MFS-UK	PRACL1/N03

Practice Set 3

Time: 25 minutes | Paper Reference **PRACL1/N03**

Mathematics

Level 1
Section A (Non – Calculator)

You must have:
Pen, HB pencil, eraser, ruler graduated in cm and mm, protractor, pair of compasses. Tracing paper may be used.

Total Marks: 14 /14

My signature confirms that I will not discuss the content of the test with anyone.

Signature: Master Functional Skills (MFS)

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Sign the declaration.
- Answer **all** questions.
- Write your final answers in the boxes provided.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- You **must** show clearly how you get your answers in the spaces provided. Marks will be awarded for your working out.
- Check your working and answers at each stage.
- Diagrams are **not** accurately drawn, unless otherwise indicated.
- **Calculators may not be used.**
- Take the value of π to be 3.14

Information

- The total mark for this section is 14.
- The marks for **each** question are shown in brackets.
  – *use this as a guide as to how much time to spend on each question.*
- This sign ☑ shows where marks will be awarded for showing your checks.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

START LEARNING TODAY AT

MasterFunctionalSkills.co.uk

SECTION A

Answer ALL questions. Write your answers in the spaces provided.

1 Here are 4 numbers.

29.4 50.8 24.7 19.9

Work out the mean of these numbers.

(3)

Step 1: Calculate the sum of all 4 numbers:

29.4 + 50.8 + 24.7 + 19.9 [M1]

- 29.4 + 50.8 = 80.2
- 80.2 + 24.7 = 104.9
- 104.9 + 19.9 = 124.8

Total sum = 124.8

Step 2: Divide the total sum by 4 (the count of numbers):

Mean = 124.8 ÷ 4 [M1]

- 120 ÷ 4 = 30
- 4.8 ÷ 4 = 1.2
- 30 + 1.2 = 31.2 [A1]

31.2 [A1]

(Total for Question 1 is 3 marks)

S 6 8 4 6 0 A 0 2 0 8

DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA

2

Work out $12^2 + 208$

(3)

Follow the Order of Operations (BIDMAS: Indices first):

Step 1: Calculate 12^2 (12 squared):

$12^2 = 12 \times 12 = 144$ [M1]

Step 2: Add 208 to 144:

$144 + 208$ [M1]

$$\begin{array}{r} 144 \\ +\ 208 \\ \hline 352 \end{array}$$ [A1]

352 [A1]

(Total for Question 2 is 3 marks)

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

3 Greta manages a visitor attraction.
She knows 48 600 people visited the attraction last spring.

Greta says

> "There has been a 15% increase in the number of visitors this spring compared to spring last year."

(a) Work out how many people visited the attraction in spring this year for Greta.

(3)

Part (a): Calculate a 15% increase on 48 600 visitors:

Find 15% non-calculator using 10% and 5%:

- **10% of 48 600 = 48 600 ÷ 10 = 4 860 [M1]**
- **5% of 48 600 = 4 860 ÷ 2 = 2 430**
- **15% increase = 4 860 + 2 430 = 7 290 visitors [M1]**

Add the increase to last year's attendance:

Total this spring = 48 600 + 7 290 = 55 890 visitors [A1]

55 890 [A1]

(b) Use reverse calculations to show a check of your working.

(1)

Part (b): Reverse calculation check (subtract the increase):

55 890 − 7 290 = 48 600 [B1]

Matches the original 48 600 visitors exactly!

55 890 − 7 290 = 48 600 [B1]

(Total for Question 3 is 4 marks)

DO NOT WRITE IN THIS AREA

4 Fabio is a restaurant manager.

He has this list of jobs.

jobs	
check supplies	$\frac{3}{4}$ of an hour
write rotas	1 hour 20 minutes
update social media	50 minutes
do accounts	$1\frac{1}{2}$ hours

Fabio thinks he can complete all of these jobs in $4\frac{1}{4}$ hours.

Is Fabio correct?
You **must** show your working.

(4)

Step 1: Convert all job times into minutes:

- *Check supplies: ¾ hr = 45 mins [M1] | Write rotas: 1 hr 20 mins = 80 mins*
- *Update social media: 50 mins | Do accounts: 1½ hrs = 90 mins*

Step 2: Calculate total time required for all jobs:

Total time = 45 + 80 + 50 + 90 = 265 minutes (4 hrs 25 mins) [M1]

Step 3: Convert Fabio's estimated time (4¼ hours) to minutes:

4¼ hours = (4 × 60) + 15 = 240 + 15 = 255 minutes (4 hrs 15 mins) [M1]

Step 4: Compare times and decide:

265 minutes > 255 minutes (it takes 10 minutes longer than 4¼ hours).

Therefore, Fabio is NOT correct.

No *[A1]*

(Total for Question 4 is 4 marks)

TOTAL FOR SECTION A IS 14 MARKS

SECTION B

Answer ALL questions. Write your answers in the spaces provided.

1 Here are five numbers.

10 754 9241 4249 7012 13 958

(a) Calculate the range of these numbers.

(2)

Part (a): Range = Largest value – Smallest value

- *Largest number = 13 958*
- *Smallest number = 4 249*

Range = 13 958 – 4 249 = 9 709 [M1 A1]

9 709 *[A1]*

☑ (b) Use estimation to show a check of your answer.

(1)

Part (b): Check using estimation (round to the nearest thousand):

- *13 958 rounds to 14 000*
- *4 249 rounds to 4 000*

Estimated range = 14 000 – 4 000 = 10 000 [B1]

10 000 is very close to our calculated answer 9 709, confirming it is correct.

(Total for Question 1 is 3 marks)

DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA

2 Emily is making sausage rolls for a party.

She has this list of ingredients.

ingredients for 4 sausage rolls

450 g	sausage meat
1	egg
1	red onion
250 g	ready-made pastry

Emily wants to make 75 sausage rolls for the party.

ready-made pastry comes in packs.
There are 500 g of pastry in each pack.

Emily thinks 9 packs of ready-made pastry is the smallest number she needs to make 75 sausage rolls.

Is Emily correct?
Show why you think this.

(4)

Step 1: Find the amount of pastry needed per sausage roll:

250 g makes 4 rolls : 250 ÷ 4 = 62.5 g per sausage roll [M1]

Step 2: Find total pastry needed for 75 sausage rolls:

75 × 62.5 g = 4 687.5 g of ready-made pastry [M1]

Step 3: Calculate the number of 500 g packs needed:

4 687.5 ÷ 500 = 9.375 packs [M1]

Since packs must be bought whole, Emily needs 10 packs.

Alternative check using 9 packs:

9 packs = 9 × 500 g = 4 500 g : 4 500 ÷ 62.5 = 72 rolls (3 short of 75).

Conclusion:

Emily is NOT correct (she needs 10 packs to make 75 rolls).

No [A1]

(Total for Question 2 is 4 marks)

3 Gareth is changing his gas supplier to GES Energy.

He has this information.

GES Energy

annual fee £231.65
plus
4.71 pence for each kWh used

get 5% off the total charge if you pay by direct debit

Last year Gareth used 42 000 kWh of gas.

Gareth thinks he will use the same amount of gas this year.
He will pay by direct debit.

Work out the total gas bill Gareth will pay using GES Energy.

(5)

Step 1: Calculate the cost of gas used (42 000 kWh at 4.71p):

42 000 × 4.71 pence = 197 820 pence [M1]

Convert to pounds (£): 197 820 ÷ 100 = £1 978.20

Step 2: Add the annual standing charge fee:

Total before discount = £1 978.20 + £231.65 = £2 209.85 [M1]

Step 3: Calculate the 5% direct debit discount:

5% of £2 209.85 = £2 209.85 × 0.05 = £110.4925 [M1]

Step 4: Subtract discount to find final bill:

Total gas bill = £2 209.85 − £110.4925 = £2 099.3575 [M1]

(Or multiply by 0.95: £2 209.85 × 0.95 = £2 099.3575)

Step 5: Round to 2 decimal places for currency:

= £2 099.36 (rounded to nearest penny) [A1]

5 Here is information about the distances travelled in miles by some people yesterday.

distance (miles)

5	4	12	8
1	2	8	7
18	7	9	11
11	22	7	6
2	3	3	1

Sandro starts to show this information in a grouped frequency table.

Complete the grouped frequency table.
Use five equal groups.

(3)

distance (miles)	tally	frequency
1 to 5	𝍸 | | |	8
6 to 10	𝍸 | |	7 [B1]
11 to 15	| | |	3 [B1]
16 to 20	|	1
21 to 25	|	1 [B1]

Verification of grouped data (Total 20 people):

- 1 to 5 miles: 5, 4, 1, 2, 2, 3, 3, 1 : Frequency = 8
- 6 to 10 miles: 8, 8, 7, 7, 9, 7, 6 : Frequency = 7
- 11 to 15 miles: 12, 11, 11 : Frequency = 3
- 16 to 20 miles: 18 : Frequency = 1
- 21 to 25 miles: 22 : Frequency = 1

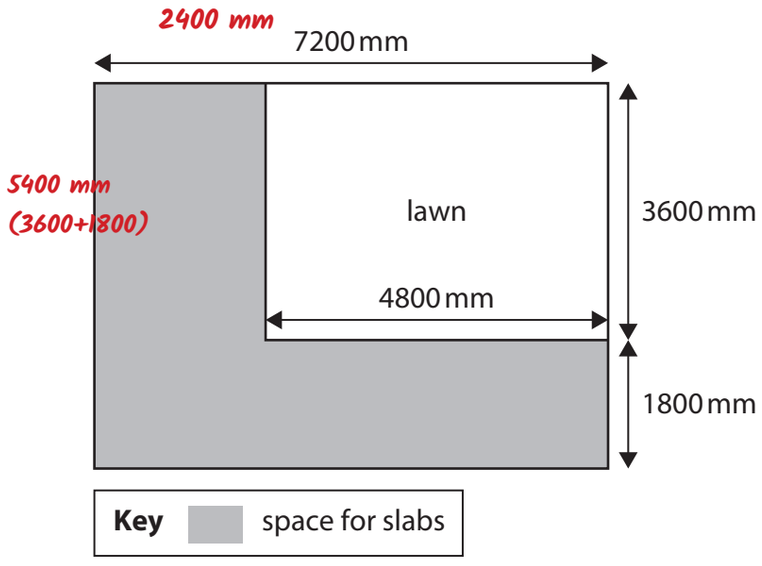

Total check: 8 + 7 + 3 + 1 + 1 = 20 peop ✓

(Total for Question 5 is 3 marks)

6 Maninder wants to put slabs in part of her garden.

She has this sketch.

All corners are right angles.

Each slab is in the shape of a square with sides of length 600 mm.

Maninder thinks she needs 65 slabs for this part of the garden.

Are 65 slabs enough for this part of the garden?
Show why you think this.

(6)

Step 1: Find missing lengths of the slab area:

- **Width of left section = 7200 − 4800 = 2400 mm [M1]**
- **Total height of garden = 3600 + 1800 = 5400 mm**

Step 2: Split L-shape into 2 rectangular sections:

Section A (Bottom strip): 7200 mm by 1800 mm

- *Slabs along length = 7200 ÷ 600 = 12 slabs [M1]*
- *Slabs along width = 1800 ÷ 600 = 3 slabs [M1]*
- **Total for Section A = 12 × 3 = 36 slabs [M1]**

Section B (Left vertical strip): 2400 mm by 3600 mm

- *Slabs along width = 2400 ÷ 600 = 4 slabs [M1]*
- *Slabs along height = 3600 ÷ 600 = 6 slabs*
- **Total for Section B = 4 × 6 = 24 slabs [M1]**

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

Step 3: Calculate the total number of slabs required:

Total slabs = Section A (36) + Section B (24) = 60 slabs [M1 A1]

Alternative Area Method check:

- Area of Section A = 7.2 m × 1.8 m = 12.96 m²
- Area of Section B = 2.4 m × 3.6 m = 8.64 m²
- Total slab area = 12.96 + 8.64 = 21.6 m²
- Area of 1 slab = 0.6 m × 0.6 m = 0.36 m²
- **Slabs needed = 21.6 ÷ 0.36 = 60 slabs** ✓

Step 4: Comparison with Maninder's 65 slabs:

Maninder has 65 slabs. She only needs 60 slabs.

60 <= 65 (she will have 5 slabs left over).

Yes, 65 slabs are enough for this part of the garde ✓

Yes [A1]

(Total for Question 6 is 6 marks)

7 Graham is the manager of a fast food restaurant.

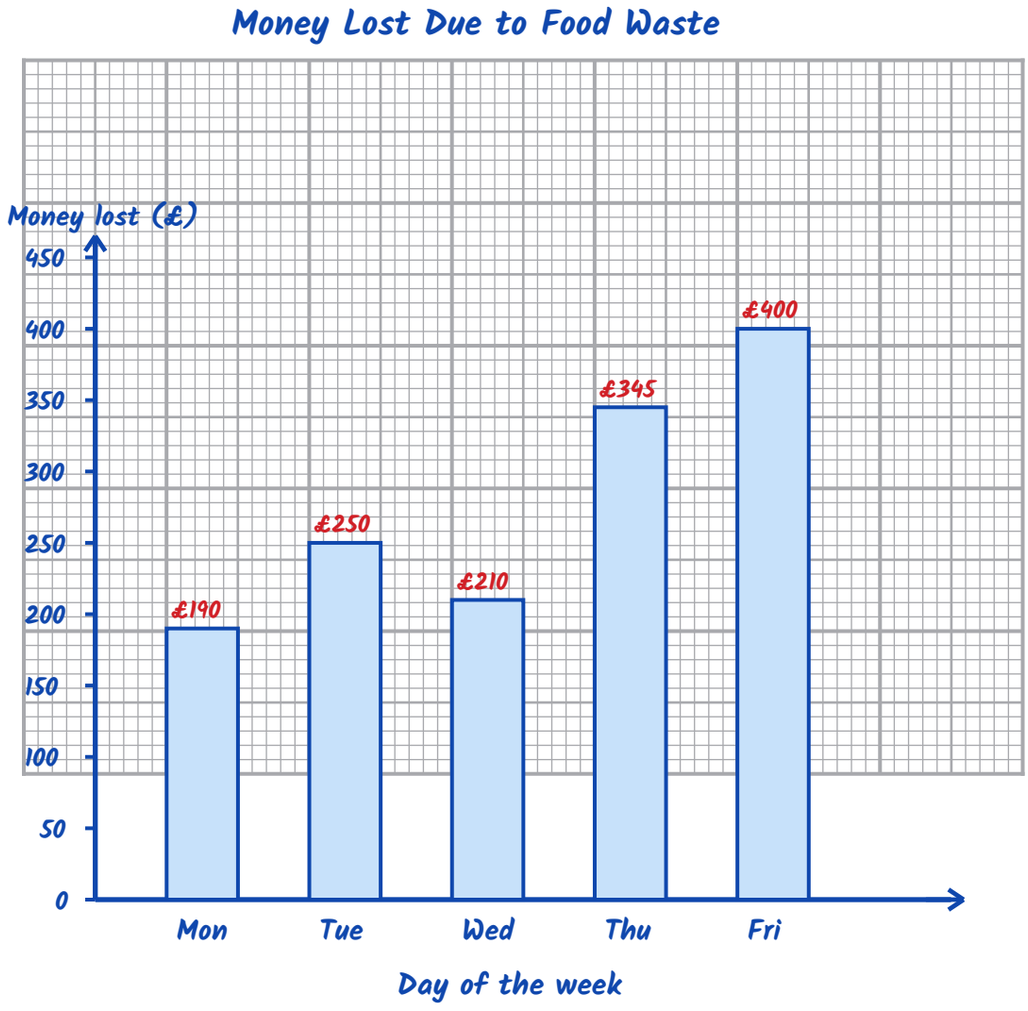

The table shows the amount of money lost due to food waste for five days.

	Mon	Tue	Wed	Thu	Fri
amount of money (£)	190	250	210	345	400

Graham wants to draw a graph to show the amount of money lost due to food waste.

Draw a suitable graph for Graham.

(3)

- Linear vertical scale: 1 large square = £50 (1 small square = £10) [M1]
- Fully labelled axes: Money lost (£) and Day of the week [M1]
- Correct bar heights plotted accurately for all 5 days [A1]

(Total for Question 7 is 3 marks)

DO NOT WRITE IN THIS AREA

8

(a) Write $1\frac{3}{4}$ as a percentage.

(1)

Part (a): Convert 1¾ to a percentage:

- 1 whole = 100%
- ¾ = 0.75 = 75%

1¾ = 100% + 75% = 175% [B1]

175 [B1] %

(b) Write $1\frac{2}{3}$ as a decimal.
Give your answer correct to two decimal places.

(2)

Part (b): Convert 12/3 to a decimal (2 decimal places):

- 2/3 = 2 ÷ 3 = 0.6666... [M1]
- 12/3 = 1 + 0.6666... = 1.6666...

Round to 2 decimal places: look at the third decimal digit (6 ≥ 5):

1.6666... rounds up to 1.67 [A1]

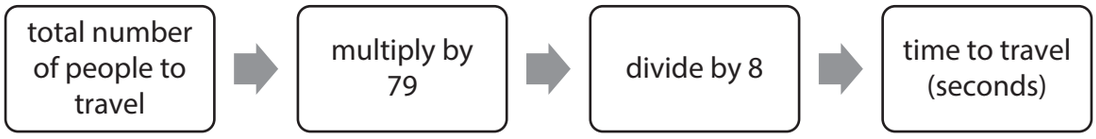

1.67 [A1]

(Total for Question 8 is 3 marks)

9 Natasha is designing a building with a restaurant on the top floor.

She needs to know how long it will take for a total of 40 people to travel in the lift from the ground floor to the restaurant.

Natasha uses this formula.

Natasha thinks it will take more than 6 minutes for a total of 40 people to travel in the lift from the ground floor to the restaurant.

Is Natasha correct?
Show why you think this.

(4)

Step 1: Apply the formula for 40 people:

- Multiply total people by 79: 40 × 79 = 3 160 [M1]
- Divide by 8: 3 160 ÷ 8 = 395 seconds [M1]

Time to travel = 395 seconds

Step 2: Convert 6 minutes into seconds:

6 minutes = 6 × 60 seconds = 360 seconds [M1]

(Or: 395 ÷ 60 = 6.583 minutes = 6 minutes 35 seconds)

Step 3: Compare times and decide:

395 seconds > 360 seconds (it takes 35 seconds longer than 6 minutes).

Natasha thinks it will take more than 6 minutes.

Therefore, Natasha is CORRECT. ✓

Yes [A1]

10 George is a farmer.

He is going to put water piping along all the edges of a field.

George draws this sketch of the field

Water piping costs £0.59 per metre.

Calculate the total cost of the water piping George needs for this field.

(3)

Step 1: Calculate the total perimeter of the field (sum of all 6 edges):

Perimeter = 64 + 68 + 90 + 26 + 26 + 42 [M1]

= 316 metres of piping needed

Step 2: Multiply total metres by the unit cost (£0.59 per metre):

Total cost = 316 × £0.59 [M1]

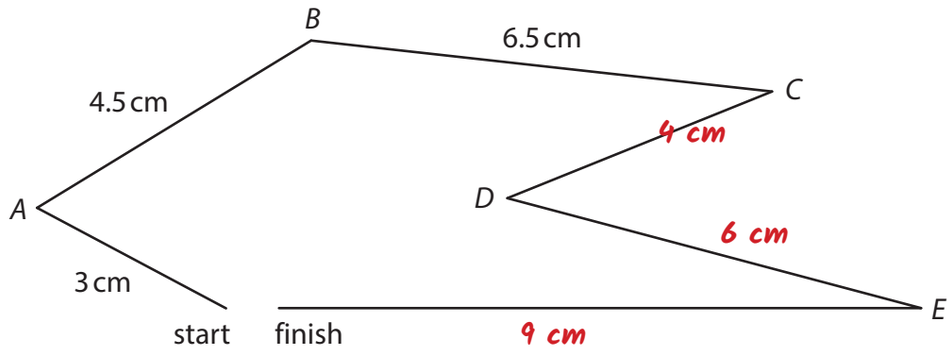

= £186.44 [A1]

£ 186.44 [A1]

(Total for Question 10 is 3 marks)

11 John is organising a charity sailing race on the sea.

He starts to draw this accurate scale map of the course.

Key 1cm on the map is $\frac{1}{2}$ km on the sea

Sailors begin the race at the start and follow the course to the finish.

John says

"The course has a total distance of more than 18 km."

(a) Is John correct?
You **must** show your working.

(4)

Step 1: Measure unlabelled legs on the scale map (± 2 mm):

- Leg C to D = 4 cm
- Leg D to E = 6 cm
- Leg E to Finish = 9 cm [M1]

Step 2: Calculate total distance on the map:

Total map distance = 3 + 4.5 + 6.5 + 4 + 6 + 9 = 33 cm [M1]

Step 3: Convert map distance to real distance at sea (1 cm = ½ km):

Real sea distance = 33 × 0.5 km = 16.5 km [M1]

Step 4: Compare with John's statement (> 18 km):

16.5 km < 18 km (the course is shorter than 18 km).
Therefore, John is NOT correct.

No [A1]
