MASTER FUNCTIONAL SKILLS • REGULATORY GOVERNANCE (MFS-GOV-10)

Internal Quality Assurance (IQA) & Standardisation Strategy

CAMERA risk-based sampling, assessor standardisation, and External Quality Assurance (EQA) readiness for English SLC and Entry Level Functional Skills.

Document Reference	MFS-GOV-10	**Effective Date**	11 November 2026
Quality & Centre Lead	Abdul (Head of Centre)	**Regulatory Alignment**	Ofqual Condition H1/H2 & Open Awards IQA / EQA Framework

1. Scope & Role of Internal Quality Assurance

While Level 1 and Level 2 Functional Skills Maths, English Reading, English Writing, and Digital Functional Skills examinations are externally set and marked by the Awarding Organisation, Master Functional Skills maintains a rigorous Internal Quality Assurance (IQA) system governing all centre-assessed components — specifically Functional Skills English Speaking, Listening and Communicating (SLC at Entry 1–3, Level 1, and Level 2) and Entry Level Mathematics/English controlled assessments.

- **Strict Separation of Assessor and IQA:** No assessor may ever internally quality-assure their own assessment decisions.
- **End-to-End Quality Cycle:** IQA spans pre-delivery task verification, live observation of assessors, risk-based sampling of recorded candidate evidence, standardisation workshops, and EQA liaison.

2. Risk-Based Sampling Plan (CAMERA Methodology)

The Lead IQA constructs an annual and cohort-by-cohort sampling plan taking full account of Candidates, Assessors, Methods of assessment, Evidence types, Records, and Assessment locations (CAMERA):

Assessor Risk Band	Definition	Minimum IQA Sampling Rate	Additional Controls
Red (New / Developing Assessor)	Newly appointed assessor, first 2 cohorts, or previous EQA/IQA action point	100% of candidates sampled prior to results claim	Live observation of at least 1 SLC session + counter-signature by Lead IQA
Amber (Established < 12 Months)	Qualified assessor with clean initial cohorts building cross-level track record	50% of candidates across every level (E3, L1, L2)	Sample includes borderline Pass/Fail and Reasonable Adjustment sittings

Green (Experienced & Standardized)	>= 12 months clean EQA sign-off and 100% attendance at standardisation	Minimum 25% (or min. 3 candidates per cohort, whichever is higher)	Annual live observation + full participation in bi-annual standardisation

3. Bi-Annual Standardisation & EQA Readiness

Consistent national interpretation of DfE Pass criteria is maintained through structured standardisation:

- Mandatory Standardisation Meetings (Minimum Twice Yearly): Assessors and IQAs benchmark anonymised Open Awards / Ofqual exemplar SLC videos and Entry Level scripts, reconciling every criterion judgement before live cohort sign-off.
- **Complete EQA Audit Pack:** Ahead of every Open Awards External Quality Assurance (EQA) remote or centre visit, MFS maintains an instant-access digital portfolio containing candidate registrations, signed Assessor Observation Records, unedited HD video recordings (framing both presenter and group participants clearly), IQA Sampling Feedback Reports, and Standardisation Minutes.

Document Control & Annual Governance Sign-Off
