NCFE Level 2 Functional Skills Qualification in Mathematics (603/5060/X)

Paper number:	P001258
Section B:	Calculator Test

Assessment window: Monday 14 Octo
Time allowed: 1 hour 30 minute

OFFICIAL MFS MODEL SOLUTION
Full Marks · 100% Pass
Signed: Master Functional Skills
Date: 20/10/2026 · Tutor Abdul

Learner instructions

- Answer **all** questions.
- Read each question carefully.
- Write your answers in the spaces provided.
- Show your working, as marks may be awarded for working.
- State units in your answers, where appropriate.
- Check your work.
- Use $\pi = 3.14$

Learner information

- Section B contains **Activities 2, 3** and **4**.
- The maximum mark for this section is **45**.
- The marks available for **each** question are shown in brackets.

Resources

You will need a:

- pen, with black or blue ink
- pencil and eraser
- 30 cm ruler
- protractor
- calculator.

If extra pages are used, please make sure your name and centre name are on them and they are securely fastened to this booklet.

Please complete the details below clearly and in BLOCK CAPITALS.

Learner name MASTER FUNCTIONAL SKILLS

Centre name MASTER FUNCTIONAL SKILLS (MFS01)

Learner number MFS-NCFE-2026

Centre number MFS01

Do not turn over until the invigilator tells you to do so.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

Examiner use or

2 (a) Tom is studying science at college.
He is learning about ice.

Tom does an experiment.
He shows that the ratio of an ice cube's surface area to its volume affects the time it takes for the ice cube to melt.

This scatter diagram shows his results:

e cube.

Each side is 2.5 cm long.

Estimate how long this ice cube will take to melt.

[4 marks]

SA: $6 \times 2.5^2 = 37.5 \text{ cm}^2$.

V: $2.5^3 = 15.625 \text{ cm}^3$.

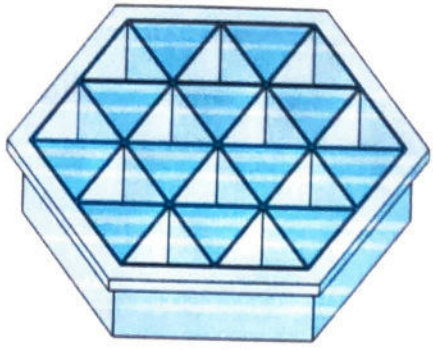

$$\frac{37.5}{15.625} = 2.4$$

Your answer: 12.5 minutes

Paper

Examiner use on

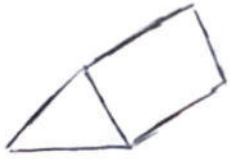

2 ... Tom finds this mould for ma... 24 triangular prisms of ice.

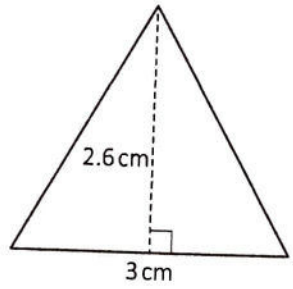

Mould

Draw a triangular prism.

[1 mark]

s of each prism have base ... and height 2.6 cm

Not drawn accurately

Tom fills the hexagonal mould with water to a depth of 3.5 cm

Tom knows that:

- to calculate the volume of each triangular prism, he can use the formula

  Volume = area of triangular face × depth of prism

- when a volume of water freezes, the ice that is formed has a volume 4% more than the volume of the water.

What will be the **total** volume of ice formed when all the water in the hexagonal mould freezes?

[5 marks]

$\frac{1}{2} \times 2.6 \times 3 = 3.9\text{cm}^2$.

$3.9\text{cm}^2 \times 3.5\text{cm} = 13.65\text{cm}^3$

$13.65 \times 24 = 327.6\text{cm}^3$

$1.04 \times 327.6 = 340.704\text{cm}^3$

Your answer: 340.704 cm³

Please turn over

Examiner use on

lumps of ice that float in the sea.

Tom reads that the icebergs float because the density of ice is less than the density of seawater.

The density of ice is 0.92 g per ml and the density of the sea is 1.03 g per ml

Calculate 0.92 as a percentage of 1.03

Give your answer as a percentage to the nearest whole number.

[2 marks]

$\frac{0.92}{1.03} \times 100 = 89.32\%$.

Your answer: 89 %

2 (e) Tom reads that scientists are planning to move an iceberg across the sea to provide water to a very dry country.

The iceberg weighs 40 million tonnes.

Write 40 million using numbers.

[1 mark]

Your answer: 40 000 000

...it as it travels.

By the time it arrives, the iceberg will weigh only 25 million tonnes.

By what fraction will the original iceberg have reduced in weight by the time it arrives?

Give your answer in its simplest form.

[2 marks]

$\frac{40-25}{40} = \frac{15}{40} = \frac{3}{8}$.

Your answer: $\frac{3}{8}$.

[Total marks: 15]

Question 2

A MFS Step 7: Accredited NCFE Method & Mark Scheme Verified by Tutor Abdul [M1 A1] [100% PASS]

Examiner use only

3 (a) Faisal starts a new job.

He will work 37 hours a week for 48 weeks a year and is paid £8.25 an hour.

He must pay:

- 0% income tax on the first £12 500 he earns each year
- 20% income tax on anything over £12 500 that he earns.

His income tax payments are spread evenly over the 48 weeks.

Faisal's first weekly wage slip shows that he has paid £8.96 income tax.

He thinks he has paid more than he should.

Is he correct?

Show how you decide.

[4 marks]

$37 \times 48 \times £8.25 = £14652$

$£14652 - £12500 = £2152$ taxable.

$0.2 \times £2152 = £430.40$.

$\frac{£430.4}{48} = £8.96\dot{}$

$\Rightarrow £8.97$.

Your answer: No.

3 ...cle about the 5 : 3 : 2 rule.

The rule says you should spend your wages after tax in the ratio 5 : 3 : 2 on **needs : wants : savings**

- **needs** are bills like rent that must be paid
- **wants** are extra things like social life and new clothes which are not needed
- **savings** are amounts of money kept for the future.

Sonya earns £480 a week after tax.

Last week she spent £185 on going out with friends.

Was this in line with the 5 : 3 : 2 rule?

Show how you decide.

[2 marks]

$\frac{3}{5+3+2} = \frac{3}{10}$.

$\frac{£185}{£480} = 0.385. > \frac{3}{10}$

Your answer: No.

er use only

Examiner use only

3 Dec needs to pay £908.64 each month for his mortgage and other bills.

This is 45% of his monthly income.

What is Dec's monthly income?

Give your answer to the **nearest ten pounds.**

[2 marks]

$\frac{£908.64}{0.45} = £2019.20$

$\rightarrow £2020$

Your answer: £ 2020

Quick Quiz

... manager of a small business claims that the mean salary in the company has gone up by over 10% in the last year.

One of the workers says that the gap between the highest and lowest earners has more than doubled.

Use this data about the company salaries to decide whether **each** of the statements is true. Show your working.

[5 marks]

Annual salaries (£s)							
Last year (12 employees)			This year (14 employees)			
15 275	42 122	15 679	15 500	33 775	17 995	34 065
20 000	25 344	25 879	21 339	20 112	24 995	23 115
85 682	15 998	53 245	157 250	40 631	45 888	
55 333	70 507	32 196	60 200	80 555	17 160	

15275+42122+...+70507+32196 = 457260

$\frac{457260}{12} = 38105$

15500 + 33775 ... + 80555 + 17160 = 592580

$\frac{592580}{14} = 42327.14.$

$100 \times \frac{42327.14 - 38105}{38105} = 11.08\%$ increase.

Range (LY):

85682 − 15275

= 70407

Range (TY):

157250 − 15500 =

141750.

70407 × 2 = 140814.

Your answer: Both statements are correct.

Examiner use only

3 (c) Dave is a salesman.

He is paid a basic salary plus a bonus based on the sales he makes.

Last year Dave's bonus was $\frac{3}{8}$ of his salary.

Write $\frac{3}{8}$ as a decimal **and** as a percentage.

[2 marks]

Decimal:

0·375

Percentage:

37·5%.

Activity 4: Archaeology

4 (a) Archaeologists study human history by digging up and analysing items from the past.

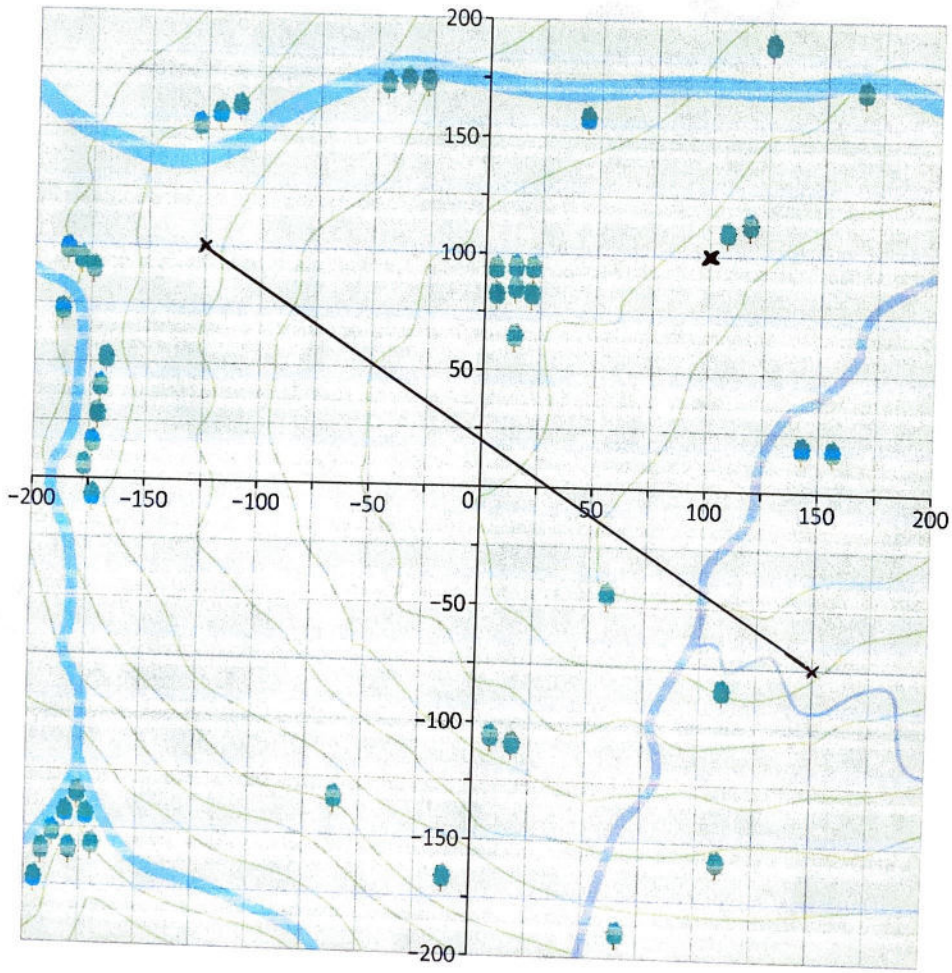

Chen is a volunteer with a community archaeology group.
At the weekends she helps to dig at an archaeological site.

The volunteers have to record exactly where each item is found.
They do this by using a coordinate grid laid over a map of the site.

The volunteers have found the wall of a building.
It runs in a straight line from (–125, 100) to (150, –75)

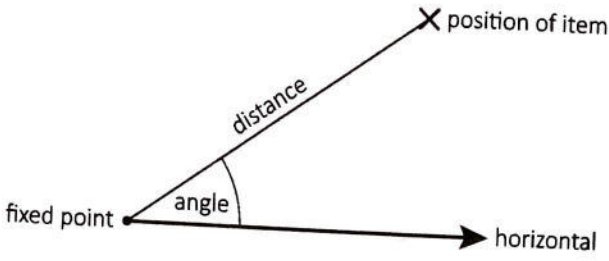

Draw the position of the wall on the grid.

[2 marks]

...ay that the volunteers can record the position of an object:

- measure the object's distance from a fixed point and
- measure the angle (see example in the diagram below).

The volunteers find an object at the point (100, 100) on the coordinate grid.

i) Mark the point on the grid in **4 (a)**.

The volunteers measure the distance of the object from the fixed point (0, 0)
They then measure the angle.

ii) What size is the angle?

[2 marks]

$\frac{100-0}{100-0} = 1.$ $\tan^{-1} 1 = 45°.$

Your answer: 45 **degrees**

some footprints that were preserved in volcanic ash.

The foot length was 18.8 cm and the stride length (the distance between the footprints) was 164.5 cm

Archaeologists use the formula: $R = \dfrac{\text{stride length}}{4 \times \text{foot length}}$

Chen uses a calculator to calculate R for the footprints found in the volcanic ash.

She enters 164.5 ÷ 4 × 18.8 and gets the answer 773.15

Explain what Chen has done wrong.

[1 mark]

BIDMAS dictates that $\frac{164.5}{4}$ was done first, then multiplied by 18.8.

She should enter "164.5 ÷ (4×18.8)".

Question Paper

...0 the person was probably ...walking.
If R is greater than 2.9 the person was probably running.
If R is in between 2.0 and 2.9 it is not possible to decide.

Tick the correct statement about the person whose footprints were preserved in the volcanic ash.

☐ They were probably walking.

☐ They were probably running.

☑ It is not possible to decide.

Explain your choice.

[2 marks]

$$\frac{164.5}{4 \times 18.8} = 2.1875$$

Past Paper

nteers in the community

The probability that they all attend on a Saturday is 0.35
The probability that they all attend on a Sunday is 0.12

The site is open next weekend.

Calculate the probability that all the volunteers will attend on both Saturday and Sunday next weekend.

Give your answer as a percentage.

[2 marks]

$0.35 \times 0.12 = 0.042$

$= 4.2\%$

Your answer: 4.2 %

Pastpaper

on Saturday and Sunday fc. ... weekends during last year.

This table shows the number of days each volunteer attends out of the 52 days available.

The information for Chen is missing.

Volunteer	Number of days
Ada	48
Barry	25
Tim	30
Chris	24
Gwen	43
Sia	39
Rita	40
Rav	18
Jon	35
Chen	

Chen says that the mode of the 9 values is 48

Is she correct?

Explain your answer.

[1 mark]

There is no mode, each value appears once only.

Examiner use o

ier of days for the 10 volu

What fraction of the days did Chen attend?

Give the fraction in its simplest form.

[3 marks]

5th (in list of 9) is 35.

$$\frac{\text{Chen's value} + 35}{2} = 33.5$$

$$\Rightarrow \text{Chen's value} = 32.$$

$$\frac{32}{52} = \frac{8}{13}$$

Your answer: $\frac{8}{13}$.

[Total marks: 15]

This is the end of the external assessment.
