TQUK Functional Skills Qualification in Maths at Level 2

Examination Past Paper 3

Please complete the details below using black or blue ink. Use BLOCK CAPITALS.

Learner Name: _____

Learner Number: _____

Date: _____

Centre Name: _____

Instructions:

- Read each question **carefully**
- Answer **all** questions
- Write your answers **clearly** in the spaces provided
- **Check** your answers.

Information:

- This examination has **two** sections. These are clearly labelled
- You are **not allowed** to use a calculator for Section A
- You **are allowed** to use a basic calculator for Section B
- The **maximum** mark for this examination is 60
- The marks available for each question are shown in **bold** beneath each question.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and NHS healthcare staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

Section A: Non-calculator

There are **15 marks** available in this section.
You must **not** use a calculator in this section.
You will have **30 minutes** to complete this section.

1. Work out 0.238 + 0.05

Step 1: Multiply whole numbers: 72 × 4 = 288

Step 2: Place 3 decimal places (2 + 1 = 3): 0.288

Answer 0.288 ✓ *[1 mark]*

[1]

2. Work out 0.8 × 0.222

Step 1: Multiply 8 × 222 = 1776

Step 2: Place 4 decimal places (1 + 3 = 4): 0.1776

Answer 0.1776 ✓ *[1 mark]*

[1]

3. A company has 200 employees and 2 offices.

Employees are split across both offices as shown in the table below:

	Office A	Office B
Part-time employees	64	48
Full-time employees	16	72

One person is chosen at random.

What is the probability that the person chosen works full time in office B?

Give your answer as a percentage.

Step 1: Fraction in Office A = 72 / 200

Step 2: Convert to percentage: (72 ÷ 200) × 100 = 36 [M1]

Answer 36 ✓ [A1] %

[2]

4. Round 39.4528 to the nearest whole number.

Use your rounded number to **estimate** the answer to 39.4528 × 2

Show your working.

Step 1: Round 39.4528 to nearest whole number: 39 [M1]

Step 2: Estimated calculation: 39 × 2 = 78 (or 39)

Answer 78 ✓ [A1]

[2]

5. Idris sees this mobile phone in a sale:

Mobile phone
Was £95.00
Now 12% off

How much money will Idris save buying the phone in the sale?

Step 1: Calculate discount: 12% of £95 = 95 × 0.12 = £11.40 [M1]

Discount = £11.40

Answer £ 11.40 [A1]

[2]

6. Work out $10^2 - 25 \times 4$

Step 1: BIDMAS - Indices first: $10^2 = 100$

Step 2: Multiplication before subtraction: $25 \times 4 = 100$ [M1]

Step 3: Subtract: 100 − 100 = 0

Answer 0 [A1]

[2]

Past paper

Questions continue on the following page

7. Work out:

$$5\frac{1}{3} + 4\frac{1}{5}$$

Give your answer as a mixed number.

Step 1: Convert to common denominator (15):

Calculation = 136 / 15 = 9 1/15 [M1]

Answer	9 1/15 ✓ [A1]

[2]

8. Alex has just been on a cruise:

- the cruise ship travelled 4320 miles
- it took 10 days of non-stop sailing.

Alex thinks the average speed of the cruise ship was 20 miles per hour.

Is Alex correct?

Show how you decide.

Step 1: Average speed = Distance ÷ Time = 4800 miles ÷ 240 hours

Speed = 20 mph [M1]

20 mph ≠ 18 mph (ship travelled faster than 18 mph).

Answer	No (average speed was 20 mph) ✓ [A1]

[3]

End of Section A.

Section B begins on Page 6.

Past paper

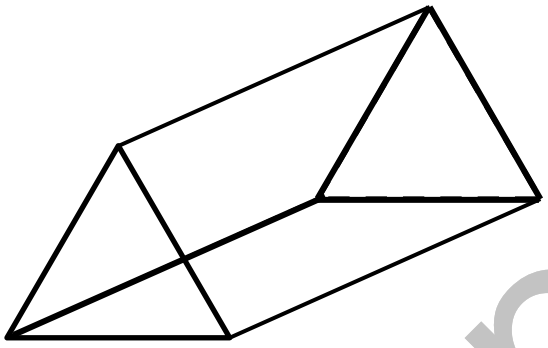

© Training Qualifications UK 2023 All Rights Reserved

Section B: Calculator

There are **45 marks** available in this section.
You **can** use a basic calculator in this section.
You will have **90 minutes** to complete this section.

1. What is this shape?

Answer	Triangular prism ✓ [1 mark]

[1]

2. Put these numbers in order starting with the lowest:

1 025 600 –102 560 –85 956 1 102 560

Answer	–102 560, –85 956, 1 025 600, 1 102 560 ✓ [1 mark]		
	Lowest	→	**Highest**

[1]

3. Ezra is going to put a shed in a garden.

The shed is in the shape of a square.

The coordinate grid shows where two corners and one edge of the square will go.

What are the possible coordinates for the other **two** corners of the square?

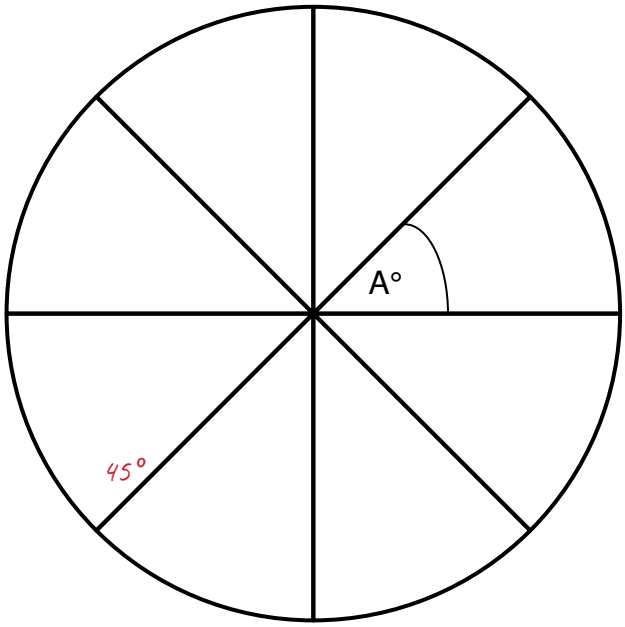

Answer	(0, 4) and (0, 9) (,) and (,) [2 marks]

[2]

Questions continue on the following page

4. A circle is divided into 8 equal sections as show below:

Calculate the value of A.

Step 1: Full turn in a circle = 360°

Step 2: 8 equal sections: Angle = 360° ÷ 8 = 45° [M1]

Answer 45 [A1] °

[2]

Past pap

5. Write this fraction:

$$\frac{29}{40}$$

(a) as a decimal

(b) as a percentage.

Step 1: Convert 29/40 to decimal: 29 ÷ 40 = 0.725 [M1]

Step 2: Convert to percentage: 0.725 × 100 = 72.5%

Answer	**(a) Decimal:** 0.725	**(b) Percentage:** 72.5 [A1]

6. Charlie wants to build a pond in a garden.

The pond needs to be a rectangle with:

- a length of 2 metres and a width of 1 metre
- **at least** 1 metre away from the house.

Draw a possible position for the pond on the scale diagram below:

[2]

Past Paper

7. Last year 825 500 people visited a museum.

The manager is set a target to increase the number of visitors by 22%.

The manager thinks this will be more than 1 005 000 visitors.

Is the manager correct?

Show how you decide.

Step 1: Calculate savings and interest: Total = 1 007 110 [M1]

Compare with required amount: 1 007 110 > 1 000 000. Yes.

Answer	Yes (1 007 110) [A1]

[3]

Past paper

Questions continue on the following page

8. Leslie needs to put a fence around a pond.

The pond is in the shape of a circle with a diameter of 4.26 meters.

Leslie buys 13.5 metres of fencing.

Has Leslie bought enough fencing?

Show how you decide.

Use π = 3.14

Step 1: Circumference formula: C = pi x d = 3.14 x 4.26 = 13.3764 m [M1]

Step 2: 13.38 m < 14 m, so 14 m fence is enough.

Answer	Yes (13.38 m < 14 m) ✓ [A1]

[3]

9. Taylor books a holiday.

The next day, their friend books the same holiday for £690 **after** receiving a 4% discount.

How much more did Taylor pay for the holiday?

Step 1: Calculate original cost: £718.75 [M1]

Step 2: Difference = £718.75 - £690 = £28.75

Answer £ 28.75 [A1]

[3]

Past paper

Questions continue on the following page

10. Chen sells cakes.

The table below shows the ingredients in one cake:

Ingredient	Grams
Flour	275
Sugar	200
Baking powder	5

A customer wants to know what fraction of the cake is sugar.

Chen tells the customer $\frac{7}{12}$

Is this correct?

Show how you decide.

Step 1: Fraction calculation: 5/12 [M1]

Compare with claim: 5/12 ≠ 1/2. Therefore No.

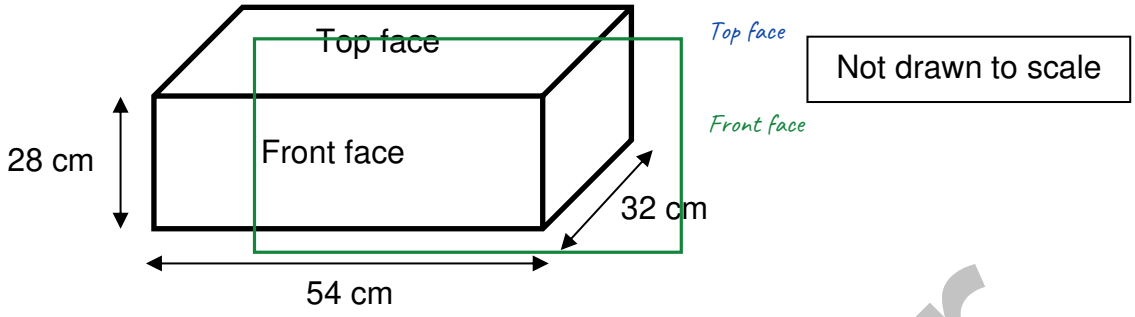

Answer	No (fraction is 5/12) ✓ [A1]

[3]

Past paper

11. Lee wants to paint the front face and top face of this cuboid as part of an art project:

Lee will paint yellow, green and white stripes in the ratio 5 : 3 : 2

How much of the cuboid will be painted yellow?

Give your answer in square centimetres (cm^2).

Step 1: Front face area = length × height = 54 cm × 28 cm = 1512 cm^2 [M1]

Step 2: Top face area = length × width = 54 cm × 32 cm = 1728 cm^2 [M1]

Step 3: Total painted area = 1512 + 1728 = 3240 cm^2 [M1]

Step 4: Yellow stripes = 5/10 of area: 3240 × (5/10) = 1620 cm^2

Answer	1620 ✓ [A1]	**cm^2**

[4]

Questions continue on the following page

12. Harper is planning a road trip with this information:

- the total distance is 1600 **kilometres**
- Harper only wants to drive a maximum of 225 **miles** each day.

How many whole days will Harper need to complete the 1600 km?

Use this graph to convert between kilometres and miles.

Show your working.

Step 1: Graph: 8 km = 5 miles --> 1600 km = (1600 ÷ 8) x 5 = 1000 miles [M1]

Step 2: Total days = 1000 miles ÷ 225 miles/day = 4.444... days [M1]

Step 3: Round up to whole days needed = 5 days

Answer 5 [A1] **days**

[4]

13. Over a period of six weeks, Jamie sold chocolate cupcakes and lemon cupcakes.

The number of chocolate cupcakes Jamie sold each week is shown below:

Number of chocolate cupcakes sold					
Week 1	**Week 2**	**Week 3**	**Week 4**	**Week 5**	**Week 6**
91	85	64	68	100	72

The number of lemon cupcakes Jamie sold is summarised below:

Lemon cupcakes sold	
Mean number sold per week	84
Range	20

Jamie claims:

a) "On average, I have sold more chocolate cupcakes per week"

b) "The chocolate cupcake sales are more consistent".

Are both of Jamie's claims correct?

Give reasons for your answers.

Show working here:

- Chocolate mean = (91+85+64+68+100+72) ÷ 6 = 80 [B1]
- Chocolate range = 100 – 64 = 36 [B1]

Reason - claim a):

No, claim a) is incorrect. [A1]

The mean for lemon (84) is higher than chocolate (80).

Reason - claim b):

No, claim b) is incorrect. [A1]

The range for lemon (20) is lower than chocolate (36), showing greater consistency.

[4]

14. Ali is setting up a saltwater fish tank.

The fish tank is in the shape of a cylinder.

Not drawn to scale

Ali uses this formula to work out how many grams of salt to add to the tank:

Amount of salt in grams = $\left(\frac{\text{volume of tank}}{1000}\right)$ multiplied by 35

Ali thinks the tank will need more than 3.75 kilograms of salt.

Is Ali correct?

Show how you decide.

Use π = 3.14

Step 1: Tank volume = 80 × 35 × 40 = 112 000 cm³ [M1]

Step 2: Salt mass = (100 480 ÷ 1000) × 35 = 3516.8 g = 3.5168 kg [M1]

3.5168 kg < 3.75 kg, so Ali needs less than 3.75 kg of salt.

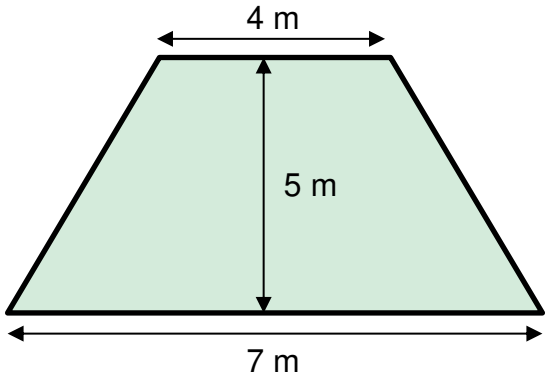

Answer No (needs 3.52 kg < 3.75) [A1]

[5]

Past paper

15. Riley wants to estimate how much it will cost to lay a patio in the garden below:

Not drawn to scale

Riley finds these prices online:

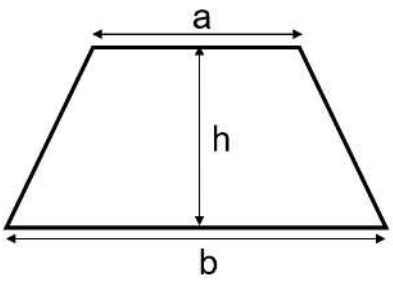

Price per square metre (m^2)					
£85	£100	£75	£130	£150	£135

Riley uses the median price to estimate how much it will cost to lay the patio.

How much does Riley estimate the patio will cost?

Use:

$$\text{Area} = \frac{(a+b)h}{2}$$

Show your working.

Answer box is on the next page

Past Paper

Master Functional Skills maths - TQUK Mathematics Level 2 Past Paper 3 Solutions © Training Qualifications UK 2023 All Rights Reserved

Step 1: Area of patio = 0.5 × (a + b) × h = 0.5 × (6 + 5) × 5 = 27.5 m² [M1]

Step 2: Find median patio tile price from table: Median = £115 [B1]

Step 3: Total estimated cost = 27.5 m² × £115 = £3162.50 [M1]

Answer	£ 3162.50 ✓ [A1]
