TQUK Functional Skills Qualification in Maths at Level 2

Examination Past Paper 6

Please complete the details below using black or blue ink. Use BLOCK CAPITALS.

Learner Name: _____

Learner Number: _____

Date: _____

Centre Name: _____

Instructions:

- read each question **carefully**
- answer **all** questions
- write your answers **clearly** in the spaces provided
- **check** your answers.

Information:

- this examination has **two** sections. These are clearly labelled
- you are **not allowed** to use a calculator for Section A
- you **are allowed** to use a basic calculator for Section B
- the **maximum** mark for this examination is 60
- the marks available for each question are shown in **bold** beneath each question.

Sample paper

OFFICIAL MFS MODEL SOLUTION · BENCHMARK EXEMPLARY PASS

60 / 60 Marks (100% Pass · Full Marks)

- Assessment: Past Paper 6 (Section A Non-Calculator & Section B Calculator)
- Complete stepped calculations, methods & mark scheme codes [MI/AI]
- Exam Board: TQUK (Training Qualifications UK · Ofqual Regulated)
- Pass standard: 34 / 60 marks (Achieved: 60 / 60 marks)

Verified by Tutor Abdul (Senior Assessor) · MasterFunctionalSkills.co.uk

Total marks	60		

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and NHS healthcare staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

Section A: Non-calculator

There are **15 marks** available in this section.
You must **not** use a calculator in this section.
You will have **30 minutes** to complete this section.

1. Work out 2.109 + 0.98

Step 1: Align decimals by place value: 2.109 + 0.980

2.109 + 0.980 = 3.089

Answer	3.089 ✓ *[1 mark]*

[1]

2. Work out the difference between –4600 and 8000

Step 1: Difference = higher value - lower value:

8000 - (-4600) = 8000 + 4600 = 12 600

Answer	~~12~~ 600 ✓ *[1 mark]*

[1]

Past paper

Questions continue on the following page

3. Round 7.5385 to one decimal place.

Use your rounded value to **estimate** the answer to 30 000 × 7.5385

Show your working.

Step 1: Round 7.5385 to 1 decimal place: 7.5385 --> 7.5 [M1]

Step 2: Estimate: 30 000 × 7.5 = 225 000

225 000 [A1]

Answer	

[2]

4. Work out 7^2 (40 ÷ 4)

Step 1: BIDMAS - calculate index first: $7^2 = 7 \times 7 = 49$ [M1]

Step 2: Multiply by 10: 49 × 10 = 490

490 [A1]

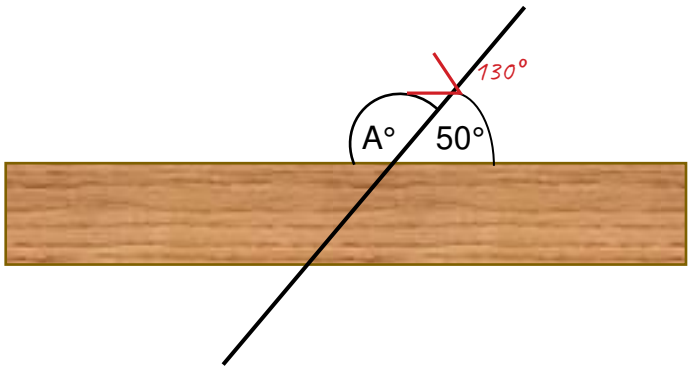

Answer	

[2]

Past paper

© Training Qualifications UK 2023 All Rights Reserved

5. Ashley needs to cut a piece of wood as shown:

Not drawn to scale

Ashley thinks angle A will be 140°

Is Ashley correct?

Show how you decide.

Step 1: Angles on a straight line add to 180°: Angle A = 180° - 50° = 130° [M1]

130° ≠ 140°, so Ashley's claim is incorrect.

No (angle is 130° ≠ 140°) ✓ [A1]

Answer	

[2]

Past paper

Questions continue on the following page

6. There are 300 sweets in a box.

There are:

- 52 chocolate sweets
- 150 strawberry sweets
- 98 lemon sweets.

One sweet is chosen at random.

What is the probability that the sweet chosen is a chocolate sweet?

Give your answer as a fraction in its simplest form.

Step 1: Total sweets = 300; Chocolate sweets = 52; P = 52 / 300 [M1]

Step 2: Simplify dividing by 4: 52÷4 / 300÷4 = 13 / 75

13 / 75 ✓ [A1]

Answer

[2]

7. A steel block has:

- mass = 7850 grams (g)
- volume = 1000 cm^3

Work out the density of the concrete block.

Step 1: Density formula: Density = Mass ÷ Volume

Density = 7850 g ÷ 1000 cm^3 = 7.85 g/cm^3 [M1]

7.85 ✓ [A1]

Answer

[2]

Past paper

8. Enkai needs 2.5 litres (l) of water.

The jug Enkai uses measures in pints (pt).

Enkai measures out 4.5 pints of water.

Does Enkai have enough water?

Show how you decide.

Use 1 litre = 1.759 pints

Step 1: Convert litres to pints (1 litre = 1.759 pints):

2.5 litres × 1.759 = 4.3975 pints ≈ 4.40 pints [M1]

Step 2: Compare with measured: 4.5 pints > 4.40 pints needed. Yes.

Yes (4.5 pt > 4.40 pt) [A1]

Answer	

[3]

End of Section A.

Past paper

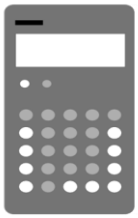

© Training Qualifications UK 2023 All Rights Reserved

Section B begins on Page 7.

Past paper

© Training Qualifications UK 2023 All Rights Reserved

Section B: Calculator

There are **45 marks** available in this section.
You **can** use a basic calculator in this section.
You will have **90 minutes** to complete this section.

1. Write down the mode of these numbers:

8.375 8.400 8.000 8.750 8.500 8.375 8.725

Step 1: Count frequency of each number:

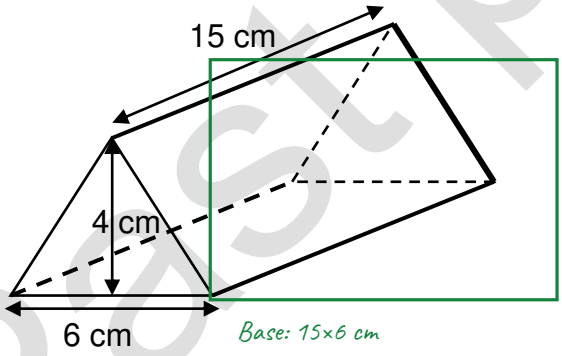

8.375 appears twice; all other numbers appear once.

Mode = 8.375

Answer 8.375 ✓ *[1 mark]*

[1]

2. The diagram shows a triangular prism:

Not drawn to scale

Base: 15×6 cm

Work out the area of the base of the prism.

Step 1: The base of the prism is a rectangle: Area = length × width

Base Area = 15 cm × 6 cm = 90 cm²

Answer 90 ✓ *[1 mark]* **cm²**

[1]

3. Nilam wants to buy a new laptop.

Nilam finds these offers for the same laptop on different websites:

Website A	**Website B**
$\frac{3}{8}$ off	34% off

Which website gives the bigger discount?

Show how you decide.

Step 1: Convert Website A fraction to percentage: 3/8 = 0.375 = 37.5% [M1]

Step 2: Compare discounts: 37.5% > 34%, so Website A gives the bigger discount.

Answer	Website A (37.5% > 34%) ✓ [A1]

[2]

Past paper

4. Use this formula to convert 15 degrees Celsius (°C) into degrees Fahrenheit (°F):

$$F = \frac{9C}{5} + 32$$

Step 1: Substitute C = 15 into formula: F = (9 × 15)/5 + 32 [M1]

Step 2: F = (135 ÷ 5) + 32 = 27 + 32 = 59 °F

Answer 59 ✓ [A1]	°F

[2]

5. Charu normally sells cakes for £4.00 each.

Charu raises the selling price of each cake to £12.00

Calculate the percentage change.

Step 1: Calculate price increase: £12.00 - £4.00 = £8.00

Step 2: Percentage change = (8 ÷ 4) × 100 = 200% [M1]

Answer 200 ✓ [A1]	%

[2]

Questions continue on the following page

Past paper

7. Frankie needs to order 400 cupcakes for a party.

Frankie needs to order lemon, strawberry and chocolate cupcakes in the ratio:

9 : 4 : 3

Frankie thinks there will be 100 more lemon cupcakes than strawberry cupcakes.

Is Frankie correct?

Show how you decide.

Step 1: Total parts = 9 + 4 + 3 = 16 parts

1 part = 400 ÷ 16 = 25 cupcakes per part [M1]

Step 2: Lemon = 9 × 25 = 225 | Strawberry = 4 × 25 = 100 [M1]

Step 3: Difference = 225 - 100 = 125 (not 100). Frankie is incorrect.

Answer	No (125 more lemon cupca[illegible] [A1]

[3]

8. Drew is a manager of a company and needs to set the budget for next year.

This year there was a budget of £980 000

Drew increases this budget by 4%.

Drew thinks the new budget will be less than £1 020 000

Is Drew correct?

Show how you decide.

Step 1: Calculate 4% increase: £980 000 × 0.04 = £39 200 [M1]

Step 2: New budget = £980 000 + £39 200 = £1 019 200 [M1]

Step 3: Compare with £1 020 000: £1 019 200 < £1 020 000. Yes.

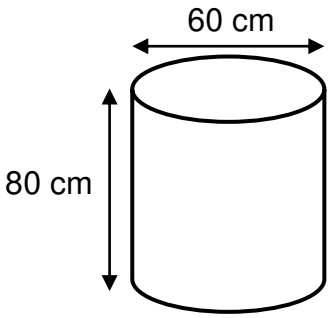

Answer	Yes (£1 019 200 < £1 020 000) [A1]

[3]

Past paper

9. Dayo needs to paint the outside of this cylinder, including the top and the bottom:

Not drawn to scale

Dayo thinks the total area to be painted is less than 20 000 cm^2

Is Dayo correct?

Show how you decide.

Use $\pi = 3.14$

Step 1: Two circular ends = $2 \times pi \times r^2 = 2 \times 3.14 \times 30^2 = 5652\ cm^2$ [M1]

Step 2: Curved surface area = $2 \times pi \times r \times h = 2 \times 3.14 \times 30 \times 80 = 15\,072\ cm^2$ [M1]

Step 3: Total area = 5652 + 15 072 = 20 724 cm^2

Compare: 20 724 cm^2 > 20 000 cm^2, so Dayo is incorrect.

Answer No (20 724 cm^2 > 20 000 ✓ [A1]

[3]

10. On Monday, Arya got a new TV package.

On Tuesday, Kai got the same TV package but got a 28% discount.

Kai pays £21.60 per month after receiving the discount.

How much more does Arya pay for the package?

Step 1: Kai pays 100% - 28% = 72% of original price:

Original price (Arya pays) = £21.60 ÷ 0.72 = £30.00 [M1]

Step 2: Difference = £30.00 - £21.60 = £8.40 per month [M1]

Answer 8.40 [A1]

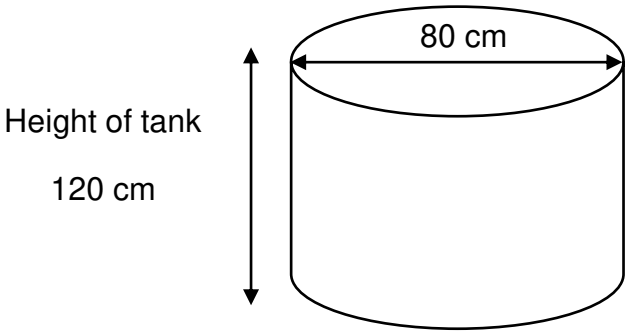

[3]

Past paper

 © Training Qualifications UK 2023 All Rights Reserved

11. Cam is setting up a new fish tank.

The fish tank is in the shape of a cylinder:

Not drawn to scale

Cam uses this formula to work out how many pounds (lbs) of gravel to add to the tank:

Amount of gravel in pounds (lbs) = volume of tank divided by 4546

How much gravel does Cam need to add to the tank?

Use $\pi = 3.14$

Step 1: Cylinder volume = pi × r^2 × h (r = 80 ÷ 2 = 40 cm, h = 120 cm):

Volume = 3.14 × 40^2 × 120 = 3.14 × 1600 × 120 = 602 880 cm³ [M1]

Step 2: Gravel amount = Volume ÷ 4546 = 602 880 ÷ 4546 = 132.617... lbs [M1]

Answer	132.6 ✓ [A1]	lbs

[4]

Questions continue on the following page

Past paper

12. Quinn wants to buy a new computer for £3000

Quinn paid £1500 into a new savings account two years ago.

The savings account paid 2% compound interest per year.

Quinn uses all of the money that is now in the savings account as a deposit towards the computer.

The balance will be paid in equal monthly instalments of £119.95

How long will it take Quinn to pay for the computer?

Show your working.

Step 1: 2% compound interest on £1500 for 2 years:

Year 1: £1500 × 1.02 = £1530 | Year 2: £1530 × 1.02 = £1560.60 [M1]

Step 2: Remaining balance = £3000 − £1560.60 = £1439.40 [M1]

Step 3: Months required = £1439.40 ÷ £119.95 = 12 months

Answer 12 months (1 year) [A1]

[4]

Past paper

© Training Qualifications UK 2023 All Rights Reserved

13. Jude grows sunflowers in two different fields.

These are the heights of each flower in Field A:

Field A					
134 cm	186 cm	120 cm	200 cm	118 cm	166 cm

This is a summary of the heights of each flower in Field B:

Field B	
Mean height	162 cm
Range	70 cm

Jude claims:

a) 'on average, sunflowers grew taller in Field A.'
b) 'the heights are more consistent in Field A.'

Are both of Jude's claims correct?

Give reasons for your answers.

Show your working.

- Field A mean = (134+186+120+200+118+166) ÷ 6 = 924 ÷ 6 = 154 cm [B1]
- Field A range = 200 – 118 = 82 cm [B1]

Reason - claim a)

No, claim a) is incorrect. [A1]

Field A mean (154 cm) is shorter than Field B (162 cm).

Reason - claim b)

No, claim b) is incorrect. [A1]

Field A range (82 cm) is greater than Field B (70 cm), showing less consistency.

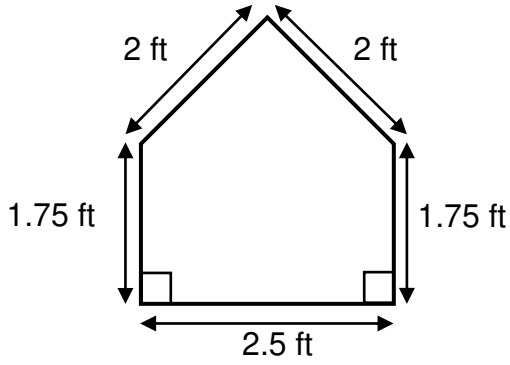

[4]

Past paper

 © Training Qualifications UK 2023 All Rights Reserved

14. Zuri wants to put a wooden border around the flower bed shown:

Not drawn to scale

Zuri measured the dimensions of the garden in feet (ft).

The shop sells wood in metres (m).

Zuri will buy 12% more wood than needed to allow for mistakes.

How many metres of wood does Zuri need to buy in total?

Use 1 foot = 0.305 metres

Step 1: Perimeter in feet = 2 + 2 + 1.75 + 1.75 + 2.5 = 10 ft [M1]

Step 2: Convert to metres: 10 ft × 0.305 = 3.05 m [M1]

Step 3: Add 12% extra: 3.05 m × 1.12 = 3.416 m [M1]

Step 4: Must buy in whole metres: round up to 4 whole metres

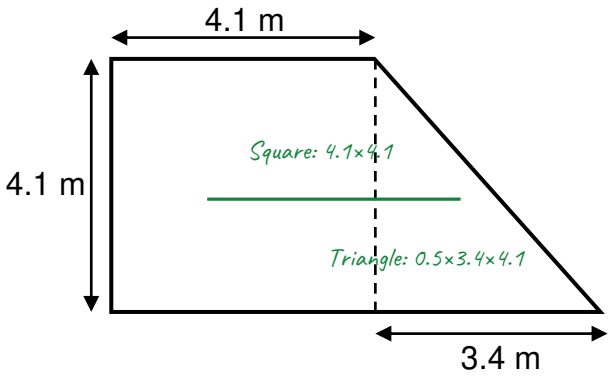

Answer	4 ✓ [A1]	**m**

[5]

Past paper

15. Jordan wants to tile this floor:

Not drawn to scale

Jordan finds these prices:

Price per square metre (m^2)						
£80.50	£75.99	£50.99	£60.50	£100.00	£45.75	£100.00

Jordan buys the tiles with the median price.

How much will Jordan pay in total?

Give your answer to the nearest pound (£).

Show your working.

Answer box is on the following page

Step 1: Triangle area = 0.5 × 3.4 m × 4.1 m = 6.97 m^2 [M1]

Step 2: Square area = 4.1 m × 4.1 m = 16.81 m^2

Total area = 6.97 + 16.81 = 23.78 m^2 [M1]

Step 3: Median tile price: £45.75, £50.99, £60.50, [£75.99], £80.50, £100, £100 so Median = £75.99 [B1]

Step 4: Total cost = 23.78 m^2 × £75.99 = £1807.04 [M1]

Past paper

Master Functional Skills pack - TQUK Mathematics Level 2 Past Paper 6 Solutions © Training Qualifications UK 2023 All Rights Reserved

Step 5: Round to nearest whole pound (£): £1807.04 --> £1807

Answer	1807 **£** [A1]
