NCFE Level 2 Functional Skills Qualification in Mathematics (603/5060/X)

Paper number:	P001259
Section B:	Calculator Test

Assessment window: Monday 9 Decen
Time allowed: 1 hour 30 minute

OFFICIAL MFS MODEL SOLUTION
Full Marks · 100% Pass
Signed: Master Functional Skills
Date: 20/10/2026 · Tutor Abdul

Learner instructions

- Answer **all** questions.
- Read each question carefully.
- Write your answers in the spaces provided.
- Show your working, as marks may be awarded for working.
- State units in your answers, where appropriate.
- Check your work.
- Use $\pi = 3.14$

Learner information

- Section B contains **Activities 2, 3** and **4**.
- The maximum mark for this section is **45**.
- The marks available for **each** question are shown in brackets.

Resources

You will need a:

- pen, with black or blue ink
- pencil and eraser
- 30 cm ruler
- protractor
- calculator.

If extra pages are used, please make sure your name and centre name are on them and they are securely fastened to this booklet.

Please complete the details below clearly and in BLOCK CAPITALS.

Learner name MASTER FUNCTIONAL SKILLS

Centre name MASTER FUNCTIONAL SKILLS (MFS01)

Learner number MFS-NCFE-2026 Centre number MFS01

Do not turn over until the invigilator tells you to do so.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

...running a business

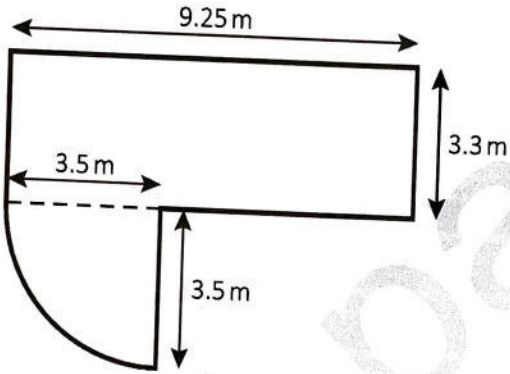

2 (a) Dan has set up a patio cleaning business.

He charges £4.25 per m^2 of the patio to be cleaned.

Mrs Jones has asked Dan how much he will charge for cleaning her patio.

This diagram shows her patio:

Not drawn accurately

past paper

How much will Dan charge Mrs Jones for cleaning her patio?

Use $\pi = 3.14$

[4 marks]

$9.25 \times 3.3 = 30.525 m^2$.

$\frac{1}{4} \times 3.14 \times 3.5^2 = 9.61625 m^2$.

$30.525 + 9.61625$

$= 40.14125 m^2$

$40.14125 \times £4.25 = £170.60$

Your answer: £ 170.60

past paper

iner use only

e turn over

Examiner use only

... £250 to clean his patio.

The £250 includes VAT at 20%

How much was the bill before the VAT was added?

[2 marks]

$$\frac{£250}{1.2} = £208.33$$

Your answer: £ 208.33

past paper

a mixture of weed killer and water to clean Mr Patel's patio.

The area of the patio to be sprayed is 63.2 m²

He fills the spray tank with the weed killer and water mixture.

How many times does Dan need to fill the spray tank to cover the whole patio?

[3 marks]

$20 \times 63.2 = 1264\text{ml}$ Weed killer needed.

$\Rightarrow 12640\text{ml}$ water needed

$1264 + 12640 = 13904\text{ml} = 13.904\text{L}$

$\frac{13.904}{5} = 2.78084$.

$\rightarrow$ 3 times

Your answer: 3

ase turn over

Examiner use only

...nd his business.

Next year he plans to clean patios from 8.30am to 3.30pm, Monday to Friday for 26 weeks during the spring and summer.

This table shows how long each job took Dan **this year**.
The times include travel time.

Time per cleaning job	Number of jobs
30 < time ≤ 60 minutes	25
60 < time ≤ 90 minutes	36
90 < time ≤ 120 minutes	45
120 < time ≤ 150 minutes	21
Total	127

Use the data to estimate how many patios Dan can clean **next year** if he works the hours planned.

[5 marks]

8:30am – 3:30pm = 7 hours.

7 hr/day × 5 day/wk × 26 wk/yr = 910 hrs/yr.

(45 × 25) + (75 × 36) + (105 × 45) + (135 × 21)

= 11385 mins total.

= 189.75 hrs total.

⇒ $\frac{189.75}{127}$ = 1.494 hrs / job (avg)

$\frac{910}{1.494}$ = 609.06 jobs

Your answer: 609 **patios**

past paper

...w long each job took Da... last year.

Time per cleaning job	Number of jobs
30 < time ≤ 60 minutes	14
60 < time ≤ 90 minutes	22
90 < time ≤ 120 minutes	30
120 < time ≤ 150 minutes	16
Total	82

Dan's accounts are checked by the tax office.

They pick one of **last year's** jobs at random to check.

What is the probability that the job would have taken more than 90 minutes?

[1 mark]

$\frac{30+16}{14+22+30+16} = \frac{46}{82} = 0.5610$

Your answer: 0.561

[Total marks: 15]

3 (a) There are 51 million adults in the UK.

20.5 million do **not** do any regular exercise.

What fraction of adults in the UK do **not** do any regular exercise?

[1 mark]

$\frac{20.5}{51} = \frac{41}{102}$

Your answer: $\frac{41}{102}$

3 (b) The proportion of commuters who cycle to work in the UK is 0.06

Write 0.06 as:

- a fraction
- a percentage.

[2 marks]

Your answer:

Fraction: $\frac{6}{100}$

Percentage: 6%

past paper

Examiner use only

Jackie is training for a cycle race.
She reads a cycling blog.

It says that cyclists should aim to keep their heart rate above 72% of their maximum heart rate.

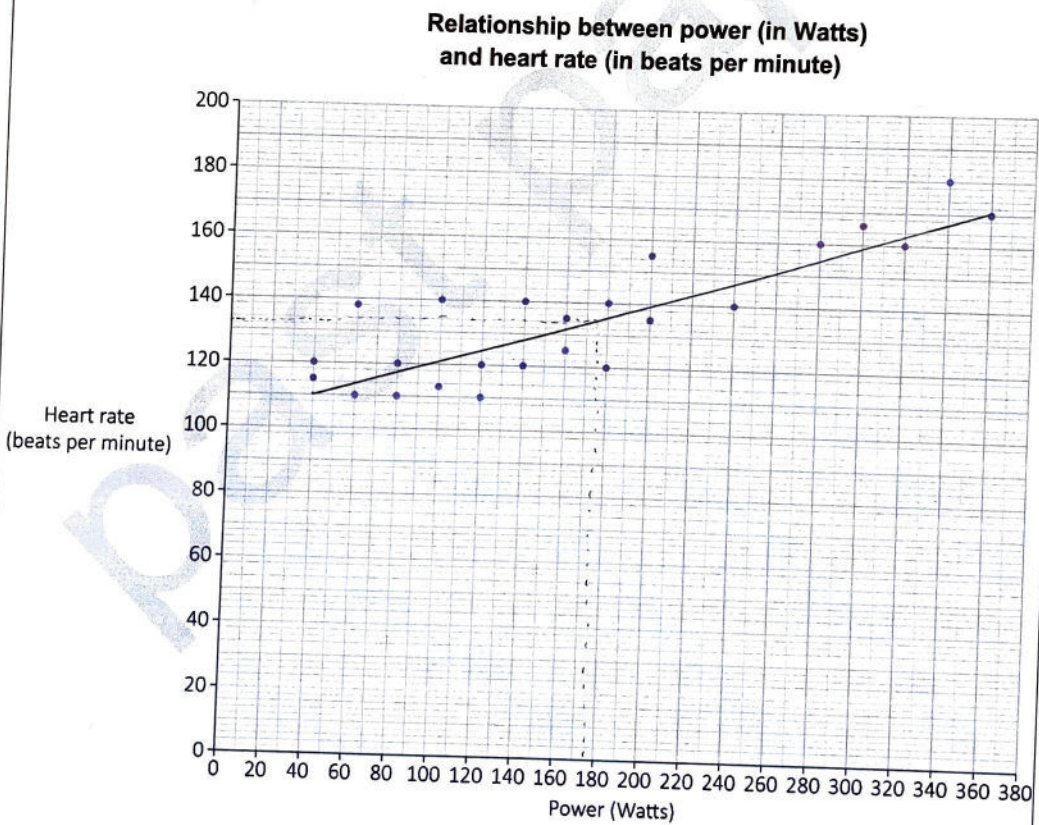

Jackie uses this formula to work out her maximum heart rate:

$$M = 191.5 - 0.007A^2$$

Where: M is the maximum heart rate in beats per minute
A is age in years.

Jackie is 25 years old.

This scatter diagram shows the relationship between power (in Watts) and heart rate (beats per minute):

inner use only

To produce 100 watts of power, a cyclist uses about 350 kilocalories per hour.

Estimate the number of kilocalories Jackie uses per hour if she cycles at 72% of her maximum heart rate.

[6 marks]

$M = 191.5 - (0.007 \times 25^2)$

$= 191.5 - 4.375$

$= 187.125$ (max heart rate)

$187.125 \times 0.72 = 134.73$ bpm.

$\Rightarrow$ 175 W

$\frac{175}{100} \times 350 = 612.5$ kcal / hr.

Your answer: 612.5 **kilocalories**

past paper

Examiner use only

...is cycle to keep fit.

They want to reduce the mean time it takes them to cycle 10 km

Their target is to reduce the time by 11% within 12 weeks.

This table shows their times in **Week 1** and **Week 12**.

	Time (minutes) to cycle 10 km	
	Week 1	**Week 12**
Ann	26.3	23.9
Mike	22.0	20.2
Rafa	28.1	25.7
Ali	24.9	20.4
Maria	18.4	18.1
Luke	21.7	20.7
Becky	20.3	17.3

Has the group achieved its target?

Show how you decide.

[4 marks]

Wk 1: $\frac{26.3 + 22 + \ldots + 21.7 + 20.3}{7} = 23.1$

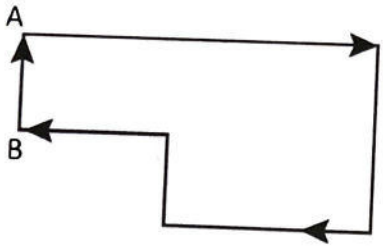

Wk 12: $\frac{23.9 + 20.2 + \ldots + 20.7 + 17.3}{7} = 20.9$

$\frac{23.1 - 20.9}{23.1} \times 100 = 9.52\%$

Your answer: No.

Past Paper

this route:

Not drawn accurately

She starts at A.

When she reaches B she has cycled 12.5 miles.

(i) What is 12.5 miles in km?

Use this conversion: 1.6 km = 1 mile

[1 mark]

$12.5 \times 1.6 =$

Your answer: 20

The total route is 23 km

(ii) What fraction of the total route has she cycled when she reaches B?

[1 mark]

$\frac{20}{23}$

Your answer: $\frac{20}{23}$

[Total marks: 15]

Activity 4: Packaging

4 (a) Beth is on a work placement.
The company makes biscuits.

In 2018 it reduced the number of biscuits in each packet.

The weight of each biscuit stayed the same.

The weight of a packet went from 135 g to 108 g

The 135 g packet contained 25 biscuits.

How many fewer biscuits did the 108 g packet contain?

[2 marks]

$\frac{108}{135} \times 25 = 20$

$25 - 20 =$

Your answer: 5 **biscuits**

past paper

The company also makes pizza.

This table shows information about the two sizes it sells:

Pizza	Diameter	Depth
Large	38 cm	2 cm
Small	19 cm	1.5 cm

Beth says that the large size gives over 5 times as much pizza as the small size.

Is Beth correct?

Show how you decide.

Use $\pi = 3.14$

[4 marks]

38cm Di. ⇒ 19cm radius

$3.14 \times 19^2 \times 2 = 2267.08\ cm^3$.

19cm Diameter ⇒ 9.5cm radius

$3.14 \times 9.5^2 \times 1.5 = 425.0775\ cm^3$

$\frac{2267.08}{425.0775} = 5.\dot{3}$

Your answer: Yes.

Examiner use only

... are sold in cardboard boxes.

When closed, the boxes measure 40 cm by 40 cm by 2.5 cm and are cuboid.

This is the net of the pizza box:

pastpaper

it could use the same ne... reduce the dimensions to 38 cm by 38 cm by 2 cm

Beth is asked to calculate the percentage reduction in cardboard if the smaller boxes are used.

What answer should Beth get?

[5 marks]

$(40 \times 40 \times 2) + (9 \times 2.5 \times 40)$

$= 4100 \text{ cm}^2$.

$(38 \times 38 \times 2) + (9 \times 2[redacted] \times 38)$

$= 3572 \text{ cm}^2$.

$$\frac{4100 - 3572}{4100} \times 100 = 12.878\%$$

Your answer: 12.878 %

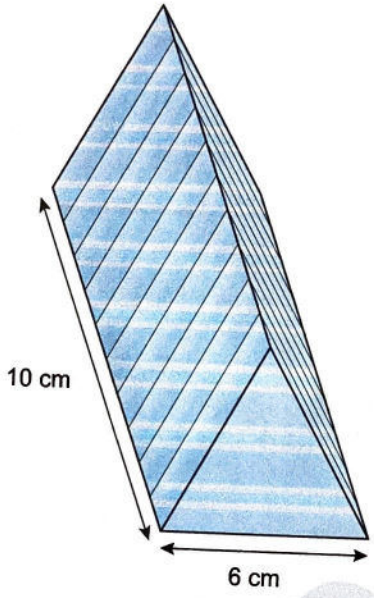

past paper

iner use only

Examiner use only

... makes a chocolate bar.

It is divided into 10 identical triangle-shaped pieces.

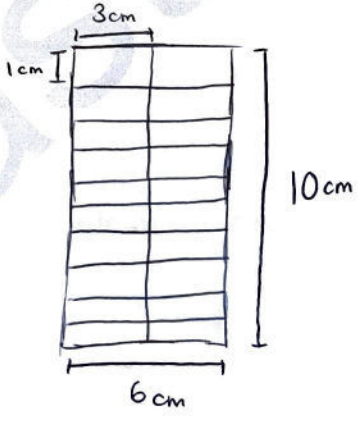

Not drawn accurately

Draw a plan view of the bar in the space below.

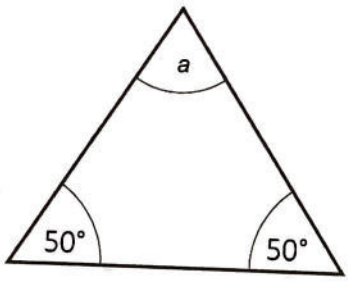

Label the dimensions.

[3 marks]

past paper

of the chocolate bar is s... in the diagram.

Not drawn accurately

Calculate the size of the angle labelled *a*

[1 mark]

$180° - (2 \times 50°) = 80°$.

Your answer: 80 °

[Total marks: 15]

This is the end of the assessment.
