MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

er use only

Activity 1: Motorcycle racing

1 (a) Damon is a motorcycle racer.
He takes part in two races over a weekend.

4650 spectators watched the race on Saturday.
This number increased by 2% on Sunday.

Increase 4650 by 2%

[2 marks]

multiplier 1.02

4650 x 1.02 = 4743

```
  4650.00
x    1.02
-------
  93'00
+4650.00
-------
 4743.00
```

Your answer:	4743

Examiner use only

1 (b) In the race on Saturday each lap was 2.678 miles long.
1 km = 0.6214 miles

Round **each** of these two figures to 1 decimal place.

Use these values to estimate the length of the lap in km

[3 marks]

$2.678 \approx 2.7$ to 1 decimal place

$0.6214 \approx 0.6$ to 1 decimal place

$\frac{2.7}{0.6} = 4.5\text{km}$

~~0.6 2.7~~

0.6	1
1.2	2
1.8	3
2.4	4
+0.3	½

Your answer: 4.5 km

examiner use only

1 (c) Damon and Ralphie each complete 7 laps in the race on Sunday.

The median lap time for Damon is 1 minute and 17.924 seconds.
This is shown as 1:17.924

The range of the lap times for Damon is 4.812 seconds.

The table below shows the lap times for Ralphie.

Lap	1	2	3	4	5	6	7
Time (minutes: seconds)	1:21.467	1:19.148	1:17.986	1:16.008	1:16.810	1:17.841	1:18.462

Calculate the median **and** the range of times for Ralphie.
Use these values to make **two** comparisons between the two racers.

[4 marks]

1:16.008, 1:16.810, 1:17.841, 1:17.986, 1:18.462,
1:19.148, 1:21.467

median

Range = biggest - smallest
= 21.467 - 16.008
= 5.459

$$\begin{array}{r} {}^{1}\not{2}\,{}^{5}\not{1}.4\not{6}{}^{1}7 \\ -\,16.008 \\ \hline 05.459 \end{array}$$

Your answer:

Median = 1:17.986

Range = 5.459

Damon's lap times were more consistent as his range was smaller.

The median lap of Damon's race was faster than that of Ralphie's.

Please turn over

Examiner use o

1 (d) Damon drives along a straight part of the track at an average speed of 126 miles per **hour**.
He completes this in 47.5 **seconds**.

Work out the length of the straight part of the track in miles.

[3 marks]

$126 \div (60 \times 60) = 0.035$ miles per second.

3600 seconds in an hour

$$3600 \overline{)126.000} = 0.035$$

distance = speed x time

$= 0.035 \times 47.5$

$= 1.6625$ miles

Your answer: 1.6625 **miles**

miner use only

1 (e) Damon is paid by 3 companies to advertise their brands on his race suit.

$\frac{2}{3}$ of the adverts are for Company A.

$\frac{1}{7}$ of the adverts are for Company B.

The rest of the adverts are for Company C.

What fraction of the adverts are for Company C?

[2 marks]

$\frac{2}{3} + \frac{1}{7} = \frac{14}{21} + \frac{3}{21}$

$= \frac{17}{21}$

$1 - \frac{17}{21} = \frac{4}{21}$

Your answer:	$\frac{4}{21}$

Examiner use only

1 (f) 1 540 806 people followed Damon on social media last year.

This number increased by 674 957 people this year.

Work out 1 540 806 + 674 957

[1 mark]

$$\begin{array}{r} 1\,540\,806 \\ +\quad 674\,957 \\ \hline 2\,215\,763 \end{array}$$

Your answer: 2215763

[Total marks: 15]

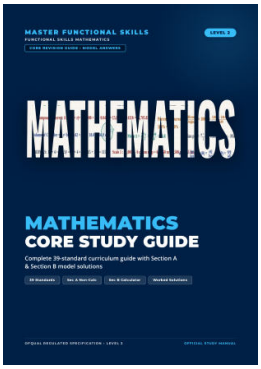

This is the end of Section A.
