MASTER FUNCTIONAL SKILLS • REGULATORY GOVERNANCE (MFS-GOV-04)

Candidate Identity Verification & Remote Invigilation Protocol

End-to-end operational standard for candidate ID checks, 360-degree room security sweeps, and Open Awards XAMS remote-invigilated sittings.

Document Reference	MFS-GOV-04	**Effective Date**	11 November 2026
Quality & Centre Lead	Abdul (Head of Centre)	**Regulatory Alignment**	Ofqual Condition G4 & Open Awards XAMS Remote Invigilation Guidance

1. Mandatory Government Photographic Identification

No candidate is admitted to a live Functional Skills onscreen examination or controlled English SLC assessment without real-time visual verification of valid, unexpired photographic identification matching their Awarding Organisation registration name and date of birth:

- **Accepted Primary Photo ID:** Valid UK or International Passport, UK Photocard Driving Licence (Full or Provisional), UK Biometric Residence Permit (BRP) / eVisa share-code verification, UK Armed Forces Identity Card, or PASS-hologram CitizenCard.
- **Pre-Exam Registration Check:** ID details are cross-checked at least 5 working days before exam day to eliminate spelling mismatches on official certificates, and re-verified live on camera immediately before launching the exam.
- **Privacy & Religious Headwear Respect:** Where a candidate wears a religious face covering, live visual ID verification is conducted respectfully in a private 1-to-1 breakout room by a female invigilator prior to recording.

2. Remote Invigilation Technical & Room Environment Specification

Candidates sitting remote-invigilated assessments from home or workplace offices must satisfy all technical and environmental checks during pre-exam onboarding:

Check Stage	Operational Requirement	Pass / Fail Gate
1. Device & Network Check (T-48h)	Windows 10/11 or macOS laptop/desktop (no tablets/Chromebooks unless XAMS-certified); >= 5 Mbps upload/download; working webcam & mic	Mandatory System Compatibility Pass prior to PIN release
2. Live Photo ID Match (T-15m)	Candidate holds original photo ID next to face on HD webcam;	No valid ID = Exam does not launch (strictly enforced)

	invigilator verifies likeness, full legal name, and expiry date	
3. 360° Room & Desk Sweep (T-10m)	Slow 360° pan of walls, closed door, floor, under desk, wrists (no smartwatches), ears (no earbuds), and single unplugged monitor check	All unauthorised items placed visibly out of reach / outside room
4. Task Manager & Screen Share (T-5m)	Full-screen desktop share enabled; Task Manager / Activity Monitor inspected confirming zero messaging, screen-capture, or AI apps	Exam PIN issued only after clean environment sign-off

3. Live Exam Incident, Disconnection & Emergency Protocol

Clear operational rules protect exam security if technical glitches occur:

- **Brief Broadband Drop (< 3 Minutes):** Candidate remains seated at desk; upon reconnection, the invigilator repeats a full 360-degree room and desk sweep before resuming.
- Extended Outage (> 3 Minutes) or Unsupervised Room Exit: The sitting is paused/terminated, logged in the Invigilation Incident Log, and escalated to the Awarding Organisation for rescheduling or Special Consideration review.
- **Scratch Paper Destruction:** At the conclusion of Maths exams, candidates hold all rough working sheets up to the webcam (front and back) and tear them into quarters on camera before disconnecting.
