Functional Skills Level 1 MATHEMATICS

Paper 2 Calculator

Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:
- a calculator
- mathematical instruments.

For Examiner's Use	
Question	Mark
1–7	
8	
9	
10	
11	
TOTAL	

Instructions
- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.
- State the units of your answer where appropriate.

Information
- The marks for questions are shown in brackets.
- The maximum mark for this paper is 60.
- You may ask for more answer paper, graph paper and tracing paper. These must be tagged securely to this answer book.

Advice

In all calculations, show clearly how you work out your answer.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Do not write outside the box

Section A

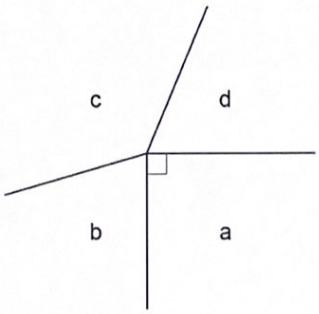
Answer **all** questions in the spaces provided.

1 Circle the **smallest** value.

[1 mark]

0.084 0.71 0.069 0.53

2 Four angles meet at a point.



Which angle is **obtuse**?

Circle your answer.

[1 mark]

a b c d

Do not write outside the box

3 Convert 3.2 litres to millilitres.

[1 mark]

3.2 × 1000 = 3200

Answer 3200 millilitres

4 A fair, ordinary dice is rolled.

Write down the probability of rolling the number 3

[1 mark]

Answer $\frac{1}{6}$

5 Here is a scale.

1 cm represents 8 km

What does a length of 2.5 cm represent?

[2 marks]

2.5 × 8 = 20 km

Answer 20 km

Do not write outside the box

6 Here are six values.

10 6 4 12 5 17

Work out the mean.

[3 marks]

$10 + 6 + 4 + 12 + 5 + 17 = 54$

$54 \div 6 = 9$

Answer 9

7 Decrease 1600 by 20%

[3 marks]

$1600 \times 0.8 = 1280$

Answer 1280

12

Do not write outside the box

Section B

Answer **all** questions in the spaces provided.

8 Holiday to Portugal

Sally is booking a family holiday to Portugal.

8 (a) The table shows the cost of flights and villa rental.

Flights	£872
Villa rental	£1980

Sally will also hire a car.

Hire cost = £130 + £35 × number of days hired

Sally has £3500 to pay for flights, villa rental and car hire.

Does she have enough to hire a car for 14 days?

You **must** show your working.

[4 marks]

3500 − 872 − 1980 = £648 available

130 + 35 × 14 = £620 cost of car hire

£620 < £648

Yes, Sally does have enough money.

Question 8 continues on the next page

Do not write outside the box

8 (b) The holiday is for 14 days.

Sally wants to have 200 euros spending money **per day**.

She already has 192 euros left from another holiday.

The exchange rate is £1 = 1.16 euros

She says,

"Changing £2200 into euros will be enough."

Is she correct?

You **must** show your working.

[3 marks]

$14 \times 200 = 2800$ euros needed

$2800 - 192 = 2608$ euros needed

$2200 \times 1.16 = 2552$ euros

$2552 < 2608$

Sally does not have enough euros.

Do not write outside the box

8 (c) The family have to travel to the UK airport at the start of the holiday.
At the end of the holiday, they have to travel from the UK airport to their home.
They can travel by taxi or drive.

Taxi	Drive
Total cost £145	The airport is 98 miles from home Petrol 15 pence per mile Parking £85

How much cheaper is it to drive than travel by taxi?

[4 marks]

One journey: $98 \times 0.15 = £14.70$.
Both ways: $14.70 \times 2 = £29.40$
Add parking: $29.40 + 85 = £114.40$

$145 - 114.40 = £30.60$

Answer £ 30.60

11

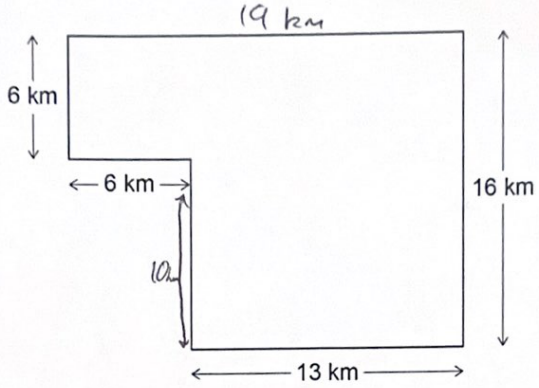
Turn over for the next question

Do not write outside the box

9 Country estate cycle ride

James is planning to cycle along the perimeter of a country estate.

9 (a) This L-shaped diagram shows his route.



Not drawn accurately

James will cycle 20 km each hour.

Show that it will take him 3.5 hours to complete the cycle ride.

[4 marks]

13+6 = 19 km 16 − 6 = 10 km

19+16+13+6+6+10 = 70 km.

70 ÷ 20 = 3.5 hours.

Do not write outside the box

9 (b) James will drive from home to the country estate.

Here is his plan for the day.

Drive to the country estate	40 minutes
Do the cycle ride	3.5 hours
Have a snack	20 minutes
Drive back home	40 minutes

He needs to be home by 4 pm

What is the **latest** time that he can leave home to go on the cycle ride?

[4 marks]

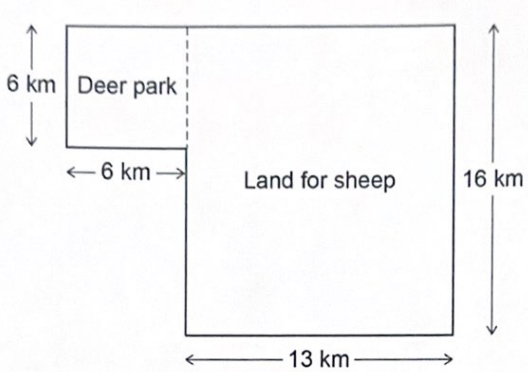
40 + 20 + 40 = 100 min
= 1h 40m
Total time = 1h 40m + 3h 30m
= 5h 10m.
5h 10m before 4pm = 10:50am

Answer 10:50am

Question 9 continues on the next page

Do not write outside the box

9 (c) The estate is made up of a deer park and some land for sheep.



James says,

"The area of the land for sheep is more than 5 times the area of the deer park."

Is he correct?

You **must** show your working.

[4 marks]

Deer park = $6 \times 6 = 36\ km^2$

Sheep = $16 \times 13 = 208\ km^2$

$36 \times 5 = 180 < 208$

James is correct.

12

Do not write outside the box

10 **Clothes company — making badges**

A clothes company makes school uniforms.

They use a machine to make badges for blazers.

The machine usually makes 5000 badges per day.

10 (a) One day, the machine makes 5000 badges.

2 of the badges are faulty.

The manager says,

"The probability that a badge is faulty is $\frac{1}{250}$"

Is he correct?

You **must** show your working.

[2 marks]

$\frac{2}{5000} = \frac{1}{2500}$ not $\frac{1}{250}$

The manager is not correct.

Question 10 continues on the next page

Do not write outside the box

10 (b) One week, the machine broke down on Wednesday.

The machine only made 1400 badges that day.

The machine still produced 25 000 badges that week.

It produced the **same** number on Thursday as on Friday.

Complete the table.

[3 marks]

Monday	Tuesday	Wednesday	Thursday	Friday	TOTAL
5000	5000	1400	6800	6800	25 000

25000 - 5000 - 5000 - 1400

= 13600

13600 ÷ 2 = 6800

6800 on Thursday and Friday

Do not write outside the box

10 (c) The table shows the costs of making 5000 badges.

Materials	17p per badge
Other costs	£265

The company wants to make **at least** 40% profit on the costs.

Work out the minimum price the company should charge per badge.

Give your answer in pence.

[6 marks]

$0.17 \times 5000 = £850$

$850 + 265 = £1115$

$1115 \times 1.4 = £1561$

$1561 \div 5000 = 0.312 = 31.2p$

32p

Answer 32p pence

11

Do not write outside the box

11 **Hotel work**

Aisha works part-time in a hotel.

11 (a) Aisha is paid an hourly rate of £8.85 for working any day from Monday to Saturday.
She is paid double this hourly rate for each hour worked on Sunday.

Aisha wants her pay to be at least £230 next week.

Here are the hours she will work from Monday to Saturday.

Monday	5 hours
Thursday	4 hours
Saturday	7 hours

Work out the minimum number of hours she needs to work on Sunday.
You **must** show your working.

[6 marks]

5+4+7=16
16 x 8.85 = £141.60
£230 - £141.60 = £88.40

£8.85 x 2 = £17.70
88.40 ÷ 17.70 = 4.99... hr

5 hours

Answer 5 hours

Do not write outside the box

11 (b) Aisha often receives tips from customers.

One month she receives £72.90 in tips.

She spends

half of the £72.90 on clothes

one fifth of the £72.90 on make-up.

She saves the rest.

Work out how much she saves.

[4 marks]

$\frac{1}{2} + \frac{1}{5} = \frac{7}{10}$

$1 - \frac{7}{10} = \frac{3}{10}$

$\frac{3}{10} \times 72.9 = £21.87$

Answer £ 21.87
