MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

QAN 500/8702/2

IB/M/Mar19/E5

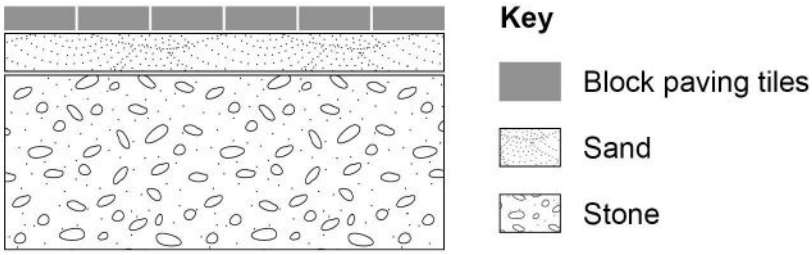

Block paving

Driveways are often covered with block paving.

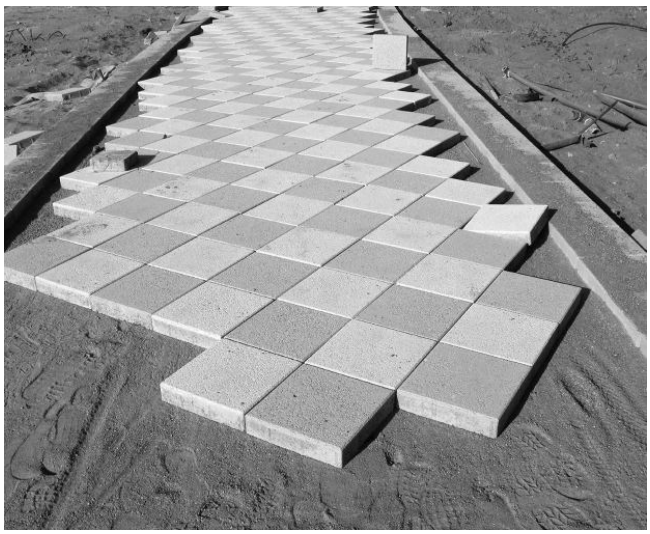

Block paving is built on a foundation.

The foundation usually has a layer of stone and a layer of sand.

To build block paving

- mark the area to be paved
- dig a hole for the foundation
- put a layer of stone into the hole
- put a layer of sand on top of the stone
- cover the sand with block paving tiles.

The foundation

Material has to be removed to make a hole for the foundation.

Use this formula to work out the amount of material that has to be removed.

$$V = \frac{Ad}{1000}$$

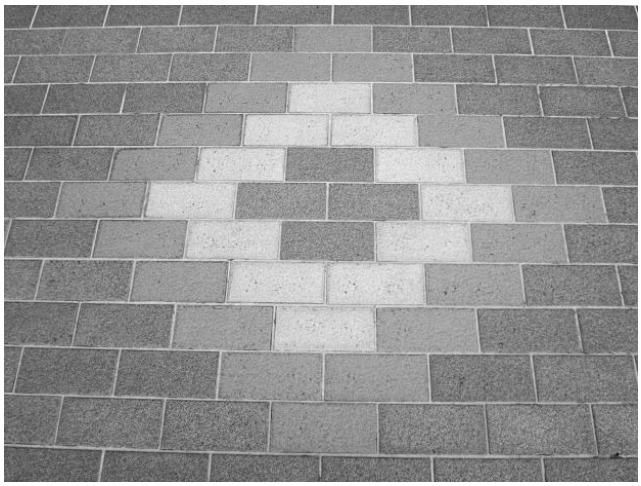

. V is the amount of material in cubic metres

A is the area, in square metres, to be covered by block paving

d is the depth, in millimetres, of the foundation

Patterns in block paving

Different coloured tiles can be used to make patterns in block paving.

Caravan

Caravan pitch

Some people have a holiday in a caravan.

They take their caravan to a caravan park.

It is possible to attach an awning to the side of a caravan.

An awning is like a tent.

Caravan

Caravan with awning

When you take a caravan to a caravan park you pay fees.

The fees are for

renting the pitch for the caravan

using the park's electricity supply

having an awning on the side of the caravan.

The table shows the fees at Clover Meadow Caravan Park.

	Fee per night
Pitch fee	£27
Using electricity	£2
Awning	£3.50

Caravanners Society

The Caravanners Society owns Clover Meadow Caravan Park.

You pay £49 per caravan per year for membership of the Caravanners Society.

Members get a discount on the total fees per night.

Loan repayments

When you borrow money you usually pay back more than you borrow.

The extra amount that you pay back is called **interest**.

You can borrow money from a loan company to help buy a caravan.

This table shows the monthly repayments.

	Amount of repayment per month				
Amount of loan	**For 12 months**	**For 24 months**	**For 36 months**	**For 48 months**	**For 60 months**
£5000	£457	£248	£179	£144	£123
£10 000	£913	£497	£358	£288	£247
£15 000	£1370	£745	£537	£433	£370

Example

You borrow £15 000 from the loan company and pay back over 36 months.

Monthly repayment = £537

Total amount repaid = 36 × £537

= £19 332

In total, you pay back £19 332

Amount of interest paid = £19 332 – £15 000

= £4332

You pay £4332 **interest**.

Answer **all** questions in the spaces provided.

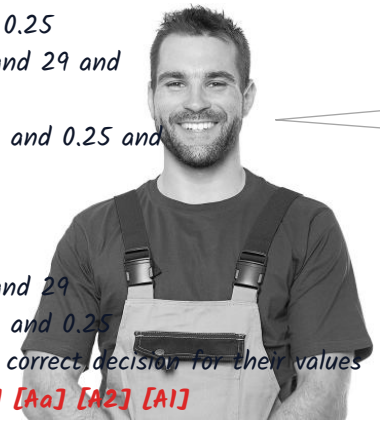

Do not write outside the box

1 **Block paving**

There is a **data sheet** for Block paving.

Tom's company builds driveways.

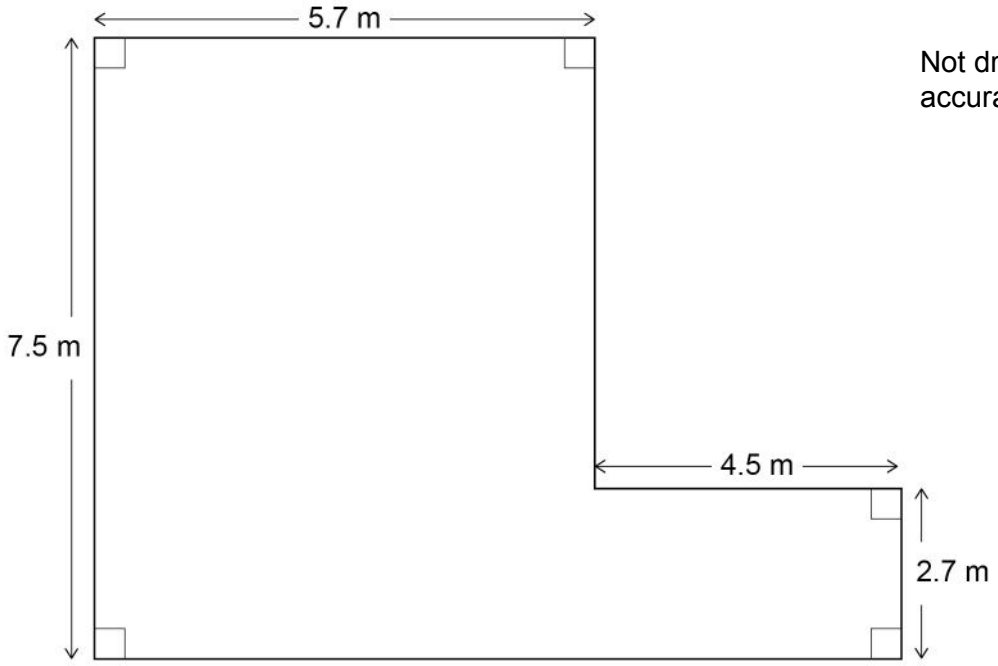

Q1 Worked Solution:
4 = 0.25
30 and 29 and
yes
0.24 and 0.25 and
yes
lb
lb
30 and 29
0.24 and 0.25
A1ft correct decision for their values
[M1] [Aa] [A2] [A1]

I plan and build block paving.

Tom

Here is a sketch of a driveway.

Not drawn accurately

Tom is going to build this driveway using block paving.

Do not write outside the box

1 (a) The depth of the foundation is 300 millimetres.

Tom works out the amount of material that he has to remove.

He is going to put this material into skips.

Each skip can contain 9 cubic metres of material.

Show that he needs 2 skips.

[4 marks]

1 (b) The usual cost of the stone that Tom needs for the foundation is £924

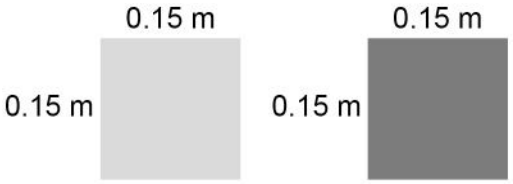

He gets a discount of 20%

How much does he pay for the stone?

[3 marks]

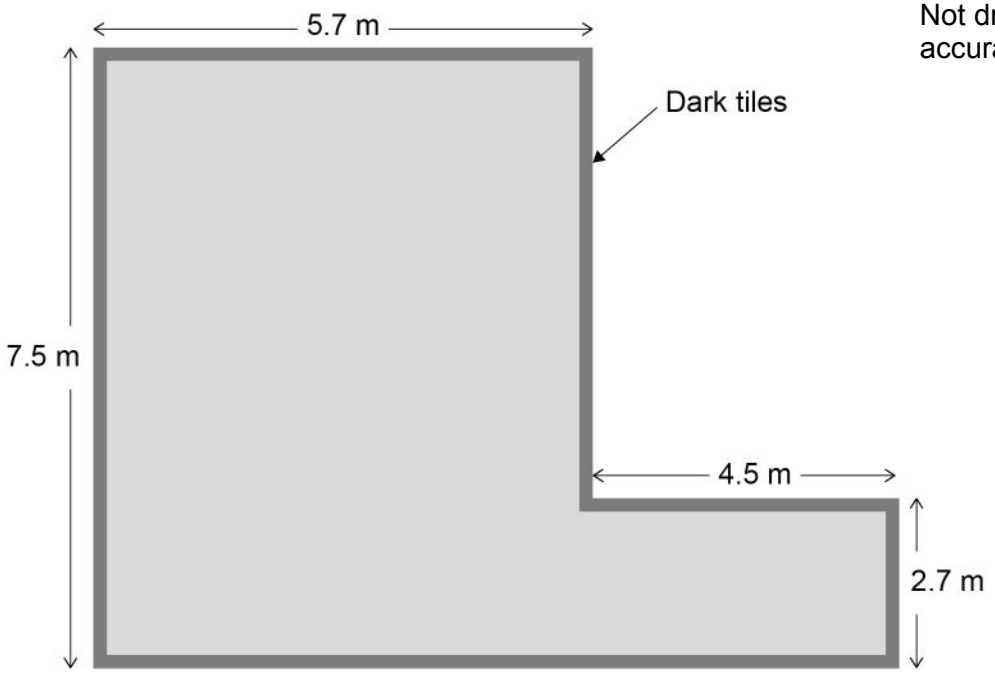

Do not write outside the box

Tom is going to cover the driveway using light tiles and dark tiles.

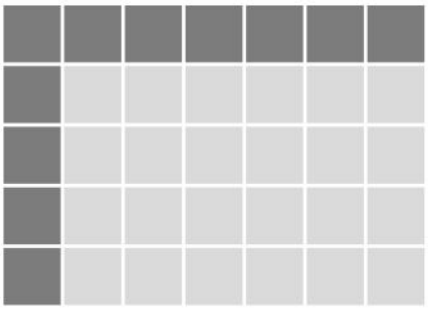

He first puts dark tiles along the edges of the driveway.

Not drawn accurately

This diagram shows how the tiles are arranged at a corner of the driveway.

Not drawn accurately

Do not write outside the box

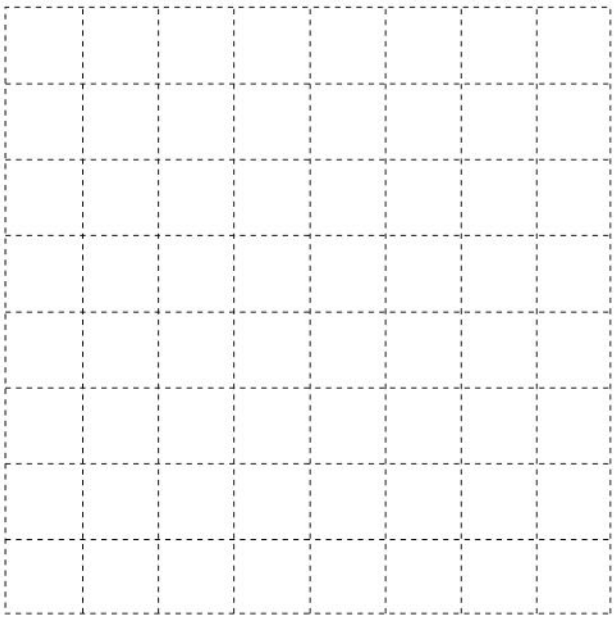

1 (d) Tom is designing a pattern of square tiles for part of the driveway.

He wants to put 24 dark tiles into this grid.

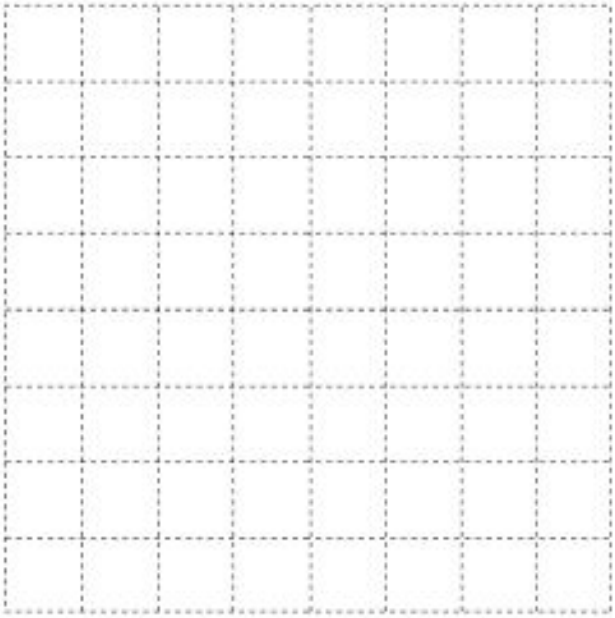

Shade 24 tiles so that the grid has exactly **four** lines of symmetry.

[3 marks]

Practise on this grid.

Put your answer on this grid.

14

Do not write outside the box

†2 (a) A loan company offers these loans.

Amount of loan	Amount of repayment per month				
	For 12 months	**For 24 months**	**For 36 months**	**For 48 months**	**For 60 months**
£2000	£191	£107	£80	£66	£57
£3000	£286	£161	£119	£99	£86
£4000	£381	£213	£159	£131	£115
£5000	£457	£248	£179	£144	£123
£10 000	£913	£497	£358	£288	£247
£15 000	£1370	£745	£537	£433	£370

Jane and Paul need to borrow £4000 to buy the caravan.

In total, how much **more** will they pay back if they borrow the money over 48 months rather than over 24 months?

[3 marks]

Check your answer by rounding the monthly repayments to the nearest £10

[1 mark]

Do not write outside the box

Jane and Paul book a holiday at Clover Meadow Caravan Park.

2 (b) They are planning their journey.

Paul makes these notes.

> The journey is 189 miles.
>
> We will travel at an average speed of 36 mph
>
> We will stop for a 40-minute break during the journey.

Q2 Worked Solution:
189 ÷ 36 = 5.25
5.25 + 0.40 = 6.65 = 7.05

They set off from home at 2 pm

Paul says,

"We should arrive at the caravan park **before** 8 pm"

Is he correct?

You **must** show your working.

[5 marks]

2 + 6.65 or 2 + 7.05
8.65 or 9.05 and no
~~Subtracting 40 minutes instead of adding can score M1M0M1A1ft~~
[M1] [M1] [M1] [A0]

Question 2 continues on the next page

Do not write outside the box

2 (c) Jane makes these notes about the cost of the holiday.

Petrol

We will drive 378 miles in total

Our car travels 42 miles per gallon of petrol

1 gallon = 4.5 litres

One litre of petrol costs £1.20

Caravan park

We will stay 5 nights

We need to pay the fees for

the pitch

the electricity

the awning

We get Caravanners Society discount of £9 per night

Spending money

Between us we will spend £70 per day for 6 days

Jane says,

"The total cost should be less than £600"

Is she correct?
You **must** show your working.

[7 marks]

Do not write outside the box

3 Flower shop

Anaya makes and sells bouquets of flowers in her flower shop.

Anaya

Bouquet of flowers

Anaya sells standard bouquets and luxury bouquets.

She makes the bouquets using roses, lilies and carnations.

The table shows the number of each type of flower in each type of bouquet.

	Roses	Lilies	Carnations
Standard	6	4	10
Luxury	9	7	4

3 (a) What fraction of the flowers in a **standard** bouquet are lilies?
Circle your answer.

[1 mark]

$\frac{1}{4}$ $\frac{1}{5}$ $\frac{7}{20}$ $\frac{11}{40}$

Q3 Worked Solution:

Marks are awarded for demonstrating the following interrelated process skills.
Representing Selecting the mathematics and information to model a situation.
R.1
Candidates recognise that a situation has aspects that can be represented using mathematics.
R.2

Question 3 · Continued

MFS Stepped Model Solution Continuation Sheet (Overflow-Safe Layout)

Candidates make an initial model of a situation using suitable forms of representation.
R.3
Candidates decide on the methods, operations and tools, including ICT, to
[Method & Accuracy]

Do not write outside the box

3 (b) On Monday, Anaya makes 24 bouquets.

She makes twice as many standard bouquets as luxury bouquets.

Work out how many of each type of bouquet she makes.

[2 marks]

3 (c) Anaya sells

standard bouquets for £22 each

luxury bouquets for £35 each.

On Tuesday

Anaya makes 14 standard bouquets and 18 luxury bouquets

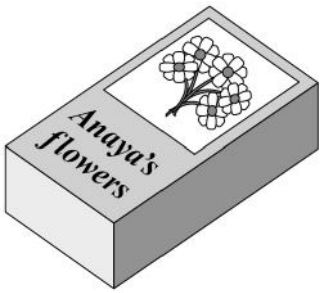

she sells all the standard bouquets and $\frac{5}{6}$ of the luxury bouquets.

How much money does she get from selling these bouquets?

[3 marks]

Do not write outside the box

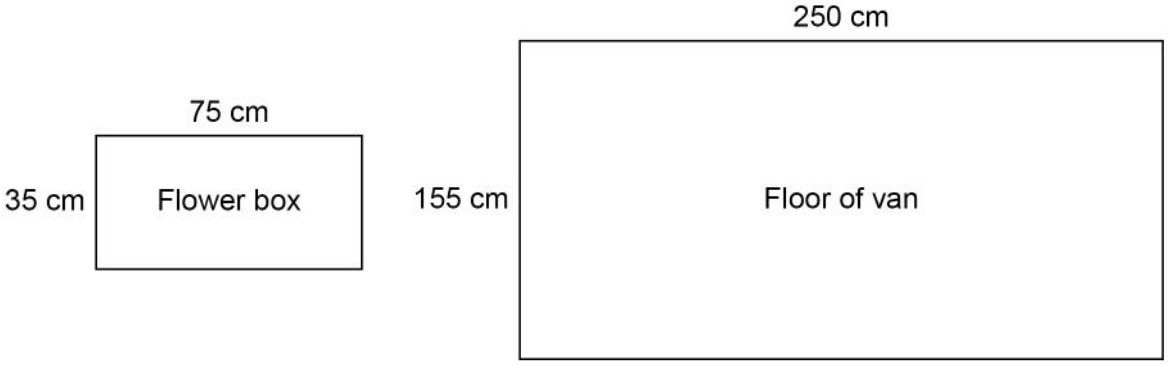

3 (d) On Saturday, Anaya packs bouquets into 40 boxes for delivery.

The base of each box is a 75 cm by 35 cm rectangle.

The floor of the van is a 250 cm by 155 cm rectangle.

Not drawn accurately

Anaya **cannot** stack more than 3 boxes on top of each other.

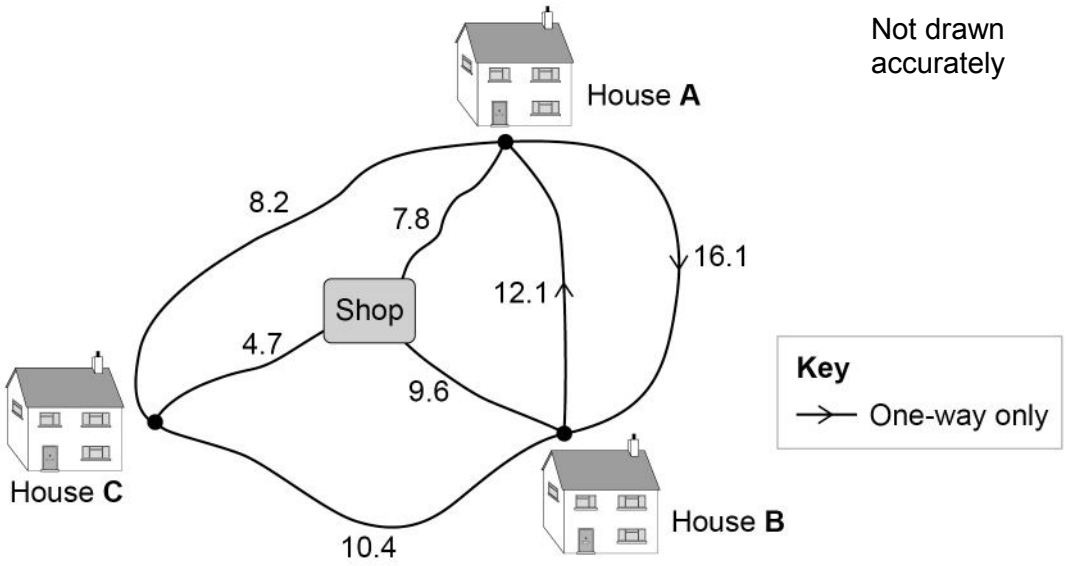

Can she fit all 40 boxes in the loading space of her van?
You **must** show your working.

[5 marks]

Do not write outside the box

3 (e) Anaya sets off from her shop to deliver flowers to three houses, A, B and C.

This diagram shows distances in miles.

Anaya wants to

- start and finish at her shop
- visit House C earlier than House A
- visit each house once only
- take the shortest route.

Work out a possible route **and** the total distance she drives.

[4 marks]

15

Turn over ►

Do not write outside the box

†4 (a) How many of the 120 calls were **less than** 2 minutes?

[2 marks]

Check your answer.
Show how you have done your check.

[1 mark]

4 (b) Lizzie has this target for her calls.

> At least 75% of the calls should be **less than** 8 minutes.

Has she met her target with these 120 calls?
You **must** show your working.

[4 marks]

Q4 Worked Solution:

In particular, individual marks are mapped onto the following skills standards.
Representing
Making sense of the situations and representing them.
A learner can:
Understand routine and non-routine problems in familiar and unfamiliar contexts and situations.
Identify the situation or problems and identify the mathematical methods needed to solve them.
Choose from a range of mathematics to find solutions.
Analysing
[Ra] [Rb] [Rc] [Aa] [Ab]

Do not write outside the box

4 (c) Lizzie is paid the basic rate for the first 37 hours she works each week.
She is paid the overtime rate for every hour over 37 hours.

Basic rate	£8.64 per hour
Overtime rate	Basic rate + 50%

The table shows the times that she worked one week.

	Start	**Finish**
Sunday	-	-
Monday	07.30	16.30
Tuesday	09.00	17.00
Wednesday	09.00	17.00
Thursday	16.30	21.30
Friday	09.00	17.00
Saturday	13.30	17.30

Lizzie has a 30-minute break on any day when she is at work for more than 6 hours.
The times in the table include the breaks.
She is **not** paid for these breaks.

Do not write outside the box

Lizzie says,

"My pay this week will be **more than** £350"

Is she correct?

You **must** show your working

[8 marks]

END OF QUESTIONS

15

Do not write outside the box

Question number	**Additional page, if required.** **Write the question numbers in the left-hand margin.**
