NCFE Level 1 Functional Skills Qualification in Mathematics (603/5055/6)

Paper number:	P001255
Section B:	Calculator Test

Time allowed: 1 hour 30 minutes

Learner instructions

- Answer **all** questions.
- Read each question carefully.
- Write your answers in the spaces provided.
- Show your working, as marks may be awarded for working.
- State units in your answers, where appropriate.
- Check your work.

Learner information

- Section B contains **Activities 2, 3** and **4**.
- The maximum mark for this section is **45**.
- The marks available for **each** question are shown in brackets.

Resources

You will need a:

- pen, with black or blue ink
- pencil and eraser
- 30 cm ruler
- protractor
- calculator.

If extra pages are used, please make sure your name and centre name are on them and they are securely fastened to this booklet.

Please complete the details below clearly and in BLOCK CAPITALS.

Learner name MASTER FUNCTIONAL SKILLS

Centre name MASTER FUNCTIONAL SKILLS (MFS01)

Learner number MFS-NCFE-2026 Centre number MFS01

Do not turn over until the invigilator tells you to do so.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

MFS Step 1: Accredited NCFE Method & Mark Scheme Verified by Tutor Abdul [M1 A1] [100% PASS]

Activity 2: Hens and eggs

2 (a) Sadie wants to keep hens in her garden.

She finds this information about some different types of hens.

Type of hen	Numbers of eggs per year
Buff Orpington	280
Rhode Island Red	260
Leghorn	270
Plymouth Rock	120
Speckled Sussex	250

Calculate the range in the numbers of eggs per year.

[1 mark]

$280 - 120 = 160$

Your answer: 160

ner use only

Examiner use only

Pas

2 (b) Sadie sees these hen houses.

The Majestic

£605

30% discount

The Classic

£636

$\frac{1}{3}$ discount

Which hen house will be cheaper after the discount?

Show how you decide.

[4 marks]

The majestic:

$605 \div 100 \times 70 = £423.50$

The classic:

$636 \div 3 \times 2 = £424$

The majestic will be cheaper

Your answer: The majestic

MasterFunctionalSkills.co.uk · NCFE Maths Level 1 · February 2020 Section B Solutions
Pas
MFS Step 3: Accredited NCFE Method & Mark Scheme Verified by Tutor Abdul [M1 A1] [100% PASS]

2 (c) Sadie wants to put fencing around an area of grass where the hens can run about safely.

She has 22 m of fencing.

She reads that the minimum area for each hen to run about safely is 1.5 m^2

Sadie decides to make a square area of grass.

What is the greatest number of hens she could keep?

[4 marks]

$22 \div 4 = 5.5$ m per side of square

Area $= 5.5 \times 5.5 = 30.25\ m^2$

$30.25 \div 1.5 = 20.166\ldots$

So she can keep 20 hens

Your answer: 20 **hens**

ner use only

Examiner use only

MFS Step 4: Accredited NCFE Method & Mark Scheme Verified by Tutor Abdul [M1 A1] [100% PASS]

2 (d) Sadie buys 10 hens.

She reads that, if the mean number of eggs per hen per year is 250 or more, then the hens are happy and healthy.

Sadie records how many eggs her 10 hens lay in the first 6 weeks.

The table shows her results:

Week 1	Week 2	Week 3	Week 4	Week 5	Week 6
46	48	55	43	52	53

Using these figures, Sadie thinks that her hens are happy and healthy.

Is Sadie correct?

Show how you decide.

[4 marks]

Mean per week $= \frac{46+48+55+43+52+53}{6}$

$= 49.5$

Mean per week per hen $= 49.5 \div 10$

$= 4.95$

Mean per year per hen $= 4.95 \times 52$

$= 257.4$

So yes, Sadie is correct

Your answer: Yes.

MasterFunctionalSkills.co.uk · NCFE Maths Level 1 · February 2020 Section B Solutions
MFS Step S: Accredited NCFE Method & Mark Scheme Verified by Tutor Abdul [MI A1] [100% PASS]

2 (e) In a recent report, it was estimated that 750 000 people keep hens.

Write 750 000 in words.

[1 mark]

Your answer: Seven hundred and fifty thousand

2 (f) 53% of the eggs produced in the UK in 2018 were free range.

Write 53% as a fraction.

[1 mark]

Your answer: $\frac{53}{100}$

[Total marks: 15]

Pas

Examiner use only

Activity 3: Decorating

3 (a) Chester is decorating some of the rooms in his house.

He needs to know the area of a window.

The window measures 3 m wide and 1.75 m high.

Round 1.75 to the nearest whole number and use this value to estimate the answer to 3 × 1.75

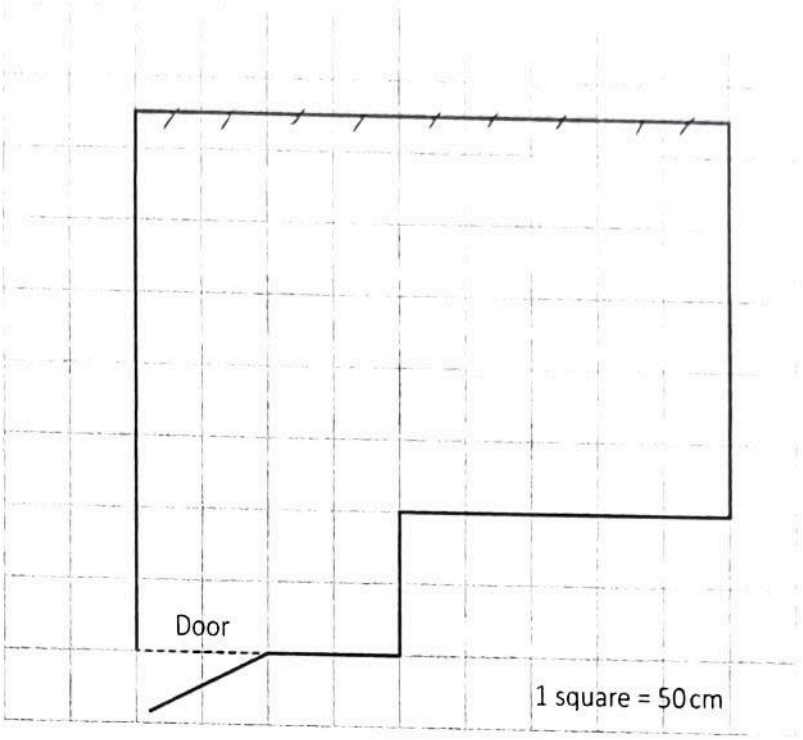

[1 mark]

$3 \times 2 = 6$

Your answer: 6

Pas

3 (b) Chester makes this scale plan of one of the rooms.

What is the actual length of the longest wall in m?

[2 marks]

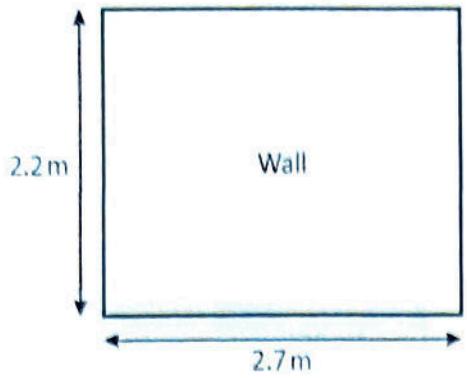

$9 \times 50 = 450$ cm

$450 \div 100 = 4.5$ m

Your answer: 4.5 m

Examiner use only

3 (c) In a different room, one of the walls is 2.7 m long and 2.2 m high.

Not drawn accurately

Chester wants to put wallpaper on this wall.

He uses wallpaper that is 0.5 m wide and 12.1 m long.

Chester will hang the wallpaper vertically with no overlaps.
Each piece will go from ceiling to floor with no joins.

How many rolls of wallpaper will Chester need to buy?

You **must** show your working.

[3 marks]

$2.7 \div 0.5 = 5.4$

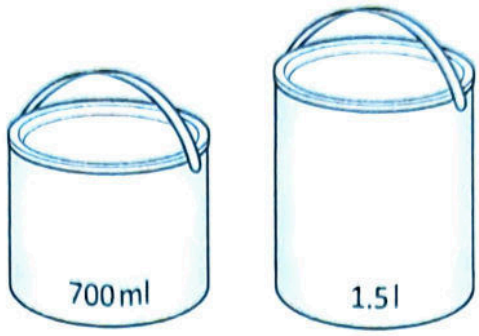

$12.1 \div 2.2 = 5.5$

So Chester will need 2 rolls.

Your answer: 2 **rolls**

3 (d) Chester will paint the other walls and the ceiling.

He finds the colour he likes in two different sizes.

£10.15 **£21.21**

Chester thinks the larger tin is better value for money.

Is Chester correct?

Show how you decide.

[3 marks]

700 ml = 0.7 L

10.15 ÷ 0.7 = £14.50

21.21 ÷ 1.5 = £14.14

Yes, he is correct.

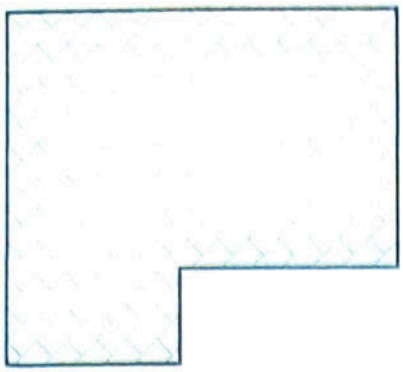

Your answer: Yes.

Pas

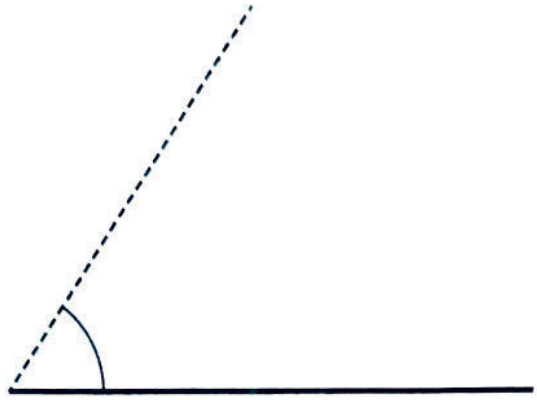

Examiner use only

3 (e) Chester is going to lay tiles on the floor.

He wants to lay them at an angle.

He marks the angles on the tile before he cuts it, as shown below.

What is the angle he has marked?

[1 mark]

Your answer: 55 °

MasterFunctionalSkills.co.uk · NCFE Maths Level 1 · February 2020 Section B Solutions
Pas
MFS Step II: Accredited NCFE Method & Mark Scheme Verified by Tutor Abdul [MI A1] [100% PASS]

3 (f) Chester needs 240 tiles.

He buys 10% more tiles in case some of the tiles break.

He cuts $\frac{3}{8}$ of the tiles he buys.

How many tiles does he cut?

[3 marks]

10% increase = 1.1

240 × 1.1 = 264

264 ÷ 8 × 3 = 99 tiles

Your answer: 99 **tiles**

iner use only

Examiner use only

Pas

3 (g) Chester buys a pack of sandpaper sheets with a mixture of grades.

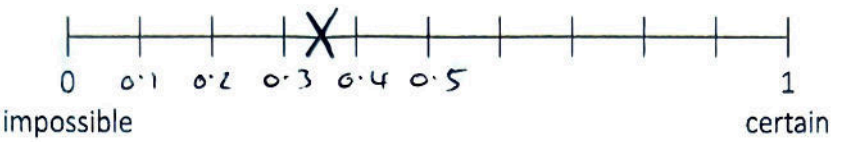

The pack contains 12 coarse grade, seven medium grade and one fine grade sheets.

Chester takes one sheet out at random.

What is the probability that the sheet Chester picks is medium grade?

Mark the probability on the scale below.

[2 marks]

$$\frac{7}{12+7+1} = \frac{7}{20} = 0.35$$

[Total marks: 15]

Activity 4: Football

4 (a) Every year, Shaz arranges a football tournament to raise money for charity.

Last year she raised £175

This year her target is to raise 25% more than last year.

What is £175 increased by 25%?

[2 marks]

175 × 1·25 = £218·75

Your answer: £218·75

iner use only

Examiner use only
Pas

4 (b) Shaz will share the money she raises between three charities.

She gives a local hospice $\frac{2}{5}$ of the money.

She gives Save the Children $\frac{1}{4}$ of the money.

She gives Age Concern $\frac{7}{20}$ of the money.

Which charity will get the most money?

Show how you decide.

[2 marks]

$\frac{2}{5} = 0.40$

$\frac{1}{4} = 0.25$

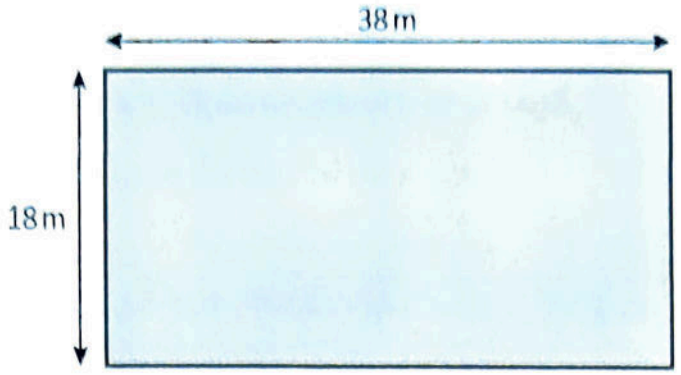

$\frac{7}{20} = 0.35$

local hospice will get the most money

Your answer: local hospice.

MFS Step IS: Accredited NCFE Method & Mark Scheme Verified by Tutor Abdul [M1 A1] [100% PASS]

4 (c) Before the first match starts, the perimeter of the football pitch needs to be marked out.

Not drawn accurately

Calculate the perimeter of the pitch.

[1 mark]

$18 + 18 + 38 + 38 = 112$ m

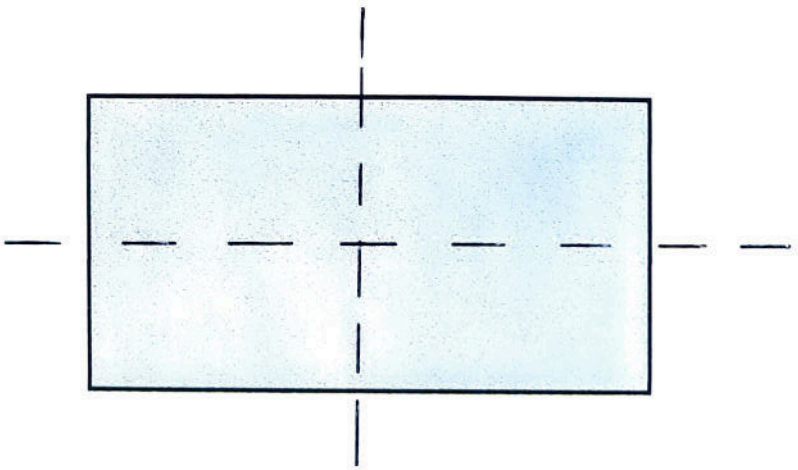

Your answer: 112 m

4 (d) Shaz needs to mark out the centre spot of the rectangular football pitch.

She uses the lines of symmetry and marks where they meet.

Draw the lines of symmetry on the diagram below.

[1 mark]

Examiner use only

4 (e) There will be six matches in total.

Each match lasts 20 minutes.

There is a five minute gap between each match.

Shaz wants to have the last match finish at 14:10

What time should she start the first match?

[3 marks]

$6 \times 20 = 120$ minutes

$5 \times 5 = 25$ minutes

Total $= 120 + 25 =$ 145 minutes

$=$ 2 hours 25 minutes

$\rightarrow$ 11:45

Your answer: 11:45

MasterFunctionalSkills.co.uk · NCFE Maths Level 1 · February 2020 Section B Solutions
Pas
MFS Step 17: Accredited NCFE Method & Mark Scheme Verified by Tutor Abdul [MI AI] [100% PASS]

4 (f) These are the scores of the football matches:

Match	Team	Score		Team
1	A	4	5	B
2	C	3	0	D
3	A	4	4	C
4	D	7	8	B
5	A	0	2	D
6	C	3	1	B

Teams get:

- 2 points if they win
- 1 point each if they draw (when both teams score the same)
- 0 points if they lose.

Complete the table below. **[2 marks]**

Position	Team	Points
1st	C	5
2nd	B	4
3rd	D	2
4th	A	1

Examiner use only

4 (g) Shaz buys drinks for the players and spectators.

Each of the four teams will have six players.

She estimates there will be 50 spectators in total.

Shaz allows 1.2 litres of drink per player and 300 ml of drink per spectator.

The drink is sold in 2.5 litre bottles.

How many bottles will Shaz need to buy?

[4 marks]

300 ml = 0·3 litres

4 × 6 = 24 players

[redacted]

24 × 1·2 = 28·8 litres for players

50 × 0·3 = 15 litres for spectators

28·8 + 15 = 43·8 litres total

43·8 ÷ 2·5 = 17·52

So she will need to buy 18 bottles

Your answer: 18 **bottles**

[Total marks: 15]

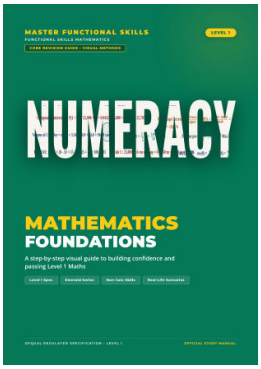

This is the end of the assessment.
