OFFICIAL MFS MODEL SOLUTION

60 / 60 Marks (100% Pass)

- Practice Assessment 1 (FSM207P)
- Complete step-by-step worked models
- Official Mark Scheme Allocations [M1 / A1]
- Exam Board: Open Awards (Ofqual Regulated)

Verified by Tutor Abdul · MasterFunctionalSkills.co.uk

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

LEVEL 2 FUNCTIONAL SKILLS QUALIFICATION IN MATHEMATICS

SECTION A - QUESTION AND ANSWER PAPER
NON-CALCULATOR – 30 MINUTES
PRACTICE ASSESSMENT 1 (FSM207P)

Do not open this paper until you are told to do so by the invigilator.

Overall assessment marks available: **60**
Overall assessment time limit: **2 HOURS**

There are **TWO** Sections to this assessment:

- **Section A** includes Task 1. You **must not** use a calculator for this section.

  Total marks available: 15. Time limit: 30 minutes
- **Section B** includes Task 2, 3 and 4. You can use a non-scientific calculator for this section

  Total marks available: 45. Time limit: 1 hour and 30 minutes

For Section A you need:

- This question and answer paper
- A pen with black or blue ink
- A pencil
- A ruler and a protractor

INTERNET ACCESS IS NOT PERMITTED AND YOU MUST NOT USE A CALCULATOR

The invigilator will stop the assessment after 30 minutes. You must hand in this question and answer paper at this point.

The invigilator will then hand out **Section B** and a non-scientific calculator. You will then have a further 1 hour and 30 minutes to complete **Section B**.

Instructions

1. Please sign and date below to confirm that your details are correct and that you have understood the instructions.
2. Read each task and question carefully.
3. Remember to show all your workings out clearly.
4. The number of marks available for each question is shown in brackets. Use these marks to guide you on how long to spend on each question.
5. Answer **all** questions using the space provided on this question and answer paper.
6. If you have time, check your work for **Section A** at the end. Once you have handed in this question and answer paper, you will not be able to check this again.
7. If you use extra paper, write your name, learner number and the question number you are answering on it and securely attach it to this question and answer paper.

Learner name:	Master Functional Skills
Learner number:	MFS-OA-2026
Centre number:	Master Functional Skills (MFS01)

Today's date:	20 / 10 / 2026

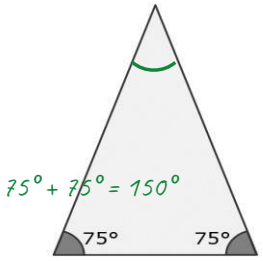

Page left intentionally blank

For Markers Use Only

Section A

Question 1

Below is an isosceles triangle. ? = 30°

What is the size of the missing angle? (1 mark)
Show your calculations and/or workings out here:

Step 1: Base angles of an isosceles triangle are equal: 75° + 75° = 150°

Step 2: Angles in any triangle always add up to 180°:

Missing top angle = 180° − 150° = 30° [1 mark]

Write your answer in this box:

30° ✓

Question 2

Calculate 42.567 + 49.63 (1 mark)

Show your calculations and/or workings out here:

Step 1: Pad 49.63 with trailing zero (49.630) and add vertically:

```
  42.567
+ 49.630
  92.197
  1 1  1
```

- 7 + 0 = 7, 6 + 3 = 9
- 5 + 6 = 11 (1 down, carry 1)
- 2 + 9 + 1 = 12 (2 down, carry 1)
- 4 + 4 + 1 = 9 --> 92.197

[1 mark]

Write your answer in this box:

92.197 ✓

For Markers Use Only

Question 3

Calculate 54.983 – 33.947 (1 mark)

Show your calculations and/or workings out here:

Step 1: Align decimal points and subtract column-by-column:

$$\begin{array}{r} 54.9\overset{7}{\cancel{8}}\overset{1}{3} \\ -\ 33.947 \\ \hline 21.036 \end{array}$$

- 13 - 7 = 6 (borrowed from 8)
- 7 - 4 = 3
- 9 - 9 = 0
- 4 - 3 = 1 and 5 - 3 = 2

[1 mark]

Write your answer in this box:

21.036 ✓

Question 4

What is the mode of this data? (1 mark)

61 74 53 98 64 44 52 61 54 79 61 74.

Show your calculations and/or workings out here:

Step 1: The mode is the value that appears most frequently:

- Frequency of 61 = 3 times (highlighted above)
- Frequency of 74 = 2 times; all other numbers appear once.

Mode = 61

[1 mark]

Write your answer in this box:

61 ✓

For Markers Use Only

Question 5

Calculate the median of this data: (2 marks)

96.3 56.1 34.4 72.9 15.32 63.7 52.7 43.9 27.91 37.76

Show your calculations and/or workings out here:

Step 1: Order data from smallest to largest:

15.32, 27.91, 34.4, 37.76, 43.9, 52.7, 56.1, 63.7, 72.9, 96.3

^ Middle two values (5th & 6th)

Step 2: Add middle numbers:

$$\begin{array}{r} 43.9 \\ +\ 52.7 \\ \hline 96.6 \end{array}$$

Step 3: Divide sum by 2 (bus stop):

$$2 \overline{)\,96.6} = 48.3$$

Median = 96.6 ÷ 2 = 48.3 [M1 A1]

Write your answer in this box:

48.3 ✓

For Markers Use Only

Question 6

A charity wants to raise a quarter of a million pounds over six months.
They have monthly expenses of £1467.26.

In five months they raise the amounts below:

Month	Amount in £
March	£26,346
April	£32,783
May	£25,256
June	£67,327
July	£53,893

The manager comments “We need to raise £52,000 in August to reach our target.”

Is the manager correct? Give a reason for your answer. (5 marks)

Show your calculations and/or workings out here:

1. Total 5 Months Income:

```
  26346
  32783
  25256
  67327
+ 53893
 205605  [MI]
  2232
```

2. Total 6 Months Expenses (£1,467.26 × 6):

```
 1467.26
x      6
 8803.56  [MI]
 24413
```

3. Net Income (Income − Expenses):

```
 205605.00
-  8803.56
 196801.44  [MI]
```

4. Target Shortfall (Quarter Million = £250,000):

```
 250000.00
- 196801.44
  53198.56  [MI]
```

5. Compare with Manager's August Plan:

- Raised + Plan: £196,801.44 + £52,000
  = £248,801.44
- Shortfall: £250,000 − £248,801.44
  = £1,198.56 short of target

--> Needs £53,198.56, NOT £52,000!

(Conclusion and official justification recorded in answer box on next page -->)

For Markers Use Only

Write your answer and reason in this box:

No, the manager is not correct. ✓ [A1]

- Target: £250,000. With August income of £52,000:

  Total net funds = £196,801.44 + £52,000 = £248,801.44.

- They need £53,198.56 in August, falling short of target by £1,198.56.

For Markers Use Only

Question 7

Carmel and Fiona each want to walk 7 miles in a week.

	Monday	Tuesday	Wednesday	Thursday	Friday
Carmel	$\frac{2}{3}$ mile	$\frac{2}{3}$ mile	$\frac{2}{3}$ mile	$\frac{2}{3}$ mile	$\frac{2}{3}$ mile
Fiona	$1\frac{1}{2}$ miles	$1\frac{1}{6}$ miles	$1\frac{1}{6}$ mile	$\frac{1}{3}$ mile	0 mile

How much further does each of them need to walk at the weekend to achieve their aim? (4 marks)

Show your calculations and/or workings out here:

Step 1: Total miles walked by Carmel (Mon-Fri = 2/3 mile every day):

2/3 + 2/3 + 2/3 + 2/3 + 2/3 = 10/3 miles = 3 1/3 miles

Carmel remaining = 7 − 10/3 = 11/3 = 3 2/3 miles [M1 A1]

Step 2: Total miles walked by Fiona (convert to common denominator 6):

- Mon: 1 1/2 = 3/2 = 9/6
- Tue: 1 1/6 = 7/6
- Wed: 1 1/6 = 7/6
- Thu: 1/3 = 2/6
- Fri: 0

Total Fiona walked = (9 + 7 + 7 + 2) / 6 = 25/6 = 4 1/6 miles

Fiona remaining = 7 − 25/6 = 17/6 = 2 5/6 miles [M1 A1]

Write your answers in this box:

Carmel: 3 2/3 miles ✓

Fiona: 2 5/6 miles ✓

[End of Section A]

Page left intentionally blank

Page left intentionally blank

LEVEL 2 FUNCTIONAL SKILLS QUALIFICATION IN MATHEMATICS

SECTION B - QUESTION AND ANSWER PAPER CALCULATOR – 1 HOUR 30 MINUTES PRACTICE ASSESSMENT 1 (FSM207P)

Do not open this paper until you are told to do so by the invigilator.

Overall assessment marks available: **60**
Overall assessment time limit: **2 HOURS**

There are **TWO** Sections to this assessment:

- **Section A** – please ensure you have handed in Section A before beginning Section B
- **Section B** includes Task 2, 3 and 4. You can use a non-scientific calculator for this section.

Total marks available: 45. Time limit: 1 hour and 30 minutes.

For Section B you need:

- This question and answer paper
- A pen with black or blue ink
- A pencil
- A ruler and a protractor
- A non-scientific calculator

INTERNET ACCESS IS NOT PERMITTED

You now have a further 1 hour and 30 minutes to complete **Section B**.

Instructions

1. Please sign and date below to confirm that your details are correct and that you have understood the instructions.
2. Read each task and question carefully.
3. Remember to show all your workings out clearly.
4. The number of marks available for each question is shown in brackets. Use these marks to guide you on how long to spend on each question.
5. Answer **all** questions using the space provided on this question and answer paper.
6. If you have time, check your work for **Section B** at the end.
7. If you use extra paper, write your name, learner number and the question number you are answering on it, and securely attach it to this question and answer paper.
8. At the end of this section (**Section B**), hand in this question and answer paper and all notes to the invigilator.

For Markers Use Only

Section B

Question 8

Round 24.927 to two decimal places. (1 mark)

Show your calculations and/or workings out here:

Step 1: Inspect the third decimal place (deciding digit):

24.92[7] --> 7 >= 5, so round up the hundredths digit 2 to 3:

24.927 rounds to 24.93 *[1 mark]*

Write your answer in this box:

24.93 ✓

Question 9

What is the probability of rolling a 3 on a fair six-sided dice?

Give your answer as a percentage. (1 mark)

Show your calculations and/or workings out here:

Step 1: Probability of rolling a 3 on fair 6-sided dice = 1 / 6:

Step 2: Convert fraction to percentage (× 100):

1 ÷ 6 × 100 = 16.666...% = 16.67% (or 16.7%) *[1 mark]*

Write your answer in this box:

16.67% ✓

For Markers Use Only

Question 10

What is 25 as a fraction of 350? Give your answer in its simplest form. (1 mark)

Show your calculations and/or workings out here:

Step 1: Write as a fraction of 350:

Fraction = 25 / 350

Step 2: Divide numerator and denominator by HCF (25):

25 ÷ 25 = 1 and 350 ÷ 25 = 14

Simplest form = 1 / 14 [1 mark]

Write your answer in this box:

1 / 14 ✓

For Markers Use Only

Question 11

A children's nursery has three play rooms for different age groups. They have 17 staff members.

They charge £38.50 per day for each child.

The table below shows the maximum number of children allowed per room and the minimum staff ratio required.

	Age	Max room capacity	Ratio of staff to children
Room A:	Under 2 years old	20	1:2
Room B:	2-3 years old	22	1:4
Room C:	3 years old and above	22	1:8

What is the maximum income they can make in one day with 17 staff? (4 marks)

Show your calculations and/or workings out here:

Step 1: Calculate staff needed to fill each room to maximum capacity:

- Room A (Under 2s, 1:2): 20 children ÷ 2 = 10 staff [M1]
- Room B (2-3 yrs, 1:4): 22 children ÷ 4 = 5.5 --> 6 staff
- Room C (3+ yrs, 1:8): 22 children ÷ 8 = 2.75 --> 3 staff

Step 2: Allocate 17 staff to maximize total children:

- Fill Room B (6 staff, 22 kids) + Room C (3 staff, 22 kids) = 9 staff used.
- Remaining staff for Room A = 17 - 9 = 8 staff.
- 8 staff in Room A (1:2 ratio) look after: 8 × 2 = 16 children.

Total children = 16 + 22 + 22 = 60 children [M1 A1]

Step 3: Calculate maximum daily income:

Maximum income = 60 children × £38.50 = £2,310 [A1]

Write your answer in this box:

£2,310

For Markers Use Only

Question 12

On Monday 34% of the children who usually attend the nursery were absent.
29 children attended the nursery on Monday.

How many children would usually be at the nursery on Monday? (2 marks)

Show your calculations and/or workings out here:

Step 1: Calculate the percentage of children who were present:

Present % = 100% - 34% = 66% [M1]

Step 2: Reverse percentage to find total usual attendance (100%):

66% = 29 children --> Total = 29 ÷ 0.66

Total = 43.939... children

Step 3: Round to whole child (discrete human count):

43.939... rounds up to 44 children [A1]

Write your answer in this box:

44 children ✓

For Markers Use Only

Question 13

Every weekday the nursery buys enough milk for 37 children to have 250 ml of milk each. An additional two pints per day is bought for the staff.

The milk comes in 4-pint cartons. The price of a carton of milk has increased by 10p.

How much more will the nursery pay for milk each week? (4 marks)

1 litre = 1.76 pints --> (multiply litres by 1.76 to convert to pints)

Show your calculations and/or workings out here:

Step 1: Total milk for 37 children over 5 weekdays:

37 children × 250 ml = 9,250 ml per day

9,250 ml × 5 days = 46,250 ml = 46.25 litres per week [M1]

Step 2: Convert litres to pints (1 litre = 1.76 pints):

Children: 46.25 litres × 1.76 = 81.4 pints

Staff: 2 pints/day × 5 days = 10 pints

Total milk needed = 81.4 + 10 = 91.4 pints [M1]

Step 3: Calculate 4-pint cartons needed (must round UP):

91.4 pints ÷ 4 pints/carton = 22.85 --> 23 cartons [M1]

Step 4: Calculate extra cost (10p per carton):

Extra cost = 23 cartons × £0.10 = £2.30 per week [A1]

Write your answer in this box:

£2.30 ✓

For Markers Use Only

Question 14

Sam is a nursery nurse and earns £8.58 per hour for the first 35 hours worked per week.

Any hours over 35 per week are paid at the overtime rate.

These are the hours that Sam works this week:

Day	Amount of time worked
Monday	9 hours
Tuesday	8 hours
Wednesday	8 hours 45 minutes
Thursday	8 hours 30 minutes
Friday	8 hours

This week Sam earns £383.24.

How much does he get paid for each hour of overtime worked? (3 marks)

Show your calculations and/or workings out here:

Step 1: Total hours worked across the 5 days:

9 + 8 + 8.75 + 8.5 + 8 = 42.25 hours (42 hours 15 mins)

Overtime hours = 42.25 − 35 = 7.25 hours [M1]

Step 2: Calculate basic pay and total overtime pay:

Basic pay = 35 hours × £8.58 = £300.30

Overtime pay = £383.24 − £300.30 = £82.94 [M1]

Step 3: Hourly overtime rate:

Overtime rate = £82.94 ÷ 7.25 hours = £11.44 per hour [A1]

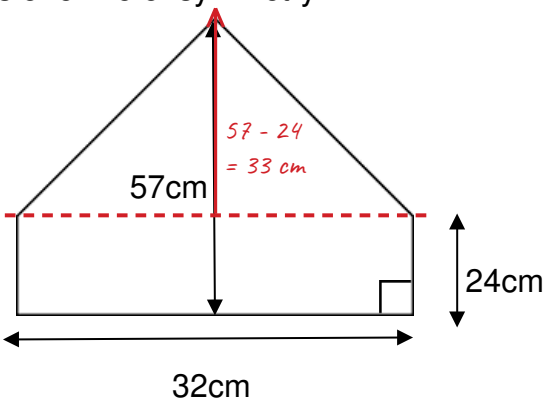

Write your answer in this box:

£11.44 per hour

For Markers Use Only

Question 15

The shape below has one line of symmetry.

What is the area of the shape? (3 marks)

Show your calculations and/or workings out here:

Step 1: Calculate the perpendicular height of the triangle:

Triangle height = 57 - 24 = 33 cm [M1]

Step 2: Calculate area of the rectangular base:

Area rectangle = width × height = 32 × 24 = 768 cm² [M1]

Step 3: Calculate area of the triangle top & total area:

Area triangle = 1/2 × base × height = 0.5 × 32 × 33 = 528 cm²

Total area = 768 + 528 = 1,296 cm² [A1]

Write your answer in this box:

1,296 cm² ✓

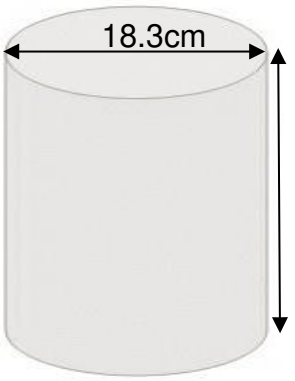

For Markers Use Only

Question 16

A company makes 600 cylindrical vases. 12.5% of vases are discarded due to faults.

The sides of the remaining vases will be painted either blue or white.

They have 800 000cm³ of blue paint and will use all of this up before painting the rest of the vases with white paint.

- Curved side only (no top or base)

Formula: Area = π × d × h

Curved Surface Area:

= π × d × h

= 3.142 × 18.3 × 32.3

= 1,857.204 cm²

What is the probability that a vase picked at random will be blue?
Give your answer as a decimal. (7 marks)

For Markers Use Only

Show your calculations and/or workings out here:

Step 1: Curved surface area of cylindrical side (π × d × h):

Area = 3.142 × 18.3 × 32.3 = 1,857.204... cm² [M1 A1]

Step 2: Deduct 12.5% faulty discarded vases:

Discarded = 600 × 0.125 = 75 vases

Remaining good vases = 600 − 75 = 525 vases [M1 A1]

Step 3: Number of vases painted blue with 800,000 cm² paint:

Blue vases = 800,000 ÷ 1,857.204 = 430.75 --> 430 vases [M1]

Step 4: Probability of picking a blue vase (430 ÷ 525):

P(Blue) = 430 / 525 = 430 ÷ 525 = 0.819047...

Probability as decimal = 0.82 (or 0.819) [M1 A1]

Write your answer in this box:

0.82 ✓

For Markers Use Only

Question 17

The company also makes glazed pots.

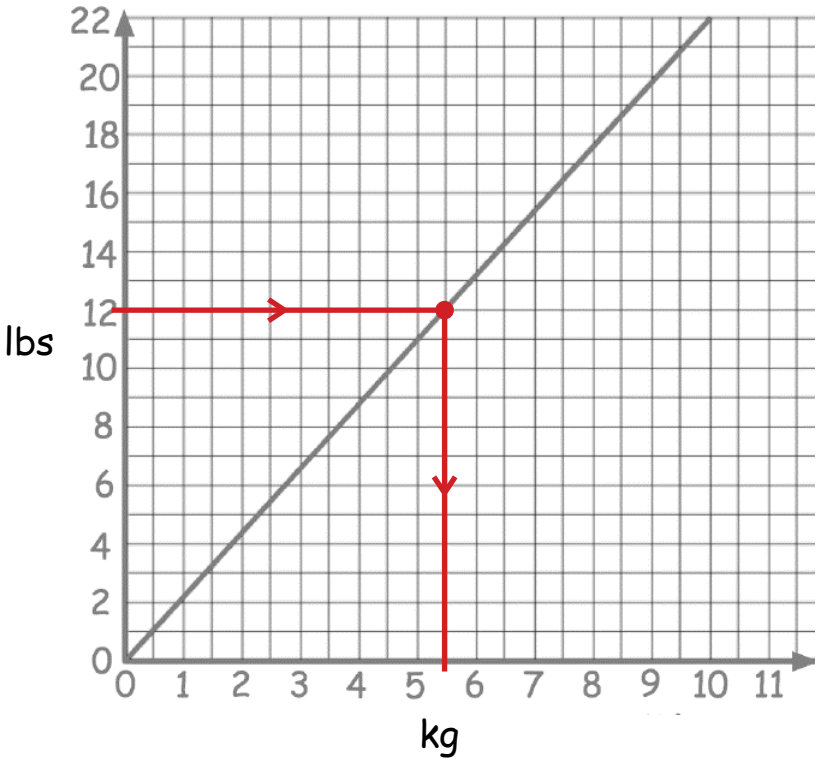

To make the glaze they mix ½ pint of water for every 1lb of glaze powder.

They have this information about glaze powder:

	Pack Size	Price
A	0.25kg	£9.86
B	0.75kg	£24.97
C	1 kg	£33.98

They need to make 6 pints of glaze and want to spend as little as possible.

Which pack size is the cheapest? (4 marks)

For Markers Use Only

Show your calculations and/or workings out here:

Step 1: Calculate total weight of glaze powder needed in lbs:

Ratio: 1/2 pt water = 1 lb powder --> 6 ÷ 0.5 = 12 lbs [M1]

Step 2: Read conversion graph for 12 lbs to kilograms:

From conversion graph, 12 lbs = 5.5 kg of glaze powder [M1]

Step 3: Calculate the cost for each pack size to cover 5.5 kg:

- *0.25 kg pack (A): 5.5 ÷ 0.25 = 22 packs --> 22 × £9.86 = £216.92*
- *0.75 kg pack (B): 5.5 ÷ 0.75 = 7.33... --> 8 packs needed*

  Cost = 8 × £24.97 = £199.76 (or 8 × £24.96 = £199.68) [M1]
- *1.0 kg pack (C): 5.5 ÷ 1.0 = 5.5 --> 6 packs needed*

  Cost = 6 × £33.98 = £203.88

Step 4: Compare costs to find cheapest option:

£199.76 < £203.88 < £216.92

--> 0.75 kg pack (B) is cheapest (£199.76) [A1]

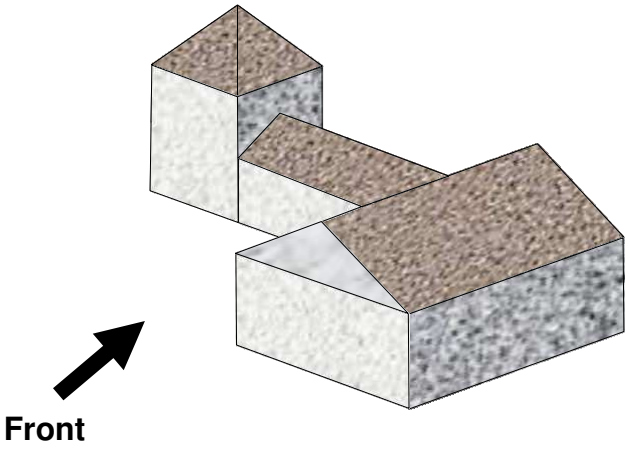

Write your answer in this box:

0.75 kg pack (£199.76) ✓

For Markers Use Only

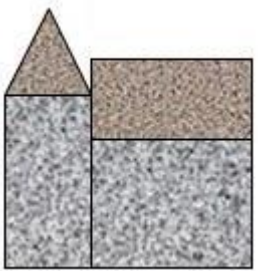

Question 18

This is an artist's 3d sketch of a new building.

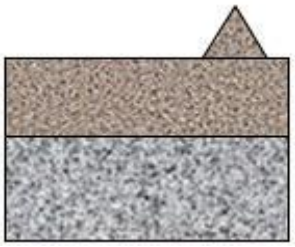

Which of the diagrams below show the front elevation of the building above? (1 mark)

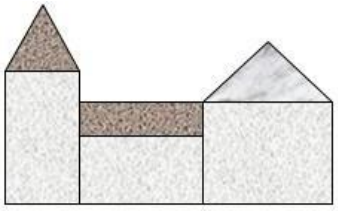

A

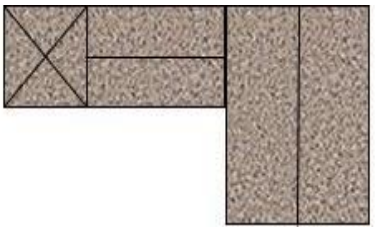

B

C

D

Front elevation has roof peaking on right and sloping left: **[1 mark]**

Write your answer in this box:

C ✓

For Markers Use Only

Question 19

Using the following formula, calculate F when b = 2.5 (2 marks)

$$F = 5(b - 1.96)^2$$

Show your calculations and/or workings out here:

Step 1: Substitute b = 2.5 into the bracket (b - 1.96):

$b - 1.96 = 2.5 - 1.96 = 0.54$ [M1]

Step 2: Square the bracket value (BIDMAS: Indices before Multiplication):

$(0.54)^2 = 0.54 \times 0.54 = 0.2916$

Step 3: Multiply by 5:

$F = 5 \times 0.2916 = 1.458$ [A1]

Write your answer in this box:

1.458 ✓

For Markers Use Only

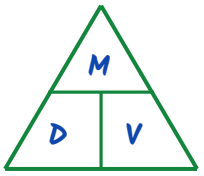

Question 20

Dylan is conducting an experiment and wants to choose the ball with the lowest density.

Ball A – diameter 7cm, mass 1.742kg

Ball B – diameter 6cm, mass 1.040kg

$$\textbf{Volume of sphere} = \frac{4}{3}\pi r^3$$

$$\textbf{Density} = \textbf{mass} \div \textbf{volume}$$

Which ball should he choose? (5 marks)

Show your calculations and/or workings out here:

Step 1: Calculate radius, volume and density for Ball A (r = 7 ÷ 2 = 3.5 cm):

Volume A = 4/3 × 3.142 × (3.5)³ = 4/3 × 3.142 × 42.875 = 179.62 cm³

Density A = 1,742 g ÷ 179.62 cm³ = 9.70 g/cm³ [M1 M1]

Step 2: Calculate radius, volume and density for Ball B (r = 6 ÷ 2 = 3.0 cm):

Volume B = 4/3 × 3.142 × (3.0)³ = 4/3 × 3.142 × 27 = 113.11 cm³

Density B = 1,040 g ÷ 113.11 cm³ = 9.20 g/cm³ [M1 M1]

Step 3: Compare densities to choose the lowest:

9.20 g/cm³ < 9.70 g/cm³ --> Ball B has lower density [A1]

Write your answer in this box:

Ball B ✓

For Markers Use Only

Question 21

A swimming club has two swimming teams. One team will be chosen to represent the club at a gala.

The performance of the two teams over previous race meetings is shown below:

Team performance over six race meetings (time in seconds)

	1	2	3	4	5	6
Team A	63.50	64.56	67.01	71.87	69.21	69.00
Team B	68.21	65.74	67.21	69.21	77.61	62.19

Becca and Cody are swim coaches.

Becca says: '**Team A should be chosen as their average time is lower**.'
Cody says: '**Team B should be chosen as their average time is lower**.'

Explain how both coaches are correct. You must show calculations to support your explanation.
(4 marks)

Show your calculations and/or workings out here:

Step 1: Calculate the mean swim times for both teams (Sum ÷ 6):

- Team A Mean = 405.15 ÷ 6 = 67.53 seconds
- Team B Mean = 410.17 ÷ 6 = 68.36 seconds [M1]

Step 2: Calculate the median swim times for both teams:

- Team A (ordered): 63.50, 64.56, 67.01, 69.00, 69.21, 71.87
  Median A = (67.01 + 69.00) ÷ 2 = 68.01 seconds
- Team B (ordered): 62.19, 65.74, 67.21, 68.21, 69.21, 77.61
  Median B = (67.21 + 68.21) ÷ 2 = 67.71 seconds [M1 A1]

Write your explanation in this box:

Yes, both coaches can be correct: ✓ [A1]

- Becca is correct using MEAN (Team A faster: 67.53s < 68.36s).
- Cody is correct using MEDIAN (Team B faster: 67.71s < 68.01s).

Question 22

The swimming club need to raise £135 for transport to the swimming gala.

They buy 20 tracksuits for £15.98 each and will sell them to raise money.

What percentage profit should they add to the cost of the tracksuits to raise the £135 they need?

(3 marks)

Show your calculations and/or workings out here:

Step 1: Calculate total cost of 20 tracksuits:

Total cost = 20 × £15.98 = £319.60 [M1]

(Profit required per tracksuit = £135 ÷ 20 = £6.75)

Step 2: Calculate percentage profit on cost price:

Formula: (Total Profit ÷ Total Cost) × 100

Percentage profit = (£135 ÷ £319.60) × 100

= 0.422403... × 100 = 42.24% (or 42.2%) [M1 A1]

Step 3: Verification using individual item values:

(£6.75 profit ÷ £15.98 cost) × 100 = 42.24%

Selling price per tracksuit = £15.98 + £6.75 = £22.73

Write your answer in this box:

42.24% ✓

[End of assessment]
