1 (e) Hannah wants to know how much money she might get for a toy car if she sells it on an online auction website.

She finds that the same make of toy car has been sold for different prices.

Price paid on online auction website	Number of toy cars sold
£0 - £9.99	6
£10 - £19.99	5
£20 - £29.99	6
£30 - £39.99	3

Use the data to calculate the estimated mean price paid for the toy car on the online auction website.

[3 marks]

(£5 × 6) + (£15 × 5) + (£25 × 6) + (£35 × 3)

= £30 + £75 + £150 + £105

= £360.
