TQUK Functional Skills Qualification in Maths at Level 2

Examination Past Paper 9

Please complete the details below using black or blue ink. Use BLOCK CAPITALS.

Learner Name: _____

Learner Number: _____

Date: _____

Centre Name: _____

Instructions:

- read each question **carefully**
- answer **all** questions
- write your answers **clearly** in the spaces provided
- **check** your answers.

Information:

- this examination has **two** sections. These are clearly labelled
- you are **not allowed** to use a calculator for Section A
- you **are allowed** to use a calculator for Section B
- the **maximum** mark for this examination is 60
- the marks available for each question are shown in **bold** beneath each question.

OFFICIAL MFS MODEL SOLUTION · BENCHMARK EXEMPLARY PASS

60 / 60 Marks (100% Pass · Full Marks)

· Assessment: Past Paper 9 (Non-Calculator & Calculator)

· Complete stepped calculations, methods & mark scheme codes [MI/AI]

· Exam Board: TQUK (Training Qualifications UK · Ofqual Regulated)

· Pass standard: 35 / 60 marks (Achieved: 60 / 60 marks)

Verified by Tutor Abdul (Senior Assessor) · MasterFunctionalSkills.co.uk

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and NHS healthcare staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

Section A: Non-calculator

There are **15 marks** available in this section.
You must **not** use a calculator in this section.
You will have **30 minutes** to complete this section.

1. Work out 0.082 + 0.49

Calculate: 1.43 × 0.4 = 0.572

Answer 0.572 ✓ [1 mark]

[1]

2. Work out 8.246 ÷ 4

Calculate: 8.246 ÷ 4 = 2.0615

Answer 2.0615 ✓ [1 mark]

[1]

Past paper

Questions continue on the following page

3. Work out $4^2 - 10 \times 2$

BIDMAS: $4^2 - 4 \times 5 = 16 - 20 = -4$

Answer -4 [2 marks]

[2]

4. Use rounding to check the calculation below:

$7.1423 \times 6.8967 = 49.25830041$

Show your working.

Round to 1 significant figure: $7.1423 \approx 7$ and $6.8967 \approx 7$

Check: $7 \times 7 = 49$ (or $49 \div 7 = 7$)

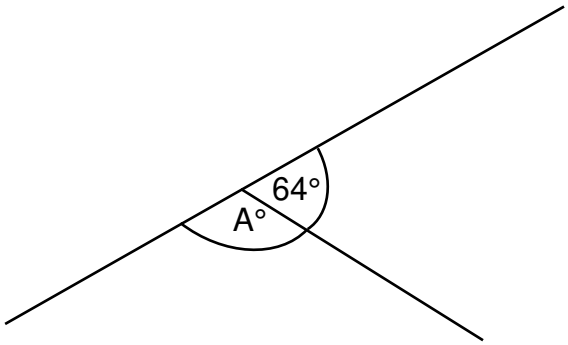

Answer 7×7 [2 marks]

[2]

Past paper

5. Casey thinks angle A is less than 120°:

Not drawn to scale

Is Casey correct?

Show how you decide.

Angles on a straight line add to 180°: 180° - 64° = 116°

Comparison: 116° ≠ 120° (or 120° + 64° = 184° > 180°). Therefore Yes.

Answer	Yes (11 ✓ 120°) [2 marks]

[2]

6. Work out:

738 925 – 245 128 – 18 503

Calculate: 738 925 - 245 128 - 18 503 = 475 294

Answer	475 ✓ 4 [2 marks]

[2]

Questions continue on the following page

Past paper

7. On a map, the distance between Mira's house and the cinema is 7 centimetres (cm).

The scale on the map is 1 : 50 000

Work out the actual distance between Mira's house and the cinema.

Give your answer in kilometres (km).

Map scale: 7 cm × 50 000 = 350 000 cm = 3500 m = 3.5 km

Answer: 3.5 ✓ [2 marks]	km

[2]

8. The table shows the number of students on a course at college:

	First-year students	Second-year students
Attend online classes only	10	13
Attend classes on campus only	15	12

One person is chosen at random.

What is the probability that this person is a second-year student who attends classes on campus only?

Probability = 12 / 50 = 24 / 100

Give your answer as a decimal **and** a percentage.

Decimal = 0.24 | Percentage = 24%

Answer	a) Decimal: 0.24	b) Percentage: 24% ✓ [3 marks]

[3]

End of Section A.

Past paper

Section B begins on Page 6.

Past paper

 © Training Qualifications UK 2023 All Rights Reserved

Section B: Calculator

There are **45 marks** available in this section.
You **can** use a basic calculator in this section.
You will have **90 minutes** to complete this section.

1. Write 12 540 000 in words.

Answer	Twelve million five hundred and forty thousand ✓ [1 mark]

[1]

2. Round 823.95132 to one decimal place.

Answer	824.0 ✓ [1 mark]

[1]

3. Bo asks a company to build a wall in 18 days.

The company's builders all work at the same speed.

It will take 5 builders 12 days to build the wall.

Can 3 builders build the wall in 18 days?

Show how you decide.

Inverse proportion: 5 workers × 12 days = 60 worker-days

3 workers take: 60 ÷ 3 = 20 days. Comparison: 20 ≠ 15 days. No.

Answer	No (ta… 20 days) ✓ [2 marks]

[2]

Past paper

4. Write 0.472:

a) as a fraction

b) as a percentage.

Decimal 0.472 = 472/1000 = 59/125 | Percentage = 47.2%

Answer	**a) Fraction:** 59/125	**b) Percentage:** 47.2% ✓ [2 marks]

[2]

5. Put these fractions in order starting with the lowest:

$\frac{4}{5}$ $\frac{8}{5}$ $\frac{13}{15}$ $\frac{15}{10}$

Show any working here:

Common denominator 30: 4/5=24/30, 13/15=26/30, 15/10=45/30, 8/5=48/30

Answer	4/5 , 13/15 , 15/10 , 8/5		✓ [2 marks]	
	Lowest	→		**Highest**

6. Kai looks online at the reviews of a hotel.

1088 reviewers would recommend the hotel.

192 reviewers would **not** recommend the hotel.

What percentage of the total reviewers would recommend the hotel.

Total attendees = 1088 + 192 = 1280

Percentage = (1088 ÷ 1280) × 100 = 85%

Answer 85 [2 marks] **%**

[2]

Past paper

7. Ashley buys a new freezer.

The instructions recommend that the freezer temperature is set at below 0 degrees Fahrenheit (°F).

Ashley sets the temperature to –15 degrees Celsius (°C).

Has Ashley set the freezer to the correct temperature?

Show how you decide.

Use:

$$C = \frac{5(F - 32)}{9}$$

Where:
C = temperature in degrees Celsius
F = temperature in degrees Fahrenheit

Formula: C = 5(F - 32) ÷ 9 --> C = 5(0 - 32) ÷ 9 = -160 ÷ 9

C = -17.78°C. -15°C is warmer than -17.78°C (not as cold). No.

Answer	No (-15 ✓ -17.78°C) [3 marks]

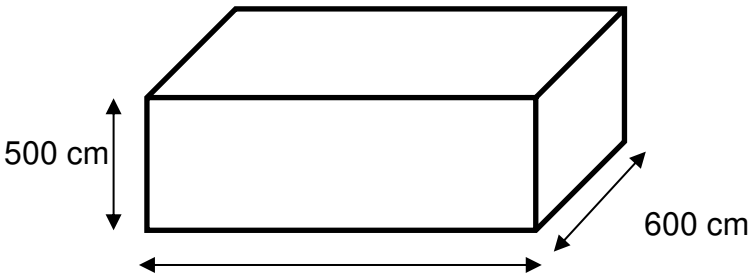

[3]

Past paper

Questions continue on the following page

8. Charlie needs to paint the outside of this cuboid:

Not drawn to scale

Charlie thinks the total area to be painted is more than 2 750 500 square centimetres (cm^2).

Is Charlie correct?

Show how you decide.

Cuboid Total Surface Area = 2[(500×1000) + (500×600) + (600×1000)] Area = 2[500 000 + 300 000 + 600 000] = 2 × 1 400 000 = 2 800 000 cm² Comparison: 2 800 000 cm² > 2 750 500 cm². Therefore Yes.
Answer Yes (2.8m cm² > 2.7 m²) [3 marks]

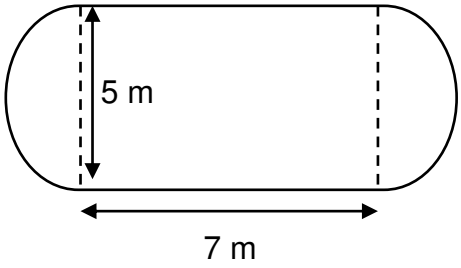

[3]

Past paper

9. Stevie needs to put a rope around the pond shown below.

The pond is in the shape of a rectangle with a semi-circle at each end.

Not drawn to scale

Stevie thinks 55 metres (m) of rope will be needed in total.

Is Stevie correct?

Show how you decide.

Use π = 3.14

Circumference = π × d = 3.14 × 5 = 15.7 m

Total Perimeter = 15.7 + 7 + 7 = 29.7 m

Comparison: 29.7 m ≠ 30 m (it is 29.7 m). Therefore No.

Answer No (Perimeter is 29.7 m) [3 marks]

10. Robin needs to make a pipe out of liquid copper.

Robin knows:

- density of copper = 8.96 g/cm^3
- the pipes need to have mass = 4480 grams.

What volume of liquid copper does Robin need to use?

Use: Density $= \frac{\text{mass}}{\text{volume}}$

Formula: Volume = Mass ÷ Density

Volume = 4480 g ÷ 8.96 g/cm³ = 500 cm³

Answer 500 [3 marks] **cm^3**

11. Morgan checks how much driving instructors charge for driving lessons:

Amount (A) charged per hour (£)	Number of driving instructors
20 < A ≤ 30	2
30 < A ≤ 40	9
40 < A ≤ 50	3
50 < A ≤ 60	1
Total	15

Morgan estimates the mean amount per hour.

Morgan will not pay any more than the mean amount.

What is the maximum amount per hour that Morgan will pay?

Midpoints: 25, 35, 45, 55. Total frequency = 2 + 9 + 3 + 1 = 15

Total fx = (25x2) + (35x9) + (45x3) + (55x1) = 50 + 315 + 135 + 55 = 555

Estimated Mean = 555 ÷ 15 = £37 per hour

Answer 37 £ [4 marks]

[4]

12. Taylor is planning a road trip.

The total distance is 1860 miles.

The average speed limit is 30 miles per hour.

Taylor wants to drive for a maximum of 6 hours per day.

How many whole days will Taylor need to complete the **entire** road trip driving at the average speed limit?

Driving hours = 1860 km ÷ 30 kph = 62 hours

Days = 62 hours ÷ 6 hours/day = 10.333... days --> Rounds up to 11 days

Answer	11 ✓ [4 marks]	**days**

[4]

Past paper

13. Izumi sells chocolate muffins and jam doughnuts.

This table shows the number of chocolate muffins sold over the last 6 days:

Chocolate muffins					
43	30	24	32	28	35

This table shows the number of jam doughnuts sold over the last 6 days:

Jam doughnuts	
Mean number sold per day	28
Range	25

Izumi claims:

i) 'on average I sell more chocolate muffins each day'
ii) 'the sales of the chocolate muffins are more consistent.'

Are both of Izumi's claims correct?

Give a reason for each of your answers.

Show your working.

Vanilla: Mean = 28, Range = 15 / Chocolate: Mean = 32, Range = 19 **Comparison: Yes, chocolate had a higher average sales and lower range.**
Reason - claim i)
Reason - claim ii)

14. Hayden needs to fill this fish tank with water.

The top of the tank is in the shape of a triangle.

Not drawn to scale

To work out how much water the tank holds, Hayden uses this formula:

Volume of tank in cubic centimetres = area of top of tank × height of tank

Hayden has a bucket that will hold 11 litres (l) of water.

Prism cross-section (triangle) = 0.5 × 80 × 30 = 1200 cm²

Volume = 1200 x 140 = 168 000 cm³ = 168 litres

What is the minimum number of times Hayden will need to use the bucket to fill the tank?

Answer box is on the following page

Past Paper

© Training Qualifications UK 2023 All Rights Reserved

Total Volume = 168 000 cm^3 = 168 litres

Times filled = 168 litres ÷ 11 litres = 15.2727... times

--> Rounds up to 16 times

Answer 16 [5 marks]

[5]

Past paper

Questions continue on the following page

 © Training Qualifications UK 2023 All Rights Reserved

15. Luca wants to put ivy along the top of a 40-foot-long garden fence.

Luca finds these prices:

Ivy	A	B	C	D	E
Price per metre	£2.50	£2.00	£1.50	£1.00	£2.75

They will buy 18% more ivy than needed.

Luca buys the ivy that has the median price.

How much will Luca pay in total?

Use 1 foot = 0.305 metres

Show your working.

Median price = £2.00 per foot. Length = 40 ft × 0.305 = 12.2 m

Net cost = 12.2 × £2.00 = £24.40

With 18% extra = £24.40 × 1.18 = £28.79

Answer £ 28.79 ✓ *[6 marks]*
