Level 1

Tuesday 26 February 2019 Morning Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:
- a calculator
- mathematical instruments
- a copy of the Data Book (Examination) (enclosed).

Instructions
- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.
- State the units of your answer where appropriate.

Information
- The marks for questions are shown in brackets.
- The maximum mark for this paper is 60.
- You may ask for more answer paper, graph paper and tracing paper. These must be tagged securely to this answer book.
- Evidence of checking is specifically assessed in Questions 1(a) and 4(c). These questions are indicated with a †.

Advice
- In all calculations, show clearly how you work out your answer.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Answer **all** questions in the spaces provided.

Do not write outside the box

1 **Caravan**

There is a **data sheet** for Caravan.

We want to buy a new caravan.

Jane and Paul

Jane and Paul decide to buy this caravan.

Caravan for sale
£16 200

†1 (a) They sell their old caravan for £4500

They will use this £4500 to pay some of the cost of the new caravan.

Work out how much **more** money they need to pay for the new caravan.

[2 marks]

£16200 − £4500 = £11700.

Check your answer.

Show how you have done your check.

[1 mark]

£11700 + £4500 = £16200.

Do not write outside the box

1 (b) Jane and Paul want to borrow money to pay some of the rest of the cost of the caravan.

A loan company offers these loans.

Amount of loan	Amount of repayment per month				
	For 12 months	For 24 months	For 36 months	For 48 months	For 60 months
£5000	£457	£248	£179	£144	£123
£10 000	£913	£497	£358	£288	£247
£15 000	£1370	£745	£537	£433	£370

They borrow £10 000 to be paid back over 48 months.

Work out the total **interest** they will pay.

[3 marks]

£288 / month × 48 months = £13 824.

£13 824 − £10000 = £3824.

1 (c) Jane and Paul pay £49 to join the Caravanners Society.

They get a discount of £9 per night at any Caravanners Society park.

Work out the smallest number of nights they must stay so that the total discount is **more than** £49

[2 marks]

$\frac{£49}{£9} = 5.\dot{4} \rightarrow 6$ nights.

Do not write outside the box

Jane and Paul book a holiday at Clover Meadow Caravan Park in Wales.

1 (d) Paul is planning their journey.

They will set off at 1.30 pm

The journey is 160 miles.

They will travel 40 miles each hour.

They will stop for a break for 45 minutes during the journey.

Paul says,

"We should be at the caravan park **before** 6 pm"

Is he correct?
You **must** show your working.

[4 marks]

$\frac{160\text{mi}}{40\text{mph}} = 4\text{ hrs}$

1:30pm + 4hrs + 45mins = 6:15pm.

No, he is incorrect.

Do not write outside the box

1 (e) Paul makes these notes about the costs of the holiday.

Petrol	Journey to Wales and back	£68
	Using the car in Wales	£35
Caravan park	Stay 7 nights	
	Pitch fee	£27 per night
	Using electricity	£2 per night
	Discount	£9 per night

Paul says,

"The total cost should be **less than** £250"

Is he correct?

You **must** show your working.

[5 marks]

£27 + £2 − £9 = £20 per night.

£20 × 7 = £140.

£140 + £68 + £35 = £243

Yes, he is correct.

17

Do not write outside the box

2 **Block paving**

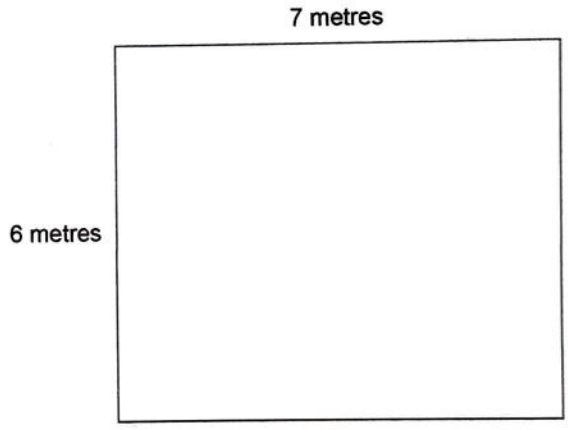

There is a **data sheet** for Block paving.

Tom's company builds driveways.

Tom

Here is a sketch of a rectangular driveway.

Not drawn accurately

Tom is going to build this driveway using block paving.

Do not write outside the box

2 (a) Tom has to remove material to make a hole for the foundation.

The depth of the foundation is 300 millimetres.

Work out the amount of material, in cubic metres, he has to remove.
Use the steps on the data sheet.

[4 marks]

$7m \times 6m = 42m^2$.

$300mm = 30cm = 0.3m$

$42m^2 \times 0.3m = 12.6m^3$

2 (b) The usual cost of stone is £80 per cubic metre.

Tom gets a discount of 10%

He orders 4 cubic metres of stone.

Work out the total amount of **discount** Tom gets.

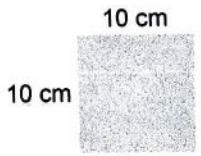

[3 marks]

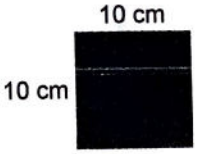

£80 × 4 = £320.

£320 × 0.1 = £32.

Do not write outside the box

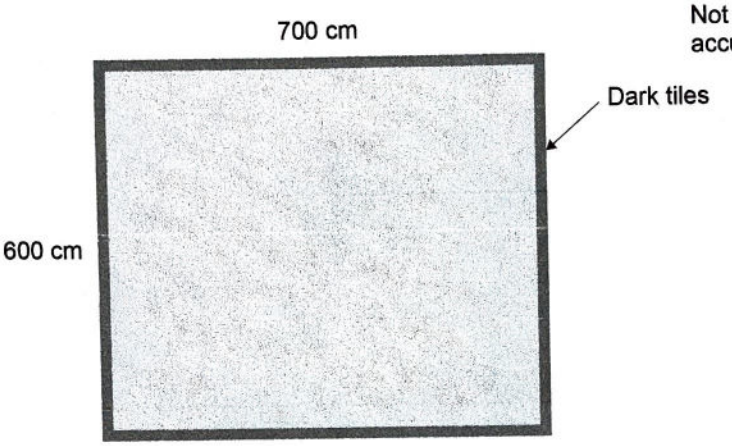

Tom is going to cover the driveway using light tiles and dark tiles.

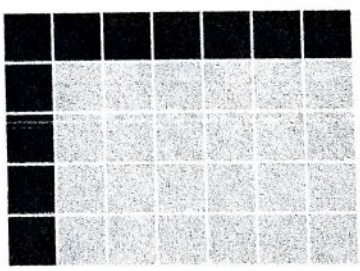

Not drawn accurately

He first puts dark tiles along the edges of the driveway.

Not drawn accurately

This diagram shows how the tiles are arranged at a corner of the driveway.

Not drawn accurately

Do not write outside the box

2 (c) Work out the total number of dark tiles needed for the edges of the driveway.

[4 marks]

700 + 600 + 700 + 600 = 2600 cm.

$\frac{2600}{10}$ = 260 tiles.

Tiles have been counted twice at the corners, so,

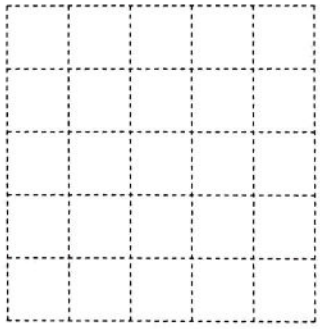

260 − 4 = 256.

2 (d) Tom is designing a pattern of square tiles for part of the driveway.
He wants to put 8 dark tiles into this grid.

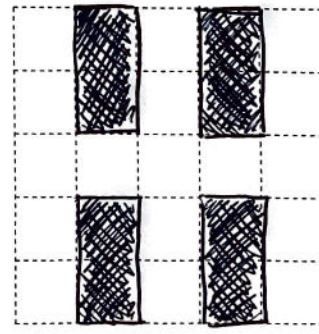

Shade 8 tiles so that the grid has exactly **two** lines of symmetry.

[2 marks]

Practise on this grid.

Put your answer on this grid.

13

Do not write outside the box

3 Flower shop

Anaya makes and sells bouquets of flowers in her flower shop.

Anaya

Bouquet of flowers

Anaya makes bouquets using roses, lilies and carnations.

The table shows the number of each type of flower in a standard bouquet.

Roses	Lilies	Carnations
4	5	11

3 (a) What percentage of the 20 flowers in a standard bouquet are lilies?
Circle your answer.

[1 mark]

4% 5% 25% 33%

Do not write outside the box

3 (b) Anaya makes some standard bouquets and 3 luxury bouquets.

She uses 24 roses with lilies and carnations to make the standard bouquets.

She sells

the 3 luxury bouquets for £35 each

all of the standard bouquets for £22 each.

Anaya says,

"I have sold these bouquets for a total of **more than** £250"

Is she correct?

You **must** show your working.

[6 marks]

$\frac{24}{4} = 6$ standard bouquets.

$(3 \times £35) + (6 \times £22) =$

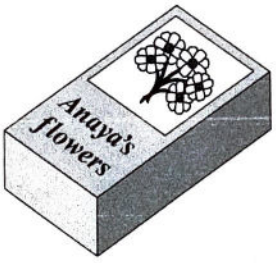

$£105 + £132 =$

$£237$

No, she is incorrect.

Do not write outside the box

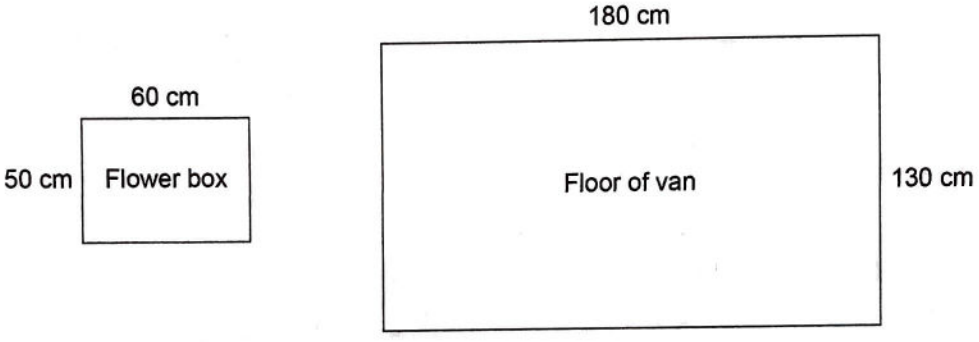

3 (c) Anaya packs the bouquets in boxes for delivery in her van.

The base of each box is a 60 cm by 50 cm rectangle.

The floor of the van is a 180 cm by 130 cm rectangle.

Not drawn accurately

Work out the maximum number of boxes that will fit on the floor of the van.

[4 marks]

$\frac{180}{60} = 3$, $\frac{130}{50} = 2.6 \Rightarrow 2$. $2 \times 3 = 6$.

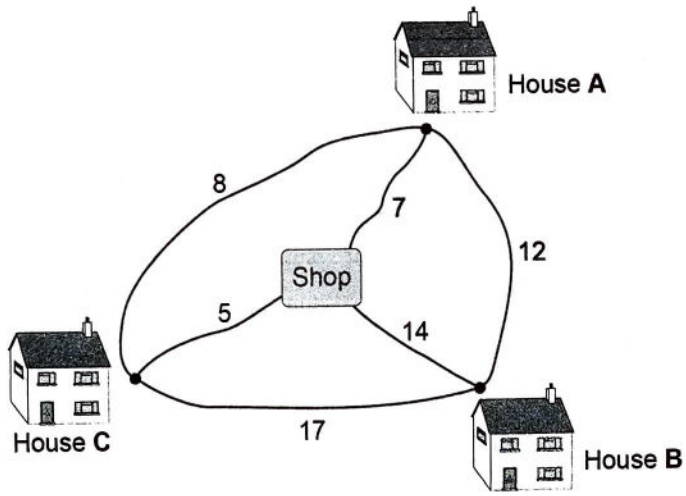

$\frac{180}{50} = 3.6 \Rightarrow 3$, $\frac{130}{60} = 2.16\dot{} \Rightarrow 2$ $3 \times 2 = 6$.

$\Rightarrow$ 6 boxes (either configuration).

Do not write outside the box

3 (d) Anaya sets off from her shop to deliver flowers to three houses, A, B and C.

This diagram shows distances in miles.

Anaya wants to

- start and finish at her shop
- visit each house once only
- take the shortest route.

Work out a possible route **and** the total distance she drives.

[5 marks]

SABCS = SCBAS = 5 + 17 + 12 + 7 = 41.

SBACS = SCABS = 5 + 8 + 12 + 14 = 39.

SACBS = SBCAS = 14 + 17 + 8 + 7 = 46.

SBACS or SCABS is the best route (these are equivalent / opposite routes), totalling 39 miles.

16

Do not write outside the box

4 Telephone operator

Lizzie is a telephone operator.

Lizzie lives in Oxford.

She works in Bicester.

Here is part of the bus timetable from Oxford to Bicester.

Oxford	0655	0720	0740	0805	0820	0825	0840
Summertown	0702	0727	0748	0812	0828	0833	0848
Gosford	0711	0736	0757	0821	0837	0842	0857
Park & Ride	0721	0746	0807	0831	0847	0852	0907
Bicester	0723	0748	0809	0833	0849	0854	0909

4 (a) How much time does the 0740 bus take to travel from Oxford to Bicester?
Circle your answer.

[1 mark]

8 minutes 28 minutes 29 minutes 60 minutes

Do not write outside the box

4 (b) To get to work, Lizzie

walks from home to the bus stop in Oxford in 12 minutes

gets the bus from Oxford to Bicester

walks from the bus stop in Bicester to work in 7 minutes.

Lizzie leaves home at 8 o'clock.

She says,

"I should get to work **before** 9 o'clock."

Is she correct?

You **must** show your working.

[5 marks]

8:00am + 12min = 8:12am.

Next bus is at 8:20am.

8:20am → 8:49am.

8:49am + 7mins = 8:56am.

Yes, she is correct.

Question 4 continues on the next page

Do not write outside the box

†4 (c) Lizzie is paid £8.64 per hour.

How much is Lizzie paid for 37 hours? **[2 marks]**

£8.64 x 37 = £319.68

Check your answer.

Show how you have done your check. **[1 mark]**

£319.68 / £8.64 = 37

Do not write outside the box

4 (d) Lizzie has this target for her calls.

> The mean time per call should be less than 8 **minutes**

Here are the times, in **seconds**, for 10 of her calls.

453 399 504 483 411 312 90 843 471 534

Has she met her target with these 10 calls?
You **must** show your working.

[5 marks]

$453 + 399 + \ldots + 471 + 534 = 4500$

$\frac{4500}{60} = 75$

$\frac{75}{10} = 7.5$ minutes.

Yes, she has met her target.
