Pearson Edexcel Functional Skills

Centre Number	Candidate Number
MFS-UK	PMAT1/N07

Set 7

Time: 25 minutes | Paper Reference **PMAT1/N07**

Mathematics

Level 1
Section A (Non-Calculator)

You must have:
Pen, HB pencil, eraser, ruler graduated in cm and mm, protractor, pair of compasses. Tracing paper may be used.

Total Marks
14 /14

My signature confirms that I will not discuss the content of the test with anyone.

Signature: Master Functional Skills (MFS)

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Sign the declaration.
- Answer **all** questions.
- Write your final answers in the boxes provided.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- You **must** show clearly how you get your answers in the spaces provided. Marks will be awarded for your working out.
- Check your working and answers at each stage.
- Diagrams are **not** accurately drawn, unless otherwise indicated.
- **Calculators may not be used.**
- Take the value of π to be 3.14

Information

- The total mark for this section is 14.
- The marks for **each** question are shown in brackets – *use this as a guide as to how much time to spend on each question.*
- This sign ☑ shows where marks will be awarded for showing your checks.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

START LEARNING TODAY AT

MasterFunctionalSkills.co.uk

SECTION A

Answer ALL questions. Write your answers in the spaces provided.

1 Chen is a weather presenter on TV.

The map shows the temperatures in five cities at noon on Monday.
The temperatures are all shown in degrees Celsius.

Chen says
"The range of these temperatures at noon on Monday is 8 degrees Celsius."

(a) Is Chen correct?
Show why you think this.

(2)

Step 1: Identify highest and lowest temperatures from the map:

- *Highest temperature = 4 °C (Plymouth)*
- *Lowest temperature = −3 °C (Aberdeen)*

Step 2: Calculate the range (Highest − Lowest):

- *Range = 4 − (−3) = 4 + 3 = 7 °C [M1]*

Conclusion: Chen says the range is 8 °C, but it is 7 °C.

No, Chen is not correct. [A1]

No [A1]

☑ (b) Use a reverse calculation to show a check for your answer.

(1)

Reverse calculation check of the range calculation:

- *Reverse subtraction by addition: 7 + (−3) = 7 − 3 = 4 °C [C1]*

  (Re-creates the highest temperature of 4 °C)

7 − 3 = 4 [C1]

(Total for Question 1 is 3 marks)

DO NOT WRITE IN THIS AREA

2 Paulo invests £2000 for 7 years.
His investment earns 5% simple interest per year.

Work out the total amount of interest the investment earns in the 7 years.

(3)

Step 1: Calculate 5% simple interest per year on £2000:

- *10% of £2000 = £2000 ÷ 10 = £200*
- ***5% of £2000 = £200 ÷ 2 = £100 per year [M1]***

  (Or: £2000 × 0.05 = £100 per year)

Step 2: Calculate total simple interest for 7 years:

- *Total interest = 7 years × £100 per year*
- ***Total interest = £700 [M1, A1]***

Verification Check:

- *5% × 7 years = 35% total interest*
- *0.35 × £2000 = £700 (confirms calculation)*

£ ***700*** *[A1]*

(Total for Question 2 is 3 marks)

3 The probability of an event happening is $\frac{7}{10}$

(a) Which of these words best describes the likelihood of this event happening?

(1)

Tick (✔) a box to show your answer.

impossible	unlikely	evens	likely	certain
[ ]	[ ]	[ ]	✓	[ ]

[A1]

7/10 = 0.7 = 70% (greater than 50% / evens, so it is likely) [A1]

Here are 4 numbers.

714	720	726	724

(b) Calculate the mean of the 4 numbers.

(3)

Step 1: Calculate the total sum of the 4 numbers:

- Sum = 714 + 720 + 726 + 724
- **Sum = 2884 [M1]**

Step 2: Divide sum by the count of numbers (4):

- Mean = 2884 ÷ 4
- **Mean = 721 [M1, A1]**

Alternative check method (differences from baseline 720):

- Differences: −6 + 0 + 6 + 4 = +4
- Mean difference: +4 ÷ 4 = +1 --> Mean = 720 + 1 = 721

721 [A1]

(Total for Question 3 is 4 marks)

4 Harry sells bags of pasta.
A bag holds 3 kilograms of pasta.

Harry decides to sell pasta in boxes.
A box holds 20% more pasta than a bag.

A customer buys 10 boxes of pasta.

How many kilograms of pasta does the customer buy?
You **must** show your working.

(4)

Step 1: Calculate how much pasta one box holds (20% more than a 3 kg bag):

- *10% of 3 kg = 0.3 kg*
- **20% of 3 kg = 0.3 × 2 = 0.6 kg extra [M1]**
- **1 box holds = 3 + 0.6 = 3.6 kg of pasta [M1]**

(Or using multiplier: 3 × 1.20 = 3.6 kg)

Step 2: Calculate total pasta for 10 boxes:

- *Total pasta = 10 boxes × 3.6 kg per box*
- **Total pasta = 36 kg [M1, A1]**

Alternative Method Check:

- *10 bags of pasta = 10 × 3 kg = 30 kg*
- *20% extra on 30 kg = 0.20 × 30 kg = 6 kg*
- *Total = 30 kg + 6 kg = 36 kg (Confirmed)*

36 kg *[A1]*

(Total for Question 4 is 4 marks)

SECTION B

Answer ALL questions. Write your answers in the spaces provided.

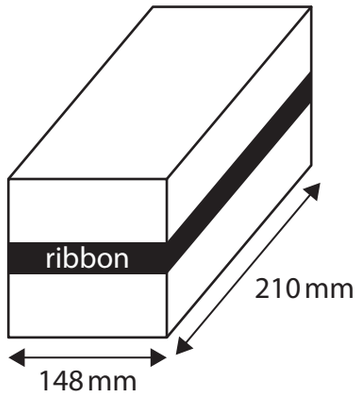

1 Jenni has a decorative box business.

She has a box in the shape of a cuboid 210 mm long and 148 mm wide.

Jenni is going to glue one piece of ribbon around all four side faces of the box.

The ribbon will not overlap.

Jenni thinks a 72 cm piece of ribbon will be long enough.

Is Jenni correct?
Show why you think this.

(3)

Step 1: Convert units to be consistent (cm <--> mm):

- *72 cm piece of ribbon = 72 × 10 = 720 mm [M1]*

  (Or: 210 mm = 21 cm, 148 mm = 14.8 cm)

Step 2: Calculate perimeter around all four side faces of the box:

- *Perimeter = 2 × (Length + Width)*
- *Perimeter = 210 + 210 + 148 + 148 = 716 mm [M1]*

  (In cm: 21 + 21 + 14.8 + 14.8 = 71.6 cm)

Step 3: Compare ribbon length with perimeter:

- *716 mm < 720 mm (or 71.6 cm < 72 cm)*
- *Jenni has 720 − 716 = 4 mm extra ribbon left over.*

Conclusion:

Yes, Jenni is correct. The ribbon is long enough. [A1]

Yes *[A1]*

2 A bag contains 26 counters.

5 of the counters are green.
The remainder of the counters are orange.

One counter is chosen at random.

(a) Work out the probability the counter is orange.

(2)

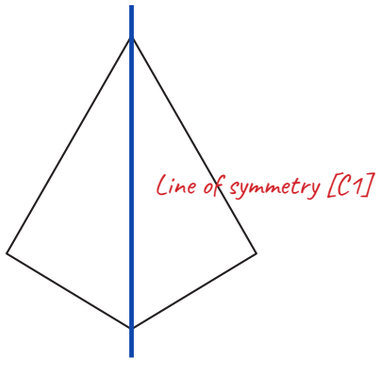

• Total counters = 26; Green counters = 5

• **Orange counters = 26 – 5 = 21 [M1]**

• **Probability (orange) = 21/26 [A1]**

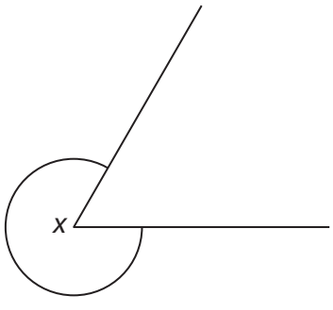

[A1] **21/26**

Here is a drawing of a kite.

(b) Draw the line of symmetry on the kite.

(1)

(c) Measure and write down the size of the reflex angle *x*.

(1)

Internal angle = 60° --> Reflex angle x = 360° – 60° = 300° [D1]

300 [D1] °

(Total for Question 2 is 4 marks)

3

(a) Write three thousand two hundred and fifty seven in figures.

(1)

Three thousand = 3000, two hundred = 200, fifty seven = 57

3257 *[A1]*

(b) Write the number 1024 in words.

(1)

1 = Thousands, 0 = Hundreds, 2 = Tens, 4 = Ones

One thousand and twenty-four *[B1]*

Ella works in a post room.
She has these parcels to post.

Here are the exact weights of the parcels.

25 kg	13 kg	11 kg	11 kg	3000 g
12 kg	28 kg	2 kg	8 kg	1 kg
6000 g	22 kg	14 kg	25 kg	28 kg
10 kg	1 kg	16 kg	21 000 g	7 kg

Ella uses a frequency table to sort the parcels into 3 groups by weight to work out the cost of postage.

(c) Complete the frequency table for Ella.

(3)

weight (kg)	tally	frequency
0 to 2	III	3
3 to 20	𝍸 𝍸 I	11 [C1, D1, E1]
21 to 30	𝍸 I	6

Unit Conversions (1000 g = 1 kg):

- *3000 g = 3 kg; 6000 g = 6 kg; 21 000 g = 21 kg [C1]*
- *Total parcels check: 3 + 11 + 6 = 20 parcels. [D1, E1]*

5 A cube has side length 20 cm.

Calculate the volume of the cube.
State the units in your answer.

(3)

Step 1: Formula for volume of a cube (length × width × height):

- *Volume = side³ = 20 × 20 × 20 [M1]*

Step 2: Carry out multiplication:

- *20 × 20 = 400*
- *400 × 20 = 8000 [A1]*

Step 3: State the correct units for volume:

- *Side length in cm --> Volume in cubic cm (cm³) [C1]*

Final Answer:

Volume = 8000 cm³ [A1, C1]

8000 cm³ *[A1, C1]*

6 Grace looks at her electricity bill for November.

Electricity bill	
meter reading last time	20312 (kWh)
meter reading this time	22198 (kWh)
unit cost	5.4 pence per kWh used
standing charge	30 days at 16.74 pence per day
total bill for November	£105.84

Grace knows the meter readings are correct.

Is the total amount on the bill for November correct?
You **must** show your working.

(6)

Step 1: Calculate number of units (kWh) of electricity used:

- *Units used = Present reading − Previous reading*
- **Units used = 22 198 − 20 312 = 1886 kWh [A1]**

Step 2: Calculate cost of electricity units used (5.4p per kWh):

- **Cost of units = 1886 × 5.4 pence = 10 184.4 pence [B1]**
- *In pounds: 10 184.4 ÷ 100 = £101.844*

Step 3: Calculate standing charge for 30 days (16.74p per day):

- **Standing charge = 30 × 16.74 pence = 502.2 pence [C1]**
- *In pounds: 502.2 ÷ 100 = £5.022*

(Continued on next page for total bill calculation and decision -->)

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

Step 4: Calculate total bill for November:

- Total pence = Units cost + Standing charge
- **Total pence = 10 184.4 + 502.2 = 10 686.6 pence [D1]**

Step 5: Convert total bill into pounds:

- **10 686.6 pence ÷ 100 = £106.866 = £106.87 [E1]**

Step 6: Compare calculated total with bill total (£105.84):

- Actual bill should be £106.87 (or £106.866)
- £106.87 ≠ £105.84 (The printed bill is £1.03 too low).

Conclusion:

No, the total amount on the bill is not correct. [F1]

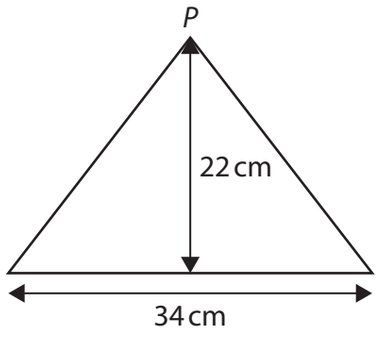

No [F1]

(Total for Question 6 is 6 marks)

8 Three groups of students are going on a school trip together on a coach.

Group A has 13 students.
Group B has 17 students.
Group C has 20 students.

There should be 1 adult for every 16 students on the coach.

Work out the least number of adults that are needed on the coach for this school trip.

(3)

Step 1: Calculate total number of students on the coach:

- *Total students = 13 (Group A) + 17 (Group B) + 20 (Group C)*
- **Total students = 50 students [M1]**

Step 2: Calculate number of adults needed (1 adult for every 16 students):

- **Ratio calculation = 50 ÷ 16 = 3.125 adults [M1]**

Step 3: Round up to the next whole number:

- *3 adults can supervise: 3 × 16 = 48 students (not enough for 50).*
- *Therefore, 4 adults are required to supervise all 50 students.*

Final Answer:

Least number of adults needed = 4 [A1]

4 [A1]

(Total for Question 8 is 3 marks)

9 Yolanda buys a coat online.
The normal price of the coat is £205

Yolanda uses a 15% discount code.

(a) Work out the price of the coat after the discount.

(3)

Step 1: Calculate the 15% discount on £205:

- 10% of £205 = £20.50
- 5% of £205 = £20.50 ÷ 2 = £10.25
- **15% discount = £20.50 + £10.25 = £30.75 [M1]**

  (Or: £205 × 0.15 = £30.75)

Step 2: Subtract discount from normal price:

- Price after discount = £205 − £30.75
- **Price after discount = £174.25 [M1, A1]**

£ **174.25** [A1]

☑ (b) Show a check of your answer.

(1)

Reverse addition calculation check:

- **Check with addition: £174.25 + £30.75 = £205.00 [B1]**

  (Re-creates original normal price of £205).

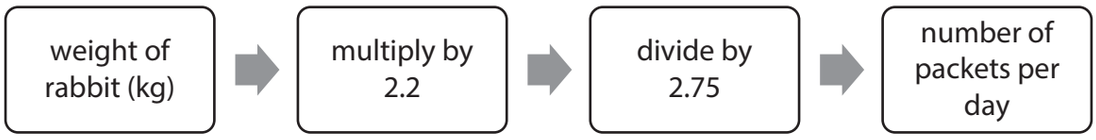

174.25 + 30.75 = 205 [B1]

(Total for Question 9 is 4 marks)

10 Abi has a pet rabbit that weighs 5 kg.
She buys packets of food for her rabbit.

Abi has this information about the number of packets of food rabbits need each day.

How many packets of food does her rabbit need each day?

(3)

Step 1: Follow rule Step 1 (multiply weight in kg by 2.2):

- Rabbit weight = 5 kg
- 5 × 2.2 = 11 [M1]

Step 2: Follow rule Step 2 (divide result by 2.75):

- 11 ÷ 2.75 = 4 packets per day [M1, A1]

(Calculation check: 4 × 2.75 = 11; 11 ÷ 2.2 = 5 kg)

Final Answer:

Her rabbit needs 4 packets of food each day. [A1]

4 [A1]

11 Edward is writing an article about a sponsored race for charity.

Edward knows

180 people are running in the race

$\frac{1}{4}$ of the people are running for pet charities

$\frac{2}{9}$ of the people are running for health charities.

The rest of the people are running for youth charities.
Edward wants to know the number of people running for youth charities.

Work out the number of people running for youth charities.

(5)

Step 1: Calculate number of runners for pet charities (1/4 of 180):

- *1/4 of 180 = 180 ÷ 4 = 45 runners [A1]*

Step 2: Calculate number of runners for health charities (2/9 of 180):

- *1/9 of 180 = 180 ÷ 9 = 20 runners [B1]*
- *2/9 of 180 = 20 × 2 = 40 runners [C1]*

Step 3: Calculate runners for pet and health charities combined:

- *Combined runners = 45 + 40 = 85 runners [D1]*

Step 4: Calculate remainder running for youth charities:

- *Youth charities = 180 − 85 = 95 runners [D1, E1]*

(Continued on next page for answer and fraction check -->)

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
