NCFE Level 2 Functional Skills Qualification in Mathematics (603/5060/X)

Paper number:	P001259
Section A:	Non-calculator Test

Assessment window: Monday 9 December 2019 – Friday 13 December 2019
Time allowed: 30 minutes

Learner instructions

- Answer **all** questions.
- Read each question carefully.
- Write your answers in the spaces provided.
- Show your working, as marks may be awarded for working.
- State units in your answers, where appropriate.
- Check your work.

Learner information

- Section A contains **Activity 1** only.
- The maximum mark for this section is **15**.
- The marks available for **each** question are shown in brackets.

To be completed by the examiner		Mark
A	Activity 1	/ 15
B	Activity 2	/ 15
	Activity 3	/ 15
	Activity 4	/ 15
TOTAL MARK		/ 60

Resources

You will need a:

- pen, with black or blue ink
- pencil and eraser
- 30 cm ruler
- protractor.

If extra pages are used, please make sure your name and centre name are on them and they are securely fastened to this booklet.

Please complete the details below clearly and in BLOCK CAPITALS.

Learner name MASTER FUNCTIONAL SKILLS

Centre name MASTER FUNCTIONAL SKILLS (MFS01)

Learner number MFS-NCFE-2026 Centre number MFS01

Do not turn over until the invigilator tells you to do so.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

1 (a) Zak is a journalist.

He is writing an article about the local weather.

This table shows the highest and lowest temperatures in Zak's town for two different years. –

Year	Lowest	Highest
2014	–3.4 °C	20.3 °C
2018	–0.2 °C	23.4 °C

Which year had the greater difference between highest and lowest temperatures?

Show how you decide.

[1 mark]

20.3 − (−3.4) = 23.7

23.4 − (−0.2) = 23.6

Your answer: 2014.

1 (b) Zak works out the percentage of days last year that the temperature fell below 0 °C

His calculator gives the answer 8.219178082

Write this percentage to 2 decimal places.

[1 mark]

Your answer: 8.22 %

past paper

Examiner use only

... recorded in Zak's town this year was 32.9 °C

Zak writes the headline,

"Temperature reaches 95°F!"

A formula to convert between °C and °F is: $°C = 5 \times (°F - 32) \div 9$

Is Zak's headline correct?

Show how you decide.

[2 marks]

$$\frac{(95-32)\times 5}{9} = \frac{63\times 5}{9} = 7\times 5 = 35°C.$$

$35 > 32.9$.

Your answer: No.

past paper

iner use only

weather forecast.

This table shows the highest daily temperatures forecast for the next eight days.

Day	1	2	3	4	5	6	7	8	9	10
Temperature °C	15	19	17	15	15	20	19	16		

- The median of the **ten** temperatures is 17.5 °C and
- the **ten** temperatures have two modes.

Use this information to find the forecast temperatures for **Day 9** and **Day 10**.

[2 marks]

15 15 15 16 17 19 19 20

5th value = 17 ⇒ 6th value = 18.

15 15 15 16 17 18 19 19 20

⇒ There must be 3 19°C days

⇒ 18, 19°C.

Your answer:

Day 9: 18°C

Day 10: 19°C.

past paper

Examiner use only

how accurate the weather forecast is.

This table shows the last 6 months' forecasts for rain.

It also shows the number of days that it actually rained or stayed dry.

		Actual weather (days)	
		Rain	Dry
Forecast weather (days)	Rain	70	60
	Dry	36	16

Was the forecast more likely to be right when it was for rain or when it was for dry weather?

Explain how you decide.

[3 marks]

$\frac{70}{70+60} = \frac{70}{130} = \frac{7}{13}$ (Rain).

$\frac{16}{36+16} = \frac{16}{52} = \frac{4}{13}$ (Dry)

Rain forecast more likely to be correct.

Your answer: Rain.

Examiner use o

actual temperatures for the town over nine days.

The line represents the points at which the forecast and actual temperatures are the same.

iner use only

accurate if the actual temperature is within 2 °C of the forecast temperature.

Zak writes that,

"The temperature forecast was accurate for less than 70% of the time".

Is Zak correct?

Show how you decide.

[3 marks]

4 are at least 2°C out.

$\frac{4}{9} \Rightarrow \frac{5}{9}$ accuracy $= 55.\dot{5}\%$

$55.6\% < 70\%$

Your answer: Yes.

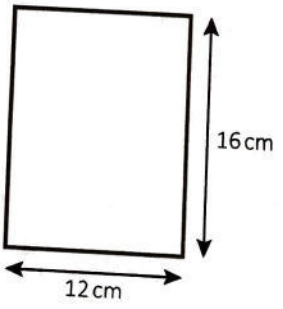

past paper

Examiner use only

(a) Zak wants to include a map in his article.
The map must be to scale.

The map shows a part of the country that is 30 km wide and 48 km long.

It must fit into a space that is no more than 12 cm wide and 16 cm long.

Not drawn accurately

The map is scaled down to fit into the space.

In the article, what distance, in km, will 1 cm on the map represent?

[3 marks]

12cm : 30km.

30km = 30000m = 3000000cm.

12 : 3 000 000

⇒ 1 : 250 000

250 000cm = 2500m = 2.5km

16cm : 48km

16 : 4800000

⇒ 1 : 300 000

300 000cm
= 3000m
= 3km.

Your answer: 3 km

[Total marks: 15]
