TQUK Functional Skills Qualification in Maths at Level 2

Examination Paper (Sample Assessment Paper 1)

Please complete the details below using black or blue ink. Use BLOCK CAPITALS.

Learner Name: MASTER FUNCTIONAL SKILLS

Learner Number: MFS-TQUK-2026 *Master Functional Skills*

Date: 20 / 10 / 2026

Centre Name: MASTER FUNCTIONAL SKILLS (MFS01)

Instructions:

- Read each question **carefully**
- Answer **all** questions
- Write your answers **clearly** in the spaces provided
- **Check** your answers.

OFFICIAL MFS MODEL SOLUTION

60 / 60 Marks (100% Pass)

· Stepped Working & Mark Codes

Verified by Tutor Abdul · MFS

Information:

- This examination has **two** sections. These are clearly labelled
- You are **not allowed** to use a calculator for Section A
- You **are allowed** to use a basic calculator for Section B
- The **maximum** mark for this examination is 60
- The marks available for each question are shown in **bold** beneath each question.

Items:

- You **will need** a pen with black or blue ink, a pencil, a ruler and an eraser (for diagrams, graphs and charts only)
- You **will need** a basic calculator for Section B only
- You **will need** a compass
- You **will not** need any other stationery or equipment.

Time allowed:

30 minutes for Section A (Non-calculator)
90 minutes for Section B (Calculator)

Do not open this examination paper until you are told to do so.

For examiner use only

	Marks available	Marks awarded	Second marks
Section A	15		
Section B	45		
Total marks	60	15 45 60	15 45 60

SAMPLE

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

Section A: Non-calculator

There are **15 marks** available in this section.
You must **not** use a calculator in this section.
You will have **30 minutes** to complete this section.

1. Work out 4.002 × 3.5

Step 1: Align decimal places with padding zero:

19.657 - 5.650 = 14.007

Answer	14.007 ✓ *[1 mark]*

[1]

2. Work out 12 as a fraction of 60

Give your answer in its simplest form.

Step 1: Convert to tenths and simplify: 0.2 = 2/10 = 1/5

Answer	1/5 ✓ *[1 mark]*

[1]

3. Write 3 806 265 in words.

Answer	*Three million, eight hundred and six thousand, two hundred and sixty-five* ✓ *[1 mark]*

[1]

Questions continue on the following page

SAMPLE

4. Put these numbers in order starting with the lowest:

0.77 0.701 0.72 0.707 0.077

Show any working here:					
Answer	0.077 , 0.701 , 0.707 , 0.72 , 0.77 ✓ [1 mark]				
	Lowest	→			**Highest**

[1]

5. Alex pays £435.50 rent each month.

Next month the rent is increasing by 2%.

How much will Alex's rent be next month?

Show your working.

Step 1: Find 2% increase: 1% = £4.355 --> 2% = £8.71

Step 2: Add increase: £435.50 + £8.71 = £444.21 (or × 1.02)

Answer	£ 444.2 ✓ [2 marks]

[2]

SAMPLE

© Training Qualifications UK 2023 All Rights Reserved

6. Taylor buys a piece of wood to make a photo frame.

Taylor uses:

- $\frac{2}{3}$ of the wood for one part of the frame
- $\frac{1}{5}$ of the wood for another part.

What fraction of the wood is left over?

Step 1: Common denominator for 3 and 5 is 15:

2/3 = 10/15 and 1/5 = 3/15

Step 2: Add spent fractions: 10/15 + 3/15 = 13/15

Step 3: Subtract from 1 whole: 1 - 13/15 = 2/15

Answer	2/15 [3 marks]

[3]

SAMPLE

Questions continue on the following page

© Training Qualifications UK 2023 All Rights Reserved

7. Remy drives 154 miles.

It takes 3 hours and 30 minutes.

Remy thinks their average speed was more than 40 miles per hour.

Is Remy correct?

Show how you decide.

Step 1: Average speed = Distance ÷ Time

Speed = 154 miles ÷ 3.5 hours = 44 mph

Step 2: Compare with 40 mph speed limit:

44 mph > 40 mph. Therefore Yes, they drove faster than 40 mph.

Answer	Yes ✓ *[3 marks]*

[3]

SAMPLE

© Training Qualifications UK 2023 All Rights Reserved

8. The table shows the number of stars awarded by some friends to a video game:

Number of stars	Frequency
1 – 3	16
4 – 6	5
7 – 9	9

Work out the estimated mean number of stars awarded.

Step 1: Midpoints: 2, 5, 8. Total frequency = 16 + 5 + 9 = 30

Step 2: fx = (2 × 16) + (5 × 5) + (8 × 9) = 32 + 25 + 72 = 129

Step 3: Estimated Mean = 129 ÷ 30 = 4.3

Answer	4.3 ✓ [3 marks]

[3]

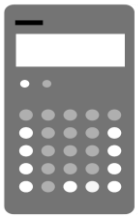

End of Section A.

SAMPLE

Section B begins on Page 7.

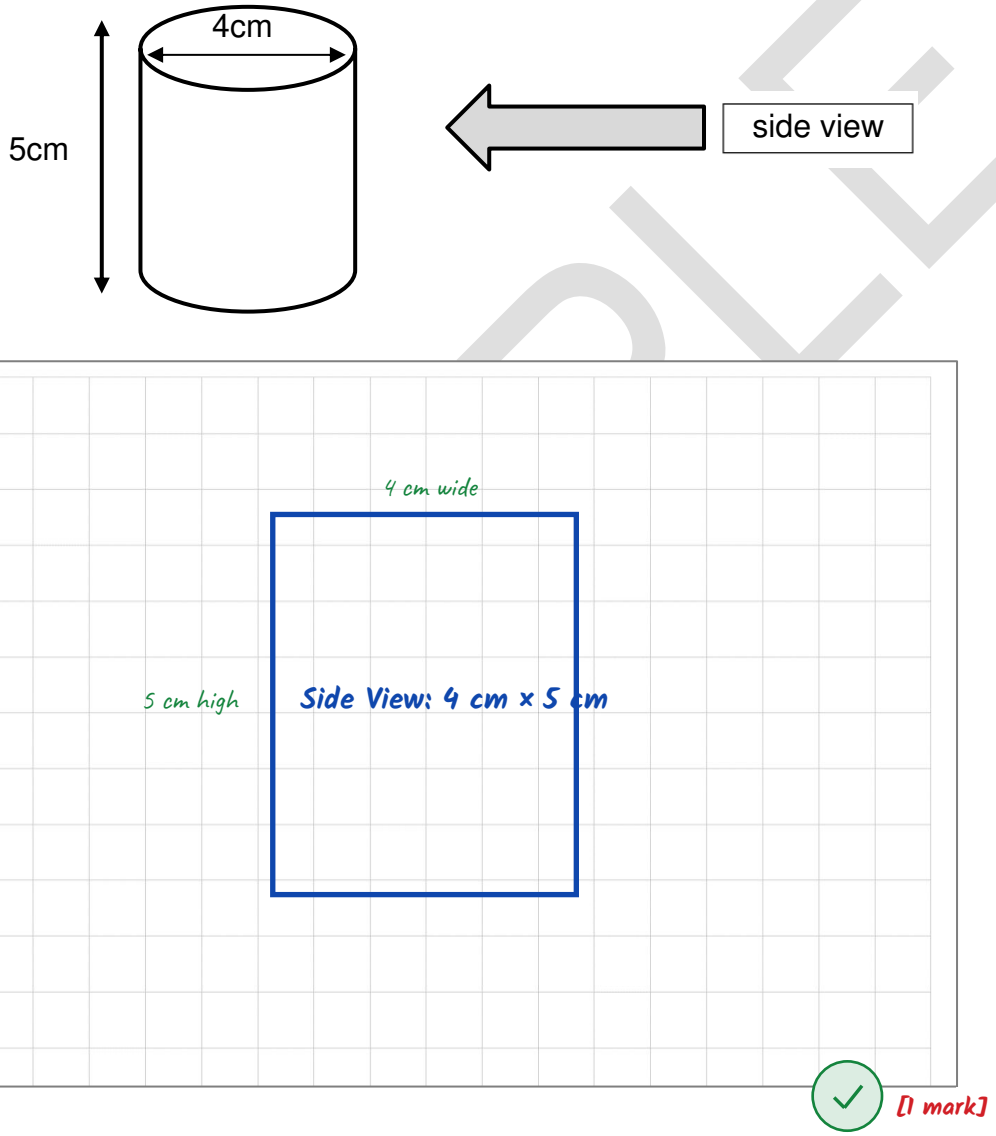

SAMPLE

Section B: Calculator

There are **45 marks** available in this section.
You **can** use a basic calculator in this section.
You will have **90 minutes** to complete this section.

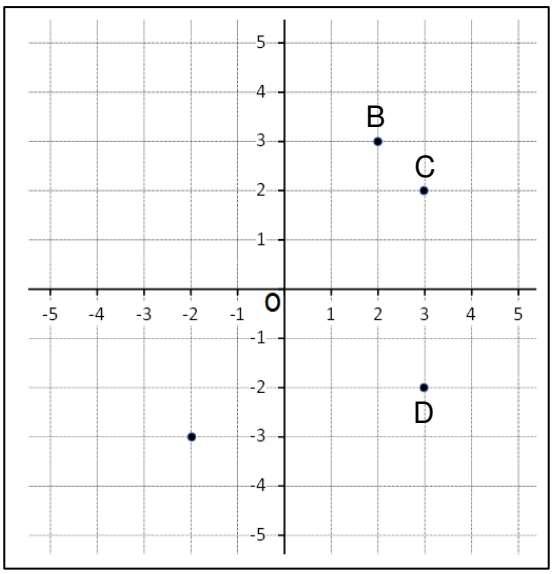

1. Draw to scale the side view of this cylinder on this cm square grid:

[1]

Questions continue on the following page

2. Which of these points has the coordinates (2, 3)?

Answer	B ✓ [1 mark]

[1]

3. Put these numbers in order starting with the lowest:

–102 498 1 200 956 1 204 812 –82 548 1 024 812

Show any working here:					
Answer	-102 498 , -82 548 , 1 024 812 , 1 200 956 , 1 204 812 ✓ [1 mark]				
	Lowest	→			**Highest**

[1]

SAMPLE

4. Calculate:

$$\frac{2.5^2 + 1.5^2}{2.5^2 - 1.5^2}$$

Step 1: Calculate: 8.5 ÷ 4 = 2.125

Answer	2.125 ✓ [2 marks]

[2]

5. The world's largest clockface is circular.

It has a radius of 21.5 m.

Calculate the circumference of the circle.

Use π = 3.14

Step 1: Circumference = 2 x pi x r = 2 x 3.14 x 21.5 m = 135.02 m

Answer	135.02 m ✓ [2 marks]

[2]

Questions continue on the following page

SAMPLE

6. A sports company sells red and blue tennis rackets.

343 980 customers bought tennis rackets last year in total.

51 597 of these customers bought red tennis rackets.

What percentage of customers bought blue tennis rackets?

Step 1: Calculate difference: 343 980 - 51 597 = 292 383

Step 2: Percentage = (292 383 ÷ 343 980) × 100% = 85%

Answer	85% ✓ [2 marks]

[2]

SAMPLE

7. Keegan wants to buy a new fridge.

They see these two offers online:

Fridge A	Fridge B
$\frac{1}{8}$ off original price	18% off original price

Both fridges have the same original price.

Keegan wants to buy the cheaper fridge.

Which fridge should Keegan buy?

Show how you decide.

Step 1: Convert Fridge B fraction to percentage: 1/8 = 12.5%

Step 2: Compare: 12.5% < 18%. Fridge B has the lower proportion.

Answer Fridge B ✓ [2 marks]

[2]

SAMPLE

Questions continue on the following page

8. An airline asked passengers to complete a questionnaire on their flight.

The results are shown below:

		Age Group		
		Under 40 years old	**40 years old and above**	**Total**
First time flying?	**No**	199 915	246 021	445 936
	Yes	23 792	23 059	46 851
		223 707	269 080	492 787

One of the passengers who completed the survey will be chosen at random to receive a prize.

Monroe writes the probability that the winner of the prize would be 40 or over and a first-time flyer in a newsletter.

What is this probability?

Give your answer as a percentage.

Step 1: Probability = 23 059 ÷ 492 787 = 0.046793...

Step 2: Convert to percentage: 0.046793... × 100% = 4.68%

Answer	4.68 ✓	%

[3 marks]

[3]

SAMPLE

9. A sales assistant has been asked to attend a meeting with their manager.

The manager sets a new target to increase the total amount of sales for this year by 12%.

The manager asks the sales assistant to **estimate** whether the new target is more than £165 000

	Quarter 1 Jan - March	Quarter 2 April - June	Quarter 3 July - Sept	Quarter 4 Oct - Dec
Amount made in sales	£23 438	£36 824	£48 506	£39 729

Is the new sales target more than £165 000?

Show how you decide.

Step 1: Round quarterly sales to nearest £1000:

Jan-Mar: £23 438 ≈ £23 000 | Apr-Jun: £36 824 ≈ £37 000

Jul-Sep: £48 506 ≈ £49 000 | Oct-Dec: £39 729 ≈ £40 000

Total estimated sales = 23 000 + 37 000 + 49 000 + 40 000 = £149 000

Step 2: Increase total by 12%:

£149 000 × 1.12 = £166 880

Step 3: Compare with new target (£165 000):

£166 880 > £165 000. Therefore target will be exceeded: Yes.

Answer	Yes ✓ [4 marks]

[4]

Questions continue on the following page

SAMPLE

10. This is a sketch of an empty cylindrical barrel.

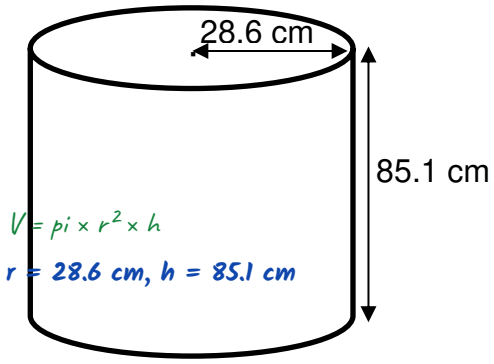

Can the barrel hold 50 gallons of liquid?

1 litre is 1000 cm^3

1 gallon is 4.5 litres.

Use π = 3.14

Show your working.

Not drawn to scale

Step 1: Volume = pi × r^2 × h = 3.14 × 28.6^2 × 85.1 = 218 570.36 cm^3

Step 2: Convert to gallons (1000 cm^3 = 1 litre, 4.5 l = 1 gal):

218.57 litres ÷ 4.5 = 48.57 gallons

Step 3: Compare: 48.6 gallons < 50 gallons. Therefore No.

Answer	No ✓ [4 marks]

[4]

SAMPLE

11. The original price of an electric bike Quinn wants to buy is £2799

There is an 8% discount for a cash payment.

Quinn's bank will loan the discounted cash price.

The loan and any interest are paid back after 2 years.

The bank charges 4% per year compound interest.

How much will Quinn pay back to the bank in total?

Show your working.

Step 1: Discount 8%: £2799 × (1 - 0.08) = £2799 × 0.92 = £2575.08

Step 2: 2 years compound interest at 4%:

Year 1: £2575.08 × 1.04 = £2678.0832

Year 2: £2678.0832 × 1.04 = £2785.2065... --> £2785.21

Answer	£ 2785.2 ✓

[4 marks]

[4]

SAMPLE

Questions continue on the following page

12. Rope A and Rope B were tested to find out which one is the stronger.

12 samples of rope A were chosen.

The greatest weight, in kg, that each sample could hold without breaking was recorded.

Here are the results:

3595	2974	3147	3311	3028	3072	Sum = 39 147 kg
3246	3072	3522	3527	3486	3167	Max = 3595, Min = 2974

Summarised below is the weight in kg that 12 different samples of Rope B were able to hold before breaking:

Mean weight held before breaking: 3172 kg

Range of weights: 213 kg

The manufacturer claims:

a. *'on average, Rope A can hold the greater weight before breaking'*
b. *'the 12 samples of Rope A were more consistent.'*

Is the manufacturer correct?

Show how you decide.

Show working here:

Step 1: Rope A Mean = 39 147 ÷ 12 = 3262.25 kg

Step 2: Rope A Range = 3595 – 2974 = 621 kg

Reason - claim a)

Claim a is correct (Yes): Rope A mean (3262 kg) > Rope B mean (3172 kg).

Reason - claim b)

Claim b is not correct (No): Rope A range (621 kg) > Rope B range (213 kg).

Rope A is less consistent in strength than Rope B.

[4 marks]

[4]

SAMPLE

13. Ali is painting a room sea green.

Sea green is made from mixing blue paint and yellow paint in the ratio 5 : 2

The area to be painted is 65.8 m^2

Both blue and yellow paint are sold in 1 litre tins.

A litre of paint covers 12 m^2

How many tins of each colour paint will Ali need to buy?

Show your working.

Step 1: Ratio Blue : Yellow = 5 : 2 --> Total = 7 parts

Step 2: 1 part = 65.8 ÷ 7 = 9.4 m^2

Blue = 5 × 9.4 = 47 m^2 | Yellow = 2 × 9.4 = 18.8 m^2

Step 3: Tins needed (12 m^2 per tin, round up):

Blue = 47 ÷ 12 = 3.916... --> 4 tins

Yellow = 18.8 ÷ 12 = 1.566... --> 2 tins

Blue paint	4 ✓	**tins**
Yellow paint	2 ✓ [5 marks]	**tins**

[5]

Questions continue on the following page

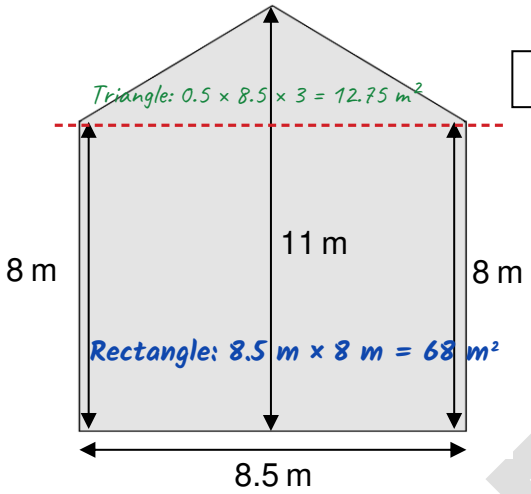

SAMPLE

14. Stevie's friend had the rectangular end of their house covered with wooden boarding.

The area covered measured 4 m by 7 m.

The builder charged £1456

Stevie wants to cover the end of their house shown below with the same wooden boarding.

Stevie estimates how much they can expect to pay.

Stevie thinks the builders will charge the same amount per square metre.

How much does Stevie estimate they can expect to pay?

Show your working.

Answer box is on the following page.

SAMPLE

Step 1: Friend's wall area = 4 m × 7 m = 28 m^2

Rate per m^2 = £1456 ÷ 28 m^2 = £52 per m^2

Step 2: Stevie's wall area = Rectangle + Triangle:

Rectangle = 8.5 m × 8 m = 68 m^2

Triangle = 0.5 × 8.5 m × (11 − 8) m = 0.5 × 8.5 × 3 = 12.75 m^2

Total wall area = 68 + 12.75 = 80.75 m^2

Step 3: Total estimated cost = 80.75 m^2 × £52/m^2 = £4199

Answer	£ 4199 ✓

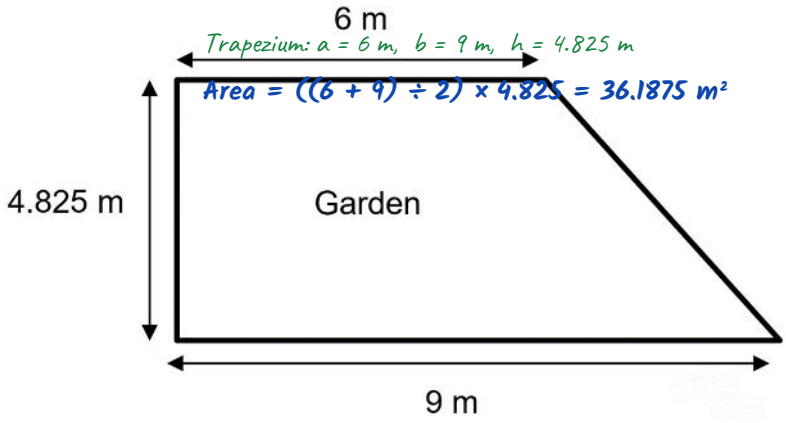

[5 marks]

[5]

SAMPLE

Questions continue on the following page

15. Jesse is thinking about covering their garden with artificial grass.

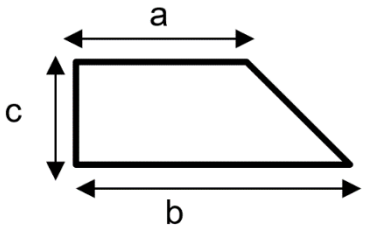

Jesse wants to determine how much it will cost.

Jesse uses this information to work out the area of the garden:

Area of garden = $\frac{(a+b)c}{2}$

Where:

Jesse searches online to find out the cost of the artificial grass per metre squared.

The results are shown in this table:

Option	Cost per metre squared
1	£14.99
2	£24.99
3	£19.99
4	£10.75
5	£17.00
6	£19.99
7	£15.50
8	£16.95
9	£19.99
10	£15.75
11	£10.95
12	£19.99

<-- Mode = £19.99
(most frequent, 4 times)

This question continues on the following page

SAMPLE

Jesse uses the modal cost to determine how much it will cost to cover the garden with artificial grass.

Jesse thinks it will cost over £800

Is Jesse correct?

Show how you decide.

Step 1: Garden area (Trapezium formula):

Area = ((a + b) ÷ 2) × h = ((6 + 9) ÷ 2) × 4.825 = 7.5 × 4.825 = 36.1875 m²

Step 2: Modal cost of grass from table:

£19.99 occurs most frequently (4 times) --> Mode = £19.99 per m²

Step 3: Total cost = 36.1875 m² × £19.99 = £723.388... --> £723.39

Step 4: Compare with budget of £800:

£723.39 < £800. Jesse thinks it will cost over £800.

Therefore Jesse is not correct: No.

Answer	No ✓ [5 marks]
