Monday 15 January 2018 Morning Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:
- a calculator
- mathematical instruments
- a copy of the Data Book (Examination) (enclosed).

For Examiner's Use	
Question	Mark
1	
2	
3	
4	
TOTAL	

Instructions
- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.
- State the units of your answer where appropriate.

Information
- The marks for questions are shown in brackets.
- The maximum mark for this paper is 60.
- You may ask for more answer paper, graph paper and tracing paper. These must be tagged securely to this answer book.
- Evidence of checking is specifically assessed in Questions 2(a) and 3(a). These questions are indicated with a †.

Advice
- In all calculations, show clearly how you work out your answer.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

Answer **all** questions in the spaces provided.

1 Dance Show

Sue runs a dance school.

The students at my dance school are in a show.

Sue

1 (a) The show has four tap dances and one ballet dance.

Each dance has three of these students.

Amy Dita Fiona Grace Leah Mel Tia

- Amy, Dita and Tia are in the 5th dance.
- Amy is **not** in the 1st dance.
- Grace is **not** in the ballet dance.
- Each student is in at least two dances.
- No student is in consecutive dances.

Show one possible plan for the students.

[5 marks]

box

Practise on this grid.

Dance	Type	Students		
1st	Tap			
2nd	Tap			
3rd	Ballet			
4th	Tap			
5th	Tap			

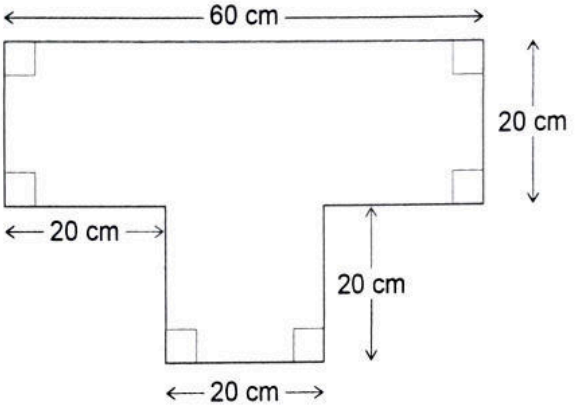

Put your answer on this grid.

Dance	Type	Students		
1st	Tap	Grace	Fiona	Tia
2nd	Tap	Dita	Leah	Mel
3rd	Ballet	Amy	Fiona	Tia
4th	Tap	Grace	Leah	Mel
5th	Tap	Amy	Dita	Tia

Question 1 continues on the next page

1 (b) Sue makes costumes for the show.

She wants to cut out 10 of these shapes from a piece of material.

Not drawn accurately

Each scale drawing opposite shows the piece of material.

Sue says,

"I can cut out 10 of these shapes from this piece of material."

Is she correct?

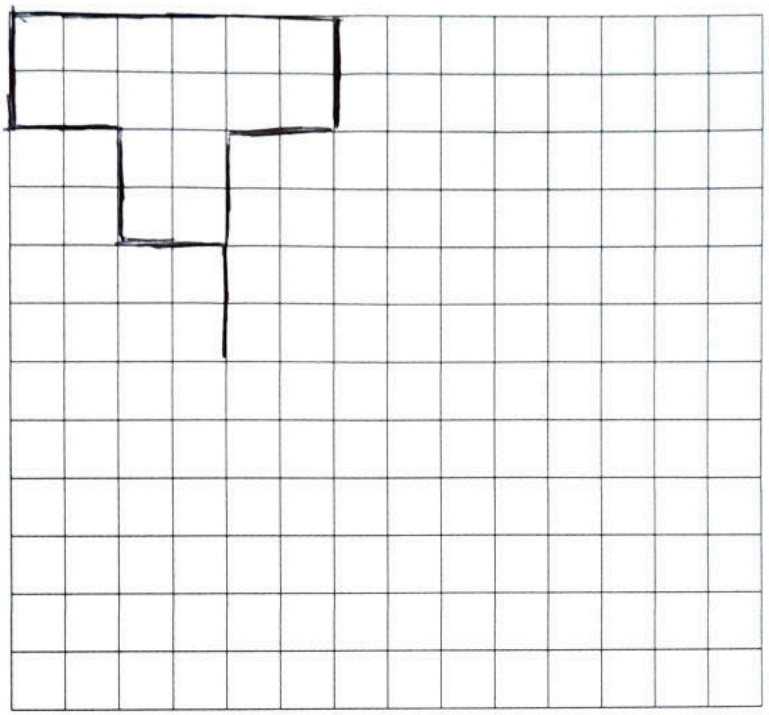

Use the scale drawings to show your working.

[5 marks]

box

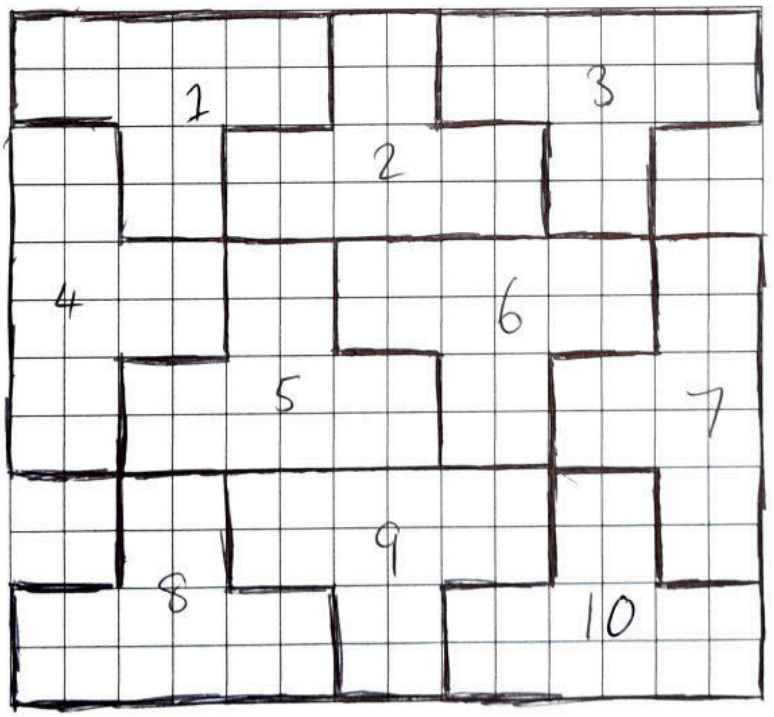

Practise on this scale drawing.

Scale ☐ represents a 10 cm by 10 cm square

Put your answer on this scale drawing.

Scale ☐ represents a 10 cm by 10 cm square

MasterFunctionalSkills.co.uk · AQA Maths Level 2 · January 2018 Solutions
MFS Step 5: Accredited AQA Method & Mark Scheme Verified by Tutor Abdul [M1 A1] [100% PASS]

box

1 (c) The show is on for **two** nights.

For each night, there are

80 adult tickets at £10.50 each

and

60 child tickets at £7.20 each.

The **total** cost of putting on the show for two nights is £925

Sue sells 90% of the adult tickets and $\frac{2}{3}$ of the child tickets.

She says,

"We have made **more than** £1200 profit."

Is she correct?

You **must** show your working.

[7 marks]

Adult:

$80 \times 0.9 = 72.$

$72 \times £10.50 = £756$

Child: $60 \times \frac{2}{3} = 40.$

$40 \times £7.20 = £288$

$£756 + £288 = £1044$ per night.

$\Rightarrow £2088$ total.

$£2088 - £925 = £1163$

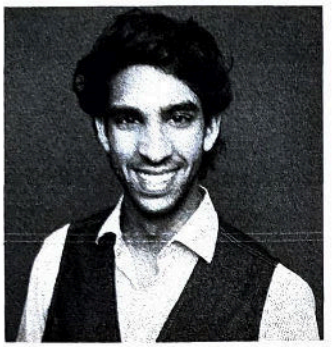

She is not correct.

17

2 **Minibus**

There is a **data sheet** for Minibus.

†2 (a) Samir wants to hire some minibuses to go to a hockey match.

I need enough minibuses to carry 96 people.

Samir

Each minibus can carry 15 people.

How many minibuses does Samir need to hire?

[2 marks]

$\frac{96}{15} = 6.4 \rightarrow 7$ minibuses needed

Check your answer.

Show how you have done your check.

[1 mark]

$6.4 \times 15 = 96.$

Question 2 continues on the next page

box

14 friends are going to Truro for a weekend.

12 of the friends will travel from Southampton.
They will pick up the other 2 friends in Bristol.

2 (b) Circle the total number of miles for the journey to Truro.

Southampton ⟶ Bristol ⟶ Truro

[1 mark]

214 268 298 536

2 (c) The friends look at this advert.

Minibus hire
£28 per day
plus
65p per mile

They drive the minibus for 3 days.

On Friday the minibus will travel

Southampton ⟶ Bristol ⟶ Truro

On Sunday the minibus will travel

Truro ⟶ Bristol ⟶ Southampton

Each friend from Southampton will pay £10 more than each friend from Bristol.

Will each friend from Southampton pay **less than** £35?
You **must** show your working.

[7 marks]

£28 × 3 = £84

£0·65 × 2 × 268 = £348.40

⇒ £84 + £348.40 = £432.40.

Let x be the amount that each friend from Southampton pays.

$12x + 2(x-10) = 432.40$

$14x - 20 = 432.4$

$\Rightarrow 14x = 452.4$

$\Rightarrow x =$ [redacted]£32.31

Yes, they pay less than £35 each.

Question 2 continues on the next page

2 (d) On the journey, they come to a low bridge.

The height of the minibus with a loaded roof rack is 3.1 metres.

Will the minibus pass under the bridge?

You **must** show your working.

[4 marks]

$10' - 6'' = 126'' = 10.5'$

$10.5 \times 0.3048 = 3.2004\text{m}.$

$3.1 < 3.2004$

Yes, it will pass under.

15

3 Guide Dogs in training

Guide Dogs train at a centre each day from Monday to Friday.

In the evenings and at weekends, people look after them at home.

Sarah looks after Buddy.

Sarah takes Buddy from her home to the centre.

She then travels to work.

Sarah makes these notes.

Home to centre	10 miles average speed 30 miles per hour
At centre	5 minutes
Centre to work	$\frac{3}{4}$ of an hour

†3 (a) How many minutes does Sarah take to travel from her home to the **centre**?

[2 marks]

$\frac{10}{30} = \frac{1}{3}$ hour, or, 20 minutes.

Check your answer.

Show how you have done your check.

[1 mark]

$\frac{20}{60} \times 30 = 10$ mi

3 (b) Sarah needs to arrive at **work** by 9.00 am

Work out the **latest** time that she can leave home.

[3 marks]

$\frac{3}{4}$ hr = 45 mins.

9:00 am − (45 min + 5 min + 20 min)

= 7:50 am.

Question 3 continues on the next page

The daily amount of food for a dog depends on the weight of the dog.

Weight of dog	Daily amount of food
10 kg	176 g
20 kg	296 g
30 kg	402 g
40 kg	494 g

25 kg is halfway between 20 kg and 30 kg
The daily amount of food for a 25 kg dog is 349 g

Dogs get two feeds each day.

Morning feed Half the daily amount
Evening feed Half the daily amount

3 (c) Buddy weighs 35 kg

Sarah uses a cup to measure out the **morning** feed.

1 cup holds 96 g

Sarah says,

"I need to measure out between $2\frac{1}{4}$ and $2\frac{1}{2}$ cups."

Is she correct?

You **must** show your working. **[5 marks]**

35kg: $\frac{402+494}{2}$ = 448g needed for the day

$\frac{448g}{2}$ = 224g for morning feed.

$\frac{224}{96}$ = $2\frac{1}{3}$.

Yes, she is correct.

outside the box

3 (d) Omar looks after a different dog.

The **daily** amount of food for his dog is 349 g

Omar says,

"A 20 kg bag of food is enough to feed my dog for 60 days."

Is he correct?

You **must** show your working.

[4 marks]

$20kg = 20000g$.

$\frac{20000g}{349g} = 57.3$ days.

He is incorrect.

15

Turn over for the next question

4 **Wages**

There is a **data sheet** for Wages.

My company makes T-shirts.

Bob

The table shows the number of T-shirts 20 piece workers made in one hour.

Number of T-shirts	Number of workers
7	9
8	4
9	5
10	2
Total	20

outside the box

4 (a) Show that the mean number of T-shirts made per worker is 8

[3 marks]

$(7 \times 9) + (8 \times 4) + (9 \times 5) + (10 \times 2) =$

$63 + 32 + 45 + 20$

$= 160.$

$\frac{160}{20} = 8.$

4 (b) The workers are all 25 years old or over.

Bob says,

"The fair rate is £1.05 per T-shirt."

Is he correct?

You **must** show your working.

[5 marks]

NMW = £7.50.

$\frac{£7.50}{8} = £0.9375$

$£0.9375 \times 1.2 = £1.125.$

No, he is incorrect.

box

4 (c) One week, the company needs to make at least 3600 T-shirts.

The mean number of T-shirts each worker makes per hour is 8

Bob will use

10 full-time workers, each working 7 hours per day for 5 days

and

some part-time workers, each working for $4\frac{1}{2}$ hours per day for 4 days.

How many part-time workers does he need?

You **must** show your working.

[5 marks]

$10 \times 7 \times 5 = 350$ total hours by full-time workers per week.

$350 \times 8 = 2800$ shirts per week by FTWs.

$3600 - 2800 = 800$ shirts required.

$4.5 \times 4 \times 8 = 144$ shirts made by one PTW in a week.

$\frac{800}{144} = 5.\dot{5} \rightarrow$ 6 PTWs needed.
