MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

LEVEL 1 FUNCTIONAL SKILLS QUALIFICATION IN MATHEMATICS

SECTION A - QUESTION AND ANSWER PAPER
NON-CALCULATOR – 30 MINUTES
PRACTICE ASSESSMENT 3 (FSM101P)

Do not open this paper until you are told to do so by the invigilator.

Overall assessment marks available: **60**
Overall assessment time limit: **2 HOURS**

There are **TWO** Sections to this assessment:

- **Section A** includes Task 1. You **must not** use a calculator for this section.
  Total marks available: 15. Time limit: 30 minutes

- **Section B** includes Task 2, 3 and 4. You can use a non-scientific calculator for this section.
  Total marks available: 45. Time limit: 1 hour and 30 minutes

For Section A you need:

- This question and answer paper
- A pen with black or blue ink
- A pencil
- A ruler and a protractor

INTERNET ACCESS IS NOT PERMITTED AND YOU MUST NOT USE A CALCULATOR

The invigilator will stop the assessment after 30 minutes. You must hand in this question and answer paper at this point.

The invigilator will then hand out **Section B** and a non-scientific calculator. You will then have a further 1 hour and 30 minutes to complete **Section B**.

Instructions

1. Please sign and date below to confirm that your details are correct and that you have understood the instructions.
2. Read each task and question carefully.
3. Remember to show all your workings out clearly.
4. The number of marks available for each question is shown in brackets. Use these marks to guide you on how long to spend on each question.
5. Answer **all** questions using the space provided on this question and answer paper.
6. If you have time, check your work for **Section A** at the end. Once you have handed in this question and answer paper, you will not be able to check this again.
7. If you use extra paper, write your name, learner number and the question number you are answering on it and securely attach it to this question and answer paper.

Learner name:	Master Functional Skills

Signature:	Master Functional Skills
Today's date:	20 / 10 / 2026

For Markers Use Only

Section A

Question 1

Calculate 26 + 11 × 7 (1 mark)

Divide by 10 (shift decimal point 1 place left):

Show your calculations and/or workings out here:

36.8 ÷ 10 = 3.68 [1 mark]

3.68 ✓

Write your answer in this box:

Fraction in simplest form:

12 / 16 = (12 ÷ 4) / (16 ÷ 4) = 3/4 [1 mark]

Question 2

Calculate 12^2 (1 mark)

Show your calculations and/or workings out here:

3/4 ✓

Write your answer in this box:

For Markers Use Only

Question 3

Calculate 5.07 × 1000 (1 mark)

Multiply whole numbers:

Show your calculations and/or workings out here: [1 mark]

45 x 12 = 540

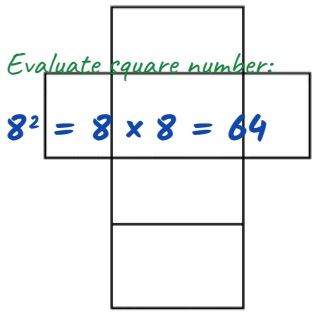

540

Write your answer in this box:

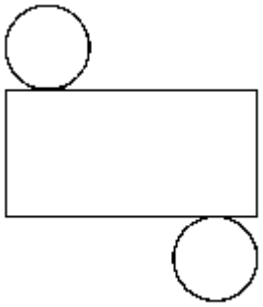

Question 4

Which of the following nets will make a pyramid shape? (1 mark)

A

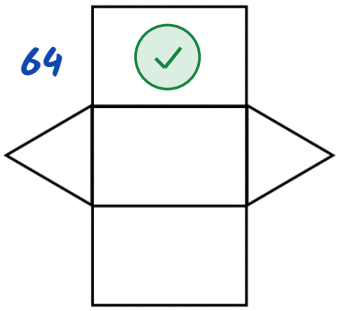

B

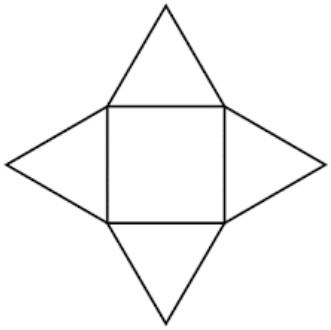

[1 mark]

C

64

D

Write your answer in this box:

For Markers Use Only

Question 5

Calculate 63 ÷ 7 (1 mark)

Angle in degrees for right angle:

Show your calculations and/or workings out here:

~~A right angle is exactly 90°~~ ~~[1 mark]~~

90° ✓

Write your answer in this box:

Question 6

Estimate your answer to the following calculation:

23.32 + 13.91 = (1 mark)

Order decimals from smallest to largest:

Show your calculations and/or workings out here: [1 mark]

0.08 < 0.35 < 0.5 < 0.72

0.08, 0.35, 0.5, 0.72 ✓

Write your answer in this box:

For Markers Use Only

Question 7

Raffle tickets numbered 1 to 100 are mixed up and put into a hat. Only raffle tickets that end with a 5 can win a prize.

What is the probability that a ticket drawn out of the hat will win a prize? Express your answer as a fraction in its simplest form.

(2 marks)

Show your calculations and/or workings out here:

Step 1: Calculate total cost of tickets and refreshments:

- 2 Adult tickets @ £8.50 = £17.00
- 3 Child tickets @ £5.20 = £15.60 [M1 A1]
- Popcorn & drinks = £12.40

Step 2: Total cost = £17.00 + £15.60 + £12.40 = £45.00

Step 3: Change from £50.00 = £50.00 - £45.00 = £5.00 [M1 A1]

Write your answer in this box:

£5.00 ✓

For Markers Use Only

Question 8

The table below shows James' scores out of 50 for his last 4 college assignments.

Assignment	1	2	3	4
Score	30	43	48	35

Step 1: Calculate rectangular lawn area (Length × Width):

What is James' mean score for his last 4 assignments?

Area = 12m × 8m = 96 m² **[M1]** (2 marks)

Show your calculations and/or workings out here:

Step 2: Boxes of grass seed needed (1 box covers 25 m²):

96 ÷ 25 = 3.84 boxes --> 4 boxes needed **[M1 A1]**

4 boxes ✓

Write your answer in this box:

For Markers Use Only

Question 9

The table below shows the result of a survey of how 48 people travel to work.

Car	Bus	Cycle	Walk
12	16	8	12

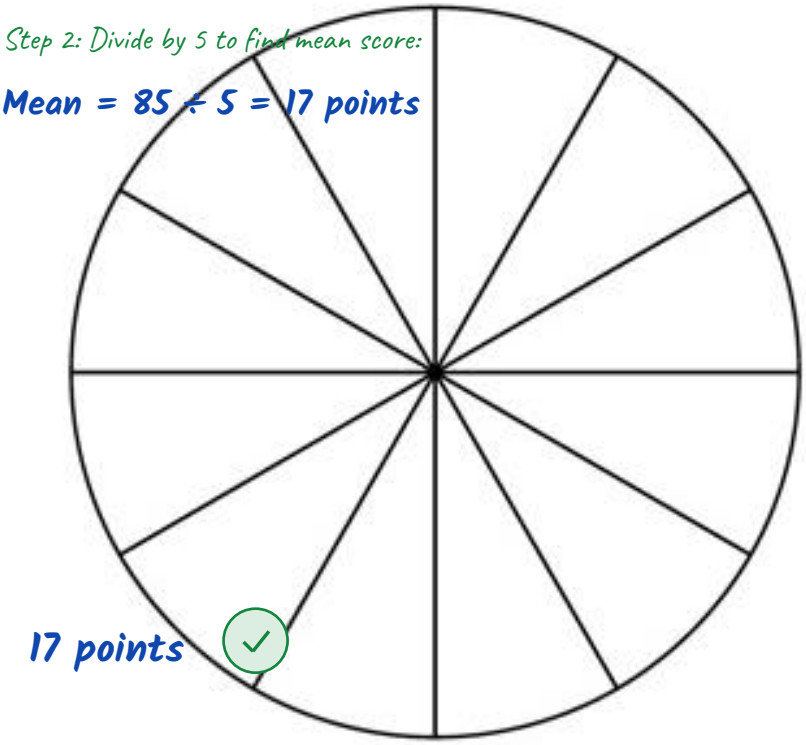

Draw a pie chart to represent the information in the table. (3 marks)

Step 1: Calculate total score across all games:

Sum = 14 + 18 + 22 + 15 + 16 = 85 points [M1]

Step 2: Divide by 5 to find mean score:

Mean = 85 ÷ 5 = 17 points [M1 A1]

Key	
Car	
Bus	
Cycle	
Walk	

For Markers Use Only

Question 10

The table below shows the result of a survey of how 48 people travel to work.

Car	Bus	Cycle	Walk
12	16	8	12

How many degrees in the pie chart represent the number of people that cycle to work? Refer to the pie chart you drew in Question 9.

(2 marks)

Show your calculations and/or workings out here.

Write your answer in this box:

[End of Section A]

Page left intentionally blank

LEVEL 1 FUNCTIONAL SKILLS QUALIFICATION IN MATHEMATICS

SECTION B - QUESTION AND ANSWER PAPER
CALCULATOR – 1 HOUR 30 MINUTES
PRACTICE ASSESSMENT 3 (FSM101P)

Do not open this paper until you are told to do so by the invigilator.

Overall assessment marks available: **60**
Overall assessment time limit: **2 HOURS**

There are **TWO** Sections to this assessment:

- **Section A** – please ensure you have handed in Section A before beginning Section B
- **Section B** includes Task 2, 3 and 4. You can use a non-scientific calculator for this section.
  Total marks available: 45. Time limit: 1 hour and 30 minutes.

For Section B you need:

- This question and answer paper
- A pen with black or blue ink
- A pencil
- A ruler and a protractor
- A non-scientific calculator

INTERNET ACCESS IS NOT PERMITTED
You now have a further 1 hour and 30 minutes to complete **Section B**.

Instructions
1. Please sign and date below to confirm that your details are correct and that you have understood the instructions.
2. Read each task and question carefully.
3. Remember to show all your workings out clearly.
4. The number of marks available for each question is shown in brackets. Use these marks to guide you on how long to spend on each question.
5. Answer **all** questions using the space provided on this question and answer paper.
6. If you have time, check your work for **Section B** at the end.
7. If you use extra paper, write your name, learner number and the question number you are answering on it, and securely attach it to this question and answer paper.
8. At the end of this section (**Section B**), hand in this question and answer paper and all notes to the invigilator.

For Markers Use Only

Section B

Question 11

Compare mixed numbers & fractions:

Put the fractions in order from largest to smallest.

Convert to common denominator 8: 1 1/4 = 10/8, 1 3/8 = 11/8, 7/8

[2 marks]

(2 marks)

$^{2}/_{3}$ $^{9}/_{10}$ $1\,^{1}/_{2}$ $1\,^{1}/_{4}$ $^{3}/_{4}$

Write your answer in this bo

7/8, 1 1/4, 1 3/8

Write six hundred and fifty-eight thousand, two hundred and nine in digits:

Question 12

Write the number in digits:

[1 mark]

Six hundred and fifty eight thousand, two hundred and nine.

658,209

(1 mark)

Write your answer in this box:

658209

For Markers Use Only

Question 13

Freddie is taking a group of 53 children on a trip to a theme park. He needs a ratio of at least 1:8 of adults to children.

How many adults need to go on the trip?

(2 marks)

Show your calculations and/or workings out here:

Ratio 1 adult : 8 children for 53 children:

53 ÷ 8 = 6.625 --> Need 7 adults to accompany all children [M1 A1]

Write your answer in this box:

7 adults ✓

For Markers Use Only

Question 14

Freddie sees this notice about ticket prices. He decides to book the tickets early.

Tickets

£21.95 per child

Book early and get a 15% discount off the total price

Step 1: Total ticket price = 53 × £21.95 = £1163.35 [M1]

Step 2: 15% discount = £1163.35 × 0.15 = £174.50
Discounted price = £1163.35 − £174.50 = £988.85 [M1 A1]

Calculate the total price Freddie will pay for the 53 children's tickets, then round to the nearest pound. [A1]

Step 3: Round to nearest pound = £989

(4 marks)

Show your calculations and/or workings out here:

£989 ✓

Write your answer in this box:

For Markers Use Only

Question 15

Freddie wants to find out about children's favourite rides at the theme park. He records this information:

Name of Child	Favourite Ride
James	Log Flume
Hannah	Pirate Ship
Chloe	Log Flume
Imran	Roller Coaster
Ben	Log Flume
Sean	Pirate Ship
Katy	Roller Coaster
Sana	Log Flume
Craig	Pirate Ship
Rakesh	Log Flume
Bethany	Pirate Ship
Caitlin	Log Flume

Tally counts: Log Flume: 6, Pirate Ship: 4, Roller Coaster: 2 (Total = 12) [2 marks]

Log Flume (6), Pirate Ship (4), Roller Coaster (2)

Complete the table below to show how many children liked each ride.

(2 marks)

Ride	Tally	Total
Log Flume		
Roller Coaster		
Pirate Ship		
Overall total		

For Markers Use Only

Question 16

Freddie needs to make sure the children are back from the theme park by 5 pm. He has made these notes.

Notes

- Spend 3 ½ hours on the rides
- Lunch ¾ hour
- Acrobatic show 40 minutes
- Coach journey 1 ½ hours one way

Step 1: Total duration = 3h + 1h + 1h + 30m + 30m + 30m + 45m + 40m = 7h 55m

[M1 A1]

Step 2: Latest arrival 17:00 (5:00 pm). Count back 7h 55m:

17:00 − 7h = 10:00 --> 10:00 − 55 mins = 09:05 am

[M1 A1]

What time should the coach leave in the morning to ensure they are back by 5 pm?

Explain your answer. (4 marks)

Show your calculations and/or workings out here:

09:05 am

They need 7 hours 55 minutes, so must leave by 9:05 am to arrive by 5 pm.

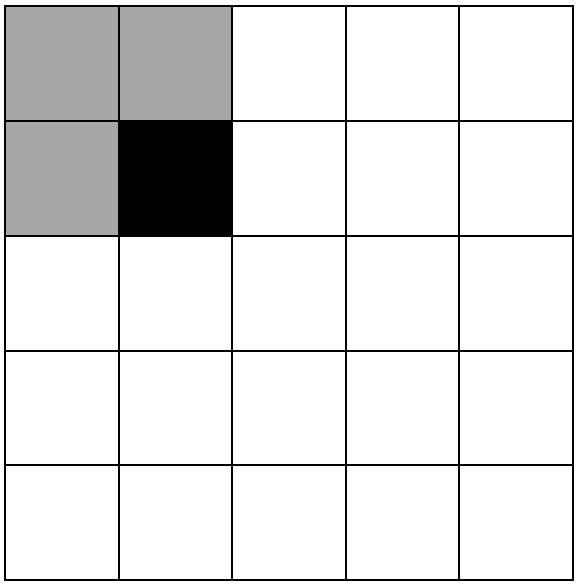

Write your answer and your explanation in this box:

For Markers Use Only

Question 17

Fully complete the grid with black and grey tiles to make a symmetrical pattern.

(2 marks)

Black

Grey

Question 18

How many lines of symmetry does your pattern have? Refer to the grid you completed in Question 17.

(1 mark)

Write your answer in this box:

For Markers Use Only

Question 19

Anya has decided to improve her health. She goes to the gym to lift weights. She uses a 20 kg barbell and adds 3 extra weights to each side.

What will be the total weight if she adds a 5 kg, a 2.5 kg and a 1.25 kg weight to each side of the barbell?

(2 marks)

Sum of barbell weights: 20 + (2 × 5) + (2 × 2.5) + (2 × 1.25):

Show your calculations and/or workings out here:

20 + 10 + 5 + 2.5 = 37.5 kg [M1 A1]

Write your answer in this box:

37.5 kg ✓

For Markers Use Only

Question 20

Anya consumes 1820 calories each day.

She wants to ensure she is eating enough protein. She finds information which tells her that $^1/_3$ of her calories should come from fat, $^1/_4$ of her calories from carbohydrates and the rest from protein.

Complete the table to show the number of calories for fat, carbohydrate and protein.

Step 1: Calories from fat = 1820 ÷ 4 = 455 kcal
Step 2: Calories from carbs = 1820 ÷ 3 = 606.7 kcal
[M1 A1]

Nutrient	Fat	Carbohydrate	Protein
Calories			

Step 3: Calories from protein = 1820 − (455 + 606.7) = 758.3 kcal
Step 4: Check if > 2/5 of total: 2/5 of 1820 = 728 kcal. 758.3 > 728 kcal.
[M1 A1]

Anya thinks more than $^2/_5$ of her calories should come from protein.

Is she correct? Give a reason for your answer.

(5 marks)

Show your calculations and/or workings out here:

Yes

Protein provides ~758 kcal, which is more than 2/5 (728 kcal).

Write your answer and reason in this box:

For Markers Use Only

Question 21

Anya tracks her weight over 8 weeks.

Week	Weight loss/gain (lb)
1	-2
2	-1.5
3	+0.5
4	+1
5	-0.5
6	-2
7	+0.5
8	-2

Net weight lost over 8 weeks:

(-2) + (-1.5) + (+0.5) + (+1) + (-0.5) + (-2) + (+0.5) + (-2) = -6 lbs (6 lbs lost) [2 marks]

What is the change in Anya's weight over these 8 weeks?

(2 marks)

Show your calculations and/or workings out here:

6 lbs lost ✓

Write your answer in this box:

For Markers Use Only

Question 22

Anya swims three times a week. Her target is 3.5 km per week.

Calculate how many complete lengths of the 25 metre pool she will need to swim on each visit to achieve this?

(3 marks)

Show your calculations and/or workings out here:

Step 1: Convert 3.5 km to metres = 3.5 × 1000 = 3500 m [M1]

Step 2: Total lengths of 25m pool = 3500 ÷ 25 = 140 lengths

Step 3: Lengths per visit (3 visits) = 140 ÷ 3 = 46.67 --> 47, 47, 46 lengths [M1 A1]

Write your answer in this box:

47 lengths (e.g. 47, 47, and 46)

For Markers Use Only

Question 23

Express 0.6 as a percentage and a fraction in its simplest form.

(2 marks)

Show your calculations and/or workings out here:

Express 0.6 as a fraction and percentage:
Fraction: 6/10 = 3/5; Percentage: 0.6 × 100 = 60%

[2 marks]

3/5 and 60% ✓

Write your answer in this box:

Question 24

Round 326.758 to 2 decimal places.

(1 mark)

Round 326.758 to 2 decimal places (check 3rd d.p. 8 >= 5):

Write your answer in this box:

326.758 --> 326.76

[1 mark]

326.76 ✓

For Markers Use Only

Question 25

Sayeed wants to keep tropical fish in a tank in his house. He sees this information. He decides to buy the starter kit and spread the cost over 12 months.

Tropical Fish Starter Kit

Fish Tank
Heater
Pump
Plants
Gravel

£149.99

Spread the cost over 12 months with interest of 15% per year

Step 1: Interest = £149.99 × 0.15 = £22.50

Step 2: Total cost = £149.99 + £22.50 = £172.49

Step 3: 12 monthly payments = £172.49 ÷ 12 = £14.374... --> £14.37

[M1 A1]

[M1 A1]

How much will Sayeed pay per month?

Show your calculations and/or workings out here:

£14.37 per month ✓

Write your answer in this box:

(4 marks)

For Markers Use Only

Question 26

Sayeed will heat the water in the fish tank before putting the fish in. His fish tank is 86 cm x 54.5 cm x 43 cm. The heater will heat 10 litres of water every hour to the required temperature.

Step 1: Volume = 54.5cm x 43cm x 86cm = 201,541 cm³ [M1 A1]

1000 cm^3 = 1 litre

Step 2: Convert cm^3 to litres (1000 cm^3 = 1 litre):

201,541 ÷ 1000 = 201.541 litres [M1]

How long will it take to heat all the water in his tank to the required temperature?

Step 3: Time at 10 litres per hour = 201.541 ÷ 10 = 20.154 hours (~20 hours) [A1] (4 marks)

Show your calculations and/or workings out here:

20.15 hours (20 hours 9 mins)

Write your answer in this box:

For Markers Use Only

Question 27

Sayeed wants to buy the maximum number of fish that will fit in his tank. Each fish costs £1.89.

Total cost of maximum number of fish in £ = area ÷ 75 x cost per fish

Step 1: Base area = 86cm x 43cm = 3698 cm² [M1 A1]

Step 2: Formula substitution: Area ÷ 75 x 1.89:

3698 ÷ 75 x 1.89 = £93.1896... --> £93.19 [M1 A1]

How much will it cost for Sayeed to buy the maximum number of fish that can fit in his tank?

(4 marks)

Show your calculations and/or workings out here:

£93.19

Write your answer in this box:

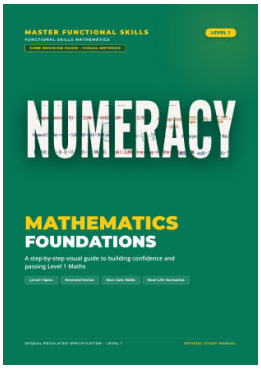

[End of assessment]
