SECTION 1 – CALCULATOR NOT PERMITTED

Candidate name (first, last)

First: MASTER

Last: FUNCTIONAL SKILLS

Candidate enrolment number: MFS4748

Date of birth (DDMMYYYY): 01012000

Assessment date (DDMMYYYY): 17102026

Centre number: MFS0001

Candidate signature and declaration*: Master Functional Skills

***I declare that I had no prior knowledge of the questions in this assessment and that I will not share information about the questions.**

Please check that your name is correctly printed on the candidate barcode label. If not, please tell the invigilator before the start of the exam.

You should have the following for this assessment:

- a pen with black or blue ink
- a pencil
- an eraser
- a 30cm ruler.

You must NOT use a protractor.
You must NOT use a calculator for Section 1.

General instructions

- Read through each question carefully.
- You may use a dictionary.
- Write all your answers in this booklet.
- Check your calculations and check that your answers make sense.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and NHS healthcare staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

Q1

672 ÷ 21

21 x 30 = 630
672 - 630 = 42
42 / 21 = 2 --> 30 + 2 = 32

[B1]

32

(1 mark)

Q2

What is 0.825 as a percentage?

0.825 x 100% = 82.5%

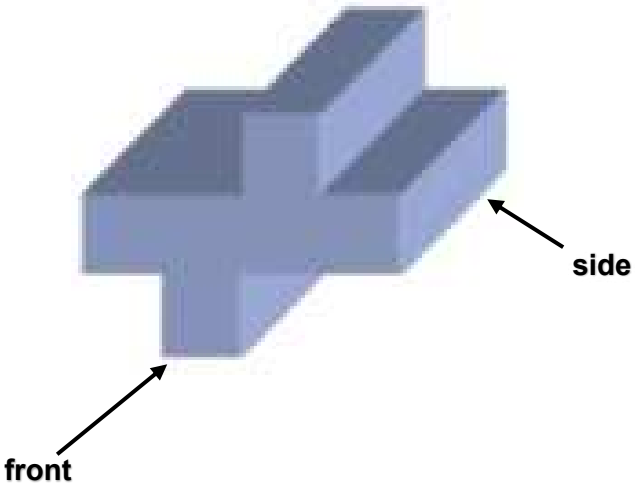

[B1]

82.5 %

(1 mark}

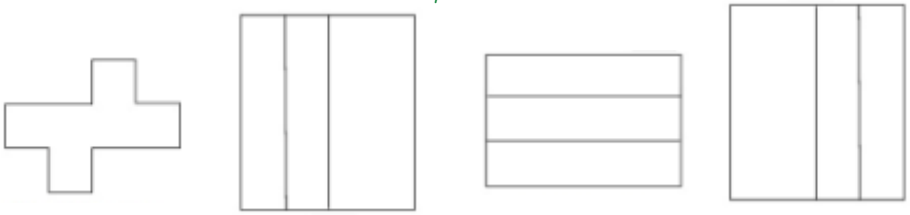

Q3

The diagram shows a cross section of a metal bar.

Which one of the following is the **side elevation**?

Looking from the side arrow: vertical upright + projecting arm
The horizontal arm forms 3 stacked sections --> Shape C

A B **C** D

[B1]

C

(1 mark)

Q4

$$\frac{\sqrt{15-6}}{3} =$$

15 - 6 = 9 sqrt(9) = 3 3 / 3 = 1

[B1] 1

(1 mark)

Q5

A box of chocolates contains 4 hard centres, 6 soft centres and 2 plain chocolates.

A woman chooses a chocolate at random.

What is the probability that she takes either a hard centre or a soft centre?
Give your answer as a fraction in its lowest terms.

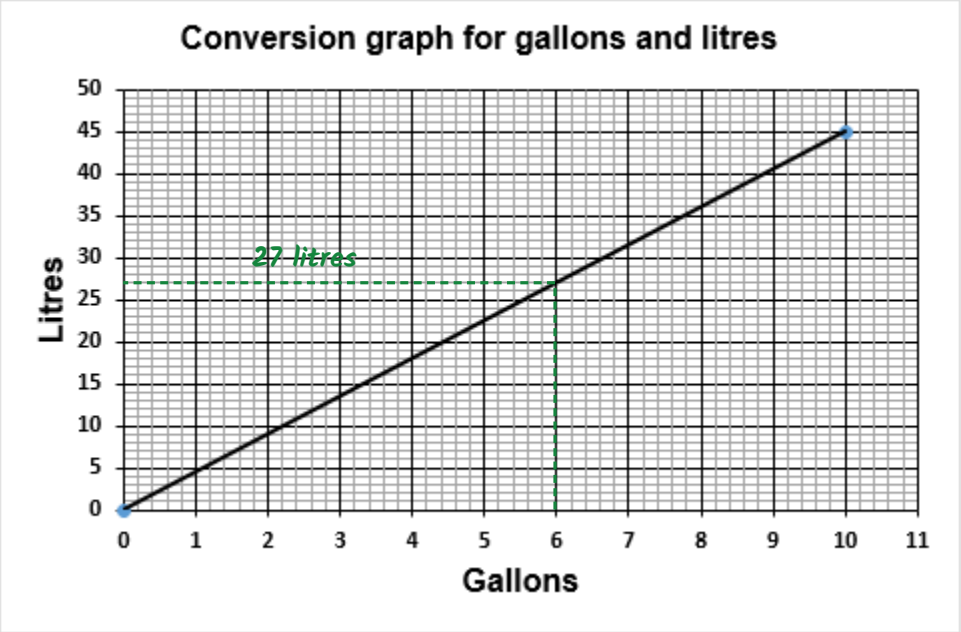

Total chocolates = 4 + 6 + 2 = 12
Hard or Soft = 4 + 6 = 10
Probability = 10/12 = 5/6 (lowest terms)

[B1] $\frac{5}{6}$

(1 mark)

© The City and Guilds of London Institute 2020

Q6

What is 6 gallons in litres, to the nearest litre?

Reading from conversion graph: 6 gallons = 27 litres

Formula check: 6 x 4.546 = 27.28 ~ 27 litres

[B1]

27

_____ litres

(1 mark)

Q7

What is 42% of 400?

10% of 400 = 40 --> 40% = 4 x 40 = 160

1% of 400 = 4 --> 2% = 8

42% = 160 + 8 = 168

[B1]

168

_____

(1 mark)

Q11

Eight bricklayers on a building site took 25 hours to build a wall.

The Site Manager needs a similar wall built.

He can hire five bricklayers to build this wall.

He needs to know how much longer it will take to build this wall.

How much **longer** will it take?

Show your working

Total man-hours = 8 bricklayers x 25 hours = 200 hours

Time with 5 bricklayers = 200 / 5 = 40 hours [M1]

Extra time taken = 40 hours - 25 hours = 15 hours longer [A1]

15 **hours**

(2 marks)

Q12

A woman needs to work out how long it will take to drive to York.

She checks the journey on a website.

The distance from her house to York is 80 miles.

20 miles of the journey are through roadworks with a speed restriction of 40mph.

She should drive the rest of the journey at an average speed of 50mph

How long should the journey take?

Show your working

Roadworks: 20 miles / 40 mph = 0.5 hours = 30 minutes

Rest of journey: 80 - 20 = 60 miles [M1]

60 miles / 50 mph = 1.2 hours = 1 hour + (0.2 x 60) mins = 1 hour 12 mins [M1]

Total journey time = 30 mins + 1 hr 12 mins = 1 hour 42 minutes [A1]

Time taken *1* **hours** *42* **minutes**

SECTION 2 – CALCULATOR PERMITTED

Candidate name (first, last)

First: MASTER

Last: FUNCTIONAL SKILLS

Candidate enrolment number: MFS4748

Date of birth (DDMMYYYY): 01012000

Assessment date (DDMMYYYY): 17102026

Centre number: MFS0001

Candidate signature and declaration*: Master Functional Skills

• If you have used any additional answer sheets write the number of additional sheets in this box. ☐
• Please ensure that you **staple** additional answer sheets to the **back** of this booklet, clearly labelling them with your full name, enrolment number, centre number and date in BLOCK CAPITALS.
• You must use a black or blue pen. You may use a pencil for charts and diagrams.
***I declare that I had no prior knowledge of the questions in this assessment and that I will not share information about the questions.**

Please check that your name is correctly printed on the candidate barcode label. If not, please tell the invigilator before the start of the exam.

You should have the following for this assessment

- a pen with black or blue ink.
- a pencil
- an eraser
- a 30cm ruler
- a calculator.

You must NOT use a protractor.

General instructions

- Read through each question carefully.
- You may use a dictionary.
- Show your working out (where required).
- Write all your working out and answers in this booklet.
- Check your calculations and check that your answers make sense.
- There are additional pages at the back of this booklet if you run out of space or ask the invigilator if you need additional sheets of paper.

Q1

What is 35 as a fraction of 490? Give your answer in its simplest form.

35 / 490: Divide numerator and denominator by 35

35 / 35 = 1

490 / 35 = 14 --> Simplest form = 1/14

[B1]

$\frac{1}{14}$

(1 mark)

Q2

$1\frac{3}{8} + 3\frac{9}{16} =$

(*tick one box*)

A $4\frac{1}{2}$ ☐

B $4\frac{3}{8}$ ☐

C $4\frac{3}{4}$ ☐

D $4\frac{15}{16}$ ☑

1 3/8 = 11/8 = 22/16

3 9/16 = 57/16

22/16 + 57/16 = 79/16 = 4 15/16

[B1]

(1 mark)

© The City and Guilds of London Institute 2020

Q3

Which of these has the smallest value?

(tick one box)

A 6.048 ÷ 24 ☐ = 0.252

B 0.095 ÷ 5 ☑ = 0.019 (Smallest value) [B1]

C 1.032 ÷ 12 ☐ = 0.086

D 1.274 ÷ 7 ☐ = 0.182

(1 mark)

Q4

$$V = \frac{bhl}{2}$$

v = volume in cm^3

b = base in cm

h = height in cm

l = length in cm

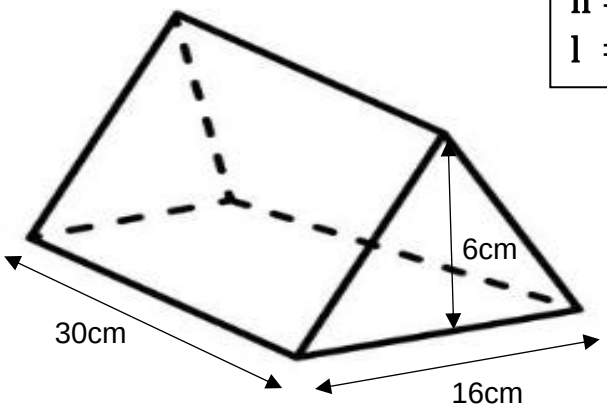

Diagram not to scale

What is the volume of this triangular prism?

V = (16 x 6 x 30) / 2 = 2880 / 2 = 1440 cm^3

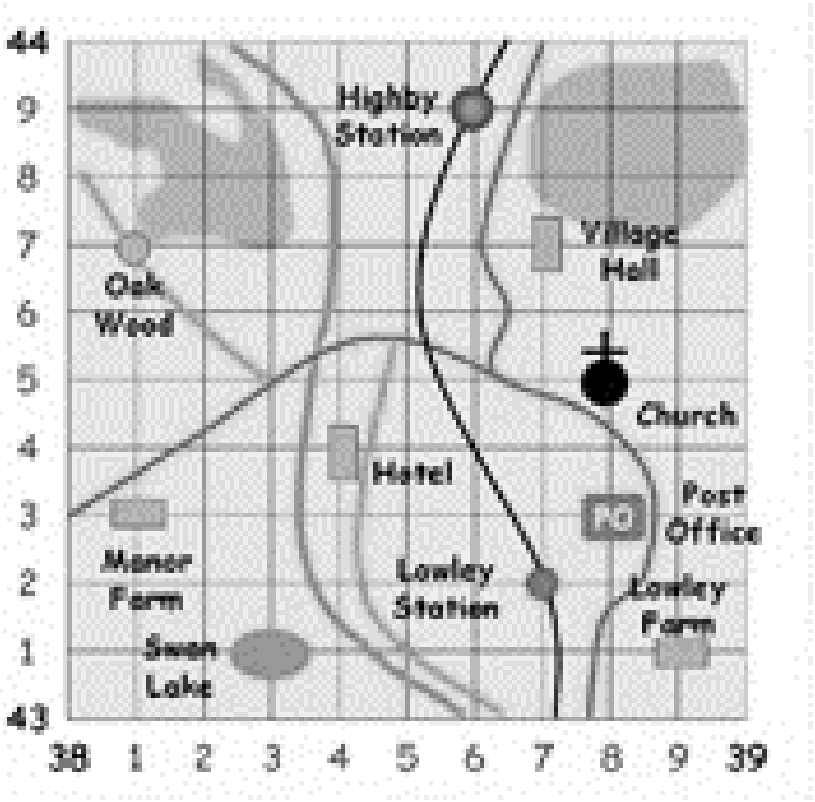

[B1]

1440 _____ **cm^3**

(1 mark)

© The City and Guilds of London Institute 2020

Q5

What is the coordinate for Highby Station?

(*tick one box*)

Easting: 38 and 6 tenths = 386 *Northing: 43 and 9 tenths = 439 --> 386439*

A 396449 ☐

B 386439 ☑ [B1]

C 439386 ☐

D 449396 ☐

(1 mark)

© The City and Guilds of London Institute 2020

Q6

A woman is going to Spain for a holiday.

She wants to book a hotel online.

She finds a hotel that charges €84 euros per night.

She thinks this will be about £100 per night.

Exchange rate pound to euro	**£1 = €1.12**

Is she right? Explain your answer.

Is she right? *(tick one box)* **Yes** ☐ **No** ☑

Explanation

Convert €84 to pounds: 84 / 1.12 = £75.00 per night [B1]

Alternatively: £100 x 1.12 = €112.00, which is more than €84

Conclusion: She is not right; €84 is £75, so £100 is too much

(1 mark)

© The City and Guilds of London Institute 2020

Q7

An apprentice hairdresser needs to prepare a solution to colour a client's hair.

The client wants high lift shades.

The apprentice hairdresser measures out 75ml of developer.

Hair shade	Ratio of hair colour to developer
Grey coverage and fashion shades	1 : 1
High lift shades	1 : 1.5
Hair lightener	1 : 2

What amount of hair colour should she measure out?

Show your working

High lift shades ratio: Colour : Developer = 1 : 1.5

Developer = 75 ml [M1]

Colour required = 75 / 1.5 = 50 ml [A1]

Check: 50 x 1.5 = 75 ml

50 _____ **ml**

(2 marks)

© The City and Guilds of London Institute 2020

Q8

A woman has a new fitness watch.

She uses this formula to calculate her **step length**.

$$\textbf{Step length}(feet) = \frac{\textbf{a measured distance } in\ feet}{(the\ number\ of\ steps\ taken)}$$

Her **measured distance** was **20 feet** and the number of **steps taken** was **16**.

In her first week she walks 67118 steps.

She wants to know how many kilometres she walked in the first week.

1 foot = 0.0003048km

What distance did she walk?

Show your working

Step length = 20 feet / 16 steps = 1.25 feet per step [B1]

Total distance in feet = 67,118 x 1.25 = 83,897.5 feet [M1]

Convert to km: 83,897.5 x 0.0003048 km/foot = 25.571958 km [A1]

Distance = 25.57 km (rounded to 2 d.p.)

Distance walked 25.57 **km**

(3 marks)

© The City and Guilds of London Institute 2020

Q9

A secretary needs to order 8 boxes of paper clips. Each box costs £7.67

The table below shows the discount offered on large orders.

Total order	Discount
£40 - £54.99	5%
£55 - £79.99	6.5%
£80 or more	8%

What amount will the secretary have to pay?

Show your working

Total order before discount = 8 x £7.67 = £61.36 [M1]

Discount band: £61.36 is in £55 - £79.99 --> 6.5% discount

Discount amount = £61.36 x 0.065 = £3.9884 ~ £3.99 [M1]

Total to pay = £61.36 - £3.99 = £57.37 [A1]

£ 57.37

(3 marks)

© The City and Guilds of London Institute 2020

Q10

The Chairperson of a committee needs to write a report for a council meeting.

She needs to compare the fly tipping incidents reported in the **local area** with the fly tipping incidents reported **nationally**.

National Report

This year local authorities in England dealt with an **increase of 8%** of fly tipping incidents on those reported in last year.

This table shows the numbers of fly tipping incidents reported in the local area.

Year	Numbers of fly tipping incidents reported
Last year	11 193
This year	11 649

What will the Chairperson write in her report about the comparison between the local incidents and the national incidents? Explain your answer using figures.

Show your working

Local increase = 11,649 - 11,193 = 456 incidents [M1]

Local percentage increase = (456 / 11,193) x 100% = 4.074% ~ 4.1% [M1]

National increase = 8% --> Comparison: 4.1% < 8% [A1]

Local rate of increase is almost half the national rate

Explanation

The number of local fly tipping incidents increased by 4.1% (456 incidents), which is considerably lower than the national increase of 8%. [B1]

Local authorities experienced less than half the national growth rate.

(4 marks)

© The City and Guilds of London Institute 2020

Q11

A golf coach wants to tell a beginner how he is performing.

He tells the beginner that he should be able to hit the ball 150 yards on average.

He tests the beginner and records the distance of each hit.

Distance travelled (d) in yards	Frequency
135 ≤ d < 140	4
140 ≤ d < 145	13
145 ≤ d < 150	17
150 ≤ d < 155	6

Is the beginner performing at the average level? Explain your answer using figures

Show your working

Midpoints: 137.5, 142.5, 147.5, 152.5

fx values: (4x137.5)=550, (13x142.5)=1852.5, (17x147.5)=2507.5, (6x152.5)=915 [M1]

Total frequency n = 4 + 13 + 17 + 6 = 40

Total fx = 550 + 1852.5 + 2507.5 + 915 = 5,825 [M1]

Estimated Mean = 5,825 / 40 = 145.625 yards [A1]

Target = 150 yards. 145.625 < 150 (short of target)

Is the beginner performing at the average level?

(tick one box) **Yes** ☐ **No** ☑

Explanation

No. The beginner has an estimated mean hit distance of 145.6 yards (145.625), which is 4.4 yards below the coach's target average of 150 yards. [B1]

(5 marks)

© The City and Guilds of London Institute 2020

Q12

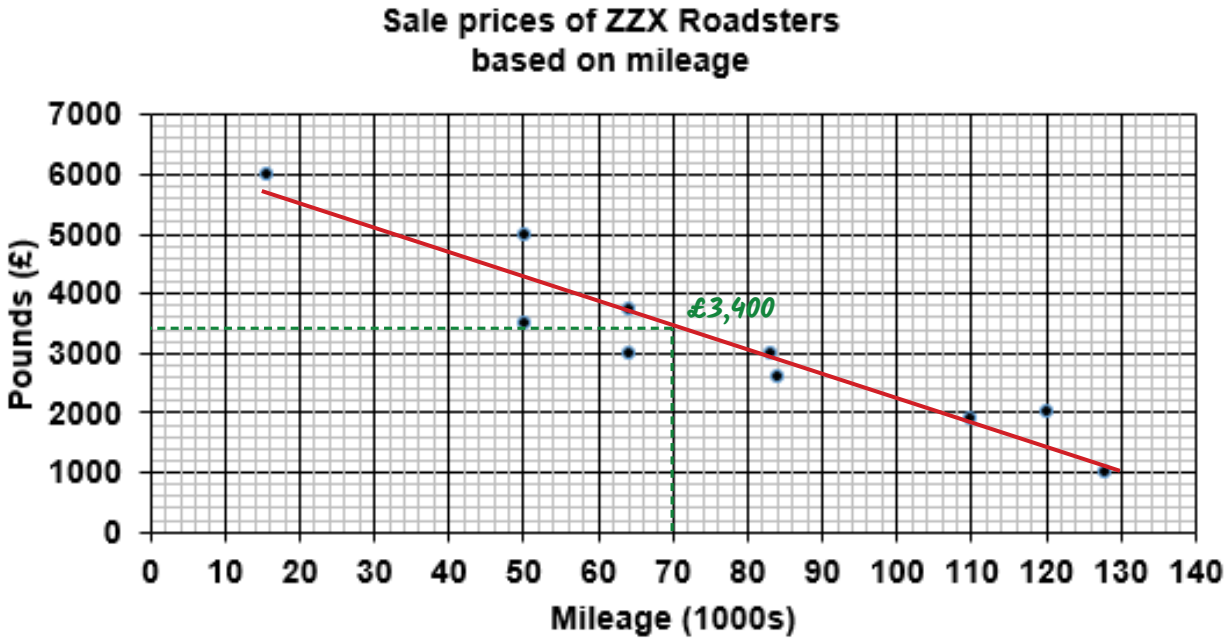

A garage sells used cars.

When a customer buys a car, the garage owner will offer an amount to pay for their old car.

A customer brings in a ZZX Roadster with a mileage of 70 000.

The garage owner estimates the value of this car based on the mileage.

He uses this website graphic to find this value.

He wants to make a first offer to the customer 30% below this value in order to make a profit when he resells it.

What amount should he offer the customer?
Explain your answer by drawing a trend line and marking the graph to show how you decided the amount.

Estimated value of the customer's car £ 3,400 [B1]

Show your working

Trend line gives estimated value at 70,000 miles = £3,400

30% below value: £3,400 x 0.30 = £1,020 deduction [M1]

First offer = £3,400 – £1,020 = £2,380 (or £3,400 x 0.70 = £2,380) [M1]

First offer to customer £ 2,380 [A1]

(4 marks)

© The City and Guilds of London Institute 2020

Q13

A 22-year-old man wants to apply for this job.

He wants to work out how much his annual take home pay will be.

Staff required
for busy town centre retail store.

Shifts available 6am – 1pm
Includes one hour break unpaid.
6 days per week
National Minimum Wage

National Minimum Wage (NMW) rates

NMW (age)	Apprentice	16-17 years	18-20 years	21-24 years
Rate per hour (£)	£3.90	£4.35	£6.15	7.70

He knows he has to pay income tax and national insurance and what is left is his take home pay.

TAX INFORMATION

Income tax is taken from your earnings after your personal allowance has been deducted.

Income Tax rated and bands

Band	Taxable income	Tax rate
Personal allowance	up to £12 500	0%
Basic rate	£12 501 to £50 000	20%
Higher rate	£50 001 to £150 000	40%

He is told that his national insurance will be about £600 National Insurance in the year.

What will the man's annual pay be?

© The City and Guilds of London Institute 2020

Show your working.

1) Hours: 6am – 1pm = 7 hrs – 1 hr unpaid break = 6 hrs/day
   6 days x 6 hrs = 36 hrs/week --> 36 x 52 weeks = 1,872 hours/year [M1]

2) Annual Gross Pay (Age 22 NMW = £7.70/hr):
   Gross Pay = 1,872 hours x £7.70 = £14,414.40 [M1]

3) Taxable Pay & Income Tax (Allowance = £12,500, Rate = 20%):
   Taxable Income = £14,414.40 – £12,500.00 = £1,914.40
   Income Tax @ 20% = £1,914.40 x 0.20 = £382.88 [M1]

4) National Insurance: £600.00 per year

5) Annual Take Home Pay = Gross - Tax - NI
   = £14,414.40 – £382.88 – £600.00 = £13,431.52 [A1]

£ 13,431.52

(6 marks)

© The City and Guilds of London Institute 2020

Q14

A kitchen designer needs to draw a scale plan for a customer's new kitchen.

The customer gives the kitchen designer this sketch to show how she would like the cupboards to fit above the worktop.

The base of the large cupboard needs to be 50cm above the top of the worktop.

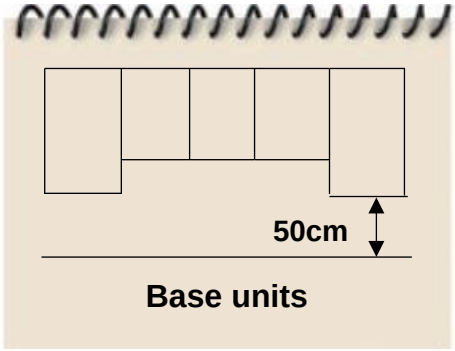

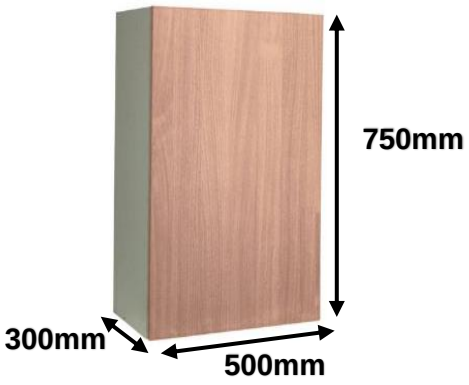

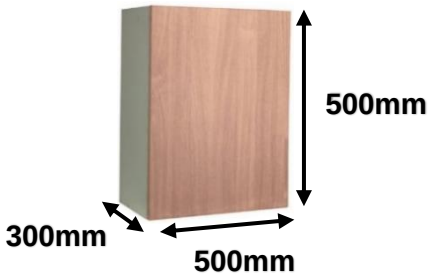

Diagram not to scale

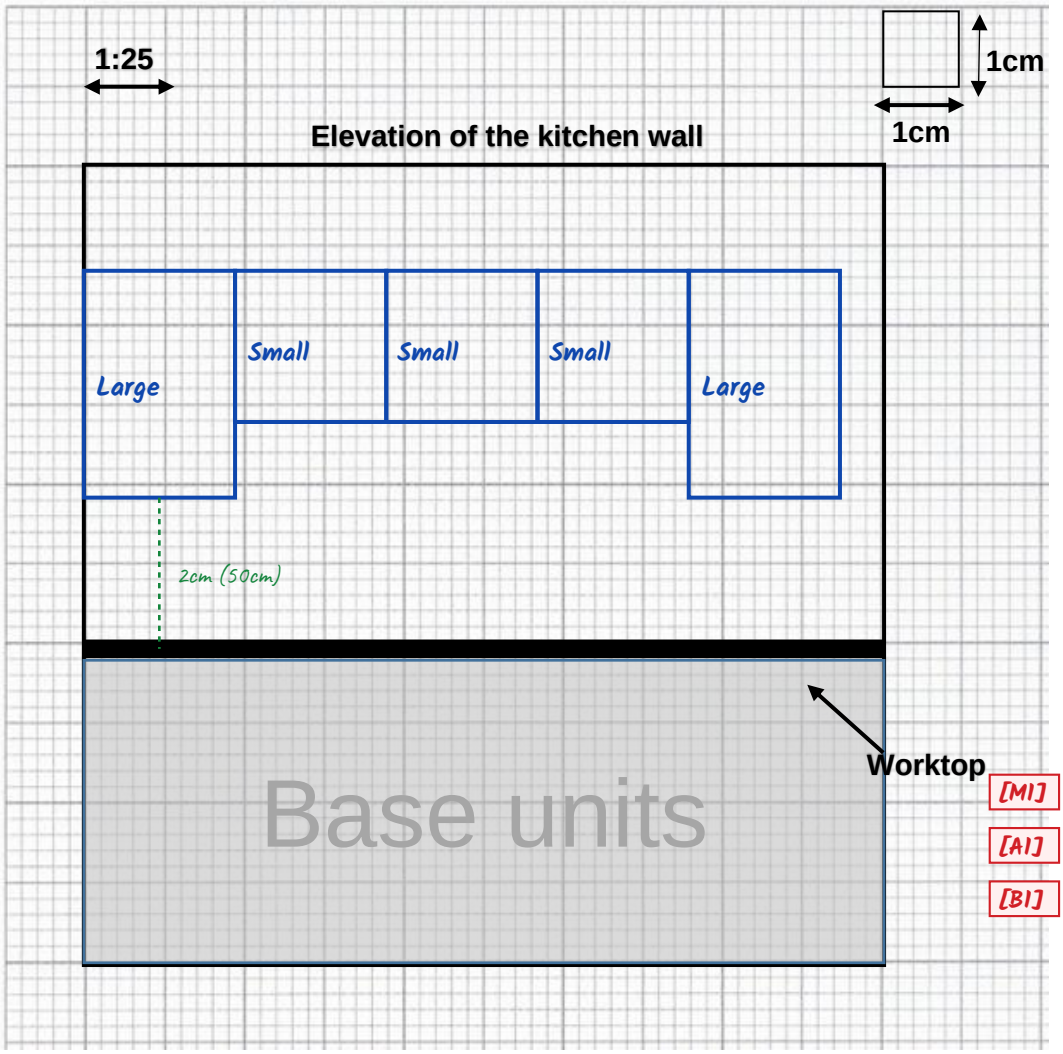

Use the scale plan of the elevation of the kitchen wall to show where the kitchen designer should draw the cupboards.

Space for working

Scale 1:25 (1 cm on plan = 25 cm in real life):

- Large Cupboard: 500mm = 50cm --> 50 / 25 = 2 cm (10 small squares wide)
  Height: 750mm = 75cm --> 75 / 25 = 3 cm (15 small squares high)
- Small Cupboard: 500mm = 50cm --> 50 / 25 = 2 cm (10 small squares wide)
  Height: 500mm = 50cm --> 50 / 25 = 2 cm (10 small squares high)
- Gap above worktop = 50cm --> 50 / 25 = 2 cm (10 small squares)
- Arrangement: 1 Large + 3 Small + 1 Large = 5 cupboards (10 cm total width)

© The City and Guilds of London Institute 2020

(6 marks)

© The City and Guilds of London Institute 2020

Q15

A health club conducts a survey to compare the average number of hours of sleep of members.

Members report their results each week.

A woman takes part in this survey. She wears a fitness band, which records the number of hours she sleeps.

She wants to compare her own results week by week.

Last week she slept a mean time of 5 hours 19 minutes with a range of 4 hours 49 minutes.

This is the record for this week.

This week	Duration of sleep
Monday	8 hours 22 minutes
Tuesday	6 hours 49 minutes
Wednesday	5 hours 59 minutes
Thursday	5 hours 49 minutes
Friday	6 hours 44 minutes
Saturday	7 hours 16 minutes
Sunday	5 hours 55 minutes

What are the results that the woman reports to the health club?
What comparison can she make between her own results?
Make **two** comments using figures.

Show your working

Total Sleep: 502 + 409 + 359 + 349 + 404 + 436 + 355 = 2,814 mins

Mean Sleep = 2,814 / 7 = 402 minutes = 6 hours 42 minutes [M1]

Range This Week = Max (502m) - Min (349m) = 153 mins = 2h 33m [A1]

Comment 1

On average she slept longer this week than last week.
Her mean sleep of 6h 42m is 1h 23m more than last week
mean of 5 hours 19 minutes (6h 42m > 5h 19m). [A1]

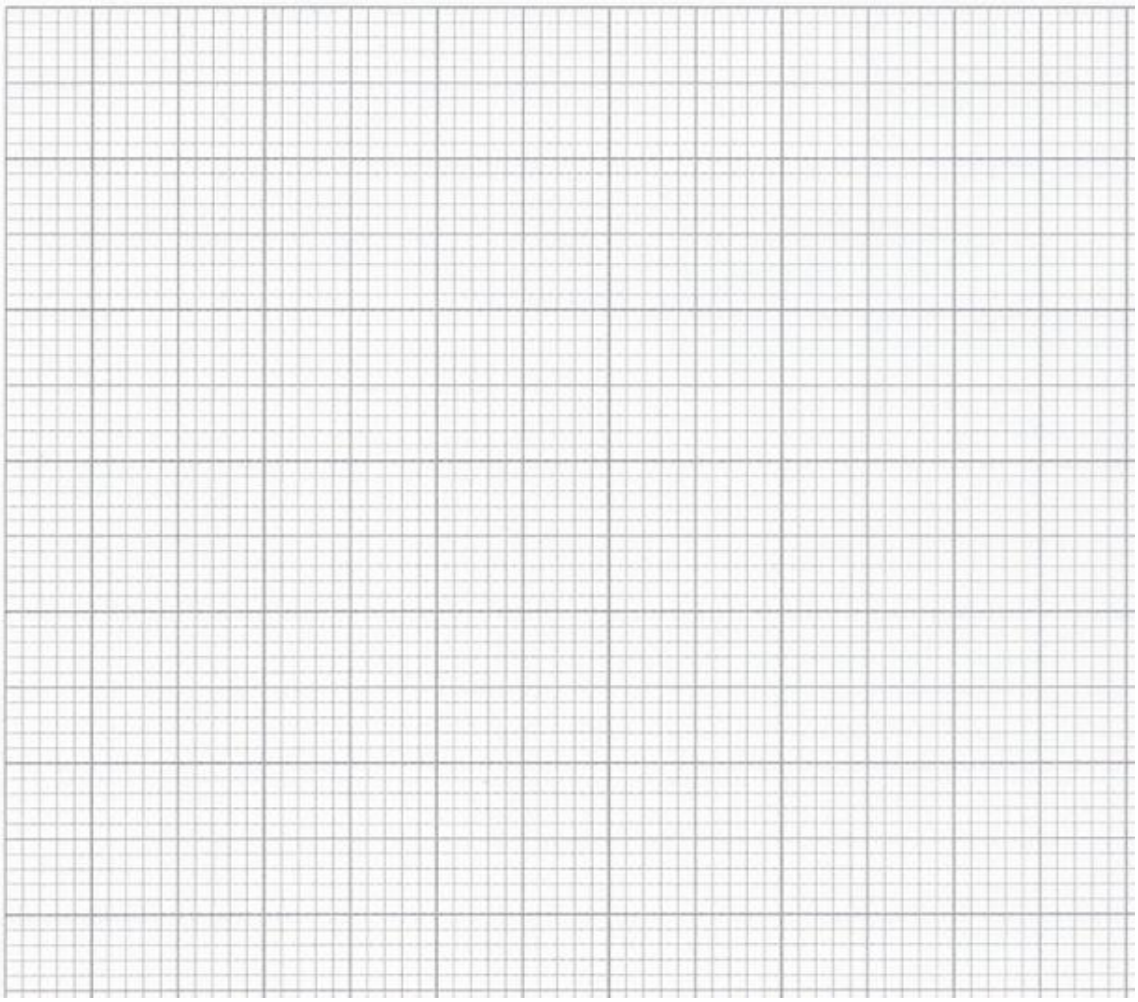

Comment 2

Her sleep was more consistent this week because her range of
2 hours 33 minutes is smaller than last week's range of
4 hours 49 minutes (2h 33m < 4h 49m, less variation). [A1]
