TQUK Functional Skills Qualification in Maths at Level 2

Examination Past Paper 7

Please complete the details below using black or blue ink. Use BLOCK CAPITALS.

Learner Name: MASTER FUNCTIONAL SKILLS *Master Functional Skills*

Learner Number: MFS-TQUK-2026

Date: 20 / 10 / 2026

Centre Name: MASTER FUNCTIONAL SKILLS (MFS01)

OFFICIAL MFS MODEL SOLUTION

60 / 60 Marks (100% Pass)

· Stepped Working & Mark Codes

Verified by Tutor Abdul · MFS

Instructions:

- read each question **carefully**
- answer **all** questions
- write your answers **clearly** in the spaces provided
- **check** your answers.

Information:

- this examination has **two** sections. These are clearly labelled
- you are **not allowed** to use a calculator for Section A
- you **are allowed** to use a calculator for Section B
- the **maximum** mark for this examination is 60
- the marks available for each question are shown in **bold** beneath each question.

Items:

- you **will need** a pen with black or blue ink, a pencil, a ruler and an eraser (for diagrams, graphs and charts only)
- you **will need** a basic calculator for Section B only
- you **will need** a protractor
- you **will not** need any other stationery or equipment.

Time allowed:
30 minutes for Section A (Non-calculator)
90 minutes for Section B (Calculator)

Do not open this examination paper until you are told to do so.

For examiner use only

	Marks available	Marks awarded	Second marks
Section A	15		
Section B	45		
Total marks	60	15 45 60	15 45 60

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

Section A: Non-calculator

There are **15 marks** available in this section.
You must **not** use a calculator in this section.
You will have **30 minutes** to complete this section.

1. Work out 1.804 + 2.6

Step 1: Align decimal places with padding zero:

1.804 + 2.600 = 4.404

Answer	4.40 ✓ [1 mark]

[1]

2. Work out 5 × 6.248

Step 1: Multiply whole numbers ignoring decimals:

5 × 6248 = 31 240

Step 2: Place 3 decimal digits: 31.240 = 31.24

Answer	31.24 ✓ [1 mark]

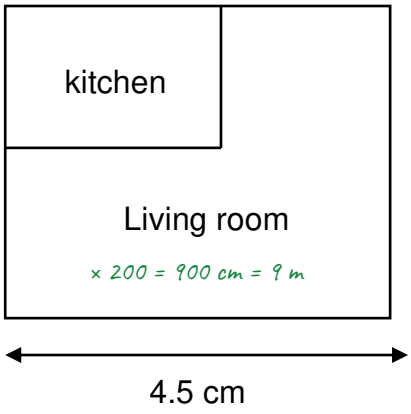

[1]

3. This is a scale diagram of a floor plan of a house:

The scale is 1 : 200

Work out the actual length of the living room.

Give the units in your answer.

Step 1: Scale factor is 1 cm : 200 cm (1 cm : 2 m)

Step 2: Multiply measured length by scale:

Actual length = 4.5 cm × 200 = 900 cm

Step 3: Convert to metres: 900 cm ÷ 100 = 9 m

Answer	9 m ✓ *[2 marks]*

[2]

Past paper

4. Work out:

$$\frac{1}{4} + \frac{1}{7}$$

Step 1: Common denominator for 4 and 7 is 28:

1/4 = 7/28 and 1/7 = 4/28

Step 2: Add numerators: 7/28 + 4/28 = 11/28

Answer 11/28 [2 marks]

[2]

5. Charlie receives these discount coupons for the same restaurant:

Monday	**Tuesday**
$\frac{1}{6}$ off	16% off

Charlie wants to go to the restaurant on the day which offers the bigger discount.

On which day should Charlie go to the restaurant?

Show how you decide.

Step 1: Convert Monday fraction to percentage:

Monday: 1/6 = 0.1666... ≈ 16.7%

Step 2: Tuesday proportion is given as 16% (0.16)

Step 3: Compare: 16.7% > 16%, so Monday had higher proportion.

Answer Mond [2 marks]

[2]

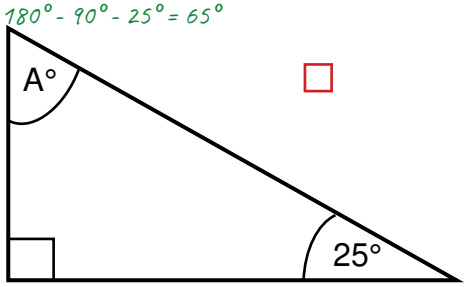

Questions continue on the following page

6. Work out the value of angle A.

A = 180° - 90° - 25° = 65°

Not drawn to scale

Step 1: Angles in a triangle sum to 180°:

Angle A = 180° - 90° - 25° = 65°

Answer 65 ✓ [2 marks] °

[2]

7. A clay pot has:

- mass = 2650 grams
- volume = 1000 cm^3

Work out the density of the clay pot.

Step 1: Formula: Density = Mass ÷ Volume

Mass = 2650 g, Volume = 1000 cm^3

Density = 2650 ÷ 1000 = 2.65 g/cm^3

Answer 2.65 ✓ [2 marks]

[2]

8. Riley wants to become a local football coach.

Riley uses this table to find out how much other local football coaches charge:

Coach	A	B	C	D	E	F	G
Charge per hour	£25	£20	£30	£40	£26	£20	£35

Riley uses this formula to work out how much to charge:

P = 1.1M

Where:

P is the amount Riley will charge per hour in pounds

M is the mode of the numbers in the table

How much will Riley charge per hour?

Step 1: Find the mode (most common price):

Prices: £20 occurs 4 times (highest frequency) --> Mode = £20

Step 2: Apply formula: Cost = 1.1 × Mode

Cost = 1.1 × £20 = £22

Answer	£ 22 ✓ *[3 marks]*

[3]

End of Section A.

Past paper

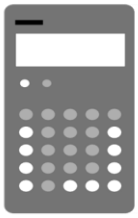

© Training Qualifications UK 2023 All Rights Reserved

Section B begins on Page 7.

Past paper

© Training Qualifications UK 2023 All Rights Reserved

Section B: Calculator

There are **45 marks** available in this section.
You **can** use a basic calculator in this section.
You will have **90 minutes** to complete this section.

1. Write five million three hundred thousand in numbers.

Answer	5 300 000 ✓ [1 mark]

[1]

2. Put these numbers in order starting with the lowest:

1 004 682 – 948 750 1 020 845 – 34 589

Show any working here:				
Answer	-948 750	-34 589	1 004 682	1 020 84 ✓
	Lowest	→		**Highest**

[1 mark]

[1]

Questions continue on the following page

3. Last week it took 2 gardeners 4 hours to mow a field.

This week there will be 5 gardeners available to mow a field of the same size.

The gardeners all work at the same speed.

Their manager thinks that the 5 gardeners will mow the field in less than 1.5 hours.

Is the manager correct?

Show how you decide.

Step 1: Total work required = 2 pumps × 4 hours = 8 pump-hours

Step 2: Time for 5 pumps = 8 ÷ 5 = 1.6 hours

1.6 hours = 1 hour + (0.6 × 60 mins) = 1 hour 36 minutes

Step 3: Compare with 1 hr 45 mins (1.75 hrs):

1.6 hours < 1.75 hours (1 hr 36 mins < 1 hr 45 mins). Therefore No.

Answer	No ✓ [2 marks]

[2]

Past paper

© Training Qualifications UK 2023 All Rights Reserved

4. Put these fractions in order starting with the highest:

$2\frac{4}{9}$ $2\frac{5}{6}$ $2\frac{2}{3}$ $2\frac{13}{18}$

Show any working here:

Step 1: Convert fractional parts to common denominator 18:

2 5/6 = 2 15/18, 2 13/18 = 2 13/18

2 2/3 = 2 12/18, 2 4/9 = 2 8/18

Step 2: Order from Highest to Lowest:

Answer	2 5/6	2 13/18	2 2/3	2 4/9 ✓
	Highest	→		**Lowest**

[2 marks]

5. The diagram shows a square based pyramid:

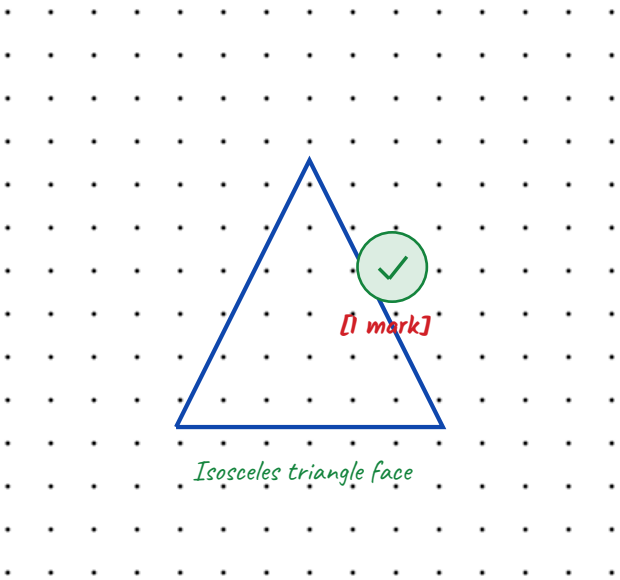

Draw the plan view and side view of the pyramid.

Plan view

Side view

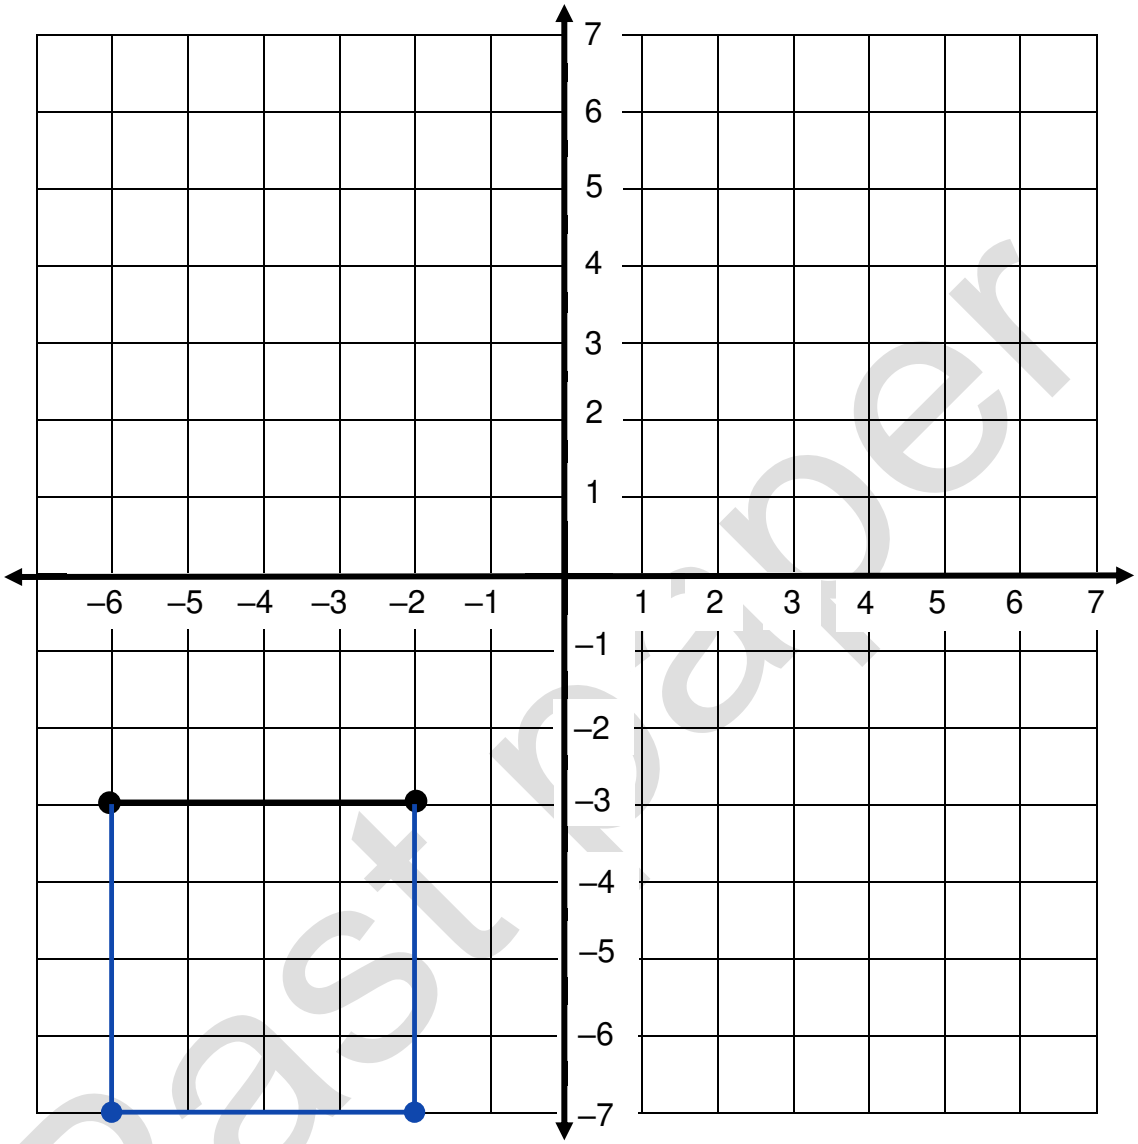

[2]

Paper

© Training Qualifications UK 2023 All Rights Reserved

6. Hansa wants to put a square trampoline in a garden.

One side of the trampoline is shown on this grid:

Where could the other **two** corners of the trampoline be placed?

Answer	(-6,-7) and (-2, -7) ✓ [2 marks]

[2]

Questions continue on the following page

© Training Qualifications UK 2023 All Rights Reserved

7. Quinn bought a mobile phone.

The next day, Drew buys the same type of mobile phone in a sale.

Drew got a 32% discount and paid £170 for their phone.

How much more money did Quinn pay for the mobile phone?

Step 1: £170 represents (100% - 32%) = 68% of original price

Step 2: Original price = £170 ÷ 0.68 = £250

Step 3: Money saved = £250 – £170 = £80

Answer	£ 80 ✓ [3 marks]

[3]

Past paper

8. This table shows how long Tomi spends on different tasks at work:

Serving customers	210 minutes
Working in warehouse	50 minutes
Paperwork	60 minutes
Stocking shelves	100 minutes

Tomi wants to know what fraction of time is spent doing paperwork.

Tomi works this out to be $\frac{1}{6}$

Has Tomi worked out the correct fraction?

Show how you decide.

Step 1: Total time = 210 + 50 + 60 + 100 = 420 minutes

Step 2: Break fraction = 60 ÷ 420 = 1/7

Step 3: Compare: 1/7 < 1/6 (or 60/420 < 70/420). Therefore No.

Answer No [3 marks]

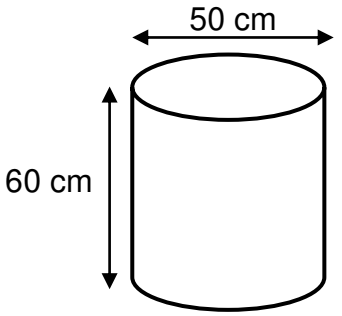

[3]

Past paper

Questions continue on the following page

© Training Qualifications UK 2023 All Rights Reserved

9. Bo needs to paint the outside of this cylinder including the top and bottom:

Not drawn to scale

radius r = 25 cm

height h = 60 cm

Bo thinks the total area to be painted is less than 15 000 cm^2

Is Bo correct?

Show how you decide.

Use $\pi = 3.14$

Step 1: Total Surface Area = 2 × (pi × r^2) + (2 × pi × r × h)

Two circular ends = 2 × (3.14 × 25^2) = 2 × 1962.5 = 3925 cm^2

Curved surface area = 2 × 3.14 × 25 × 60 = 9420 cm^2

Step 2: Total = 3925 + 9420 = 13 345 cm^2

Step 3: Compare: 13 345 cm^2 < 14 000 cm^2. Therefore Yes.

Answer	Yes ✓ [3 marks]

[3]

Past paper

10. The table shows how far Alex walked each day for two weeks:

	Monday	Tuesday	Wednesday	Thursday	Friday
Week 1	4 miles	2 miles	5 miles	9 miles	6 miles
Week 2	5 miles	3 miles	6 miles	7 miles	5 miles

Was Alex more consistent in week 1 or week 2?

Give a reason for your answer.

Step 1: Calculate range for each week (Highest - Lowest):

Week 1 Range = 15 - 8 = 7

Week 2 Range = 14 - 10 = 4

Step 2: Smaller range indicates less variation: 4 < 7

Answer	Week ✓ [3 marks]

[3]

Past paper

Questions continue on the following page

© Training Qualifications UK 2023 All Rights Reserved

11. Jamie is planning an event for 280 people.

There will be three different ticket types available.

The ticket types are Standard, Premium and Luxury in the ratio 5 : 3 : 2

Jamie needs to know how many of each ticket type there will be.

Complete the table for Jamie.

Tickets available	
Ticket Type	**Number Available**
Standard	140
Premium	84
Luxury	56
Total	280

Show any workings here:

Step 1: Ratio Standard : Premium : Luxury = 5 : 3 : 2

Total parts = 5 + 3 + 2 = 10 parts

Step 2: Find value per part: 280 ÷ 10 = 28 tickets per part

Step 3: Multiply each share by 28:

Standard = 5 × 28 = 140 tickets

Premium = 3 × 28 = 84 tickets

Luxury = 2 × 28 = 56 tickets

Check total: 140 + 84 + 56 = 280 tickets

Answer	See t ✓ [4 marks]

12. Damyan sells cakes in the shape of a cylinder.

The diameter of each cake is 15 centimetres (cm)

Damyan puts a ribbon around the outside of each cake.

Each ribbon needs to be 56% longer than the distance around the cake.

How long does each ribbon need to be?

Circumference = 3.14 × 15 = 47.1 cm

Use $\pi = 3.14$

Step 1: Circumference = pi × diameter = 3.14 × 15 = 47.1 cm

Step 2: Increase circumference by 56%:

47.1 × 1.56 = 73.476 cm --> Rounds to 73.5 cm

Answer	73.5 ✓ [4 marks]	**cm**

13. Riley wants to buy milk from a local farm.

The farm has these prices on its website:

Glass bottles	Plastic bottles
£1 per pint	£2.30 for a 2-litre bottle

Which type of bottle is better value for money?

Use 1 litre = 1.76 pints

Show how you decide.

Step 1: Convert 2 litres to pints:

2 litres × 1.76 pints/litre = 3.52 pints

Step 2: Plastic cost per pint = £2.30 ÷ 3.52 = £0.6534... ≈ £0.65

Step 3: Glass bottle cost = £0.94 per pint

Step 4: Compare: £0.65 < £0.94. Plastic bottle is better value.

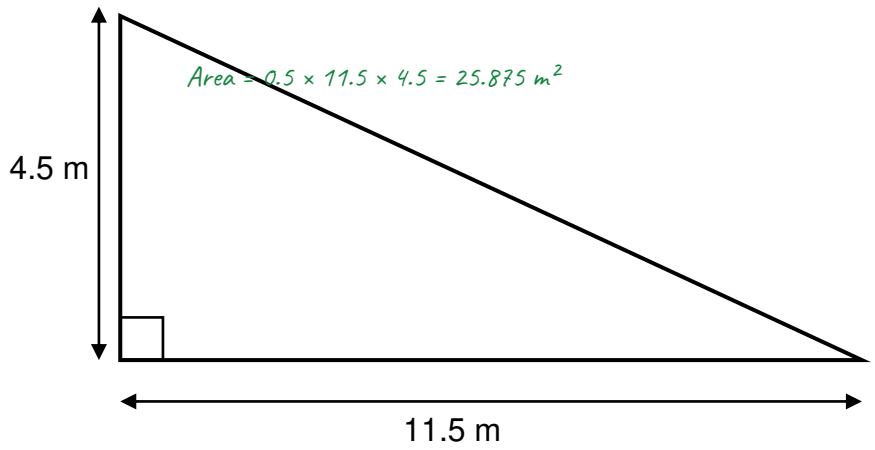

Answer	Plast ✓ [4 marks]

[4]

Past paper

14. Lei needs to paint this wall three times:

Paint is available in these colours:

Colour	White	Grey	Black	Charcoal	Cream
Number of square metres one tin will cover	14 m^2	12 m^2	8 m^2	6 m^2	13 m^2

Lei chooses the colour that will cover the median number of square metres.

How many tins of paint does Lei need to paint the wall three times?

Show your working.

Answer box is on the following page

Past paper

© Training Qualifications UK 2023 All Rights Reserved

Step 1: Area of triangular wall = 0.5 × base × height

Area = 0.5 × 11.5 m × 4.5 m = 25.875 m²

Step 2: Wall painted three times (3 coats):

Total coverage required = 25.875 m² × 3 = 77.625 m²

Step 3: Find median tin coverage:

Ordered values: 6, 8, 10, 12, 13, 14, 15

Median coverage = 12 m² per tin

Step 4: Number of tins needed = 77.625 ÷ 12 = 6.46875 tins

Round up to nearest whole tin: 7 tins needed

Answer	7 ✓ [5 marks]	tins

[5]

Past paper

15. Kass owns a cleaning company.

Kass uses this table to record time spent at each cleaning job:

Time (t) in minutes	Number of cleaning jobs
$0 < t \leq 60$	11
$60 < t \leq 120$	36
$120 < t \leq 180$	18
$180 < t \leq 240$	5

Kass thinks the mean amount of time per cleaning job is less than 104.75 minutes.

Is Kass correct?

Show your working.

Answer box is on the following page

Past paper

© Training Qualifications UK 2023 All Rights Reserved

Step 1: Identify class midpoints and calculate fx:

0 < t <= 60: midpoint = 30, fx = 30 × 11 = 330

60 < t <= 120: midpoint = 90, fx = 90 × 36 = 3240

120 < t <= 180: midpoint = 150, fx = 150 × 18 = 2700

180 < t <= 240: midpoint = 210, fx = 210 × 5 = 1050

Step 2: Total fx = 330 + 3240 + 2700 + 1050 = 7320

Step 3: Total number of jobs (frequency) = 11 + 36 + 18 + 5 = 70

Step 4: Estimated Mean = 7320 ÷ 70 = 104.57 minutes

Step 5: Compare: 1 hr 45 mins = 105 minutes

104.57 mins < 105 mins. Kass thinks it is less than 1 hr 45 mins.

Therefore Kass is correct: Yes.

Answer	Yes ✓ *[6 marks]*
