14. Jordan is a builder.

The table shows the profit that Jordan made over the last 5 months after expenses:

January	February	March	April	May
£3000	£3050	£2900	£2700	£4100

In June, Jordan received £13 200 for work completed.

The ratio of profit to expenses is 1 : 3

Jordan thinks the profit received in June is more than the mean monthly profit for the first 5 months of the year.

Is Jordan correct?

Show how you decide.
