Assessment Date: 20 / 10 / 2026

Signature: Master Functional Skills

OFFICIAL MFS MODEL SOLUTION

60 / 60 Marks (100% Pass)

- Section A (Non-Calc): 15 / 15 Marks
- Section B (Calculator): 45 / 45 Marks
- Complete Step-by-Step Working Included
- Accredited Tutor Checked: Abdul
- High-Yield Exam Techniques Applied
- Reformed Qualification Specification FSM201P

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

START LEARNING TODAY AT

MasterFunctionalSkills.co.uk

LEVEL 2 FUNCTIONAL SKILLS QUALIFICATION IN MATHEMATICS

SECTION A - QUESTION AND ANSWER PAPER
NON-CALCULATOR – 30 MINUTES
PRACTICE ASSESSMENT 3 (FSM201P)

Do not open this paper until you are told to do so by the invigilator.

Overall assessment marks available: **60**
Overall assessment time limit: **2 HOURS**

There are **TWO** Sections to this assessment:

- **Section A** includes Task 1. You **must not** use a calculator for this section.
  Total marks available: 15. Time limit: 30 minutes

- **Section B** includes Task 2, 3 and 4. You can use a non-scientific calculator for this section
  Total marks available: 45. Time limit: 1 hour and 30 minutes

For Section A you need:

- This question and answer paper
- A pen with black or blue ink
- A pencil
- A ruler and a protractor

INTERNET ACCESS IS NOT PERMITTED AND YOU MUST NOT USE A CALCULATOR

The invigilator will stop the assessment after 30 minutes. You must hand in this question and answer paper at this point.

The invigilator will then hand out **Section B** and a non-scientific calculator. You will then have a further 1 hour and 30 minutes to complete **Section B**.

Instructions

1. Please sign and date below to confirm that your details are correct and that you have understood the instructions.
2. Read each task and question carefully.
3. Remember to show all your workings out clearly.
4. The number of marks available for each question is shown in brackets. Use these marks to guide you on how long to spend on each question.
5. Answer **all** questions using the space provided on this question and answer paper.
6. If you have time, check your work for **Section A** at the end. Once you have handed in this question and answer paper, you will not be able to check this again.
7. If you use extra paper, write your name, learner number and the question number you are answering on it and securely attach it to this question and answer paper.

Learner name:	Master Functional Skills

Centre number:	Master Functional Skills (MFS01)
Signature:	Master Functional Skills
Today's date:	20 / 10 / 2026

For Markers Use Only

Section A

Question 1

Calculate $\frac{4}{3} - \frac{1}{4}$ (1 mark)

Show your calculations and/or workings out here:

Step 1: Convert mixed number to improper fraction: 1 1/3 = 4/3

Step 2: Common denominator is 12: 4/3 = 16/12, 1/4 = 3/12

Step 3: Subtract numerators: 16/12 - 3/12 = 13/12 = 1 1/12 [1 mark]

Write your answer in this box:

1 1/12 (or 13/12) ✓

Question 2

Put these decimals in order of size, smallest to largest: (1 mark)

0.04789 0.004709 0.479 0.04798 0.004879

Show your calculations and/or workings out here:

Step 1: Compare place values (thousandths & ten-thousandths):

0.004709 < 0.004879 < 0.04789 < 0.04798 < 0.479 [1 mark]

Write your answer in this box:

0.004709, 0.004879, 0.04789, 0.04798, 0.479 ✓

For Markers Use Only

Question 3

Calculate 35.986 + 0.28 (1 mark)

Show your calculations and/or workings out here:

Vertical column addition with lined-up decimal points:

```
  35.986
+ 00.280
  36.266
    1  1
```

[1 mark]

Write your answer in this box.

36.266 ✓

Question 4

Calculate the mode of this set of numbers: (1 mark)

10.2 10.4 10.2 10.3 10.1 10.3 10.2 10.1 10.2 10.3

Show your calculations and/or workings out here:

Step 1: Tally occurrences of each number in the list:

10.1 (2 times), 10.2 (4 times), 10.3 (3 times), 10.4 (1 time)

Step 2: Mode = most frequent number = 10.2

[1 mark]

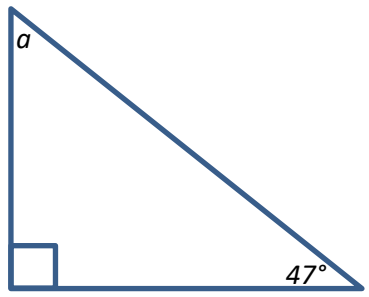

Write your answer in this box:

10.2 ✓

For Markers Use Only

Question 5

Work out the value of the missing angle, *a*

(2 marks)

Show your calculations and/or workings out here:

Step 1: Sum of angles in any triangle = 180°:

Right angle = 90°, given base angle = 47°

Sum of known angles = 90° + 47° = 137° [M1]

Step 2: Calculate missing angle a:

Angle a = 180° − 137° = 43° [A1]

(Check: 90° + 47° + 43° = 180°)

Write your answer in this box:

43° ✓

For Markers Use Only

Question 6

Elsa works as a volunteer for a forest conservation agency. Elsa and her team must plant 63000 new yew and oak trees each year in the ratio 5:3.

Elsa's team has planted 3623 oak trees so far this year. How many more oak trees do Elsa's team need to plant?

(3 marks)

Show your calculations and/or workings out here:

Step 1: Identify total parts in the tree planting ratio:

Ratio of oak trees is 3 in 8 (3 parts out of 8 total parts)

Value of 1 part = 63,000 ÷ 8 = 7,875 trees [M1]

$$\begin{array}{r} 7\ 8\ 7\ 5 \\ 8\overline{)\,6\ 3\ ^{7}0\ ^{6}0\ ^{4}0} \end{array}$$

- 63 ÷ 8 = 7 remainder 7
- 70 ÷ 8 = 8 rem 6, 60 ÷ 8 = 7 rem 4, 40 ÷ 8 = 5

Step 2: Calculate total oak trees required (3 parts):

Oak trees required = 3 × 7,875 = 23,625 oak trees [M1]

Step 3: Calculate remaining oak trees to be planted:

Already planted = 3,623 oak trees

Remaining = 23,625 - 3,623 = 20,002 oak trees [A1]

Write your answer in this box:

20,002 ✓

For Markers Use Only

Question 7

A tree planting team usually has 4 volunteers and together they can plant 45 trees per hour. Assuming all volunteers plant trees at the same rate, how many trees could 5 volunteers plant in one hour?

(2 marks)

Show your calculations and/or workings out here:

Step 1: Calculate planting rate per volunteer per hour:

Rate per person = 45 trees ÷ 4 volunteers = 11.25 trees/hr [M1]

Step 2: Calculate trees planted by 5 volunteers:

Total trees = 5 × 11.25 = 56.25 trees

Whole trees planted completed = 56 trees [A1]

Write your answers in this box:

56 trees ✓

Page left intentionally blank

For Markers Use Only

Question 8

The table below shows the number of visitors to the Forest Conservation Centre in years 2017 and 2018.

Month	2017	2018
January	Centre closed	
February		
March	1013	1032
April	1028	1278
May	987	1113
June	1520	1622
July	1692	1654
August	1321	1421
September	1254	1142
October	Centre closed	
November		
December		

The median number of visitors for 2017 is 1254. Elsa thinks this was greater than the median number of visitors for 2018, and that the visitor numbers per month in 2018 were more consistent than in 2017.

Is she correct? (4 marks)

For Markers Use Only

Show your calculations and/or workings out here.

Step 1: Order the 7 monthly visitor figures for 2018:

1032, 1113, 1142, 1278, 1421, 1622, 1654

^ 4th value (Median)

2018 Median = 1,278 visitors (2017 Median = 1,254 visitors) **[M1 A1]**

Step 2: Calculate visitor ranges for both years:

- *2017 Range = 1692 - 987 = 705 visitors*
- *2018 Range = 1654 - 1032 = 622 visitors* **[M1]**

Step 3: Comparison and conclusions:

- *Median: 1278 > 1254, so Elsa is NOT correct (2018 median was higher).*
- *Range: 622 < 705, so 2018 visitor attendance was more consistent.* **[A1]**

Write your answer in this box.

No, Elsa is not correct. The 2018 median (1278) is higher than 2017 (1254).
The 2018 range (622) is lower than 2017 (705), showing higher consistency.

[End of Section A]

Page left intentionally blank

LEVEL 2 FUNCTIONAL SKILLS QUALIFICATION IN MATHEMATICS

SECTION B - QUESTION AND ANSWER PAPER CALCULATOR – 1 HOUR 30 MINUTES PRACTICE ASSESSMENT 3 (FSM201P)

Do not open this paper until you are told to do so by the invigilator.

Overall assessment marks available: **60**
Overall assessment time limit: **2 HOURS**

There are **TWO** Sections to this assessment:

- **Section A** – please ensure you have handed in Section A before beginning Section B
- **Section B** includes Task 2, 3 and 4. You can use a non-scientific calculator for this section.
  Total marks available: 45. Time limit: 1 hour and 30 minutes.

For Section B you need:

- This question and answer paper
- A pen with black or blue ink
- A pencil
- A ruler and a protractor
- A non-scientific calculator

INTERNET ACCESS IS NOT PERMITTED
You now have a further 1 hour and 30 minutes to complete **Section B**.

Instructions
1. Please sign and date below to confirm that your details are correct and that you have understood the instructions.
2. Read each task and question carefully.
3. Remember to show all your workings out clearly.
4. The number of marks available for each question is shown in brackets. Use these marks to guide you on how long to spend on each question.
5. Answer **all** questions using the space provided on this question and answer paper.
6. If you have time, check your work for **Section B** at the end.
7. If you use extra paper, write your name, learner number and the question number you are answering on it, and securely attach it to this question and answer paper.
8. At the end of this section (**Section B**), hand in this question and answer paper and all notes to the invigilator.

Learner name:	Master Functional Skills
Learner number:	MFS-OA-2026
Centre number:	Master Functional Skills (MFS01)

Today's date:	20 / 10 / 2026

Page left intentionally blank

For Markers Use Only

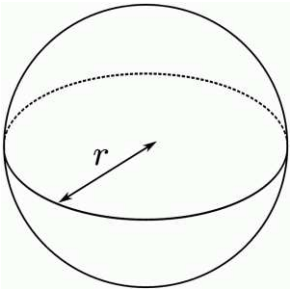

Section B

Question 9

Use the formula to work out the surface area of a sphere with a radius of 7.4cm.
Give your answer to 3 decimal places.

(3 marks)

Diagram not to scale

Surface Area = $4\pi r^2$
Use 3.14 for π

Show your calculations and/or workings out here:

Step 1: Substitute radius r = 7.4 cm and π = 3.14 into formula:

SA = 4 × π × r² = 4 × 3.14 × (7.4)² [M1]

Step 2: Evaluate product:

(7.4)² = 54.76 --> SA = 12.56 × 54.76 = 687.7856 cm² [A1]

Step 3: Round to 3 decimal places as instructed:

687.7856 cm² --> 687.786 cm² [A1]

Write your answers in this box:

687.786 cm² ✓

For Markers Use Only

Question 10

Tom works at a leisure centre. His current working hours are listed in the table below:

Day	Duties	Shift Times	Break
Monday	Reception	06:30 - 13:00	30 minutes
Tuesday	Reception	06:30 - 16:30	60 minutes
Wednesday	Lifeguard	13:00 - 20:30	60 minutes
Thursday	Reception	06:30 - 13:00	30 minutes
Friday	Reception	06:30 - 13:00	30 minutes
Saturday	Day Off		
Sunday	Lifeguard	10:00 - 16:00	30 minutes

Tom is not paid for his break times and he earns a standard rate of £8.16 per hour.

On Wednesdays and Sundays, Tom works as a lifeguard for 1.45 times his normal rate of pay per hour.

Tom thinks he could work less hours and earn the same amount of money per week by only working as a lifeguard.

Approximately how many hours per week would Tom need to work as a lifeguard to match his current weekly pay?

(5 marks)

For Markers Use Only

Show your calculations and/or workings out here:

Step 1: Calculate total paid hours worked per role:

- Reception: Mon (6h) + Tue (9h) + Thu (6h) + Fri (6h) = 27 hours
- Lifeguard: Wed (6.5h) + Sat (5.5h) = 12 hours [M1]

Step 2: Calculate lifeguard hourly pay rate (45% higher):

Lifeguard rate = £8.16 × 1.45 = £11.832 per hour (or £11.83) [M1]

Step 3: Calculate current total weekly pay:

- **Reception pay = 27 × £8.16 = £220.32**
- **Lifeguard pay = 12 × £11.832 = £141.984 (or 12 × £11.83 = £141.96)**

Total weekly pay = £220.32 + £141.96 = £362.28 [A1]

Step 4: Calculate hours needed as lifeguard to match £362.28:

Hours needed = £362.28 ÷ £11.832 = 30.618... hours [M1]

Step 5: Approximate hours to match pay:

Tom needs approximately 31 hours (or 30.5 hours) as lifeguard. [A1]

Write your answer in this box:

31 hours (or 30.5h) ✓

For Markers Use Only

Question 11

Tom receives a pay rise. His new standard rate of pay per hour has risen from £8.16 to £8.82. By what percentage has Tom's standard rate of pay per hour increased?

(2 marks)

Show your calculations and/or workings out here:

Step 1: Calculate amount of hourly pay increase:

Pay increase = £8.82 - £8.16 = £0.66 per hour

Step 2: Percentage increase formula = (Increase ÷ Original) × 100:

= (£0.66 ÷ £8.16) × 100 [M1]

Step 3: Evaluate percentage:

= 0.080882... × 100 = 8.088...% --> 8.09% (or 8.1%) [A1]

Write your answer in this box:

8.09% *(or 8.1%)* ✓

Page left intentionally blank

For Markers Use Only

Question 12

A circular jacuzzi at the leisure centre has a diameter of 2.25m and a constant depth of 0.62m.

The manager records the midday temperature of the jacuzzi every day for a week:

Mon	Tues	Wed	Thurs	Fri	Sat	Sun
37.77°c	37.72°c	37.04°c	37.78°c	37.72°c	37.71°c	37.77°c

He uses the formula below to estimate the number of kilowatt hours (kwh) used by the jacuzzi per day.

Electricity per day in kwh = Volume of water in jacuzzi in m^3 × median midday temperature in °c ÷ 0.85.

Tom thinks the electricity used by the jacuzzi is under 100Kwh per day. Is Tom correct?

(5 marks)

Show your calculations and/or workings out here:

Step 1: Calculate volume of cylinder jacuzzi (d = 2.25m, h = 0.62m):

Radius r = 2.25m ÷ 2 = 1.125m

Volume = π × r^2 × h = 3.142 × $(1.125)^2$ × 0.62 [M1]

= 3.142 × 1.265625 × 0.62 = 2.4639... m^3 (or 2.465 m^3) [A1]

Step 2: Determine median midday temperature across the 7 days:

Ordered: 37.04, 37.71, 37.72, 37.72, 37.77, 37.77, 37.78

^ Median (4th value)

Median temperature = 37.72 °C [M1]

Step 3: Substitute into daily electricity consumption formula:

Electricity = (Volume × Median Temp) ÷ 0.85

= (2.4639 × 37.72) ÷ 0.85 = 92.939 ÷ 0.85 = 109.34 kWh [M1]

109.34 kWh > 100 kWh, so Tom's estimate is incorrect.

For Markers Use Only

Write your answer and reason in this box:

No, Tom is not correct. [A1]

The jacuzzi uses 109.34 kWh per day (2.464 m³ × 37.72°C ÷ 0.85),

which exceeds Tom's estimate of 100 kWh by approximately 9.34 kWh.

For Markers Use Only

Question 13

Put these fractions in order of size, smallest to largest:

$\frac{3}{5}$ $\frac{5}{4}$ $\frac{5}{8}$ $\frac{3}{2}$ $\frac{1}{4}$ (1 mark)

Show your calculations and/or workings out here:

• Decimal benchmarks: 1/4 = 0.25, 3/5 = 0.60, 5/8 = 0.625, 5/4 = 1.25, 3/2 = 1.50

1/4, 3/5, 5/8, 5/4, 3/2 [1 mark]

Write your answer in this box:

1/4, 3/5, 5/8, 5/4, 3/2 ✓

Question 14

A bag contains 67 blue balls, 20 green balls and 47 red balls. What is the probability of picking out a blue ball **or** a red ball? Give your answer as a decimal.

(2 marks)

Show your calculations and/or workings out here:

Step 1: Total balls = 67 (blue) + 20 (green) + 47 (red) = 134 balls

Step 2: Number of blue or red balls = 67 + 47 = 114 balls

Step 3: P(Blue or Red) = 114 / 134 = 57 / 67 ≈ 0.8507... [M1]

Step 4: As decimal = 0.85 [A1]

Write your answer in this box:

0.85 ✓

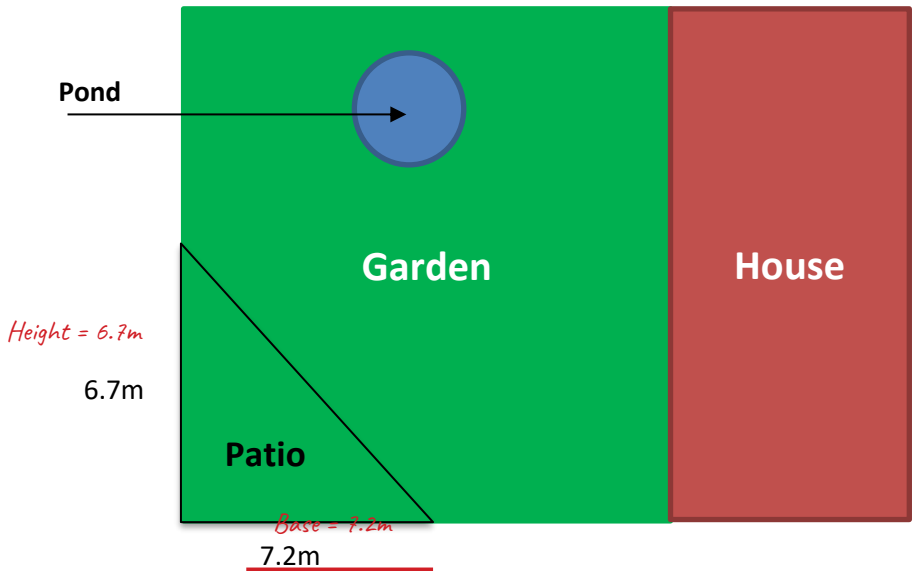

Page left intentionally blank

For Markers Use Only

Question 15

Mia wants to build a patio area in the corner of her garden. A diagram of the garden is shown below:

Diagram not to scale

Mia has prepared the patio and wants to put down either paving stones or decking boards. She wants to spend the least amount of money possible.

Should Mia choose decking or paving stones to cover the patio area?

(6 marks)

Decking Wood

Board width 120mm
Board length 2400mm
£5.25 each

Paving Stones

500mm x 500mm
£4.50 each

Offer- Buy 10 for £40

For Markers Use Only

Show your calculations and/or workings out here:

Step 1: Calculate triangular patio area:

Patio Area = 1/2 × base × height = 0.5 × 7.2m × 6.7m = 24.12 m² [M1 A1]

Step 2: Option A (Decking Wood - 120mm × 2400mm @ £5.25):

- *Board area = 0.12m × 2.4m = 0.288 m²*
- *Boards needed = 24.12 ÷ 0.288 = 83.75 --> 84 boards*
- **Total Decking Cost = 84 × £5.25 = £441.00** [M1]

Step 3: Option B (Paving Stones - 500mm × 500mm, Offer: 10 for £40):

- *Stone area = 0.5m × 0.5m = 0.25 m²; Stones needed = 24.12 ÷ 0.25 = 96.48 --> 97 stones*
- *Cost: 9 packs of 10 (£360) + 7 stones (£31.50) = £391.50 (or 10 packs = £400)*
- **Comparison: Paving is £49.50 cheaper than Decking (£391.50 vs £441.00)** [M1 A1]

Write your answer in this box:

Paving Stones (£391.50 vs £441.00 for decking) [A1]

For Markers Use Only

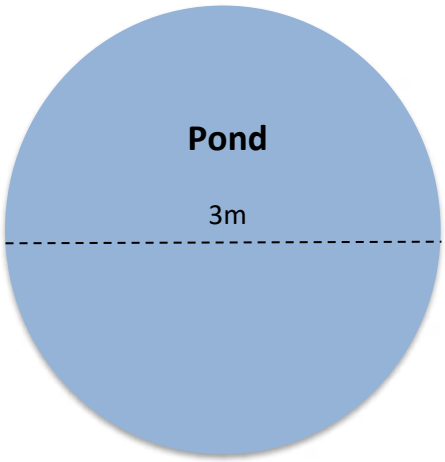

Question 16

Mia wants to build a wall around the circular pond in her garden. The pond has a diameter of 3m. Mia will use bricks that are 21cm long x 10cm wide x 6.5cm high. The wall will be built to a height of 6 bricks.

How many bricks will Mia need to build the wall?

(3 marks)

Diagram not to scale

Show your calculations and/or workings out here:

Step 1: Calculate circumference of circular pond (d = 3m):

Circumference = π x d = 3.142 x 3m = 9.426 m [M1]

(or using π = 3.14: 3.14 x 3 = 9.42 m)

Step 2: Calculate bricks per layer (laid lengthways, 210mm = 0.21m):

Bricks per layer = 9.426m ÷ 0.21m = 44.88... --> 45 bricks [M1]

Step 3: Calculate total bricks for 6 layers:

Total bricks = 45 x 6 layers = 270 bricks [A1]

Write your answer in this box:

270 bricks ✓

For Markers Use Only

Question 17

The pond has been filled with 2750 litres of water and needs to be treated to stop algae. One bottle of liquid pond treatment is required per 250 gallons of water. How many bottles of liquid pond treatment will Mia need to treat the pond?

1 gallon = 4.55 litres

(3 marks)

Show your calculations and/or workings out here:

Step 1: Convert litres to gallons (1 gallon = 4.55 litres):

Gallons = 2,750 L ÷ 4.55 = 604.3956... gallons [M1]

Step 2: Calculate bottles needed (1 bottle treats 250 gallons):

Bottles required = 604.3956 ÷ 250 = 2.417... bottles [M1]

Step 3: Round up to complete whole bottles:

Requires 3 whole bottles of algae treatment [A1]

Write your answer in this box:

3 bottles ✓

For Markers Use Only

Question 18

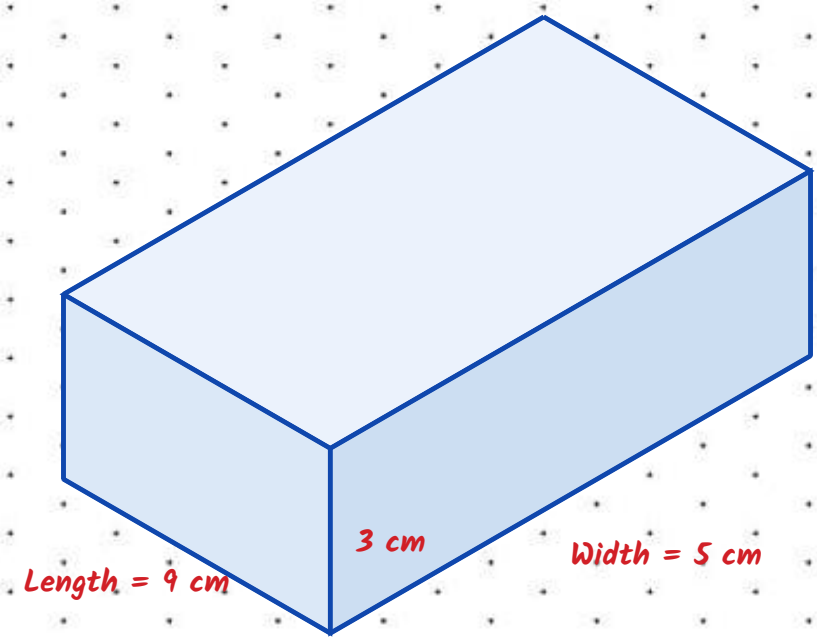

A cuboid has the dimensions 9 cm x 5 cm x 3 cm.

Draw the cuboid on the isometric paper below.

(2 marks)

- Isometric Projection: 9cm × 5cm × 3cm
- All parallel edges drawn with accurate unit counts

Isometric Dot Paper (1 cm)

For Markers Use Only

Question 19

Calculate $41 - 3^2 \times 4.5$ (1 mark)

Show your calculations and/or workings out here:

Apply BIDMAS / Order of Operations: $41 - 3^2 \times 4.5$

- Step 1 (Indices): $3^2 = 9$
- Step 2 (Multiplication): $9 \times 4.5 = 40.5$
- **Step 3 (Subtraction): $41 - 40.5 = 0.5$** [1 mark]

Write your answer in this box:

0.5 ✓

For Markers Use Only

Question 20

A running club asks its members to complete a survey. One of the questions asks members how many races they entered last year.

The answers from the 25 members are shown below:

10	**11**	**24**	**12**	**13**
5	**3**	**0**	**17**	**9**
12	**18**	**11**	**6**	**16**
21	**14**	**16**	**13**	**17**
15	**11**	**5**	**7**	**0**

Complete the table and estimate the mean number of races per club member last year.

(6 marks)

Number of Races entered	Frequency	Midpoint
0-4	3	2
5-9	5	7
10-14	9	12
15-19	6	17
20-24	2	22

For Markers Use Only

Show your calculations and/or workings out here:

Step 1: Calculate f × x products for each class interval:

- **Group 0 – 4: Midpoint = 2, f × x = 3 × 2 = 6**
- **Group 5 – 9: Midpoint = 7, f × x = 5 × 7 = 35**
- **Group 10 – 14: Midpoint = 12, f × x = 9 × 12 = 108** **[M1 A1]**
- **Group 15 – 19: Midpoint = 17, f × x = 6 × 17 = 102**
- **Group 20 – 24: Midpoint = 22, f × x = 2 × 22 = 44**

Step 2: Total races (Sum of fx) and Total members (Sum of f):

Total f = 3 + 5 + 9 + 6 + 2 = 25 members

Total fx = 6 + 35 + 108 + 102 + 44 = 295 races **[M1]**

Step 3: Estimated Mean = Total fx ÷ Total f:

= 295 ÷ 25 = 11.8 races --> 12 races (or 11.8) **[A1]**

Write your answer in this box:

Estimated Mean Number of Races = **11.8 races** ✓ **[A1]**

(or 12 races)

For Markers Use Only

Question 21

Aminah is a member of the running club. She ran 9 races last year. The distances she ran in each race are shown in the table below.

Race	Distance
Yorkshire Winter Run	10 miles
Charity Run	5 km
Charity Run	10 km
Redditch Half Marathon	13.1 miles
Bristol Half Marathon	13.1 miles
Charity Fun Run	3 miles
Birmingham Run	10 km
Liverpool Marathon	26.2 miles
Charity Run	10 km

How many miles did Aminah run in all her races last year?

(3 marks)

Use the conversion 5 miles = 8 km

Show your calculations and/or workings out here:

Step 1: Calculate total km distance from the 4 charity/city runs:

Km runs = 5 km + 10 km + 10 km + 10 km = 35 km [M1]

Step 2: Convert 35 km into miles (5 miles = 8 km --> 1 km = 0.625 miles):

35 km × (5 ÷ 8) = 35 × 0.625 = 21.875 miles [M1]

Step 3: Sum all race distances in miles:

Total = 10 + 13.1 + 13.1 + 3 + 26.2 + 21.875

= 87.275 miles (or 87.3 miles) [A1]

Write your answer in this box:

87.275 miles ✓

Question 22

Aminah completes a 26.2 mile marathon in 5 hours and 30 minutes. What is her average running pace in minutes per mile?

(3 marks)

Show your calculations and/or workings out here:

Step 1: Convert marathon finish time to total minutes:

5 hours 30 mins = (5 × 60) + 30 = 330 minutes **[M1]**

Step 2: Calculate running pace in minutes per mile:

Pace = Total minutes ÷ Total miles = 330 mins ÷ 26.2 miles **[M1]**

= 12.5954... minutes per mile --> 12.6 minutes/mile **[A1]**

Step 3: Conversion check (minutes and seconds):

0.5954 × 60 seconds = 35.7 seconds --> 12 mins 36 secs / mile

Write your answer in this box:

12.6 mins/mile *(12m 3*

MASTER FUNCTIONAL SKILLS STORE

OFFICIAL REVISION GUIDES, WORKBOOKS & FLASHCARDS

Written by accredited specialist tutors to match the exact 2026 Pearson Edexcel standards

Everything You Need To Revise, Practice & Pass Your Maths Level 2 Exam

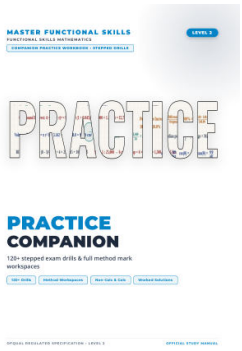

Core Curriculum Manual

Maths Level 2
Core Study Guide

- Full official curriculum coverage
- Section A Non-Calc & Sec B Calc
- Worked models & golden rules
- Dyslexia-friendly visual format

Spiral Bound Print & PDF

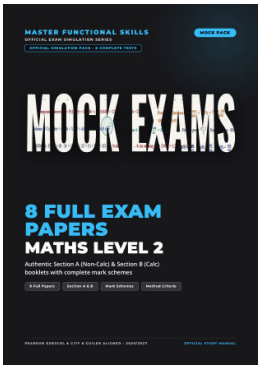

1,000+ Practice Drills

Maths Level 2
Companion Workbook

- 1,000+ exam-style questions
- Progressive difficulty drills
- Full worked step-by-step key
- Targeted fix for weak areas

Spiral Bound Print & PDF

Realistic Mock Papers

Maths Level 2
Official Mock Packs

- Full mock exam paper sets
- Authentic Pearson Edexcel style
- Detailed mark schemes included
- Grade boundaries & pass marks

Exam Booklet Pack & PDF

Pocket Flashcards A6

Maths Level 2
Pocket Revision Cards

- Compact A6 cards for quick study
- Essential formulas & conversions
- Dual-sided question & answer
- High-yield mental arithmetic rules

Boxed Card Deck & Print PDF
