Alex receives £12.50 per hour and works 10 hours each week.

Alex wants to pay $\frac{1}{4}$ of the total amount received each week into a savings account.

How much should Alex pay into the savings account each week?

Answer	**£**

[3]

End of Section A.

SAMPLE

Section B begins on Page 6.

SAMPLE

Section B: Calculator

There are **45 marks** available in this section.
You **can** use a basic calculator in this section.
You will have **90 minutes** to complete this section.

1. Calculate 48^2

Answer	

[1]

2. How many pennies are there in £2.48?

Answer	**pennies**

[1]

SAMPLE

3. Write this fraction:

$\frac{5}{8}$

(a) as a decimal

(b) as a percentage.

Answer	**(a) Decimal:**	**(b) Percentage:**

[2]

4. These sweets are in a bag:

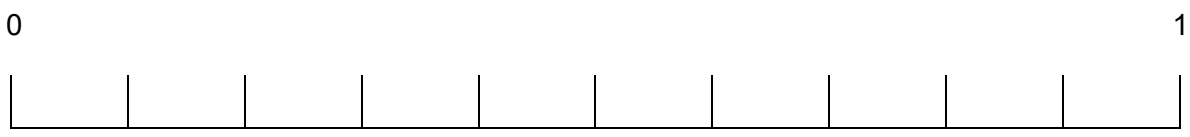

- 2 yellow sweets
- 4 orange sweets
- 9 red sweets

One sweet is chosen at random.

What is the probability that a red sweet is chosen?

Give your answer as a fraction **and** mark your probability on the scale below.

Answer	

[2]

Questions continue on the following page

SAMPLE

5. The map shows the location of three UK cities.

Charlie thinks Brighton and Sheffield are over 198 km apart in a straight line on the map.

1 cm represents 24 km

Map drawn to scale

Is Charlie correct?

Show how you decide.

Answer	

[2]

SAMPLE

6. Kai is playing a fairground game.

- The probability that Kai wins a teddy bear is $\frac{2}{5}$
- The probability that Kai wins a t-shirt is $\frac{3}{8}$

Is Kai more likely to win a teddy bear or a t-shirt?

Show how you decide.

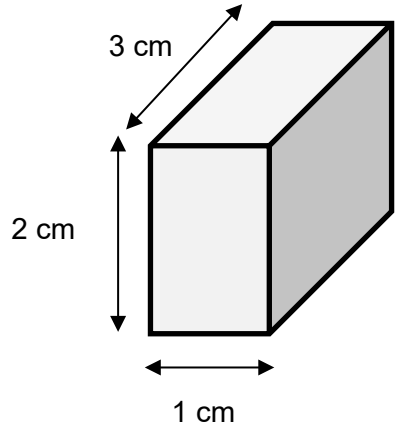

Answer	

[2]

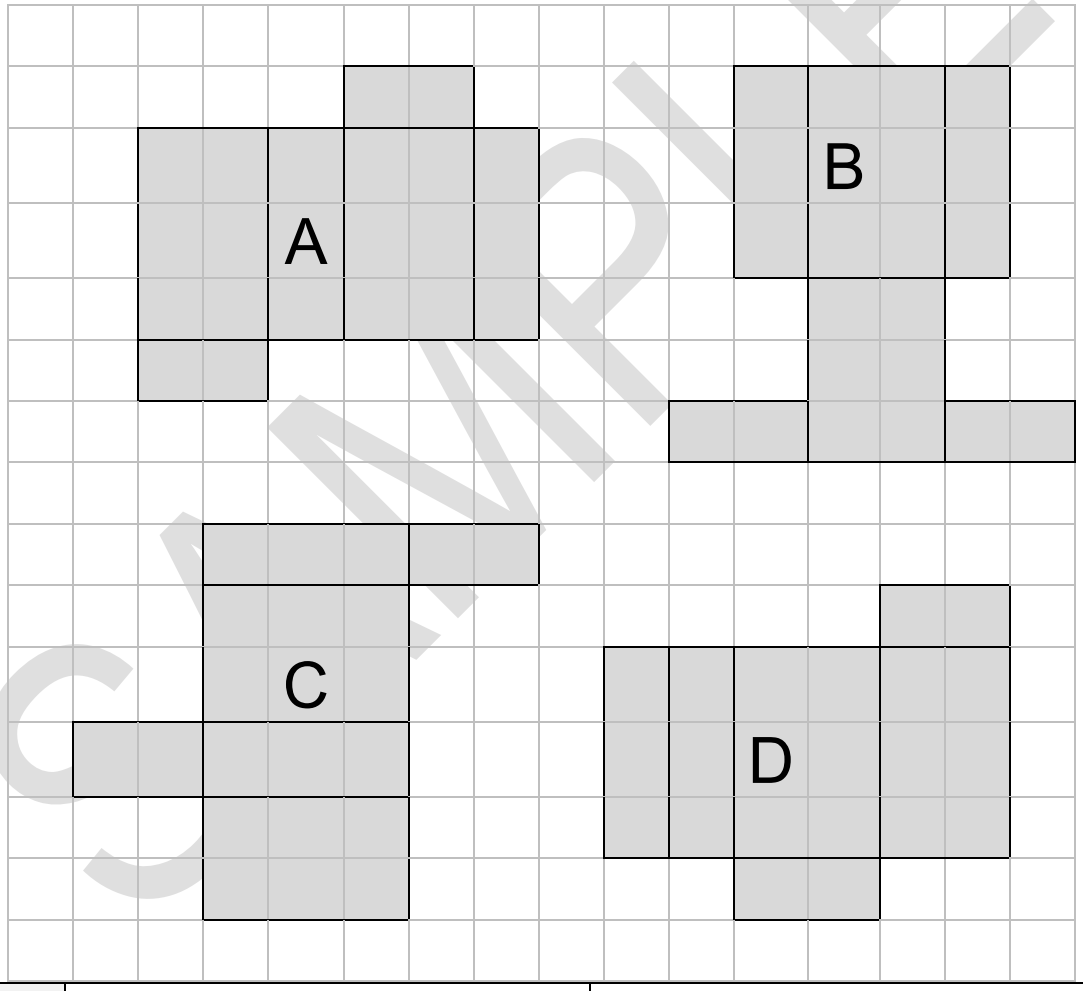

SAMPLE

Questions continue on the following page

7. Which **two** of the following diagrams are an accurate representation of a net of this cuboid?

Nets drawn on centimetre grid

Answer	Diagram:	Diagram:

[2]

SAMPLE
