TOTAL	

Materials

For this paper you must have:
- a calculator
- mathematical instruments
- a copy of the Data Book (Examination) (enclosed).

Instructions
- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.
- State the units of your answer where appropriate.

Information
- The marks for questions are shown in brackets.
- The maximum mark for this paper is 60.
- You may ask for more answer paper, graph paper and tracing paper. These must be tagged securely to this answer book.
- Evidence of checking is specifically assessed in Questions 3(c) and 4(b). These questions are indicated with a †.

Advice
- In all calculations, show clearly how you work out your answer.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

MFS Step 1: Accredited AQA Method & Mark Scheme [M1 A1] Verified by Tutor Abdul [100% PASS]

There are no questions printed on this page

DO NOT WRITE ON THIS PAGE
ANSWER IN THE SPACES PROVIDED

IB/M/Nov17/4368

Answer **all** questions in the spaces provided.

1 **Pets Corner**

There is a **data sheet** for Pets Corner.

1 (a)

I am going to Pets Corner by train and bus.

Amy

Amy catches a train at 1.35 pm from Durham Station.
The train takes 16 minutes to travel to Central Station.
Amy then catches the next number 38 bus.
What time should this bus arrive at Corner House?

[2 marks]

1:35pm +16mins → 1:51pm

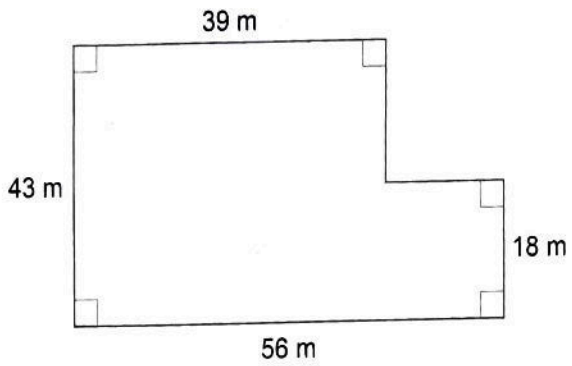

Catches the 2:01pm bus.

2:01pm + 20mins → 2:21pm.

Question 1 continues on the next page

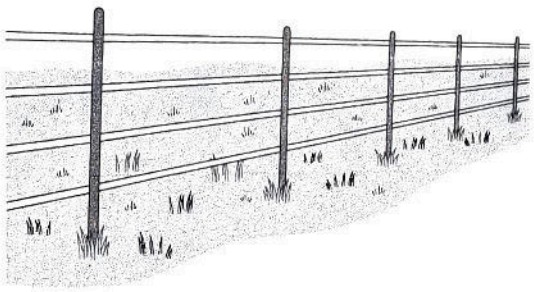

Joe is making an enclosure for alpacas.

Here is a sketch of the fence for the enclosure.

Not drawn accurately

1 (b) The fence has 4 rows of electric tape.

Electric tape is sold in rolls.
Each roll has 150 m of tape.

Joe says,

"I need to buy five rolls."

Is he correct?
You **must** show your working.

[5 marks]

39m + 43 + 56 + 18 + 25 + 17 = 198m.

198m [redacted] × 4 = [redacted]. 792m.

$\frac{792}{150} = 5.28$, he is incorrect -

he will need 6 rolls.

1 (c) 1 acre = 4840 square yards

Joe says,

"The enclosure will be big enough to keep three alpacas."

Is he correct?

You **must** show your working.

[6 marks]

Area = $(34 \times 43) + (18 \times (56 - 34))$

$= 1983 m^2$.

$1983 \times 1.196 = 2371.668$ sq yd.

Half an acre = $\frac{4840}{2} = 2420$ sq yds.

$2371.7 < 2420$,

So, he is incorrect.

13

MFS Step 5: Accredited AQA Method & Mark Scheme [M1 A1] Verified by Tutor Abdul [100% PASS]
outside the box

2 Supermarket

Raj is the manager of a supermarket.

2 (a) Workers in the supermarket work in shifts.

Each day there are shifts in the morning, the afternoon and the evening.
Each person can work a maximum of two shifts each day.

Raj needs Amy, Ben, Cathy, David and Eva to work the following shifts next week.

Monday	1 worker for the evening shift
Tuesday	1 worker for the evening shift
Wednesday	1 worker for the evening shift
Thursday	2 workers for each of the three shifts
Friday	2 workers for each of the three shifts
Saturday	2 workers for each of the three shifts
Sunday	1 worker for the afternoon shift

This table shows when Amy, Ben, Cathy, David and Eva can work next week.

Amy	can only work evening shifts
Ben	can only work on Thursday, Friday and Saturday
Cathy	**cannot** work on Monday or Friday
David	can only work on Friday and Saturday
Eva	can only work on Thursday and Friday

Work out a possible rota for Amy, Ben, Cathy, David and Eva for next week.
Show your rota on the opposite page.

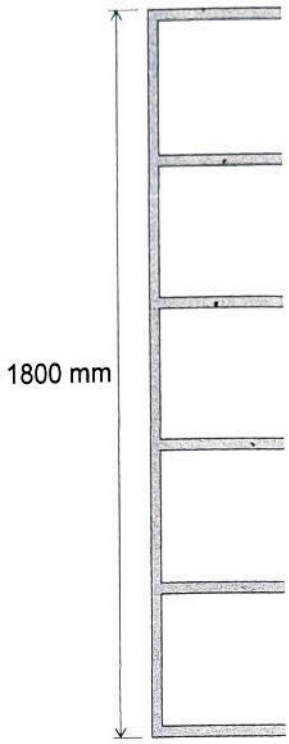

[3 marks]

Show your rota in the space below.

Mon	Evening	Amy
Tues	Evening	Amy
Weds	Evening	Amy
Thu	Morning	Cathy + Ben
	Afternoon	Cathy + Ben
	Evening	Amy + Eva
Fri	Morning	Ben + Eva
	Afternoon	Ben + David
	Evening	David + Amy
Sat	Morning	David + Cathy
	Afternoon	Ben + David
	Evening	Ben + Amy
Sun	Afternoon	Cathy

Question 2 continues on the next page

2 (b) Here is a set of shelves in the supermarket.

Not drawn accurately

Each of the **six** shelves is 20 mm thick.
Each gap between the shelves is the same.

A bottle of lemonade is 320 mm high.

Will the bottle fit on the bottom shelf?
You **must** show your working.

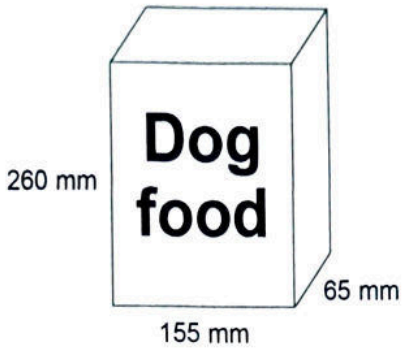

[4 marks]

$1800\text{mm} - (20 \times 6)\text{mm} = 1680\text{mm}$

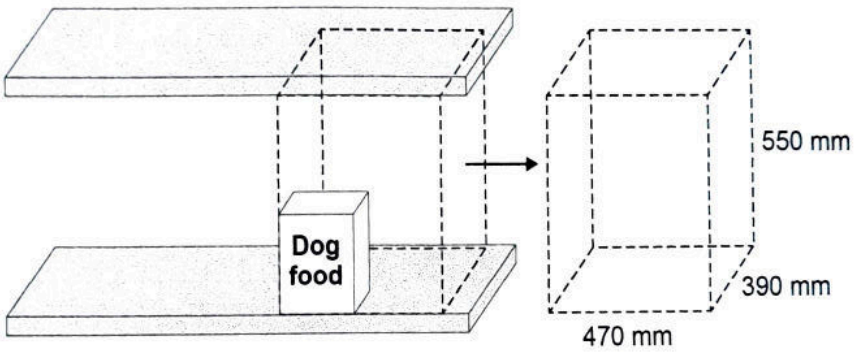

$\frac{1680\text{mm}}{5} = 336\text{mm}.$

Yes, it will fit.

2 (c) Raj puts these boxes of dog food on another set of shelves.

He stacks the boxes in the space within the dotted lines shown on this diagram.

The space is shaped like a cuboid with

height 550 mm
width 470 mm
depth 390 mm

Work out the maximum number of boxes of dog food that can fit in the space.
You **must** show your working.

[4 marks]

$\frac{550}{260} = 2.11 \rightarrow 2$, $\frac{390}{65} = 6$, $\frac{470}{155} = 3.03 \rightarrow 3$.

$2 \times 6 \times 3 = 36$.

MFS Step 9: Accredited AQA Method & Mark Scheme Verified by Tutor Abdul [M1 A1] [100% PASS]

2 (d) Raj buys and sells plastic carrier bags.

He pays £11.41 per 1000 bags.
He uses this to work out the cost per bag.
He sells the bags for 5p each.

He gives 80% of the **profit** on each bag to a local charity.
One month he sold 384 carrier bags.

How much did Raj give to the charity for that month?

[5 marks]

$\frac{11.41}{1000} = £0.01141 \Rightarrow 1.141p$ per bag.

$5p - 1.141p = 3.859p$ profit per bag

$£0.03859 \times 384 = £14.81856$

$0.8 \times £14.81856 = £11.854848$

$\approx £11.85$.

16

3 Water

There is a **data sheet** for Water.

3 (a) Mia uses her dishwasher 15 times.

Circle the amount of water this uses.

[1 mark]

45 litres | 57 litres | 225 litres | 675 litres

3 (b) Liam normally uses 1200 litres of water each week.
One week he decides to save water.

Normally, he has 3 baths each week.
He decides to have 3 showers instead.

He puts a brick in the toilet cistern.
This saves 1.5 litres of water each flush.
He flushes the toilet 30 times that week.

He says,

"This saved $\frac{1}{6}$ of the total amount of water I normally use each week."

Is he correct?
You **must** show your working.

[7 marks]

Bath: $3 \times 77 = 231L$

Shower: $3 \times \frac{216}{6} = 108L$

Toilet: $\frac{30}{32} \times 288 = 270L$.

$1.5L \times 30 = 45L$ saved.

$270 - 45 = 225L$

$231 - 108 = 123L$ saved by showering

$123 + 45 = 168L$ saved.

$\frac{168}{1200} = 0.14$. $\frac{1}{6} = 0.16$, So he is incorrect.

Ella, Seema and Jane are going to share a house for the whole of 2018

Ella Seema Jane

The house does **not** have a water meter.
Altogether they will use 450 **litres** of water per day.

†3 (c) How many **cubic metres** of water will the three girls use in the whole of 2018? **[2 marks]**

$450 \times 365 =$ ~~[illegible]~~ 164250 L per year.

$\frac{164250}{1000} = 164.25\ m^3$ per year.

Check your answer.
Show how you have done your check. **[1 mark]**

$164.25 \times 1000 = 164250$

$\frac{164250}{365} = 450\ L.$

box

3 (d) Here are the ways they can pay their water charges for the **year**.

With a water meter	**Without a water meter**
£134 plus £2.96 per cubic metre of water used	12 fixed monthly payments of £53.50

The girls want the cheapest way to pay for the water they will use.

Should they have a water meter fitted?
You **must** show your working.

[5 marks]

w/ WM: £134 + (£2.96 × 164.25)

= £620.18

w/o WM: £53.50 × 12

= £642

They should fit the water meter.

16

4 Swimming

4 (a) One event in a swimming competition is the men's 100 metres freestyle.

Here are the times from the two semi-finals.

Semi-Final 1	
Name	**Time (seconds)**
Ralf	53.37
Simon	53.49
Harry	53.70
Cheng	52.97
Ahmed	52.92
Ian	53.26
Mike	53.28
Jack	52.83

Semi-Final 2	
Name	**Time (seconds)**
Tom	53.23
Zain	53.14
Paul	52.93
Kev	52.88
Dai	53.20
Greg	53.66
Yan	53.28
Louis	53.57

The eight fastest swimmers from the semi-finals go into the final.

Each swimmer in the final is given a lane number.

The table below shows how the lane numbers are decided.

Time in semi-finals	Lane number
1st fastest	4
2nd fastest	5
3rd fastest	3
4th fastest	6
5th fastest	2
6th fastest	7
7th fastest	1
8th fastest	8

Complete the table for the final. **[4 marks]**

Lane number	Name
1	Dai
2	Cheng
3	Ahmed
4	Jack
5	Kev
6	Paul
7	Zain
8	Tom.

†4 (b) The winning time in the final is 52.28 seconds.
The competition record is 51.91 seconds.
How much slower is the winning time than the record time? **[1 mark]**

52.28 − 51.91 = 0.37s.

Check your answer.
Show how you have done your check. **[1 mark]**

51.91 + 0.37 = 52.28.

4 (c) Beth and Daisy are members of a swimming club.
They both swim in 100 metres backstroke races.

Here are their times, in seconds, for their races in 2017

Beth

65.7 66.6 67.4 63.6 65.2 64.8 66.5 64.9 68.5 66.8

Daisy

62.5 63.2 67.4 62.6 64.2 66.2 64.8 65.9

For the next race the club wants to choose the better swimmer.

Use the data to decide which swimmer the club should choose.
You **must** show your working.

[4 marks]

Beth: $65.7 + 66.6 + \ldots + 68.5 + 66.8 = 660$

Daisy: $62.5 + 68.2 + \ldots + 64.8 + 65.9 = 516.8$

$\frac{660}{10} = 66$, $\frac{516.8}{8} = 64.6$.

They should ~~~~ choose Daisy.

4 (d) Erin is the manager of a junior swimming team.

I need to buy swimming kit for six swimmers.
I also need to hire a minibus.

Erin

She sees these adverts

Swimming kit	
Swimsuit	£46.95
Swim cap	£6.50
Tracksuit	£62.95
15% off orders over £500	

Minibus Hire
£370

Erin wants to buy each of the six swimmers a swimsuit, swim cap and tracksuit.
Show that it will cost **less than** £1000 for the kit and minibus.

[5 marks]

46.95 + 6.50 + 62.95 = £116.40

116.4 × 6 = £698.40. 1 − 0.15 = 0.85

698.4 × 0.85 = £593.64

593.64 + 370 = £963.64

She is correct, it will cost less than £1000.
