Master Functional Skills	Model Solutions (MFS)

Pearson Edexcel Functional Skills

Centre Number	Candidate Number
MFS-UK	L2-PR03

Practice Set 3

Time: 25 minutes | Paper Reference **PRACL2/N03**

Mathematics

Level 2
Section A (Non–Calculator)

You must have:
Pen, HB pencil, eraser, ruler graduated in cm and mm, protractor, pair of compasses. Tracing paper may be used.

Total Marks
16 /16

My signature confirms that I will not discuss the content of the test with anyone.

Signature: Master Functional Skills (MFS)

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Sign the declaration.
- Answer **all** questions.
- Write your final answers in the boxes provided.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- You **must** show clearly how you get your answers in the spaces provided. Marks will be awarded for your working out.
- Check your working and answers at each stage.
- Diagrams are **not** accurately drawn, unless otherwise indicated.
- **Calculators may not be used.**
- Take the value of π to be 3.14

Information

- The total mark for this section is 16.
- The marks for **each** question are shown in brackets – *use this as a guide as to how much time to spend on each question.*
- This sign ☑ shows where marks will be awarded for showing your checks.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

START LEARNING TODAY AT

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

SECTION A

Answer ALL questions. Write your answers in the spaces provided.

1 *PQRS* is a quadrilateral.

PQT is a straight line.

RQV is a straight line.

(a) Write down the value of *x*.

(1)

Opposite angles at an intersection are equal:

Angle x and opposite angle are equal: x = 84°

84 [A1]

(b) Work out the value of *y*.

(2)

Step 1: Sum of interior angles of a quadrilateral is 360°

y = 360° − (27° + 216° + 84°) = 360° − 327° = 33° [M1]

33 [A1]

(Total for Question 1 is 3 marks)

2 Prasha sees this advert for an apprenticeship.

Apprentice plumber

£5.68 per hour
37 hours per week

Prasha will be paid for 52 weeks of the year.

She estimates that she will have an annual salary of £11 500

Use estimation to check if Prasha's estimate is sensible.
You **must** show your working.

(3)

Step 1: Round values to 1 significant figure for estimation

- **Hourly wage: £5.68 ≈ £6 per hour** *[M1 rounding]*
- **Weekly hours: 37 hours ≈ 40 hours per week**
- **Weeks in year: 52 weeks ≈ 50 weeks**

Step 2: Calculate estimated annual salary

Estimated Salary = £6 × 40 × 50 = £12,000 **[M1]**

Exact calculation check:

- **£5.68 × 37 × 52 = £10,928.32**
- **Both £12,000 & £10,928.32 are close to £11,500**

Step 3: Compare with Prasha's estimate (£11,500)

£12,000 close to £11,500 --> Sensible estimate.

Sensible because £6 × 40 × 50 = £12,000 (close to £11,500)

Yes **[A1]**

(Total for Question 2 is 3 marks)

S 6 8 4 6 2 A 0 4 0 8

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

3

(a) Write 8% as a decimal.

(1)

Divide percentage by 100: 8 ÷ 100 = 0.08

0.08 [A1]

(b) Work out $\sqrt{64} \times (12 - 7)$

(1)

√64 = 8; (12 − 7) = 5; 8 × 5 = 40

40 [A1]

(c) Work out $\frac{4}{5} - \frac{3}{8}$

(2)

Step 1: Find lowest common denominator: LCM(5, 8) = 40

- 4/5 = (4 × 8) / (5 × 8) = 32/40 [M1 common denom]
- 3/8 = (3 × 5) / (8 × 5) = 15/40

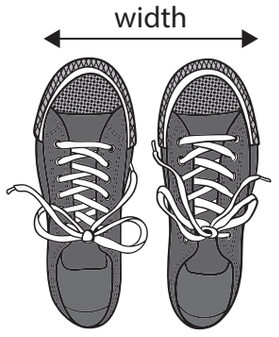

Step 2: Subtract numerators

32/40 − 15/40 = 17/40 (= 0.425)

17/40 [A1]

(Total for Question 3 is 4 marks)

4 Uditi wants to make a shoe tray.
The tray will hold rows of shoes.
She wants each row to hold 6 pairs of shoes.

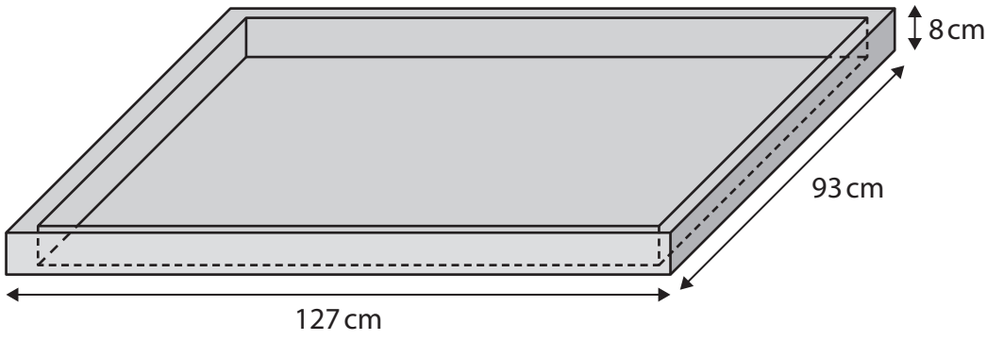

Uditi measures the width of 5 pairs of her shoes.
Here are the results in cm.

18.2 19.7 19.4 18.6 18.9

To find the total width of 6 pairs of shoes Uditi will multiply the median width of these pairs of shoes by 6

The width of the base of the tray will need to be 10% more than the total width of 6 pairs of shoes and have an extra 3 cm at each end of the tray for a frame.

Uditi draws this diagram of the largest shoe tray she can make with the wood she has.

Uditi thinks this tray can hold 6 pairs of her shoes in a row.

Is she correct?
Show why you think this.

(6)

Ordered shoe widths: 18.2, 18.6, 18.9, 19.4, 19.7 cm --> Median = 18.9 cm

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

Step 1: Find the median width of the 5 shoe pairs

In ascending order: 18.2, 18.6, 18.9, 19.4, 19.7 cm [M1 median]

Middle value = 18.9 cm

Step 2: Calculate total width needed for 6 pairs of shoes

Basic width for 6 pairs = 6 × 18.9 cm = 113.4 cm [M1]

Step 3: Add 10% extra space for shoe spacing

10% of 113.4 cm = 11.34 cm [M1 10% extra]

Required Width = 113.4 + 11.34 = 124.74 cm

Step 4: Calculate available internal width of the tray

Outer width = 127 cm. Subtract two 3 cm side edges: [M1 internal width]

Available Width = 127 − 6 = 121 cm

Step 5: Compare required width with available space

124.74 cm > 121 cm (needs 3.74 cm more space)

Tray will NOT hold 6 pairs of shoes.

No, required width is 124.74 cm which is greater than 121 cm

No [A1]

(Total for Question 4 is 6 marks)

TOTAL FOR SECTION A IS 16 MARKS

Pearson

SECTION B

Answer ALL questions. Write your answers in the spaces provided.

1 Susie wants to make a dress.

To make the dress she needs a piece of fabric with a length of $2\frac{3}{4}$ yards.
Fabric is sold in lengths measured in cm.

1 inch = 2.54 cm
1 yard = 36 inches

Work out the length of fabric, in cm, Susie needs to make the dress.
You **must** show your working.

(3)

Step 1: Convert yards to inches (1 yard = 36 inches)

2 3/4 yards = 2.75 yards [M1 yards to inches]

Inches = 2.75 × 36 = 99 inches

Step 2: Convert inches to centimetres (1 inch = 2.54 cm)

Centimetres = 99 × 2.54 cm [M1]

Centimetres = 251.46 cm (accept 251/252)

Alternative single-step multiplier check:

- 1 yard = 36 × 2.54 = 91.44 cm
- 2.75 yards × 91.44 cm/yard = 251.46 cm (correct)

251.46 [A1] cm

(Total for Question 1 is 3 marks)

2 Jamal owns a car paint repair business.
He has 375 ml of thinner.

Jamal has plenty of colour and hardener
He has to mix colour, hardener and thinner in the ratio 2 : 1 : 10 to make car paint.

Work out the maximum amount of car paint Jamal can make with 375 ml of thinner.

(3)

Step 1: Find the value of 1 ratio part using Thinner (10 parts = 375 ml)

1 part = 375 ml ÷ 10 = 37.5 ml [M1 1 part]

Step 2: Calculate total ratio parts for the car paint

Total parts = 2 + 1 + 10 = 13 parts

Step 3: Calculate total volume of car paint

Total Paint = 13 parts × 37.5 ml = 487.5 ml [M1]

Component breakdown check:

- Colour: 2 × 37.5 = 75 ml
- Hardener: 1 × 37.5 = 37.5 ml
- Thinner: 10 × 37.5 = 375 ml
- Total = 75 + 37.5 + 375 = 487.5 ml (correct)

487.5 [A1] ml

(Total for Question 2 is 3 marks)

3 Airon is a festival promoter.

He says

"In 2019 I sold 105 276 tickets.
This is 7% less than the number of tickets I sold in 2018."

(a) How many tickets did Airon sell in 2018?

(3)

Step 1: Understand reverse percentage relationship

2019 sales = 100% − 7% = 93% of 2018 sales *[M1 93%]*

Step 2: Divide by 0.93 to find original 2018 sales

2018 Tickets = 105,276 ÷ 0.93 **[M1]**

2018 Tickets = 113,200 tickets

113200 **[A1]**

☑ (b) Show a check of your answer.

(1)

Reverse calculation check (multiply by 0.93):

Check: 113,200 × 0.93 = 105,276 (correct) **[A1]**

Or: 7% of 113,200 = 7,924; 113,200 − 7,924 = 105,276 (correct)

(Total for Question 3 is 4 marks)

4

(a) Write down the coordinates of point *A*.

(1)

[A1]

(-4 , 0)

B is the point (2, 0).

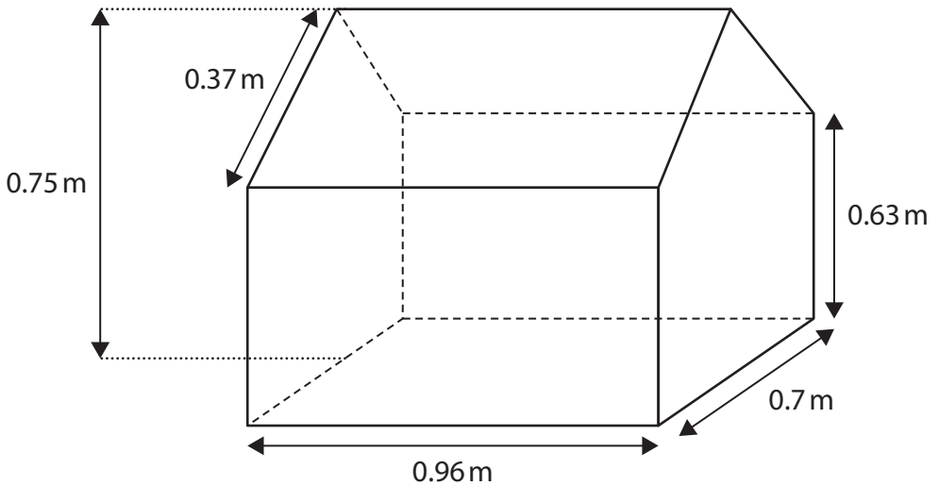

(b) On the grid draw a circle with diameter *AB*.

(2)

Diameter AB = 6 units. Centre (-1, 0), radius = 3 units.

(Total for Question 4 is 3 marks)

5 Here is a diagram of a dolls house Jayden has made.

Two faces are each in the shape of a pentagon with a vertical line of symmetry.
All other faces are rectangular.
The base angles of each pentagon are right angles.

Jayden wants to cover all the surfaces of the dolls house with paint.
He knows the total area of the base and the roof is 1.3824 m^2

Jayden has enough paint to cover 3.5 m^2

Has Jayden got enough paint to cover all the surfaces of the dolls house?
Show why you think this.

(5)

Step 1: Calculate height of triangular gable roof

Gable height = 0.75 m − 0.63 m = 0.12 m *[M1 gable h]*

Step 2: Calculate external surface areas (walls, gables, roof)

- **2 Long walls: 2 × (0.96 × 0.63) = 1.2096 m^2**
- **2 End walls: 2 × (0.70 m × 0.63 m) = 0.882 m^2** *[M1 areas]*
- **2 Gables: 2 × [(0.70 × 0.12) ÷ 2] = 0.084 m^2**
- **2 Roof slopes: 2 × (0.96 × 0.72) = 1.3824 m^2**

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

Step 3: Calculate total external area to be painted

Total Area = 1.2096 + 0.882 + 0.084 + 1.3824

Total Area = 3.558 m² [M1 total area]

Step 4: Compare with 3.5 m^2 paint coverage

3.5 m² < 3.558 m² (short by 0.058 m²)

Therefore, Jayden does NOT have enough paint.

No, area is 3.558 m² (> 3.5 m²) [A1]

(Total for Question 5 is 5 marks)

6 Here is a formula.

$$m = \frac{2.67a}{4y}$$

Find the value of m when $a = 8$ and $y = 3.5$
Give your answer correct to 3 decimal places.

(3)

Step 1: Substitute a = 8 and y = 3.5 into the formula

m = (2.67 × 8) / (4 × 3.5)

Step 2: Calculate numerator and denominator

- Numerator: 2.67 × 8 = 21.36 [M1]
- Denominator: 4 × 3.5 = 14

Step 3: Divide and round to 3 decimal places

m = 21.36 ÷ 14 = 1.52571428... [M1]

4th digit: 7 >= 5, round up: m = 1.526

1.526 [A1]

(Total for Question 6 is 3 marks)

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

7 Nikos owns a restaurant.

The table shows information about the number of customers that visited the restaurant on each of the 31 nights in August.

Number of customers	Frequency		
1 – 15	2		
16 – 30	7		
31 – 45	12		
46 – 60	10		

The mean number of customers per night in July was 32

Nikos thinks the mean number of customers per night in August was more than the mean number of customers per night in July.

(a) Is Nikos correct?
Show why you think this.

(3)

Step 1: Calculate midpoints (x) and fx products for each group

- 1–15: mid 8 × 2 = 16; 16–30: mid 23 × 7 = 161 *[M1 midpoints & fx]*
- 31–45: mid 38 × 12 = 456; 46–60: mid 53 × 10 = 530

Step 2: Calculate total estimated customers for the 31 nights

Total = 16 + 161 + 456 + 530 = 1,163

Step 3: Calculate estimated mean and compare to 32

Estimated Mean = 1,163 ÷ 31 ≈ 37.5 [M1]

37.5 > 32 --> Nikos IS correct.

Yes, mean is 37.5 customers which is greater than 32 [A1]

☑ (b) Show a check of your mean calculation.

(1)

Reverse check for the mean calculation:

Check: 37.516... × 31 = 1,163 (correct) [A1]

(Total for Question 7 is 4 marks)

DO NOT WRITE IN THIS AREA

8 Benji sells items in a shop and online.

In a survey he asked 100 people if they

- prefer to buy items in a shop or online
- are aged under 25 years, 25 to 40 years or over 40 years.

56 of the 100 people prefer to buy online.
27 of the people aged under 25 years prefer to buy online.
12 of the 33 people aged 25 to 40 years prefer to buy in a shop.

Of the people aged over 40 years, 8 prefer to buy online and 17 prefer to buy in a shop.

One person who prefers to buy in a shop is chosen at random to win a prize.

(a) What is the probability that this person is aged under 25 years?
You **must** show your working.

(4)

Step 1: Complete two-way contingency table for the 100 people surveyed

- **Total who prefer shop = 100 − 56 = 44 people** *[M1 table]*
- **Under 25 in shop = 44 − 12 − 17 = 15 people**

Step 2: Calculate probability: P(Under 25 given prefers shop)

Probability = 15 / 44 (≈ 0.341 or 34.1%) **[M1]**

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

P(Under 25 | Shop) = 15/44 [A1]

Yesterday Benji made

- 48 sales in the shop
- 76 sales online.

(b) What fraction of the total number of sales made yesterday were in the shop?
Write your fraction in its simplest form.

(2)

Step 1: Total sales = 48 + 76 = 124 sales [M1]

Step 2: Simplify: 48/124 = 12/31

[A1] $\frac{12}{31}$

10 Lucia is driving to a meeting.
She needs to drive for 58 miles on the motorway.

The maximum speed limit on the motorway is 70 mph.
Lucia will not drive over the speed limit.

Work out the minimum time Lucia will spend driving on the motorway.
Give your answer correct to the nearest minute.

(3)

Step 1: Calculate driving time in hours (Time = Distance ÷ Speed)

Time = 58 miles ÷ 70 mph = 0.8285714... hours [M1 hours]

Step 2: Convert hours to minutes (multiply by 60)

Minutes = 0.8285714... × 60 = 49.714... minutes [M1]

Step 3: Round to nearest whole minute

49.714... minutes ≈ 50 minutes

50 [A1] minutes

(Total for Question 10 is 3 marks)

11 Matt and Gabrielle are planning their wedding.
There will be 150 people at the reception.

All of the tables at their reception

- seat a maximum of 8 people
- have a circular top of diameter 1.7 m

Matt and Gabrielle want to put ribbon around the top edge of each table.
They will allow for an extra 65 cm of ribbon per table for a bow.

Ribbon is sold in rolls.
Each roll of ribbon is 30 m in length.

How many rolls of ribbon do Matt and Gabrielle need to buy to decorate the minimum number of tables needed at their reception?

(5)

Step 1: Calculate number of tables needed for 150 guests (8 per table)

Tables needed = 150 ÷ 8 = 18.75 tables *[M1 tables]*

Must round up to whole tables: 19 tables required!

Step 2: Calculate circumference of 1 circular table (diameter = 1.7 m)

Circumference = π × d = π × 1.7 = 5.341... m *[M1 circumference]*

Step 3: Add extra ribbon for bow (0.65 m per table)

Ribbon per table = 5.3407... + 0.65 = 5.9907... m

Step 4: Calculate total ribbon for all 19 tables

Total Ribbon = 19 × 5.99... = 113.82 m *[M1 total ribbon]*

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

Step 5: Calculate number of 30-metre rolls of ribbon needed

Rolls = 113.82... ÷ 30 = 3.794... rolls [M1]

Must round up to 4 whole rolls!

Summary checklist for examiner:

- 19 tables x ~5.99 m = ~113.8 m total ribbon
- 113.8 ÷ 30 = 3.79 rolls --> 4 rolls (correct)

4 [A1]

(Total for Question 11 is 5 marks)

12 Jana is writing a report about wages.

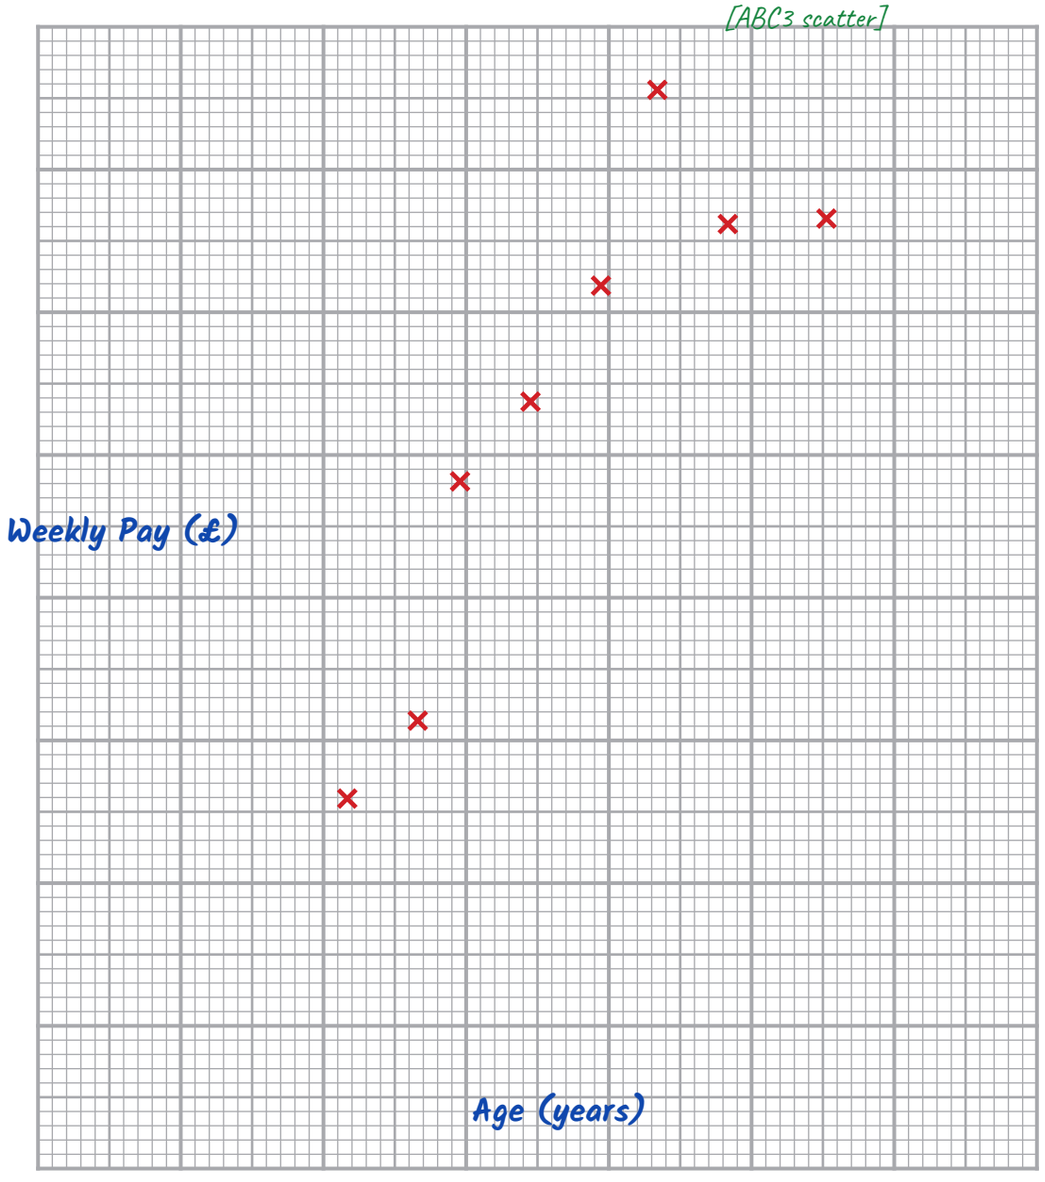

She has this information about the ages and weekly pay of eight men.

Age (years)	27	41	32	19	46	37	24	53
Weekly pay (£)	470	686	514	295	612	578	338	615

Jana wants to draw a diagram to see if there is a relationship between age and weekly pay for these eight men.

(a) Draw a suitable diagram for Jana.

(3)

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

(b) What type of correlation describes the relationship between age and weekly pay for these men?

(1)

Positive correlation: as age increases, pay increases [A1]

Jana wants to compare the variation in weekly pay of men with the variation in weekly pay of women.

She finds the range of weekly pay for a sample of eight women is £437

(c) Write a comment comparing the variation in weekly pay for men and for women. Support your comment with a calculation.

(2)

Step 1: Calculate range of weekly pay for men

Range for men = £686 − £295 = £391 [M1 range]

Step 2: Compare with range of weekly pay for women (£415)

£391 < £415 --> Men have less variation in pay.

Men have less variation (£391 vs £415) [A1]
