MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Cycling

This assessment is about cycling.

Complete activities 1, 2 and 3 based on the documents provided for each activity.

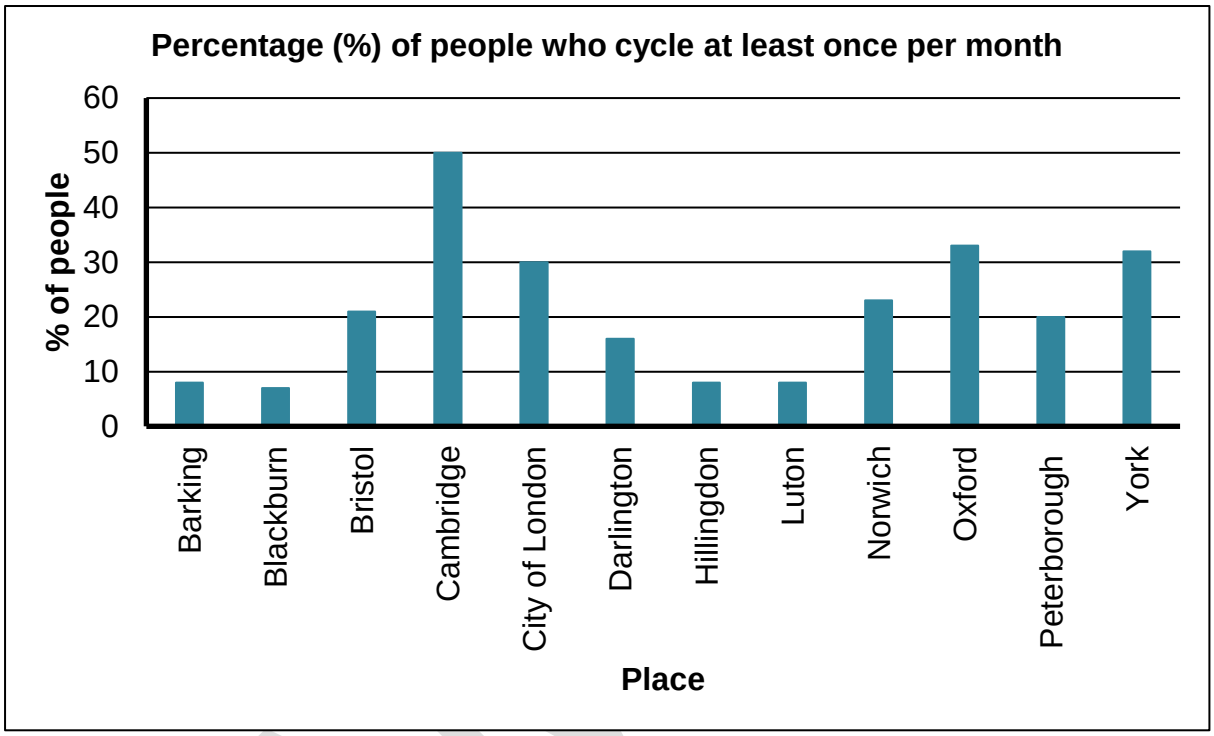

SAMPLE

Activity 1

Task A

Adults and children cycle to work and school. They also cycle for fitness and fun.

The chart below shows the percentage of people who cycle at least once per month in different places.

1. Which place has more than twice the percentage of people who cycle in Peterborough?

Marks available: 2

You must show your working:

Qlal Worked Solution:
Cambridge
Peterborough identified as 20%
1
Cambridge identified (award both marks for Cambridge as final answer)
1
[2 marks]

Your answer:

SAMPLE

2. Find the places where more than a quarter of the people cycle at least once per month.

Show the number of these places as a fraction of all the places in the chart. Show your answer in its **simplest form**.

Q1a2 Worked Solution:

Marks available: 3

1/3

You must show your working:

Cambridge, London, Oxford, York OR 4 (places) seen OR 25% seen
1
4/12 or their value/12 seen (accept evidence of their/12 simplified, for example, 1/4 from their 3/12)
1
CAO (correct answer only) 1/3
1
[3 marks]

Your answer:

SAMPLE

Task B

1. In a town near London a teacher asks pupils in one class how they travel to school.

The table shows the results. There are 35 in the class.

Method of travel	Number of pupils
Car	15
Bus	3
Cycle	7
Walk	10

Q1b1 Worked Solution:
2:3

What is the ratio of pupils who walk compared to the pupils who travel by car? Show your answer in its **simplest form**.

Marks available: 2

You must show your working:

10:15 (accept 10 and 15 seen)
1
CAO 2:3
1
[2 marks]

Your answer:

SAMPLE

2. What is the percentage of pupils in the class who cycle to school?

Marks available: 3

You must show your working:

Q1b2 Worked Solution:

1. collect and record discrete data and organise and represent information in different ways
m. find mean and range
2A2, 3B1,
3B1, 3B2,
3B2, 3B2
6
n. use data to assess the likelihood of an outcome

[5 marks]

Your answer:

3. In the town, 35% of journeys made to college are by car. 25% walk or cycle. The rest travel by bus.

What is the likelihood that a journey is made by bus? Show your answer as a **decimal**.

Marks available: 2

You must show your working:

Q3(a) Worked Solution:

15.2 (km/hour) with valid check
15 (minutes) = 0.25 (hours) OR 4 x 15 = 1 hour/60 mins OR 3.8/15
1
3.8/0.25 OR 3.8/15*60 OR 4 x 3.8
1
CAO 15.2 (km/hour)

Your answer:

1
Check using reverse calculation, for example, 15.2*0.25 = 3.8 or 15.2/4 = 3.8 FT
1

[4 marks]

Total marks available: 12

SAMPLE

Activity 2

Jay, Vin and Sam are keen cyclists.

Task A

1. Jay measures the length of a cycling route using a mobile phone app. The app shows the distance as 31560 metres (m).

What is this distance in kilometres (km)?

Marks available: 1

Q2a1 Worked Solution:

Space for your working:

31.56 (km)
CAO 31.56 (km)
1
[1 mark]

Your answer:

SAMPLE

2. Vin completes laps of a cycle track with the times shown in the table. Each lap is 250 metres (m).

Lap number	Time (seconds)
Lap 1	32.14
Lap 2	31.94
Lap 3	31.68
Lap 4	31.89
Lap 5	32.14
Lap 6	32.71
Lap 7	32.57

Q2a2 Worked Solution:
1.03 (seconds)

What is the range of the lap times?

32.71 - 31.68 seen OR 32.71 and 31.68 specifically identified

Marks available: 2

You must show your working:

1
CAO 1.03 (seconds)
1
[2 marks]

Your answer:

SAMPLE

Task B

1. Sam cycles for 2 hours and 30 minutes each week. She cycles on 5 days of the week and for the same length of time each day.

How many minutes does she cycle each day?

Marks available: 2

You must show your working:

Q2b1 Worked Solution:
30 (minutes)
150 (minutes) seen OR 2.5/5 (=0.5 hours)
1
3
Activity 2

30 (minutes) accept 0.5 hour or 1/2 hour but appropriate units required

Your answer:

1
[2 marks]

2. Sam uses 720 calories in 60 minutes of cycling. She drinks a can of lemonade which contains 168 calories.

How many minutes does she need to cycle to use the 168 calories?

Marks available: 3

You must show your working:

Q2b2 Worked Solution:
14 (minutes)
720/60 or 12 seen (calories per minute)
1
168/12 OR 168 / their calories per minute (award both method marks for 168/720*60)
1
CAO 14 (minutes)
1

Your answer:

[3 marks]

SAMPLE

3. Jay cycles and goes to the gym. Each week $\frac{2}{3}$ of his exercise is cycling and the rest is in the gym.

What **percentage** of his exercise is in the gym?

Marks available: 2

You must show your working:

Your answer:

SAMPLE

Task C

> 'Cycling is one of the easiest ways to fit exercise into your daily routine because it's also a form of transport. It saves you money, gets you fit and is good for the environment.'
>
> *- NHS (2015, http://www.nhs.uk/Livewell/fitness/Pages/Cycling.aspx)*

1. Rita is thinking about buying a bicycle to travel to college.

The costs to buy and maintain a good bicycle are:

- New bicycle £300
- Cycling helmet £40
- Reflective high visibility cycling belt £15
- Servicing £50 per year
- Insurance £25 per year

Q2c1 Worked Solution:

She expects to keep the bicycle for 2 years. What is the total cost over **2 years**?

Marks available: 2

You must show your working:

(£) 505
300 + 40 + 15 + (2*50) + (2*25) or equivalent
1
CAO (£) 505
1
[2 marks]

Your answer:

SAMPLE

2. Rita has 2 options: to buy and maintain the bicycle or join her local gym which costs £30 per month.

How much money will she save over 2 years by cycling instead of using the gym?

Marks available: 4

You must show your working:

Q2c2 Worked Solution:
b. add, subtract, multiply and divide whole numbers using a range of strategies
c. understand and use equivalencies between common fractions, decimals and percentages
1A2, 1A2,
1B2, 1B2,
2A2, 2B3,
[5 marks]

Your answer:

Show how you can check your answer:

Total marks available: 16

SAMPLE

Activity 3

Task A

Jay completes a journey of 3.8 kilometres (km). The journey takes 15 minutes.

The average speed in km per hour is equal to the distance in km divided by the time in hours.

What is the average speed for the journey in km per hour?

Marks available: 4

You must show your working:

Your answer:

Show how you can check your answer:

SAMPLE

Task B

1. Rita carried out a survey of people who cycled to college from Monday to Friday.

The number of cyclists per day is shown in the table.

Day	Monday	Tuesday	Wednesday	Thursday	Friday
Number	87	122	136	142	128

What is the average (mean) number of cyclists per day?

Marks available: 2

You must show your working:

Q3b1 Worked Solution:
123
615/5 or their value/5
1
CAO 123
1

[2 marks]

Your answer:

SAMPLE

2. Rita recorded the number of cyclists on a Saturday for 4 weeks.

The results for the first 3 weeks are shown in the table.

The average (mean) number of cyclists on a Saturday is 43.

Q3b2 Worked Solution:

Complete the table with the missing number at Week 4.

53 (may be seen in workings box)

Week	Week 1	Week 2	Week 3	Week 4
Number	38	42	39	

Your answer

*172 OR 43*4 seen*

Marks available: 3

1

Use the space below for your working:

*172 - 119 OR 43*4 - 119 OR 43*4 - 38 - 42 - 39*
1
CAO 53 (may be seen in workings box)
1
[3 marks]

SAMPLE

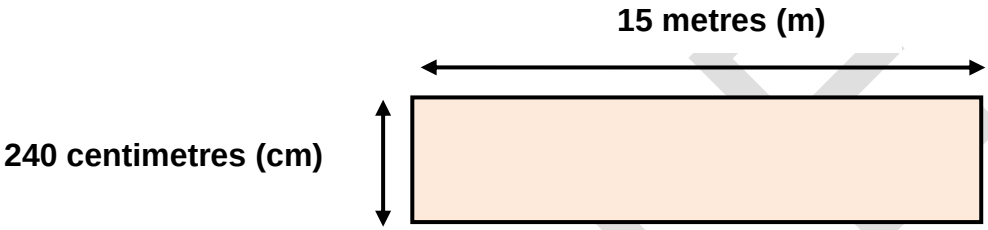

Task C

The college is adding a roof to cover the bicycle racks.

The diagram below shows the measurements of each roof.

Not to scale

What is the total area of roof needed for each shelter? Show your answer with the **correct units**.

Marks available: 3

You must show your working:

Your answer:

Total marks available: 12

End of assessment
