# ***Past Paper 6***

Time: 25 minutes | Paper Reference **PMAT1/N06**

# Mathematics

## Level 1
## Section A (Non-Calculator)

**You must have:**
Pen, HB pencil, eraser, ruler graduated in cm and mm, protractor, pair of compasses. Tracing paper may be used.

Total Marks
14 /14

**My signature confirms that I will not discuss the content of the test with anyone.**

**Signature:** Master Functional Skills (MFS)

## Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Sign the declaration.
- Answer **all** questions.
- Write your final answers in the boxes provided.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- You **must** show clearly how you get your answers in the spaces provided. Marks will be awarded for your working out.
- Check your working and answers at each stage.
- Diagrams are **not** accurately drawn, unless otherwise indicated.
- **Calculators may not be used**.
- Take the value of $\pi$ to be 3.14

## Information

- The total mark for this section is 14.
- The marks for **each** question are shown in brackets
  – *use this as a guide as to how much time to spend on each question.*
- This sign ☑ shows where marks will be awarded for showing your checks.

## Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

# MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

## Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

## 1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

## 2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

## 3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

## Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

START LEARNING TODAY AT

MasterFunctionalSkills.co.uk

## SECTION A

**Answer ALL questions. Write your answers in the spaces provided.**

**1** Kate uses a machine to make toys.

She makes

- 800 toys in one hour
- toys for 6 hours each day.

Kate checks 5% of the toys she makes in a day for any faults.

How many toys does Kate check in a day?

**(3)**

*Step 1: Calculate total number of toys made in 6 hours:*

*Total toys = 800 × 6 = 4800 toys [M1]*

- *800 toys/hour × 6 hours = 4800 toys*

*Step 2: Calculate 5% of the 4800 toys made in a day:*

*Method: Find 10% first, then halve it:*

- *10% of 4800 = 4800 ÷ 10 = 480*
- *5% of 4800 = 480 ÷ 2 = 240 toys [M1]*

*Alternative methods:*

- *4800 × 0.05 = 240 toys*
- *Or 5% of 800 = 40 toys/hr -> 40 × 6 = 240 toys*

*240* *[A1]* toys

**(Total for Question 1 is 3 marks)**

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

**2** (a) Write 0.3 as a fraction.

**(1)**

- *The digit 3 is in the tenths column:*

**0.3 = 3/10**

[B1] $\frac{3}{10}$

(b) Work out 1.6 × 1000

**(1)**

- *Multiplying by 1000 moves the decimal point 3 places to the right:*

**1.6 × 1000 = 1600**

**1600** [B1]

(c) Write 19.075 correct to 1 decimal place.

**(1)**

- *Look at the second decimal place (hundredths): 7*
- *Since 7 ≥ 5, round the tenths digit up from 0 to 1:*

**19.075 -> 19.1**

**19.1** [B1]

**(Total for Question 2 is 3 marks)**

DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA

**3**

(a) Work out $\frac{(17-3)}{2}+4^2$

**(3)**

*Follow the Order of Operations (BIDMAS):*

*Step 1 (Brackets): 17 − 3 = 14 [M1]*

*Step 2 (Indices): $4^2$ = 4 × 4 = 16 [M1]*

*Step 3 (Division): 14 ÷ 2 = 7*

*Step 4 (Addition): 7 + 16 = 23 [M1]*

*Full line: (17 − 3) ÷ 2 + $4^2$ = 14 ÷ 2 + 16 = 7 + 16 = 23*

**23** *[A1]*

☑ (b) Use a reverse calculation to show a check of your answer.

**(1)**

*Reverse Calculation Check:*

- *Reverse addition: 23 − 16 = 7 [B1]*
- *Reverse division: 7 × 2 = 14*
- *Reverse subtraction: 14 + 3 = 17 (original bracket value)*

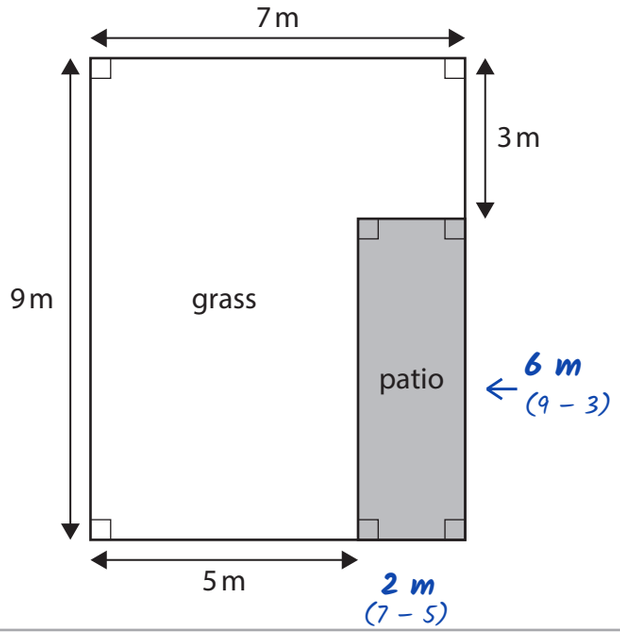

✓

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

**4** Rupert is a gardener.

He wants to put grass in the space shown in the diagram.

Work out the area of the space for the grass.

**(4)**

*Step 1: Find the missing dimensions of the patio cutout:*

- *Patio width = 7 m − 5 m = 2 m [M1]*
- *Patio height = 9 m − 3 m = 6 m*

*Step 2: Method A — Subtract patio area from total rectangle area:*

- *Total area = 9 m × 7 m = 63 m² [M1]*
- *Patio area = 6 m × 2 m = 12 m² [M1]*
- *Grass area = 63 m² − 12 m² = 51 m² [M1]*

*Alternative Method B (Split into two vertical strips):*

- *Strip 1 (left): 5 m × 9 m = 45 m²*
- *Strip 2 (top right): 2 m × 3 m = 6 m² --> 45 + 6 = 51 m²*

*51* *[A1]* m²

**(Total for Question 4 is 4 marks)**

**TOTAL FOR SECTION A IS 14 MARKS**

## SECTION B

**Answer ALL questions. Write your answers in the spaces provided.**

**1** Alan takes part in a health study.

He records the time he spends looking at different screens on Monday.

| | |
|---|---|
| computer | 5.5 hours |
| mobile phone | 40 minutes |
| TV | $3\frac{3}{4}$ hours |

Alan thinks he spent more than 10 hours in total looking at different screens on Monday.

Is Alan correct?
Show why you think this.

**(3)**

Step 1: Convert all times into hours and minutes:

- Computer: 5.5 hours = 5 hrs 30 mins [M1]
- Mobile phone: 40 mins
- TV: 3 3/4 hours = 3 hrs 45 mins

Step 2: Calculate total screen time on Monday:

- Hours: 5 + 3 = 8 hours
- Minutes: 30 + 40 + 45 = 115 mins = 1 hour 55 mins
- Total = 8 hours + 1 hr 55 mins = 9 hours 55 minutes [M1]

Step 3: Compare with Alan's estimate of 10 hours:

- 9 hours 55 mins is less than 10 hours (it is 5 minutes shorter).
- Therefore, Alan is NOT correct.

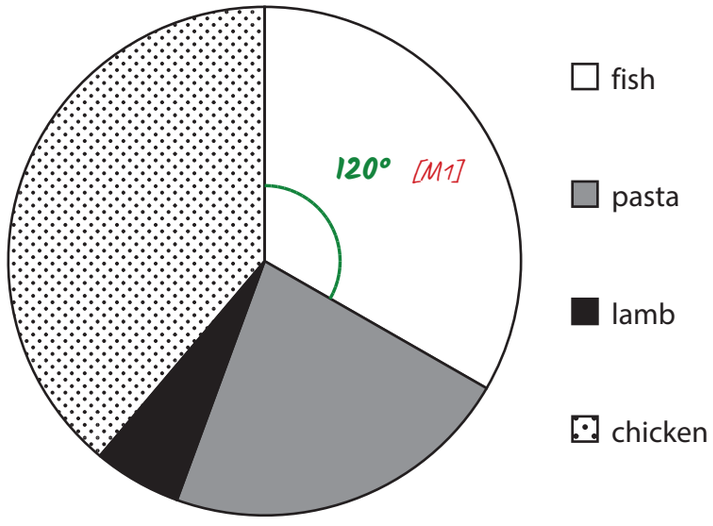

No (9 hrs 55 mins) [A1]

**(Total for Question 1 is 3 marks)**

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

**2** Sarah sees this poster about results of a survey about favourite meals in the school canteen.

**Favourite meals of 180 students**

She decides to write a comment about the results on social media.

How many students chose fish as their favourite meal?
You **must** show all your working.

**(4)**

Step 1: Measure angle of the "fish" sector using a protractor:

- Angle for fish = 120° [M1]

Step 2: Find the fraction of the full pie chart (360°):

- Proportion = 120° ÷ 360° = 1/3 (one-third of all students) [M1]

Step 3: Calculate the number of students who chose fish:

- Total students = 180
- Fish students = 180 ÷ 3 = 60 students [M1]

Alternative: 180 ÷ 360° = 0.5 students/deg -> 120° × 0.5 = 60 students

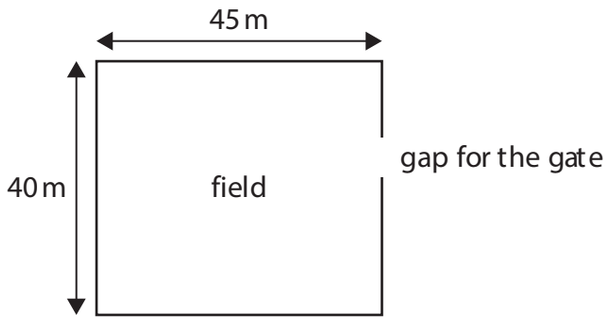

60 [A1] students

DO NOT WRITE IN THIS AREA

**3** Patrick needs to put fence panels around a field.

The field is in the shape of a rectangle.

Patrick will leave a gap of 260 cm for a gate.

Each fence panel is 1.8 m long.
Patrick can cut and join the fence panels.

Work out the total number of fence panels Patrick needs to put around this field.

**(5)**

*Step 1: Convert all units to metres:*

- *Gate gap = 260 cm ÷ 100 = 2.6 m [M1]*

*Step 2: Calculate full perimeter of the rectangular field:*

- *Perimeter = 45 m + 40 m + 45 m + 40 m = 170 m [M1]*

*Step 3: Subtract gate gap to find total fencing length needed:*

- *Fencing length = 170 m − 2.6 m = 167.4 m [M1]*

*Step 4: Divide by the panel length (1.8 m) to find number of panels:*

- *Number of panels = 167.4 m ÷ 1.8 m = 93 panels [M1]*

*(Working continued on next page ->)*

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

**Step-by-step summary for Question 3:**

1. Gate gap in metres: 260 cm = 2.6 m [M1]

2. Total field perimeter: 2 × (45 + 40) = 170 m [M1]

3. Length requiring fence panels: 170 − 2.6 = 167.4 m [M1]

4. Number of 1.8 m panels: 167.4 ÷ 1.8 = 93 panels [M1]

**Alternative method by individual sides:**

- Two 45 m sides: (45 ÷ 1.8) × 2 = 25 × 2 = 50 panels
- One 40 m side without gate: 40 ÷ 1.8 = 22.22... panels
- One 40 m side with gate: (40 − 2.6) ÷ 1.8 = 37.4 ÷ 1.8 = 20.77... panels
- Total panels = 50 + 22.22... + 20.77... = 93 panels

**93** [A1] fence panels

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

**5** Joe sells cars.

He sold 840 cars last year.
720 of these cars were petrol cars.
All the other cars he sold were electric cars.

Joe writes a report for his manager.

He states,

"I sold 6 times as many petrol cars as electric cars last year."

Is this statement correct?
You **must** show your working.

**(3)**

*Step 1: Calculate the number of electric cars sold:*

*Electric cars = 840 − 720 = 120 cars [M1]*

*Step 2: Test Joe's statement (6 times as many petrol as electric):*

*Method 1 (Multiply electric cars by 6):*

- *120 × 6 = 720 petrol cars [M1]*
- *This matches exactly the 720 petrol cars sold!*

*Method 2 (Divide petrol cars by 6):*

- *720 ÷ 6 = 120 electric cars (matches 120)*

*Method 3 (Ratio simplification):*

- *720 : 120 = 6 : 1*

*Conclusion: Joe's statement is correct.*

*Yes (720 = 6 × 120) [A1]*

**(Total for Question 5 is 3 marks)**

**6** Raphael owns a barber shop.

The table shows the number of customers who had a haircut last week at the shop.

| Mon | Tue | Wed | Thu | Fri | Sat | Sun |
|---|---|---|---|---|---|---|
| 58 | 64 | 49 | 73 | 89 | 96 | 103 |

The price of a haircut was £8

Next week Raphael will

- increase the price of a haircut by 25%
- have the same mean daily number of customers.

Raphael thinks his mean daily income next week will be more than £750

Is Raphael correct?
Show why you think this.

**(6)**

*Step 1: Calculate total number of customers last week:*

*Total = 58 + 64 + 49 + 73 + 89 + 96 + 103 = 532 customers [M1]*

*Step 2: Calculate the mean daily number of customers:*

*Mean daily customers = 532 ÷ 7 days = 76 customers/day [M1]*

*Step 3: Calculate the new price of a haircut (+25%):*

- *25% of £8 = £8 ÷ 4 = £2.00 [M1]*
- *New price = £8.00 + £2.00 = £10.00 per haircut [M1]*

*(Working continued on next page ->)*

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

**Step 4: Calculate Raphael's mean daily income next week:**

- Mean daily customers = 76
- New price per haircut = £10

Mean daily income = 76 × £10 = £760.00 [M1]

**Step 5: Compare with Raphael's prediction (£750):**

- £760 is greater than £750 (£760 > £750 by £10)
- Therefore, Raphael is CORRECT.

**Alternative Method (Weekly comparison):**

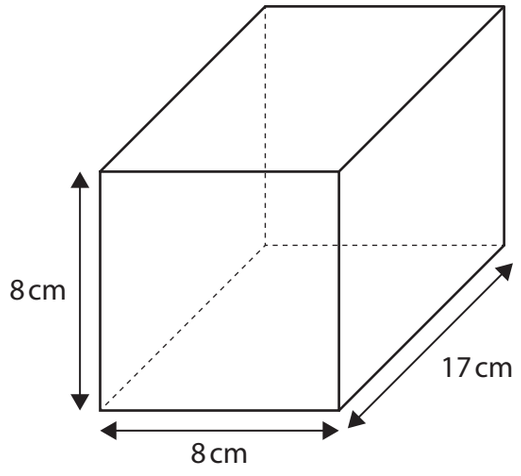

- Total weekly income = 532 × £10 = £5320
- Mean daily income = £5320 ÷ 7 = £760.00 > £750

Yes (£760 > £750) [A1]

**(Total for Question 6 is 6 marks)**

**7** Here is a cuboid.

Calculate the volume of the cuboid.
Remember to give units with your answer.

**(3)**

***Step 1: Formula for the volume of a cuboid:***

***Volume = length × width × height [M1]***

***Step 2: Substitute the cuboid dimensions:***

- *Dimensions = 17 cm by 8 cm by 8 cm*
- *8 cm × 8 cm = 64 cm²*
- ***Volume = 17 × 64 = 1088 cm³ [A1]***

  *(10 × 64 = 640; 7 × 64 = 448; 640 + 448 = 1088)*

***Step 3: State the correct units of volume:***

- ***Dimensions in cm --> volume is cm³ [B1]***

***1088 cm³*** *[A1, B1]*

**(Total for Question 7 is 3 marks)**

**8** Anju works at a town hall.

The town population is four hundred and seventy thousand and fifteen.

Anju uses this rule to work out how many people in the town have a full-time job.

Anju thinks 272 019 people in the town have a full-time job.

Is Anju correct?
Show why you think this.

**(3)**

*Step 1: Write the town population in digits:*

- *470 015 = 470 thousand and fifteen [B1]*

*Step 2: Multiply by 0.6 to find people with full-time jobs:*

- *Number with full-time jobs = 470 015 × 0.6 [M1]*

  *470 015 × 0.6 = 282 009 people*

*Step 3: Compare with Anju's estimate (272 019):*

- *Actual calculation = 282 009*
- *Anju's estimate = 272 019*
- *282 009 ≠ 272 019 (Anju is incorrect by 9 990 people)*
- *Therefore, Anju is NOT correct.*

*Alternative reverse check:*

- *272 019 ÷ 0.6 = 453 365 ≠ 470 015*

*No (282 009) [A1]*

**(Total for Question 8 is 3 marks)**

**9** Wesley is planning his new bathroom.
He will put a bath and a sink in the bathroom.

The bath needs

- a rectangular space 1.75 m by 1 m
- to be against the back wall
- to be an equal distance from both side walls.

The sink needs

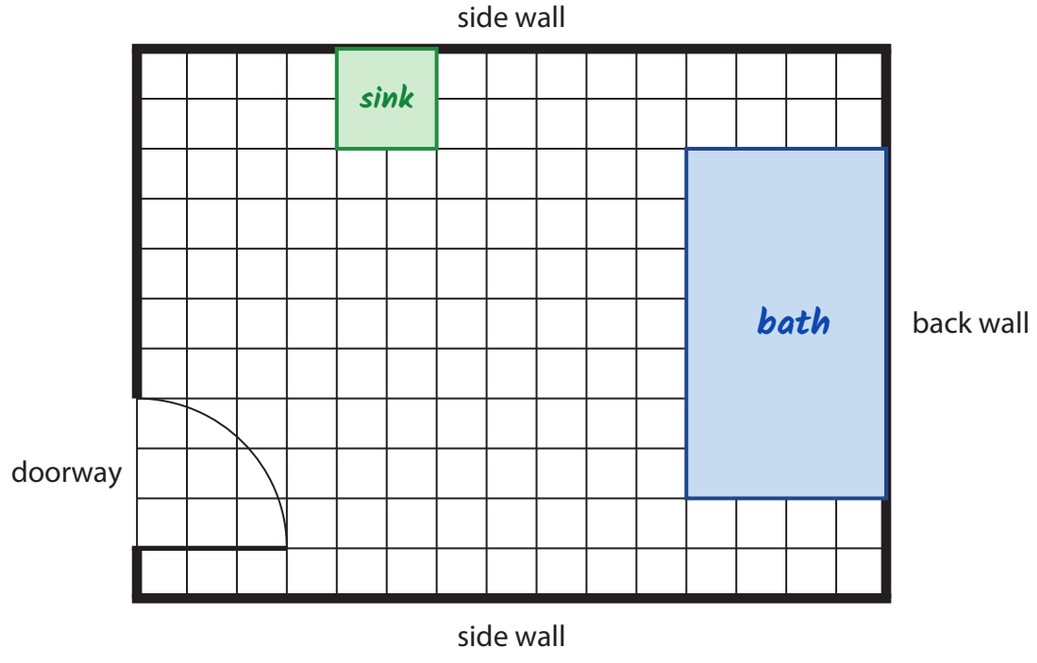

- a square space 0.5 m by 0.5 m
- to be against a side wall
- to be at least 1 m from the bath
- to be at least 1 m from the doorway.

Show a space for the bath and a space for the sink on the grid.
Remember to use the scale and label each item.

**(4)**

***Scale Calculations & Item Placement:***

- *Bath: 1.75 m ÷ 0.25 m = 7 squares; 1 m ÷ 0.25 m = 4 squares [M1]*
  *Against back wall, centered 2 squares from side walls [A1]*
- *Sink: 0.5 m ÷ 0.25 m = 2 squares by 2 squares [M1]*
  *Against top wall, ≥ 4 squares from doorway and bath [A1]*

**Key**
1 square on the grid is 0.25 m by 0.25 m in the bathroom

**(Total for Question 9 is 4 marks)**

DO NOT WRITE IN THIS AREA

**10** Here are some numbers.

27.5 −17.3 63.1 4.6 −42.4 39.8 −9.7 58.6

(a) Work out the range of these numbers.

**(2)**

*Step 1: Identify the largest (maximum) and smallest (minimum) numbers:*

- Maximum value = 63.1
- Minimum value = −42.4

*Step 2: Calculate the range (Maximum − Minimum):*

Range = 63.1 − (−42.4) [M1]

- Subtracting a negative is the same as adding:

63.1 + 42.4 = 105.5 [M1]

105.5 [A1]

☑ (b) Show a check of your answer.

**(1)**

*Reverse Calculation Check:*

- Reverse the subtraction by subtracting 63.1 from the range 105.5:

105.5 − 63.1 = 42.4 (which equals −(−42.4)) [B1]

- Or: 105.5 + (−42.4) = 105.5 − 42.4 = 63.1

**(Total for Question 10 is 3 marks)**

DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA

**11** Charly is organising a party.
She needs to buy 90 party plates.

She finds this offer.

pack of 6 plates

normal price £3.55
now $\frac{1}{5}$ off the normal price

Charly has £45 to spend on the plates.

Does Charly have enough money to buy 90 plates?
Show why you think this.

**(5)**

*Step 1: Calculate the number of packs needed for 90 plates:*

*Number of packs = 90 ÷ 6 = 15 packs [M1]*

*Step 2: Calculate the discount per pack (1/5 off £3.55):*

- *Discount = £3.55 ÷ 5 = £0.71 per pack [M1]*

*Step 3: Calculate the sale price per pack:*

- *Sale price = £3.55 − £0.71 = £2.84 per pack [M1]*

*(Or: 4/5 × £3.55 = 4 × £0.71 = £2.84)*

*(Working continued on next page ->)*

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

Step 4: Calculate the total cost for 15 packs at £2.84 each:

Total cost = 15 × £2.84 [M1]

- 10 × £2.84 = £28.40
- 5 × £2.84 = £14.20
- Total = £28.40 + £14.20 = £42.60 [M1]

Step 5: Compare total cost (£42.60) with budget (£45.00):

- £42.60 is less than £45.00 (£42.60 < £45)
- Change left over = £45.00 − £42.60 = £2.40
- Therefore, Charly DOES have enough money.

Alternative method (calculate normal total first):

- Normal cost = 15 × £3.55 = £53.25
- Discount = £53.25 ÷ 5 = £10.65
- Sale total = £53.25 − £10.65 = £42.60 ≤ £45

Yes (£42.60 < £45)[A1]
