Report

MFS ACTIVE READING GUIDE · TEXT A (REPORT: QUESTIONS 1·4, 12a, 13, 14, 15)

· Style (Q2): Impartial report (Option C) using Ofcom statistics & Dr Mike Agari quotes.

· Key: Crimson = Retrieval (Q1, Q15) | Green = Style/Headings (Q3, Q4) | Gold = Vocab/Rule of 3 | Navy = Q13

Television viewing habits in the UK

Paragraph 1 *<-- [Q4 Subheading: 'Changes to viewing habits' = Para 1 (given)]*

Teenagers and children are watching far fewer television programmes at the scheduled time of broadcast than they were in 2010. There has been a move to digital viewing. People are watching catch-up TV on a phone, laptop or tablet and using TV and film services such as Amazon and Netflix.

Q14: Rule of 3

Paragraph 2 *<-- [Q4 Subheading: 'Differences according to age' = Para 2]*

There is an escalating gap between the viewing habits of younger and older people. According to Ofcom, 16 to 24 year olds watched 114 minutes of scheduled TV a day last year. This is far less than the average viewer who watched 212 minutes a day. Those most loyal to watching conventional TV are the over 65s who watched 344 minutes per day on average.

Q3: 'A' Formal

Q1: 114 mins

Q1: 344 mins

Paragraph 3 *<-- [Q4 Subheading: 'Impact of new services' = Para 3]*

On-demand and streaming services have transformed the way people watch. Children and young people now expect to watch what they want, when they want. They don't want to hang about for a week to see the next episode of a programme. Expert Dr Mike Agari says: 'Online services mean young people can be up with the latest series. Binge-watching has become the norm.'

Q12a: changed

Q13: Sim. #1

Paragraph 4 *<-- [Q4 Subheading: 'Use of digital devices' = Para 4 (given)]*

Traditional TV sets have lost the battle with laptops, tablets, smartphones and other devices. People are glued to their phones, checking them regularly, and many people also use individual devices like phones to watch short programmes and YouTube clips. Some viewers only use traditional sets to watch extended programmes and films.

Q14: Rule of 3

Q13: Sim. #2

Q3: 'E' Formal

Paragraph 5 *<-- [Q4 Subheading: 'Effect on family life' = Para 5]*

Some parents and carers are unhappy about the impact of these changes on family life. 'The days of the family chilling together in front of a TV show on Saturday evenings are long gone,' says Dr Agari. 'People either go to their own rooms or sit in the same room but watch different shows on individual devices.'

Q15: Text A

Q13 & Q15

Text A Examiner Tip: Formal report language ('escalating gap', 'individual devices' -> Q3) contrasts with Dr Agari's spoken quotes ('hang about', 'chilling together'). Copy exact quotes for Q13 (similarities) and Q15 (family impact).

Do we spend too much time in front of screens?

Whether it's for study, work or relaxation, we are spending more time in front of screens. Is it too much, especially for young people? Two experts give their opinions.

Anthony Crowther – ICT content developer	**Anne-Marie Branski – child psychologist**
Yes, we spend a lot of time in front of screens: this is because they have improved our lives immeasurably. Imagine studying or working without access to the internet. And as for entertainment, there is now limitless choice – music, films, YouTube – all at our fingertips. *<-- [Q5: endless | Q14: Rule of 3]* Social media enables us not only to communicate with people across the world, but to share people's lives from a distance. We can also keep up-to-date with the news as it happens, and e-learning makes education accessible to everyone, everywhere. *<-- [Q6: 'D' Fact | Q8a: #1]* Recent research by Oxford University suggests that, for teenagers, moderate levels of connectivity (four hours on a computer and two hours on a smartphone per day) enhance creativity. Another study shows that technology doesn't affect young people's sleep, as parents fear, but can improve their communication skills. *^ [Q8a: #2 Creativity & #3 Communication]* So let's stop panicking and appreciate the fact that we live in the digital age.	The average person in the UK spends one day a week online and young people spend four hours a day on their phones[1]. People are utilising so many devices for work, study and leisure that it amounts to far too much screen time. *<-- [Q7b: Superscript ' = Footnote]* The research by Oxford University didn't consider the negative impact of screen time on teenagers. Lack of exercise has been linked to health risks, like obesity. Violence on TV can affect children's behaviour in school and too much screen time delays language development. *<-- [Q8b: #1 & #2]* Spending hours in front of a screen, binge-watching box sets, for example, can prevent us from doing other important things like engaging face-to-face with people, pursuing interests and boosting our fitness. Social media reduces the time available for young people to read and can also cause problems with friendships. *<-- [Q8b #3 & Q15 Text B]* It's time to take a step back and review our digital lives. *<-- [Q5: 'binge-watching']*

Time to dial down digital use?

By Jonathan Wells

Are you completely dependent on your screens? Do you spend so much time in front of them, you don't have time to pursue other hobbies and interests? The average person spends a mind-boggling ten years of their life watching television. Although people, especially young people, are watching less traditional TV, viewing a box set rather than one episode of a show is now commonplace. People check their smartphones up to 200 times a day and most people say they might struggle to go for 24 hours without connecting to the internet.

The availability of different devices means we use them for work and play, to communicate with others and to keep ourselves informed. This can have a negative impact on our relationships: we may be too engrossed in our phones to have a conversation at mealtimes or immersed in doing our own thing on different devices, even when relaxing in the living room with family or friends.

If you think you and your family need to review your screen time, and make some adjustments, follow these guidelines. First of all, list all the gadgets you use and compile a record of how much time you are spending on them – there are apps to help. Then decide what activities you enjoy doing but don't have time to do currently. Finally make a plan: you must be resolute and self-disciplined to reduce your technology use, but here are some strategies to help you succeed. Remember – no pain, no gain.

◊ Set yourself realistic targets that you can keep to.

◊ Schedule your viewing / social media use and keep to the times you have specified.

◊ Remove phones from your bedroom to improve your sleep patterns, and prohibit devices during mealtimes so everyone can focus on enjoying conversation.

◊ Put phones and tablets away when you are socialising and give people your full attention.

◊ Try leaving your phone at home when you go shopping or to the gym. It's important to keep phones on silent to avoid annoying distractions at other times, and turn off notifications.

◊ Change one thing at a time and persevere with it for at least a week.

◊ Consider a digital downtime holiday where you leave technology behind and concentrate on living in the present and just appreciating your surroundings.

EXAMINER STRATEGY & MARK BREAKDOWN · SECTION A (TEXT A) 7 / 7 MARKS

· Question 1 (2 Marks · Scanning for Figures):

Scan Text A for the age brackets ('16 to 24' and 'over 65s'). Always include the unit ('minutes') for clarity.

· Question 2 (1 Mark · Identifying Writer's Style & Voice):

Text A is a factual report using Ofcom data without taking sides, making 'impartial' (Option C) the only valid choice.

· Question 3 (2 Marks · Distinguishing Formal vs Informal Register):

Eliminate options containing colloquialisms inside Dr Agari's spoken quotes ('be up with', 'chilling', 'hang about').

Select the narrator's objective report sentences: Option A ('escalating gap') and Option E ('individual devices').

· Question 4 (2 Marks · Matching Subheadings to Paragraphs):

Award 2 marks for all 3 correct numbers (5, 3, 2), or 1 mark if 2 numbers are correct. Always cross off '1' and '4' first since they are already completed for you, then match the remaining 3 paragraphs by their opening topic sentences.

Golden Rule: Never leave a table cell or checkbox blank · double-check how many boxes the question asks you to mark!

SECTION B

Read Text B and answer Questions 5 to 8.

5 What does each of these quotations from Text B suggest about onscreen entertainment?

'limitless choice' There is an endless, boundless range of entertainment options and programmes for viewers to choose from. (Explains both 'limitless' and 'choice') [1 mark] (1)

'binge-watching box sets' Watching lots of episodes or a whole TV series back to back in a single sitting from start to finish. (Explains 'binge-watching' + 'box sets') [1 mark] (1)

Answer Question 6 with a cross in a box ☒. If you change your mind about an answer, put a line through the box ☒ and then mark your new answer with a cross ☒.

6 Text B includes both facts and opinions.

Which **one** of these statements is a fact?

- ☐ **A** People should appreciate that we live in a digital age. (Opinion: 'should appreciate')
- ☐ **B** Social media prevents us from pursuing our own interests. (Opinion/claim, not proven fact)
- ☐ **C** People spend too much time in front of different screens. (Value judgement: 'too much')
- ☒ **D** Social media enables people to communicate across the world. [1 mark]

^ Correct: Verifiable objective statement of fact (Text B, Left Col).

· Question 5 (2 Marks · Explaining Quotations in Context):
Never repeat the words from the quote itself! Replace 'limitless choice' with 'endless/infinite range of options to select' and 'binge-watching box sets' with 'watching a whole series / many episodes in one sitting'.

· Question 6 (1 Mark · Fact vs Opinion):
Opinions contain modal verbs of obligation ('should') or subjective adjectives ('too much'). Facts can be proven true.

· Question 7a & 7b (2 Marks · Reference & Organisational Features):
Look for the small superscript number (¹) after 'four hours a day on their phones¹'. Follow it to the bottom of the webpage to find the report title ('A Decade of Digital Dependency'). That organisational feature is called a footnote.

· Question 8a & 8b (4 Marks · Targeted Information Retrieval):

12 You may use a dictionary to answer this question.

(a) 'transformed the way people watch'

Give **one** word or phrase to replace 'transformed' that keeps the meaning of this quotation from Text A the same.

changed <-- Also accepted: altered / made a difference to / brought a change to [1 mark] **(1)**

(b) 'prohibit devices during mealtimes'

(Total for Question 12 = 2 marks)

EXAMINER GUIDE · QUESTION 12: VOCABULARY SUBSTITUTION TEST (2 / 2 MARKS)

How to guarantee full marks on 'Give one word or phrase to replace...' questions:

1. Match the exact verb tense & grammatical form:
   · In 12(a), 'transformed' is a past participle ('have transformed'). Your replacement must also be past tense: 'changed' or 'altered' (NOT 'change' or 'changing', which would make the sentence ungrammatical).

2. Plug your word back into the sentence to test if the meaning stays identical:
   · 12(a) Test: 'On-demand and streaming services have [changed] the way people watch.' --> Makes 100% sense!
   · 12(b) Test: '...improve your sleep patterns, and [ban / forbid] devices during mealtimes.' --> Makes 100% sense!

3. Give ONE clear answer:
   · Write your single strongest word ('changed', 'ban') on the line so there is zero ambiguity for the examiner.
