Digital Functional Skills Onscreen Practice Assessment Guide

Pearson has a number of onscreen practice assessments to support learners taking Entry Level 3 and Level 1 Digital Functional Skills assessments. These assessments replicate the look and feel of the live Pearson Onscreen Platform. The assessments covered by this guide are:

- Digital Functional Skills Entry Level 3
- Digital Functional Skills Level 1

Technical Requirements

In order to access our onscreen practice assessments, please ensure that your machine meets the minimum technical requirements shown below:

- Pentium III with 900Mhz processor
- 1Gb RAM
- 100Mb storage capacity
- 10/100 Mbps network interface adapter (for local mode only)
- Sound recording device (for language assessments)
- Speakers/headphones (for sound-based assessments)
- Access to Internet (ADSL 1Mb minimum) via reliable ISP (if online mode)
- Windows XP or above
- Microsoft .Net 4.0 (Full or Extended version)
- Windows Media Player 11 or above

Download the Sample Test Player

In order to run Pearson's onscreen practice assessments, you will need to download our sample test player. Click here to download the sample test player. If you are using a work or college computer, you may need administrator access and passwords.

Locating practice tests

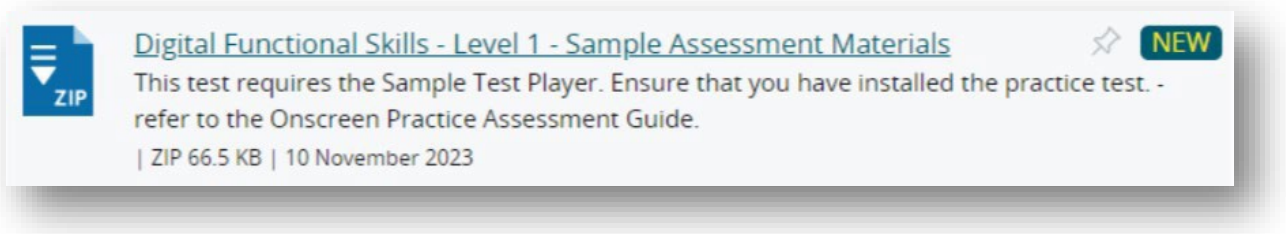

Both the onscreen Sample Assessment Materials (SAMs) and Practice tests can be used for test practice.

These are available from the Digital Functional Skills qualification page, as shown in the links below:

- Sample Assessment Materials
- Practice Tests

How to open and run tests

1. Install test player as per guidance above.
2. Click on the link to download the Zip file. The file contains the Onscreen Practice Assessment Guide, Package (.pkgx) test file and the Data folder, e.g.

3. Open the zip file and open the .pkgx file by double clicking on the .pkgx file to run the test.
4. If requested, the 'Learner Number' and 'Order Number' should be entered as '12345678'.

Generating an answer sheet and marking the practice assessments

Digital Functional Skills tests contain two sections, Section A and Section B. Section A is automatically marked, however all work done in Section B needs to be manually marked by the tutor/assessor.

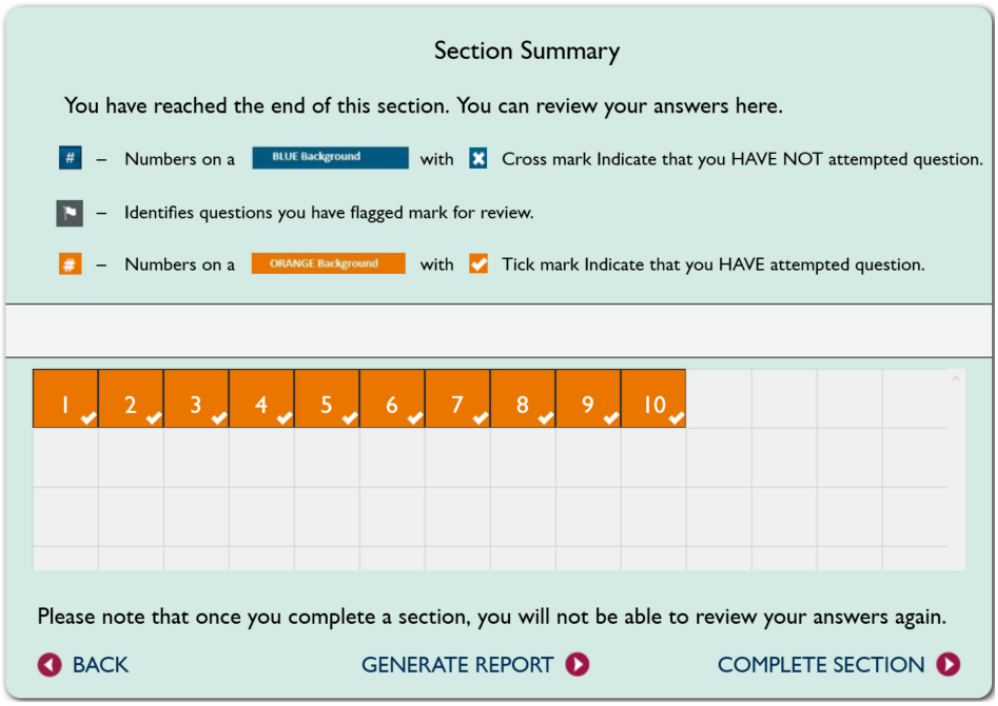

The mark schemes for the Sample Assessment Materials are available within the PDF version of the tests, as shown below:

- Digital Functional Skills - Entry Level 3 - Sample Assessment Material
- Digital Functional Skills - Level 1 - Sample Assessment Material

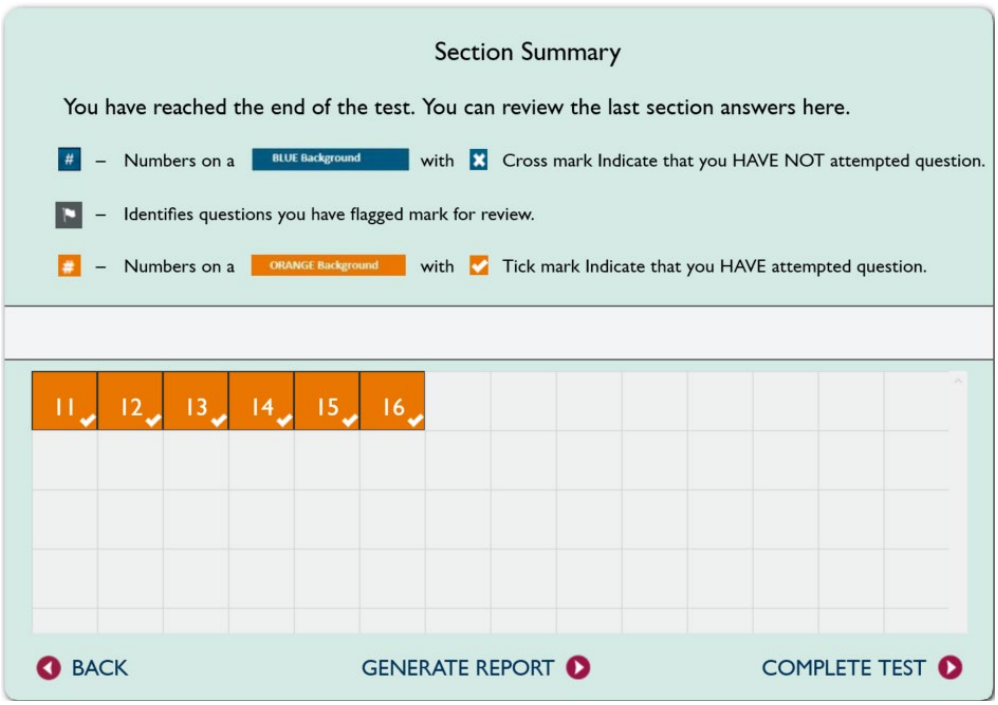

The mark schemes for the Practice Tests are available within the downloaded zip file for the test.

When taking the test, you will see a **Section Summary**, as shown below, at the end of each section of the test. There are two sections to the test, so this will show twice.

Section A summary screen

Section B summary screen (Level 1)

Please note the number of questions on Section B may vary depending on the level and content of the assessment.

Please click the **GERNERATE REPORT** function at the end of Section B. This button **must** be clicked **before** the learner clicks on the **COMPLETE TEST** button. This will generate a pdf version of the test with their answers, please save a copy of this report to refer back to.

Understanding the report

The report will show a summary table on the first page. The subsequent pages will list each question of the test with the answer selected by the learner.

In the summary table, the Test Number refers to the question number order so Test Number 203114 equals Question 1 on the mark scheme and progresses sequentially.

The first 10 Test Number rows on the summary table form section A.These questions are automatically marked for you and marks are shown in the Marks Obtained column, e.g.

Candidate name	John Doe			
Test Number	Computer Markable	Marks Obtained	Skipped	Flagged
203114	Yes	1		
203115	Yes	1		
203116	Yes	1		
203117	Yes	1		
203118	Yes	1		
203119	Yes	1		
203120	Yes	1		
203121	Yes	1		
203122	Yes	1		
203123	Yes	1		
203124	Yes	0		
203125	Yes	0		
203126	Yes	0		
203127	Yes	0		
203128	Yes	0		
203129	Yes	0		
Total:			10	
Percent:				

The rest of the rows on the report refer to Section B. Any marks shown in the Marks Awarded column should be ignored and the learners work should be marked against the appropriate mark scheme criteria by the tutor/assessor.

Additional Support

Additional support for Sample Test Player is available via the following webpage Pearson Onscreen Platform Additional Support.

If you have a questions, please contact **FS Assessment** or your **Vocational Quality Assurance Manager** via The Pearson Contact Portal.
