Past Paper 3

Time: 25 minutes | Paper Reference **PMAT1/N03**

Mathematics

Level 1

Section A (Non-Calculator)

You must have:
Pen, HB pencil, eraser, ruler graduated in cm and mm, protractor, pair of compasses. Tracing paper may be used.

Total Marks
14 /14

My signature confirms that I will not discuss the content of the test with anyone.

Signature: Master Functional Skills (MFS)

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Sign the declaration.
- Answer **all** questions.
- Write your final answers in the boxes provided.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- You **must** show clearly how you get your answers in the spaces provided. Marks will be awarded for your working out.
- Check your working and your answers at each stage.
- Diagrams are **not** accurately drawn, unless otherwise indicated.
- **Calculators may not be used.**
- Take the value of π to be 3.14

Information

- The total mark for this section is 14.
- The marks for each question are shown in brackets
  – *use this as a guide as to how much time to spend on each question.*
- This sign ☑ shows where marks will be awarded for showing your checks.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and NHS healthcare staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

START LEARNING TODAY AT

MasterFunctionalSkills.co.uk

SECTION A

Answer ALL questions. Write your answers in the spaces provided.

1 Marli travels to college by bus.
She has this information about ticket prices.

ticket prices	
daily ticket	£3.40
weekly ticket	£12
monthly ticket	£54

Marli will travel to college 4 days next week.
She buys a weekly ticket instead of 4 daily tickets.

How much money does Marli save in total?
You **must** show your working.

(3)

Step 1: Calculate the cost of 4 daily bus tickets:

4 daily tickets = 4 × £3.40 = £13.60 [M1]

- 4 × £3.00 = £12.00
- 4 × £0.40 = £1.60
- £12.00 + £1.60 = £13.60

Step 2: Compare with the weekly ticket (£12) to find savings:

Money saved = £13.60 − £12.00 = £1.60 [M1]

Conclusion: Marli saves £1.60 in total by buying the weekly ticket.

£ 1.60 [A1]

(Total for Question 1 is 3 marks)

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

2 Here is a set of data.

14.3	17.2	9.4	15.6	19.5

(a) Calculate the range of this set of data.

(2)

Step 1: Identify the largest and smallest values in the data set:

- *Largest value = 19.5*
- *Smallest value = 9.4*

Step 2: Calculate the range (Largest – Smallest):

Range = 19.5 – 9.4 [M1]

Range = 10.1

10.1 *[A1]*

☑ (b) Use estimation to show a check of your answer.

(1)

Check using estimation (round each value to nearest whole number):

19.5 ≈ 20 and 9.4 ≈ 9

Estimated range = 20 – 9 = 11 [B1]

(Or: 19 – 9 = 10, both close to 10.1)

(Total for Question 2 is 3 marks)

3 Lee works in a garage.
He has these jobs to do on Tuesday

- service 1.5 hours
- oil change $\frac{3}{4}$ hour
- replace headlight 20 minutes.

Lee will start the first job on the list at 9 am.
He will have a break of half an hour after the first two jobs.

Lee thinks he will finish the last job before 1 pm.

Will Lee finish the last job before 1 pm?

(4)

Step 1: Convert all durations into minutes:

- Service: 1.5 hours = 1 hour 30 mins = 90 mins [M1]
- Oil change: 3/4 hour = 45 mins
- Replace headlight: 20 mins
- Break: 0.5 hour = 30 mins

Step 2: Calculate total working and break time:

Total time = 90 + 45 + 20 + 30 = 185 minutes [M1]

185 mins = 3 hours and 5 minutes (180 + 5 mins)

Step 3: Work out finish time starting from 9:00 am:

Finish time = 9:00 am + 3 hours 5 mins = 12:05 pm [M1]

Step 4: Compare with 1:00 pm deadline:

12:05 pm is 55 minutes before 1:00 pm.

Yes (12:05 pm) [A1]

(Total for Question 3 is 4 marks)

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

4 Place the correct number in the space to complete the sentence.

(a) Angles around a point add up to ..360.. degrees. [B1]

(1)

Shelley reads an article about holidays in 2018
She sees this pie chart.

holidays in 2018

The pie chart shows where 1800 people went on holiday in 2018

Shelley thinks that 540 of these people went abroad on holiday.

(b) Is Shelley correct?
Show why you think this.

(3)

Step 1: Identify the angle and fraction for "abroad":

- The "abroad" sector has a right-angle symbol = 90°
- Fraction abroad = 90° / 360° = 1/4 [M1]

Step 2: Calculate 1/4 of 1800 people:

1800 ÷ 4 = 450 people went abroad [M1]

Step 3: Compare with Shelley's claim of 540 people:

450 ≠ 540 (Shelley is incorrect; 450 is 25%, not 540)

No (450 people) [A1]

(Total for Question 4 is 4 marks)

SECTION B

Answer ALL questions. Write your answers in the spaces provided.

1 Charlie is a florist.
He cuts lengths of ribbon to go around vases.

Each length of ribbon must be 70 cm.
Charlie has a roll of ribbon which is 15 metres in length.

How many 70 cm lengths of ribbon can Charlie cut from the roll?

(3)

Step 1: Convert the length of the roll from metres to centimetres:

1 m = 100 cm

15 m = 15 × 100 = 1500 cm [B1]

Step 2: Divide the total length by the length of one piece (70 cm):

1500 ÷ 70 = 21.428... [M1]

- 21 × 70 cm = 1470 cm
- 1500 cm − 1470 cm = 30 cm left over (cannot make a 22nd length)

Step 3: Round down to the nearest whole length:

Charlie can cut 21 whole lengths.

21 [A1]

2 (a) Write 1.07 litres in millilitres.

(1)

Step: Convert litres to millilitres (1 litre = 1000 ml):

1.07 × 1000 = 1070 ml

1070 [B1] ml

Alex buys vegetarian pies and chicken pies for a party.
He buys 164 pies in total.

Alex buys vegetarian pies and chicken pies in the ratio 3 : 1

(b) Work out the number of vegetarian pies Alex buys.

(3)

Step 1: Find total number of ratio parts:

3 + 1 = 4 parts in total [M1]

Step 2: Find the value of 1 part:

164 ÷ 4 = 41 pies per part [M1]

Step 3: Calculate the number of vegetarian pies (3 parts):

3 × 41 = 123 vegetarian pies

Check: 1 × 41 = 41 chicken; 123 + 41 = 164

123 [A1]

(Total for Question 2 is 4 marks)

DO NOT WRITE IN THIS AREA

3

(a) Write 60% as a fraction in its simplest form.

(1)

Step 1: Write 60% as a fraction out of 100:

60% = 60/100

Step 2: Simplify by dividing by 20:

60 ÷ 20 = 3 and 100 ÷ 20 = 5

$\frac{3}{5}$ [B1]

Lou plans to go to a beauty salon.

She sees this special offer.

treatments

facial	£31
leg wax	£29
massage	£35
manicure	£27
eyelash tint	£13

book any 3 treatments get 25% off the total cost

Lou wants to book a massage and 2 other different treatments.

She has £60 to spend on the treatments.

(b) Work out the total cost of the 3 treatments using the special offer for Lou.
Remember to write down the 3 treatments.

(4)

(Working for Question 3(b) continues on the next page)

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

Step 1: Choose 3 different treatments including a massage (£35):

- Budget = £60. Maximum before 25% discount is £60 ÷ 0.75 = £80.
- **Selected treatments: [M1]**
  1. **Massage (£35)**
  2. **Facial (£31)**
  3. **Eyelashes (£13)**

Step 2: Calculate total cost of the 3 treatments before discount:

Total = £35 + £31 + £13 = £79 [M1]

Step 3: Calculate the 25% discount:

25% of £79 = £79 ÷ 4 = £19.75 [M1]

Step 4: Subtract discount to find total cost to pay:

Total cost = £79 − £19.75 = £59.25

(Or: 75% of £79 = £79 × 0.75 = £59.25)

Verification: £59.25 is within Lou's budget of £60 (£0.75 change).

(Alt option: Massage £35 + Manicure £27 + Eyelashes £13 = £75 -> £56.25)

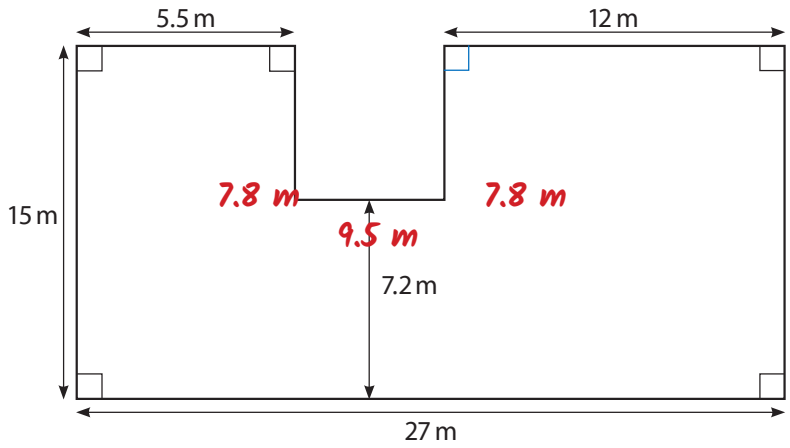

Treatments: Massage, Facial, Eyelashes

£ **59.25** [A1]

(Total for Question 3 is 5 marks)

4 Here is a shape.
The shape is made up of 3 rectangles.

Work out the perimeter of this shape.

(3)

Step 1: Find the missing vertical lengths:

Missing vertical sides = 15 − 7.2 = 7.8 m (both inner sides) [M1]

Step 2: Find the missing horizontal length:

Missing inner horizontal = 27 − (5.5 + 12) = 27 − 17.5 = 9.5 m [M1]

Step 3: Add all 8 sides to find the perimeter:

Perimeter = 15 + 27 + 15 + 12 + 7.8 + 9.5 + 7.8 + 5.5

Perimeter = 99.6 m

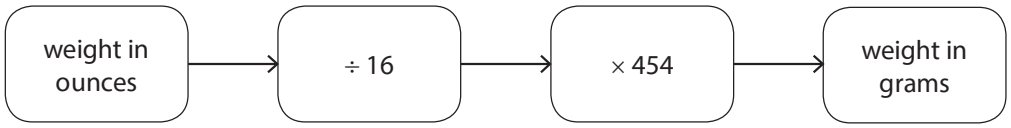

- Outer sides: 15 + 27 + 15 = 57 m
- Inner & top sides: 12 + 7.8 + 9.5 + 7.8 + 5.5 = 42.6 m so 57 + 42.6 = 99.6 m

99.6 [A1] m

(Total for Question 4 is 3 marks)

5 Here is a formula.

Use the formula to convert 12 ounces to grams.

(3)

Step 1: Divide weight in ounces (12) by 16:

12 ÷ 16 = 3/4 = 0.75 [M1]

Step 2: Multiply by 454 to find weight in grams:

0.75 × 454 = 340.5 grams [M1]

- 454 ÷ 4 = 113.5 (one quarter)
- 113.5 × 3 = 340.5 grams (three quarters)

Check by single fraction calculation:

(12 × 454) ÷ 16 = 5448 ÷ 16 = 340.5 g

340.5 [A1] grams

(Total for Question 5 is 3 marks)

DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA

6 Jilly works at a school.
She is going to make a vegetable patch in a field at the school.

The vegetable patch will

- have an area of 24 m^2
- be rectangular in shape
- be at least 2 m away from each edge of the field.

Jilly will put fencing around the vegetable patch.
Fencing can be cut and joined.

Jilly has 5 lengths of the fencing.
Each length of the fencing is 5 m long.

Does Jilly have enough fencing to go along each side of the vegetable patch?
You **must** draw the space for the vegetable patch on the grid opposite.

(6)

Step 1: Dimensions for 24 m^2 vegetable patch:

- Dimensions: Length = 6 m, Width = 4 m [B1]
- Area = 6 m × 4 m = 24 m^2

Step 2: Scale drawing conversion (1 small square = 0.5 m):

- Length 6 m = 6 ÷ 0.5 = 12 small squares [B1]
- Width 4 m = 4 ÷ 0.5 = 8 small squares
- Distance from edge ≥ 2 m = 2 ÷ 0.5 = 4 small squares [B1]

Step 3: Work out perimeter of vegetable patch:

Perimeter = 6 + 4 + 6 + 4 = 20 m [M1]

Step 4: Calculate total fencing available:

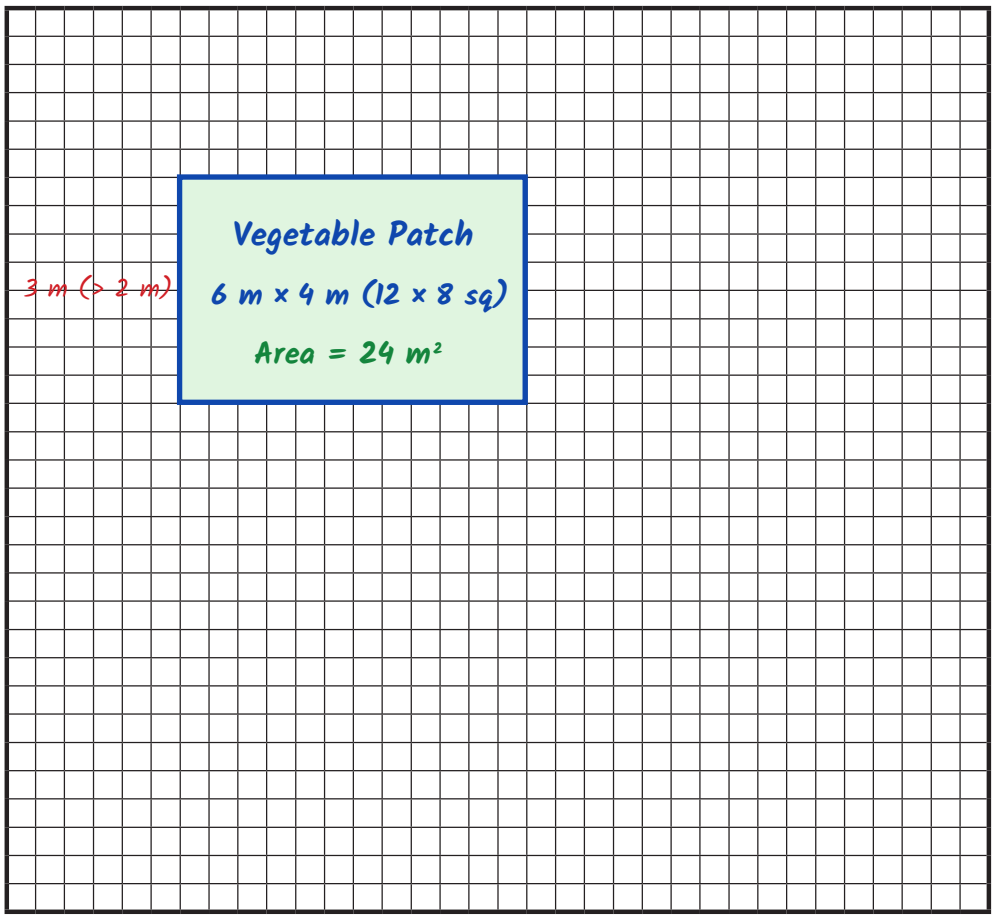

5 lengths × 5 m each = 25 m of fencing [M1]

Step 5: Compare perimeter and fencing:

20 m < 25 m, so Jilly has 5 m extra fencing left over.
Conclusion: Yes, Jilly has enough fencing. [A1]

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

The grid shows a plan of the field.

Key 1 small square length on the grid represents 0.5 m in the field
edge of the field

Grid plan summary:

- Patch: 12 sq × 8 sq (6 m × 4 m) = 24 m²
- Clearance: 6 sq = 3 m from edge (≥ 2 m required) [B1]
- Perimeter = 20 m ≤ 25 m fencing (enough fencing!) [A1]

(Total for Question 6 is 6 marks)

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

7

(a) Write the following numbers in order of size.
Start with the smallest number.

0.102 0.04 0.2

(1)

Compare using equal decimal places: 0.040, 0.102, 0.200

0.04 , 0.102 , 0.2 *[B1]*

(b) Round 178.146 correct to 2 decimal places.

(1)

Third digit is 6 (≥ 5), so round second decimal 4 up to 5:

178.15 *[B1]*

(c) How many minutes are there in one and a quarter hours?

(1)

1 hour = 60 minutes

1/4 hour = 60 ÷ 4 = 15 minutes

Total = 60 + 15 = 75 minutes

75 *[B1]* minutes

8 Pierre is a teacher.
There are 13 boys and 17 girls in his class.

Pierre chooses one of these students at random for a presentation.

(a) Work out the probability this student is a boy.

(2)

Step 1: Find total number of students in the class:

Total students = 13 boys + 17 girls = 30 students [M1]

Probability student is a boy = 13 / 30

$$\frac{13}{30}$$ [A1]

Pierre travels to work on the train.
He records whether the train is on time or late.

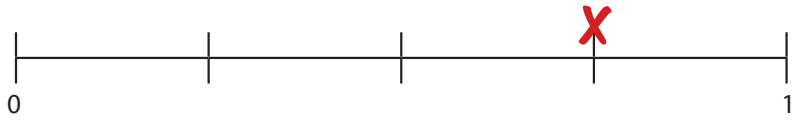

These are his results after 20 train journeys

- on time 15 days
- late 5 days.

(b) Mark with a cross (X) the probability the train is on time on the scale.

(1)

Probability train on time = 15/20 = 3/4 = 0.75 [M1]

[B1]

3/4 (0.75)

(Total for Question 8 is 3 marks)

9 Juliet wants to check her gas bill.
She has this information.

month	May	June	July	August	September	October
units used	430	276	205	168	261	565

Juliet thinks the mean number of units she used for the 6 months was more than 300

(a) Is Juliet correct?
Show why you think this.

(3)

Step 1: Calculate total units used across the 6 months:

Total = 430 + 276 + 205 + 168 + 261 + 565 = 1905 units [M1]

Step 2: Calculate the mean (Total ÷ 6):

Mean = 1905 ÷ 6 = 317.5 units [M1]

Step 3: Compare mean with Juliet's claim (more than 300 units):

317.5 > 300, so Juliet is correct.

Yes, mean is 317.5 [A1]

☑

(b) Use a reverse calculation to show a check of your mean.

(1)

Reverse calculation check (Mean × 6 = Total):

317.5 × 6 = 1905 units [B1]

(Or: 300 × 6 = 1800 < 1905)

(Total for Question 9 is 4 marks)

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

10 Magda owns a music venue.
She has this information about the people who attended a recent show.

age (years)	men	women
18 to 35	142	86
36 or older	175	27

Magda says,

'About a quarter of the people were women aged between 18 and 35'

Is Magda correct?
Show why you think this.

(3)

Step 1: Calculate total number of people at the venue:

Total = 142 + 86 + 175 + 27 = 430 people [M1]

Step 2: Find the number and proportion of women aged 18 to 35:

Number of women aged 18 to 35 = 86

Proportion = 86 / 430 = 0.2 = 20% [M1]

Step 3: Compare with Magda's statement ("about a quarter" = 25%):

- A quarter (1/4 or 25%) of 430 = 430 ÷ 4 = 107.5 people
- 86 is only 20%, which is significantly less than 25% (107.5).

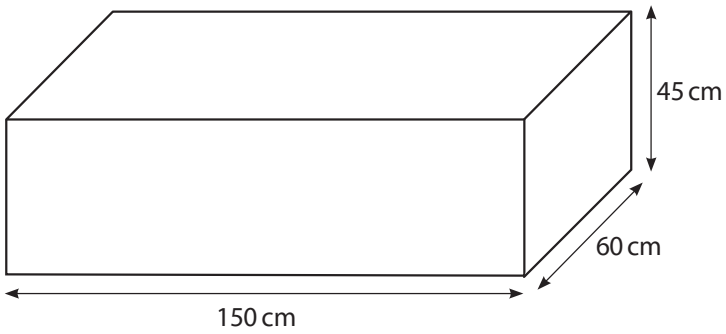

Conclusion: Magda is NOT correct.

No, 20% (not 25%) [A1]

(Total for Question 10 is 3 marks)

11 Nick is a farmer.
He has a tank for water.

The tank is in the shape of a cuboid.

The tank is $\frac{2}{3}$ full of water.

Nick knows that 1000 cm^3 = 1 litre.

Work out how many litres of water are in the tank.

(5)

Step 1: Calculate the total volume of the cuboid tank:

Volume = length × width × height

Volume = 150 × 60 × 45 = 405 000 cm^3 [M1]

Step 2: Find the volume of water when 2/3 full:

Water volume = 405 000 × (2/3) [M1]

- *405 000 ÷ 3 = 135 000 cm^3 (1/3)*
- **135 000 × 2 = 270 000 cm^3 (2/3) [M1]**

(Full conversion to litres and answer on the next page)

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

Step 3: Convert cubic centimetres to litres (1000 cm³ = 1 litre):

Litres of water = 270 000 ÷ 1000 = 270 litres [M1]

Alternative method using water height:

- Water depth = 45 × 2/3 = 30 cm
- Water volume = 150 × 60 × 30 = 270 000 cm³
- In litres = 270 000 ÷ 1000 = 270 litres

270 [A1] litres

(Total for Question 11 is 5 marks)
