Master Functional Skills	Model Solutions (MFS)

Pearson Edexcel Functional Skills

Centre Number	Candidate Number
MFS-UK	PMAT1/N09

Set 9

Time: 25 minutes | Paper Reference **PMAT1/N09**

Mathematics

Level 1
Section A (Non–Calculator)

You must have:
Pen, HB pencil, eraser, ruler graduated in cm and mm, protractor, pair of compasses. Tracing paper may be used.

Total Marks: 14 /14

My signature confirms that I will not discuss the content of the test with anyone.

Signature: Master Functional Skills (MFS)

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Sign the declaration.
- Answer **all** questions.
- Write your final answers in the boxes provided.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- You **must** show clearly how you get your answers in the spaces provided. Marks will be awarded for your working out.
- Check your working and answers at each stage.
- Diagrams are **not** accurately drawn, unless otherwise indicated.
- **Calculators may not be used**.
- Take the value of π to be 3.14

Information

- The total mark for this section is 14.
- The marks for **each** question are shown in brackets – *use this as a guide as to how much time to spend on each question.*
- This sign ☑ shows where marks will be awarded for showing your checks.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

START LEARNING TODAY AT

MasterFunctionalSkills.co.uk

SECTION A

Answer ALL questions. Write your answers in the spaces provided.

1

(a) Work out 35^2

(2)

Step 1: Recall definition of squaring (multiply number by itself):

- $35^2 = 35 \times 35$

Step 2: Calculate using partitioned multiplication:

- $35 \times 30 = 1050$
- $35 \times 5 = 175$
- **Total = 1050 + 175 = 1225 [M1]**

Alternative Grid Method Check:

- $(30 + 5) \times (30 + 5) = 900 + 150 + 150 + 25 = 1225$ (Confirmed)

1225 [A1]

(b) Write 325 grams in kilograms.

(1)

Convert grams to kilograms (1 kg = 1000 g --> divide by 1000):

- **325 ÷ 1000 = 0.325 kg [B1]**

0.325 [B1] kg

(Total for Question 1 is 3 marks)

DO NOT WRITE IN THIS AREA

2 Carla needs to fill her car with diesel.

She sees the price of diesel in a service station.

Diesel
160p per litre

(a) Write the price of diesel in pounds.

(1)

Convert pence to pounds (100p = £1 --> divide by 100):

- 160p ÷ 100 = £1.60 per litre [B1]

£ 1.60 [B1]

Carla needs to buy 30 litres of diesel.

Diesel
160p per litre

She has £40

(b) Does Carla have enough money to buy 30 litres of diesel?

(2)

Step 1: Calculate total cost of 30 litres of diesel:

- Cost = 30 × £1.60

  30 × £1.00 = £30.00; 30 × £0.60 = £18.00

  Total cost = £30.00 + £18.00 = £48.00 [M1]

Step 2: Compare total cost with Carla's budget (£40):

- £48.00 > £40.00 (Carla is £8.00 short)
- No, Carla does not have enough money. [A1]

No [A1]

(Total for Question 2 is 3 marks)

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

3 Keira wants to be an apprentice.
She wants to apply to the company that has the greatest number of apprentices.

Company A has 80 employees.
20% of the employees are apprentices.

Company B has 300 employees.
5% of the employees are apprentices.

(a) Which company has the greatest number of apprentices?

(3)

Step 1: Calculate apprentices at Company A (20% of 80):

- *10% of 80 = 80 ÷ 10 = 8*
- **20% of 80 = 8 × 2 = 16 apprentices [M1]**

Step 2: Calculate apprentices at Company B (5% of 300):

- *10% of 300 = 300 ÷ 10 = 30*
- **5% of 300 = 30 ÷ 2 = 15 apprentices [M1]**

Step 3: Compare number of apprentices between companies:

- **16 > 15**
- **Company A has the most apprentices (16 vs 15). [A1]**

(b) Use a reverse calculation to show a check of your answer.

(1)

Reverse check using multiplication (inverse of division):

- **8 × 10 = 80 employees in Company A [B1]**

8 × 10 = 80
Company A [A1][B1]

(Total for Question 3 is 4 marks)

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

4 The distance between Calais and Nice is 1195 km.

(a) Write 1195 in words.

(1)

Write 1195 in words:

One thousand one hundred and ninety-five [B1]

3 friends will drive a total distance of 1225.3 km.
They will share the driving equally.

They estimate each person will drive 295 km.

(b) Use **estimation** to work out if each person will drive 295 km.
You **must** show your working.

(3)

Step 1: Round figures to convenient manageable numbers:

- Round total distance: 1225.3 km ≈ 1200 km [B1]

Step 2: Estimate distance driven by each of the 3 friends:

- Estimated distance per person = 1200 ÷ 3 = 400 km [M1]

Step 3: Compare estimated distance with 295 km:

- 400 km is significantly greater than 295 km (difference of 105 km)
- No, each person will drive approximately 400 km, not 295 km. [A1]

No (approx 400 km) [A1]

(Total for Question 4 is 4 marks)

TOTAL FOR SECTION A IS 14 MARKS

Please check the examination details below before entering your candidate information

Candidate surname	Other names
Master Functional Skills	Model Solutions (MFS)

Pearson Edexcel Functional Skills

Centre Number	Candidate Number
MFS-UK	PMAT1/C09

Set 9

Time: 1 hour 30 minutes | Paper Reference **PMAT1/C09**

Mathematics

Level 1
Section B (Calculator)

You must have:
Pen, calculator, HB pencil, eraser, ruler graduated in cm and mm, protractor, pair of compasses. Tracing paper may be used.

Total Marks: 42 /42

My signature confirms that I will not discuss the content of the test with anyone.

Signature: Master Functional Skills (MFS)

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Sign the declaration.
- Answer **all** questions.
- Write your final answers in the boxes provided.
- Answer the questions in the spaces provided – *there may be more space than you need.*

SECTION B

Answer ALL questions. Write your answers in the spaces provided.

1 Marlene competes in sprint races.
She wants to qualify to race in a team.

Here are the times, in seconds, of her last 4 races.

24.99 23.07 23.7 24.54

Marlene needs the mean time of her last 4 races to be less than 23.9 seconds to qualify.

Is the mean time of her last 4 races less than 23.9 seconds?

(3)

Step 1: Calculate total sprint race time across all 4 races:

- *Sum = 24.99 + 23.07 + 23.70 + 24.54 = 96.30 seconds [M1]*

Step 2: Calculate mean race time (Total ÷ Number of races):

- *Mean = 96.30 ÷ 4 = 24.075 seconds [M1]*

Step 3: Compare mean race time with qualifying threshold (23.9 s):

- *24.075 s > 23.900 s (Marlene is 0.175 s slower than needed)*
- *No, her mean time is not less than 23.9 seconds. [A1]*

Alternative target total check:

- *4 × 23.9 s = 95.6 s needed; actual 96.3 s > 95.6 s (Confirmed)*

No *[A1]*

(Total for Question 1 is 3 marks)

DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA

2 Rio has a mobile car wash business.
He has a tank for water in his van.

The tank is in the shape of a cuboid 0.9 m wide and 0.9 m long.
When full, the water in the tank is 0.4 m deep.

Rio uses 45 litres of water to wash each car.

$1 m^3 = 1000$ litres

Rio thinks there is enough water in a full tank to wash 8 cars.

Is Rio correct?
Show why you think this.

(4)

Step 1: Calculate volume of the cuboid water tank (V = l × w × h):

- $V = 0.9\ m \times 0.9\ m \times 0.4\ m = 0.324\ m^3$ [M1]

Step 2: Convert volume from cubic metres to litres (1 m^3 = 1000 L):

- Tank capacity = 0.324 × 1000 = 324 litres [M1]

Step 3: Calculate water needed to wash 8 cars (45 L per car):

- Water needed = 8 × 45 litres = 360 litres [M1]

Step 4: Compare water available with water needed:

- 324 litres < 360 litres (tank is 36 litres short)
- No, Rio is not correct (enough for only 324 ÷ 45 = 7.2 cars). [A1]

Alternative check in cubic metres:

- 360 L ÷ 1000 = 0.36 m^3 needed; tank is only 0.324 m^3 (Confirmed)

No [A1]

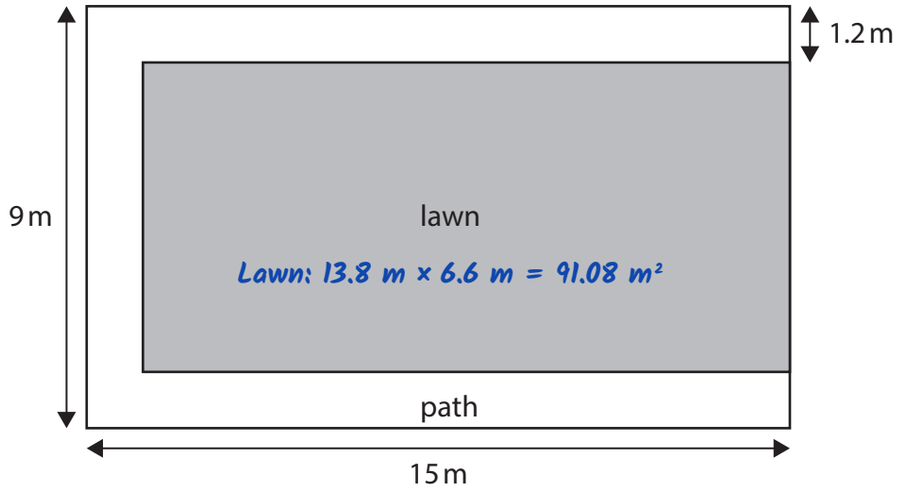

(Total for Question 2 is 4 marks)

3 Ella is making a path around three sides of her lawn.
The lawn is in the shape of a rectangle.

The width of the path will be 1.2 m

All corners on the path are right angles.

Ella will cover the path with gravel.

Gravel is sold in bags.
Each bag of gravel covers 3 m^2

Work out the number of bags of gravel Ella needs to buy to cover the path.

(5)

Step 1: Calculate total area of the outer boundary rectangle:

- **Outer area = 15 m × 9 m = 135 m^2 [M1]**

Step 2: Calculate inner dimensions of the rectangular lawn:

- Lawn length = 15 m − 1.2 m = 13.8 m
- Lawn width = 9 m − (1.2 m + 1.2 m) = 9 − 2.4 = 6.6 m [M1]
- **Lawn area = 13.8 m × 6.6 m = 91.08 m^2 [M1]**

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

Step 3: Calculate total area of the gravel path:

- Path area = Outer area − Lawn area
- **Path area = 135 m² − 91.08 m² = 43.92 m² [M1]**

Step 4: Calculate number of bags of gravel (each bag covers 3 m²):

- **Bags needed = 43.92 ÷ 3 = 14.64 bags [M1]**

Step 5: Round up to full bags to ensure full coverage:

- 14 bags cover only 14 × 3 = 42 m² (not enough)
- **Ella must buy 15 bags of gravel. [A1]**

Alternative strip method check:

- Top strip: 15 × 1.2 = 18 m²
- Bottom strip: 15 × 1.2 = 18 m²
- Left strip: 6.6 × 1.2 = 7.92 m²
- Total = 18 + 18 + 7.92 = 43.92 m²; 43.92 ÷ 3 = 14.64 --> 15 bags (Confirmed)

15 bags [A1]

(Total for Question 3 is 5 marks)

4 Colin wants to buy a new television.
He sees this offer.

Television
Normal price £599
Now 35% off the normal price

Colin uses the offer.

Work out the price of the television using the offer.

(3)

Step 1: Calculate the discount amount (35% of £599):

- *35% = 0.35*
- **Discount = £599 × 0.35 = £209.65 [M1]**

Step 2: Subtract discount from normal price to get offer price:

- **Offer price = £599.00 − £209.65 = £389.35 [M1, A1]**

Alternative Multiplier Method Check:

- *100% − 35% = 65% = 0.65 of original price*
- *Offer price = £599 × 0.65 = £389.35 (Confirmed)*

£ **389.35** *[A1]*

(Total for Question 4 is 3 marks)

5 Jessica wants to sell her house.

She has this information about the selling prices of houses in her street.

£199 000 £195 500 £225 550 £190 995 £229 000

Jessica thinks the range of these selling prices is more than £35 000

(a) Is Jessica correct?
Show why you think this.

(2)

Step 1: Identify maximum and minimum selling prices in the street:

- Highest price (Maximum) = £229 000
- Lowest price (Minimum) = £190 995

Step 2: Calculate the range (Maximum – Minimum):

- **Range = £229 000 – £190 995 = £38 005 [M1]**

Step 3: Compare range with £35 000:

- **£38 005 > £35 000 (exceeds £35 000 by £3005)**
- **Yes, Jessica is correct: range > £35 000. [A1]**

Yes [A1]

(b) Show a check of your answer.

(1)

Reverse check using addition (inverse of subtraction):

- **£190 995 + £38 005 = £229 000 (Confirmed) [B1]**

(Total for Question 5 is 3 marks)

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

6

(a) Write 35% as a decimal.

(1)

Convert percentage to decimal (divide by 100):

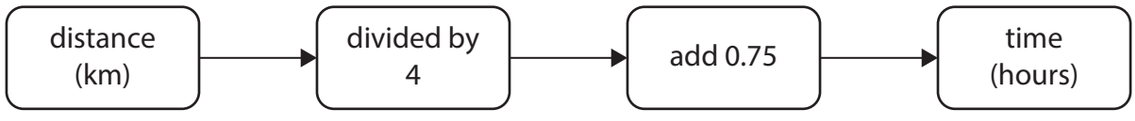

- 35% = 35 ÷ 100 = 0.35 [B1]

0.35 [B1]

Pete uses a map to plan a route for walking.
The route he will walk today is 14 cm on the map.

1 cm on the map represents 2.5 km on the route

Pete uses this rule to work out the time needed to walk the route.

(b) Work out the time needed to walk the route.
Give your answer in **hours** and **minutes**.

(5)

Step 1: Calculate actual walking distance using map scale (1 cm = 2.5 km):

- Actual distance = 14 cm × 2.5 km/cm = 35 km [M1]

Step 2: Apply Pete's formula (distance ÷ 4 + 0.75):

- Divide distance by 4: 35 ÷ 4 = 8.75 hours [M1]
- Add 0.75: 8.75 + 0.75 = 9.50 hours [M1]

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

Step 3: Convert decimal hours (9.5 hours) into hours and minutes:

- *Whole hours = 9 hours*
- *Remaining hours = 0.5 hours*
- ***Convert to minutes: 0.5 × 60 = 30 minutes [M1]***
- ***Total time needed = 9 hours 30 minutes [A1]***

Verification check in total minutes:

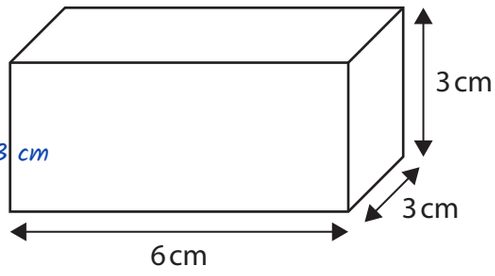

- *9.5 hours × 60 min/hr = 570 minutes*
- *570 ÷ 60 = 9 with remainder 30 --> 9 hours 30 minutes (Confirmed)*

9 hours *30* minutes *[A1]*

8 Layla buys a box of doughnuts.
Each doughnut is filled with either jam or apple or chocolate.

In the box there are

- 7 jam doughnuts
- 15 apple doughnuts
- 18 chocolate doughnuts.

Layla opens the box and picks a doughnut at random.

(a) What is the probability that Layla picks a jam doughnut?

(2)

Step 1: Calculate total number of doughnuts in the box:

- *Total = 7 + 15 + 18 = 40 doughnuts [M1]*

Step 2: Express probability of selecting jam as a fraction:

- *P(Jam) = Number of jam doughnuts ÷ Total doughnuts*
- *P(Jam) = 7 / 40 [A1]*

[A1] $\frac{7}{40}$

The probability that a person does not like doughnuts is $\frac{1}{10}$

(b) Which of these words describes this probability?

(1)

Tick [✓] a box to show your answer.

[ ] impossible

[✓] unlikely *1/10 = 0.10 (10%) is close to 0 --> unlikely [B1]* *[B1]*

11 Jon is tiling a swimming pool.
He needs to buy 120 boxes of tiles in total.

He buys boxes of blue tiles and boxes of white tiles in the ratio 1 : 4

Each box of blue tiles costs £23.99
Each box of white tiles costs £16.75

Work out the total cost of all the tiles Jon needs.
You **must** show your working.

(5)

Step 1: Find total parts in the ratio of blue to white tiles (1 : 4):

- *Total parts = 1 + 4 = 5 parts [M1]*

Step 2: Calculate the number of boxes represented by 1 part:

- *1 part = 120 boxes ÷ 5 = 24 boxes [M1]*
- *Blue tile boxes (1 part) = 1 × 24 = 24 boxes*

Step 3: Calculate the number of white tile boxes (4 parts):

- *White tile boxes = 4 × 24 = 96 boxes [M1]*
- *Verification of total: 24 + 96 = 120 boxes (Confirmed)*

Step 4: Summary of boxes to purchase:

- *24 boxes of blue tiles at £23.99 per box*
- *96 boxes of white tiles at £16.75 per box*

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

Step 5: Calculate total cost of blue tiles:

- **Cost of blue tiles = 24 × £23.99 = £575.76 [M1]**

Step 6: Calculate total cost of white tiles:

- **Cost of white tiles = 96 × £16.75 = £1608.00 [M1]**

Step 7: Calculate total overall cost of all tiles:

- **Total cost = £575.76 + £1608.00 = £2183.76 [M1, A1]**

Alternative Ratio Set Method Check:

- 1 set of tiles (1 blue + 4 white) = 5 boxes
- Cost of 1 set = £23.99 + (4 × £16.75) = £23.99 + £67.00 = £90.99
- Number of sets = 120 ÷ 5 = 24 sets
- Total cost = 24 × £90.99 = £2183.76 (Confirmed)

£ **2183.76** [A1]
