Past Paper 10

Time: 25 minutes | Paper Reference **PMAT2/N10**

Mathematics

Level 2
Section A (Non-Calculator)

You must have:
Pen, HB pencil, eraser, ruler graduated in cm and mm, protractor, pair of compasses. Tracing paper may be used.

Total Marks 16 /16

My signature confirms that I will not discuss the content of the test with anyone.

Signature: Master Functional Skills (MFS)

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Sign the declaration.
- Answer **all** questions.
- Write your final answers in the boxes provided.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- You **must** show clearly how you get your answers in the spaces provided. Marks will be awarded for your working out.
- Check your working and answers at each stage.
- Diagrams are **not** accurately drawn, unless otherwise indicated.
- **Calculators may not be used**.
- Take the value of π to be 3.14

Information

- The total mark for this section is 16.
- The marks for **each** question are shown in brackets – *use this as a guide as to how much time to spend on each question.*
- This sign ☑ shows where marks will be awarded for showing your checks.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

SECTION A

Answer ALL questions. Write your answers in the spaces provided.

1

(a) Write 50 as a fraction of 125
Give your answer in its simplest form.

(1)

$$\frac{50}{125} \begin{matrix} \div 25 \\ \div 25 \end{matrix} = \frac{2}{5}$$

Divide top & bottom by HCF = 25

$\frac{2}{5}$

(b) Work out 18.17 + 4.398
Remember to show your working.

(2)

```
  1   1        (carries)
  1 8.1 7 0
+   4.3 9 8
-------------
  2 2.5 6 8
-------------
```

Pad with 0 to keep decimal columns aligned

22.568

(Total for Question 1 is 3 marks)

2 Work out $5\frac{3}{4} - 2\frac{5}{8}$

Give your answer as a mixed number.
You **must** show your working.

(3)

$5\frac{3}{4} - 2\frac{5}{8}$ Step 1: Convert to improper fractions

$= \frac{23}{4} - \frac{21}{8}$ $\times 2$ $\times 2$ Step 2: Common denominator of 8

$= \frac{46}{8} - \frac{21}{8}$

$= \frac{25}{8} = 3\frac{1}{8}$ Step 3: 25 ÷ 8 = 3 remainder 1

$3\frac{1}{8}$

(Total for Question 2 is 3 marks)

DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA

3 Hana wants to buy a new washing machine.
She will use one of these offers.

Offer A	**Offer B**
24 monthly payments of £30	normal price £954 now 22% off

Hana wants to spend the least amount of money.

Which offer should Hana use?
Show why you think this.

(4)

Offer A:

24 × £30 = £720

24
× 30
720

Offer B (22% off £954):

10% of £954 = £95.40
20% of £954 = £190.80 (× 2)

1% of £954 = £9.54
2% of £954 = £19.08 (× 2)

22% discount = 190.80 + 19.08 = £209.88

Sale Price = £954 − £209.88 = £744.12

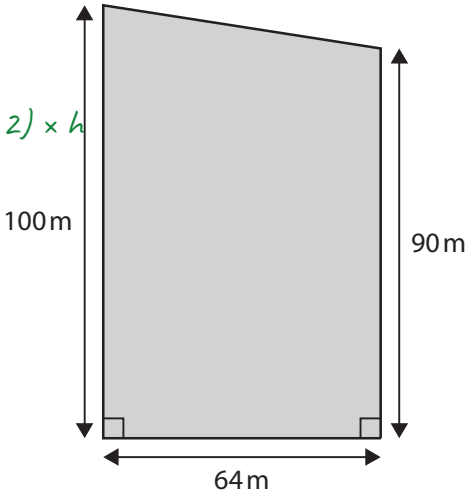

borrow: 4 13 9 10
9 5 4 . 0 0
− 2 0 9 . 8 8
7 4 4 . 1 2

Offer A (£720) is cheaper than Offer B (£744.12)
Difference: £744.12 − £720 = £24.12 cheaper

Offer A is cheaper (£720)

(Total for Question 3 is 4 marks)

4 Jack is managing a concert.
The diagram shows the total floor space for the concert.

Trapezium:
Area = ((a + b) ÷ 2) × h
a = 100m, b = 90m
h = 64m

Jack receives £21 for each square metre of floor space from ticket sales.

He donates $\frac{1}{7}$ of the total he receives from ticket sales to a charity.

How much money does Jack donate to the charity?
You **must** show your working.

(6)

Step 1: Find total floor space (Area of Trapezium)

$$\text{Area} = \frac{100 + 90}{2} \times 64 = 95 \times 64$$

$$= 6{,}080 \text{ m}^2$$

```
  2 3  (carries)
    9 5
x   6 4
-------
  3 8 0   (95 × 4)
5 7 0 0   (95 × 60)
-------
  1
-------
6 0 8 0
```

Step 2: Calculate ticket revenue (£21 per m²)

Total sales = 6,080 × £21

= £127,680

```
  1      (carry)
  6 0 8 0
x     2 1
---------
  6 0 8 0
1 2 1 6 0 0
---------
1 2 7 6 8 0
```

Continued on next page for charity donation calculation ->>

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

Step 3: Charity donation (1/7 of total ticket sales)

Donation = £127,680 ÷ 7

$$7 \overline{)\,1\,2^{5}\,7^{1}\,6^{2}\,8\,0} = 0\,1\,8\,2\,4\,0$$

Jack donates: £18,240 to charity

*** Tutor Exam Shortcut:**

Since Jack donates 1/7 of £21 per m^2, he donates exactly £21 ÷ 7 = £3 per m^2!

So Donation = 6,080 m^2 × £3 = £18,240 (Fast method and prevents errors!)

£ 18,240

(Total for Question 4 is 6 marks)

TOTAL FOR SECTION A IS 16 MARKS

SECTION B

Answer ALL questions. Write your answers in the spaces provided.

1 Marta and Aki want to move into a two-bedroom flat.
Marta will have the bigger bedroom.

The total monthly rent for the flat is £720
Marta and Aki will share the cost of the rent in the ratio 9 : 7

Marta thinks she will pay less than £400 a month in rent.

Is Marta correct?
Show why you think this.

(3)

Ratio = Marta : Aki = 9 : 7

Total parts = 9 + 7 = 16 parts

Value of 1 part = £720 ÷ 16 = £45

Marta has the bigger bedroom -> 9 parts

↓

Marta pays: 9 × £45 = £405

(Aki pays: 7 × £45 = £315; Check: 405 + 315 = £720)

Marta thinks she will pay less than £400.

£405 > £400, so Marta is NOT correct.

She pays £405 (£5 more than £400).

No (she pays £405)

(Total for Question 1 is 3 marks)

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

2 Ben is the manager of a mobile phone shop.

He starts to record the sales of mobile phones to 50 customers.

		Model		
		Mini	**Regular**	**Maxi**
Storage	**64 GB**	5	2	4
	128 GB	7	9	6
	256 GB	6	8	3

(a) Complete the table for Ben.

(1)

Working for table:

Total customers = 50

Sum of known = (5+2+4) + (7+9+6) + (6+8) = 11 + 22 + 14 = 47

Missing Maxi 256GB = 50 – 47 = 3

Ben selects at random one of the customers who bought a mini mobile phone.

(b) What is the probability that this customer bought a 128 GB mobile phone?

(2)

Total customers who bought a Mini phone:

Total Mini = 5 + 7 + 6 = 18 customers

Number of Mini customers who bought 128 GB = 7

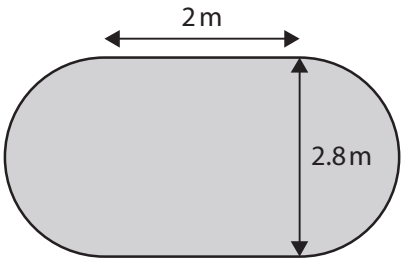

Probability = $\frac{7}{18}$ (Condition: out of Mini phones only!)

$\frac{7}{18}$

(Total for Question 2 is 3 marks)

3 Emma hires a large tent for a party.

The diagram shows the shape of the ceiling of the tent.
The ceiling is made up of a rectangle and two semi-circles.

Emma wants to put a flower garland around the edge of the ceiling.

She has 40 feet in length of flower garland.

Use 1 metre = 3.3 feet

Does Emma have enough flower garland to go around the edge of the ceiling?

(4)

1) Straight edges = 2 m + 2 m = 4 m

2) Curved edges (2 semi-circles of d = 2.8 m = 1 circle):
Circumference = π × d = 3.14 × 2.8 = 8.792 m

3) Total Perimeter = 4 + 8.792 = 12.792 m

4) Convert to feet (1 m = 3.3 ft):
12.792 × 3.3 = 42.2136 ft (≈ 42.21 ft)

42.21 ft > 40 ft -> She does NOT have enough garland.

(She is short by 42.21 – 40 = 2.21 feet)

No (needs 42.2 ft > 40 ft)

(Total for Question 3 is 4 marks)

4 Jake and Tia are preparing to take part in a 10 km race.

They both run 10 km each week for 6 weeks.

Jake records his times.

Week	1	2	3	4	5	6
Time (minutes)	65	59	62	56	58	66

Tia says,
"my median time is 61 minutes."

(a) Is Jake's median time greater than Tia's median time?

(2)

Jake's times: 65, 59, 62, 56, 58, 66

Step 1: Put times in ascending order:

56, 58, 59, 62, 65, 66

Middle two values are 59 and 62

$$\text{Jake's Median} = \frac{59 + 62}{2} = 60.5 \text{ minutes}$$

Tia's median is 61 minutes.

60.5 < 61, so Jake's median is NOT greater than Tia's.

No (60.5 mins < 61 mins)

☑ (b) Show a check of your answer.

(1)

Reverse check using multiplication:

60.5 × 2 = 121 minutes

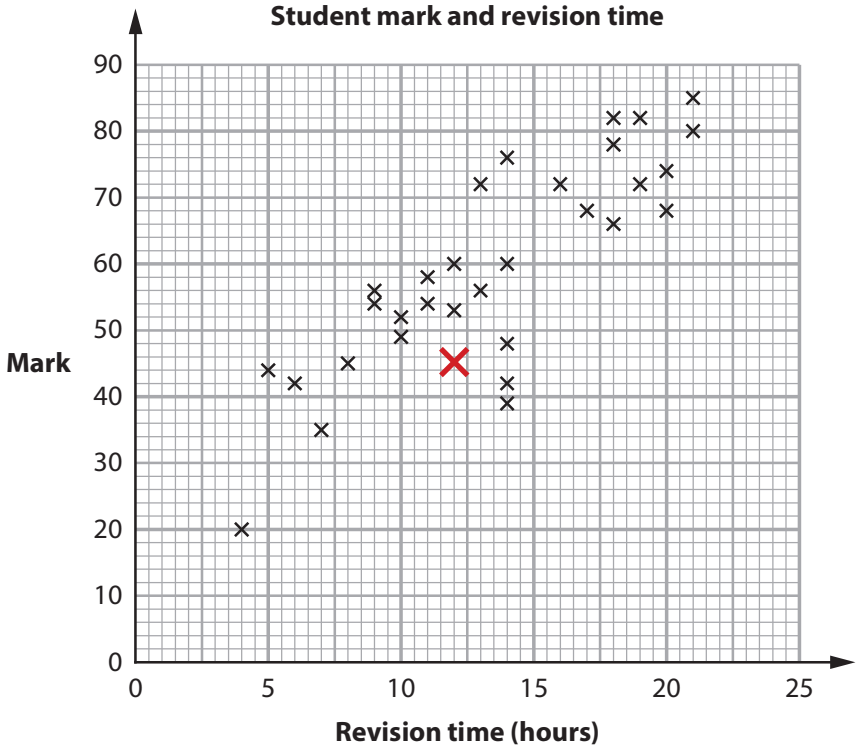

121 – 59 = 62 (Matches the second middle value)

(Total for Question 4 is 3 marks)

6 Alya is a baker.
In April she will use 400 kg of flour to make bread.

In May she plans to increase the amount of bread she makes by 14%
Alya needs to order the flour she needs to make the bread in May.

How much flour does Alya need to order to make the bread in May?

(3)

Method 1: Percentage Multiplier

14% increase = 100% + 14% = 114% = 1.14

Flour needed = 400 × 1.14 = 456 kg

Method 2: Step-by-Step Breakdown

10% of 400 kg = 40 kg

1% of 400 kg = 4 kg -> 4% of 400 kg = 16 kg

14% increase = 40 + 16 = 56 kg

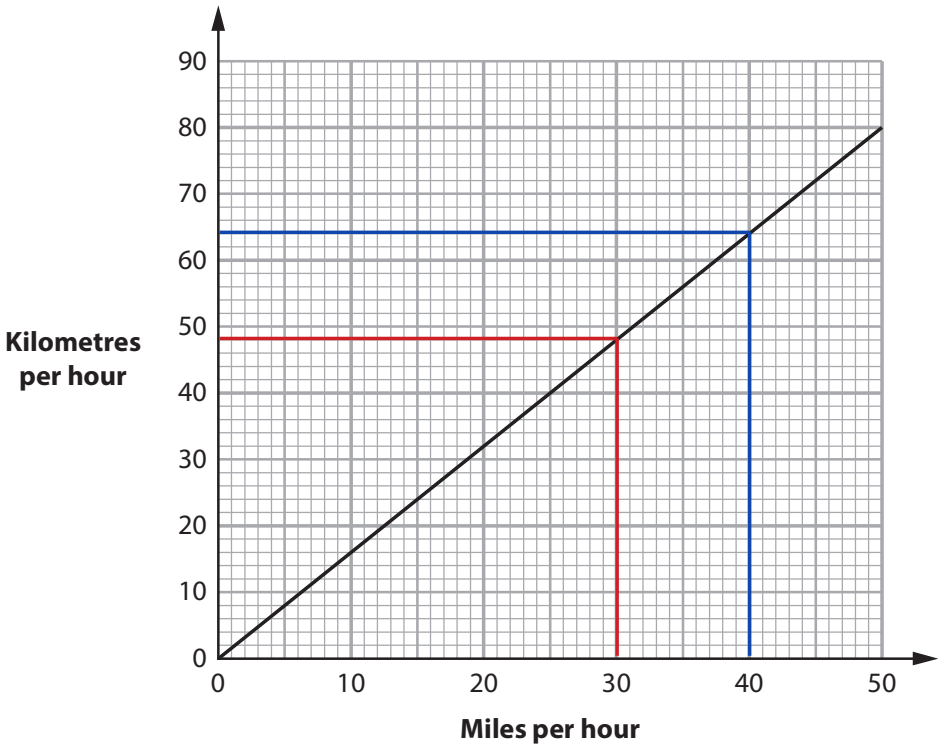

Total flour = 400 + 56 = 456 kg

456 kg

8 Amir is a builder.
He needs to work out how much it will cost him to build a wall.

Amir uses this information to work out the number of bricks he needs.
The wall will be

- 7.9 m in length
- 9 bricks in height
- 8.6 m in width.

The bricks Amir will use are in the shape of a cuboid.

Amir has these prices for bricks.

Price per brick			
£1.50	£1.75	£1.68	£1.99
£1.65	£1.80	£1.49	£1.50

He uses the mode of these prices to work out the total cost of the bricks he needs for the wall.

Amir will also pay £75 for the other materials he needs to build the wall.

Work out the total cost of the bricks and other materials for Amir.

(6)

Step 1: Mode price = £1.50 (most frequent price in table)

Step 2: Calculate number of bricks needed for wall

- Length: 7.9 ÷ 0.215 = 36.74... -> round up to 37 bricks
- Width: 8.6 ÷ 0.065 = 132.30... -> round up to 133 bricks

Total bricks = 37 × 133 × 9 = 44,289 bricks

(using wall height = 9 bricks)

Step 3: Calculate Total Cost for Amir

1) Cost of bricks = 44,289 × £1.50 = £66,433.50

2) Cost of other materials = £75.00

Total Cost = £66,433.50 + £75.00

= £66,508.50

* Always round up individual dimensions so the wall is fully covered!

£ 66,508.50

(Total for Question 8 is 6 marks)

9 Craig works on a building site.
He knows it takes 2 bricklayers 3 hours to lay a total of 450 bricks.

On Monday there are 5 bricklayers at the building site.
All the bricklayers work at the same rate.

How much time would it take 5 bricklayers to lay a total of 450 bricks?
Give your answer in hours.

(3)

Inverse Proportion Method:

2 bricklayers -> 3 hours

÷ 2 | × 2

1 bricklayer -> 6 hours

× 5 | ÷ 5

5 bricklayers -> 1.2 hours

* Total work = 2 × 3 = 6 worker-hours. With 5 bricklayers: 6 ÷ 5 = 1.2 hrs

1.2 hours

DO NOT WRITE IN THIS AREA

11 Ben is the manager of a leisure centre.
He has this formula to work out the volume of the water in the pool.

$$V = 10dw + 15aw$$

where
V = the volume of the water in the pool (m^3)
d = the depth of the water at the deep end of the pool (m)
w = width of the pool (m)
a = the depth of the water at the shallow end of the pool (m)

Ben knows the width of the pool is 12 m.
The depth of the water at the deep end is 2 m.
The depth of the water at the shallow end is 1.5 m.

Ben uses two water pumps at the same time to empty the pool.
Pump A empties water at a rate of 31.2 m^3 per hour.
Pump B empties water at a rate of 27 m^3 per hour.

Ben thinks that using the two water pumps will empty the pool in less than 9 hours.

Is he correct?
Show why you think this.

(5)

Step 1: Calculate pool volume (V = 10dw + 15aw)

V = (10 × 2 × 12) + (15 × 1.5 × 12) = 240 + 270 = 510 m³

Step 2: Combined flow rate of the two pumps

Combined rate = 31.2 + 27 = 58.2 m³ per hour

Step 3: Water pumped in 9 hours

Water pumped = 58.2 × 9 = 523.8 m³

Continued on next page for comparison and decision ->

DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

Step 4: Comparison & Conclusion

- Volume pumped in 9 hours = 523.8 m^3
- Total pool volume = 510 m^3

Since 523.8 m^3 > 510 m^3,
the pumps can empty the pool in less than 9 hours.

* **Alternative check by time:**

Time to empty = 510 ÷ 58.2 = 8.76 hours

8.76 hours < 9 hours (8 hours 46 minutes)

Yes (523.8 m^3 > 510 m^3)

(Total for Question 11 is 5 marks)

12 Ricardo gets a new job at a leisure centre.
He records the number of visits of 50 clients in August.

Number of visits	Frequency	Midpoint	f × Midpoint
1 to 7	8	4	8 × 4 = 32
8 to 14	24	11	24 × 11 = 264
15 to 21	12	18	12 × 18 = 216
22 to 28	6	25	6 × 25 = 150
Total	**50**		Total = 662

Ricardo works out an estimate for the mean number of visits by these clients in August.

His manager tells him this is a 16% increase on the mean number of client visits in July.

(a) What was the mean number of client visits in July?

(5)

Step 1: Estimated Mean for August

$$\text{August Mean} = \frac{\text{Total } (f \times x)}{\text{Total } f} = \frac{662}{50} = 13.24 \text{ visits}$$

Step 2: Find the Mean for July

August is a 16% increase on July:

August = July × (100% + 16%) = July × 1.16

July Mean = 13.24 ÷ 1.16

= 11.4137... visits

-> 11.41 visits (or 11 visits)

Continued on next page for answer box and reverse check ->

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

Calculation summary from previous page:

- August Estimated Mean = 662 ÷ 50 = 13.24 visits
- July Mean = 13.24 ÷ 1.16 = 11.4137... visits

= 11.41 visits (rounded to 2 decimal places)

11.41

☑ (b) Use a reverse calculation to show a check of your estimated mean.

(1)

Reverse Calculation Check of Estimated Mean:

13.24 × 50 = 662

* Checks that (Mean × Total Frequency) matches Total fx (662 = 662)
