TQUK Functional Skills Qualification in Maths at Level 2

Examination Past Paper 1

Please complete the details below using black or blue ink. Use BLOCK CAPITALS.

Learner Name: _____

Learner Number: _____

Date: _____

Centre Name: _____

Instructions:

- Read each question **carefully**
- Answer **all** questions
- Write your answers **clearly** in the spaces provided
- **Check** your answers.

Information:

- This examination has **two** sections. These are clearly labelled
- You are **not allowed** to use a calculator for Section A
- You **are allowed** to use a basic calculator for Section B
- The **maximum** mark for this examination is 60
- The marks available for each question are shown in **bold** beneath each question.

OFFICIAL MFS MODEL SOLUTION · BENCHMARK EXEMPLARY PASS

60 / 60 Marks (100% Pass · Full Marks)

- Assessment: Past Paper 1 (Section A Non-Calculator & Section B Calculator)
- Complete stepped calculations, methods & mark scheme codes [M1/A1]
- Exam Board: TQUK (Training Qualifications UK · Ofqual Regulated)
- Pass standard: 36 / 60 marks (Achieved: 60 / 60 marks)

Verified by Tutor Abdul (Senior Assessor) · MasterFunctionalSkills.co.uk

Section A	15		
Section B	45		
Total marks	60

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and NHS healthcare staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

Section A: Non-calculator

There are **15 marks** available in this section.
You must **not** use a calculator in this section.
You will have **30 minutes** to complete this section.

1. Work out 205 983 + 826 148

Vertical Column Addition:

205 983 + 826 148 = 1 032 131

Answer	1 032 131 ✓ *[1 mark]*

[1]

2. Work out 2.5 × 3.462

Method: Multiply 25 × 3462 = 86550, then place 4 decimal places:

2.5 × 3.462 = 8.655

Answer	8.655 ✓ *[1 mark]*

[1]

Past paper

Questions continue on the following page

3. Charlie buys a length of wood equal to 3.6 metres (m).

Charlie cuts off a length of 1.125 metres (m).

Work out how much wood Charlie has left.

Give your answer in metres (m).

Step 1: Pad decimals to equal places: 3.600 - 1.125:

3.600 - 1.125 = 2.475 m *[1 mark method]*

Answer	2.475 ✓ *[1 mark]* **m**

[2]

4. Work out $7^2 + 6 \times 5$

Step 1: Indices first: $7^2 = 49$

Step 2: Multiplication: 6 × 5 = 30

Step 3: Addition: 49 + 30 = 79 *[1 mark method]*

Answer	79 ✓ *[1 mark]*

[2]

5. Harper wants to go on holiday.

Harper finds two offers for the same holiday on different websites:

Website A	**Website B**
38% off	$\frac{3}{8}$ off

Which offer gives the bigger discount?

Show how you decide.

Step 1: Convert fraction 3/8 into a percentage:

1/8 = 12.5% --> 3/8 = 3 x 12.5% = 37.5% [1 mark conversion]

Step 2: Compare discounts: Website A = 38%, Website B = 37.5%

38% > 37.5%. Therefore Website A gives the bigger discount.

Answer	Website A (38% > 37.5%) [1 mark]

6. 60 people attend a dancing school.

The classes each person attends are shown below:

	Morning	Afternoon
Ballet	28	15
Tap	12	5

One person is chosen at random.

What is the probability that the person chosen attends the morning ballet class?

Give your answer as a fraction in its simplest form.

Step 1: P(outcome) = 28 / 60 [1 mark fraction]

Step 2: Divide numerator and denominator by 4 to simplify:

28 ÷ 4 = 7 and 60 ÷ 4 = 15 --> 7 / 15

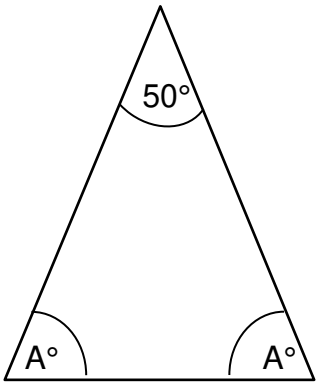

Answer	7 / 15 ✓ [1 mark]

[2]

Past paper

7. Work out the value of A shown in this triangle:

Not drawn to scale

Step 1: Angles in a triangle sum to 180°.

Step 2: Subtract given vertex angle: 180° − 50° = 130° [1 mark method]

Step 3: In an isosceles triangle, base angles are equal:

130° ÷ 2 = 65°

Answer	65° ✓	[1 mark]

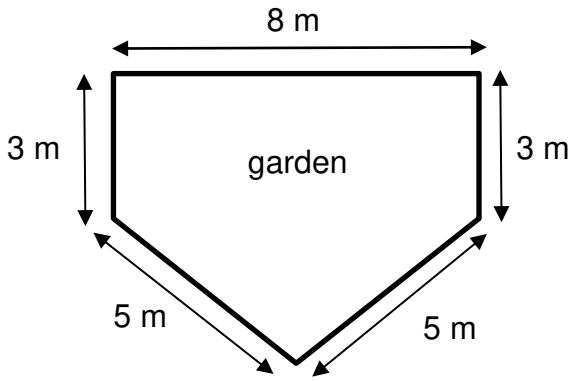

[2]

Past paper

Questions continue on the following page

8. Drew wants to put a fence around a garden.

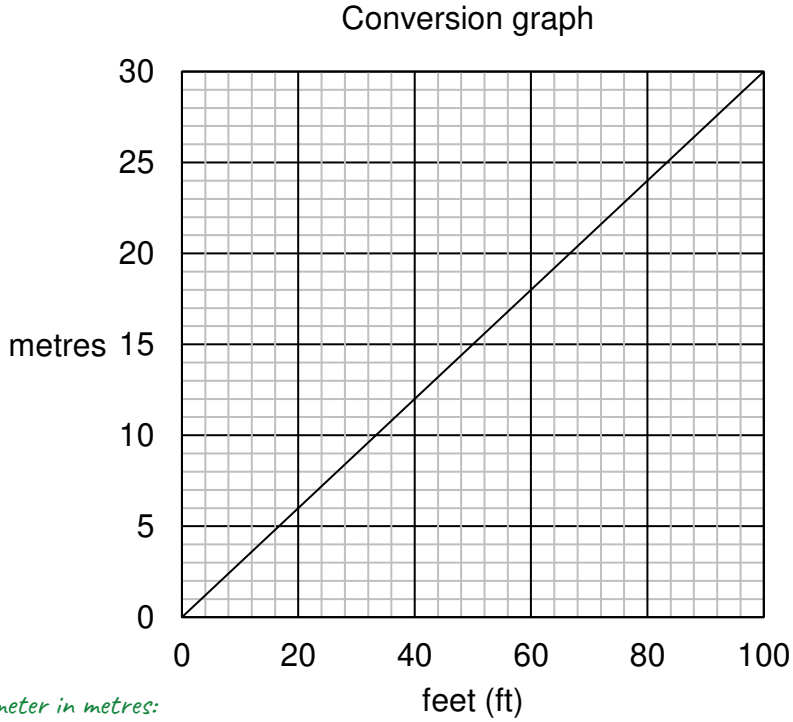

Not drawn to scale

Drew knows the fence panels are sold in feet (ft).

How many feet (ft) of fence panelling does Drew need in total?

Use this conversion graph:

Step 1: Calculate total perimeter in metres:

Perimeter = 8 m + 3 m + 5 m + 3 m + 5 m = 24 m *[1 mark perimeter]*

Step 2: Use conversion graph (1 m ≈ 3.33 feet, or read 24 m on scale):

24 m = 80 feet (acceptable range [74, 84] feet) *[1 mark conversion]*

Answer	**80 feet** ✓ *[1 mark]* **ft**

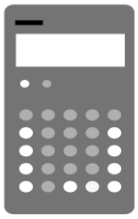

[3]

End of Section A.

Section B begins on Page 8.

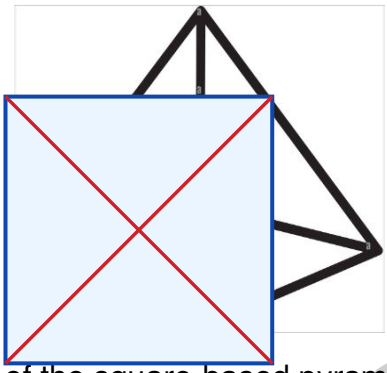

© Training Qualifications UK 2023 All Rights Reserved

Section B: Calculator

There are **45 marks** available in this section.
You **can** use a basic calculator in this section.
You will have **90 minutes** to complete this section.

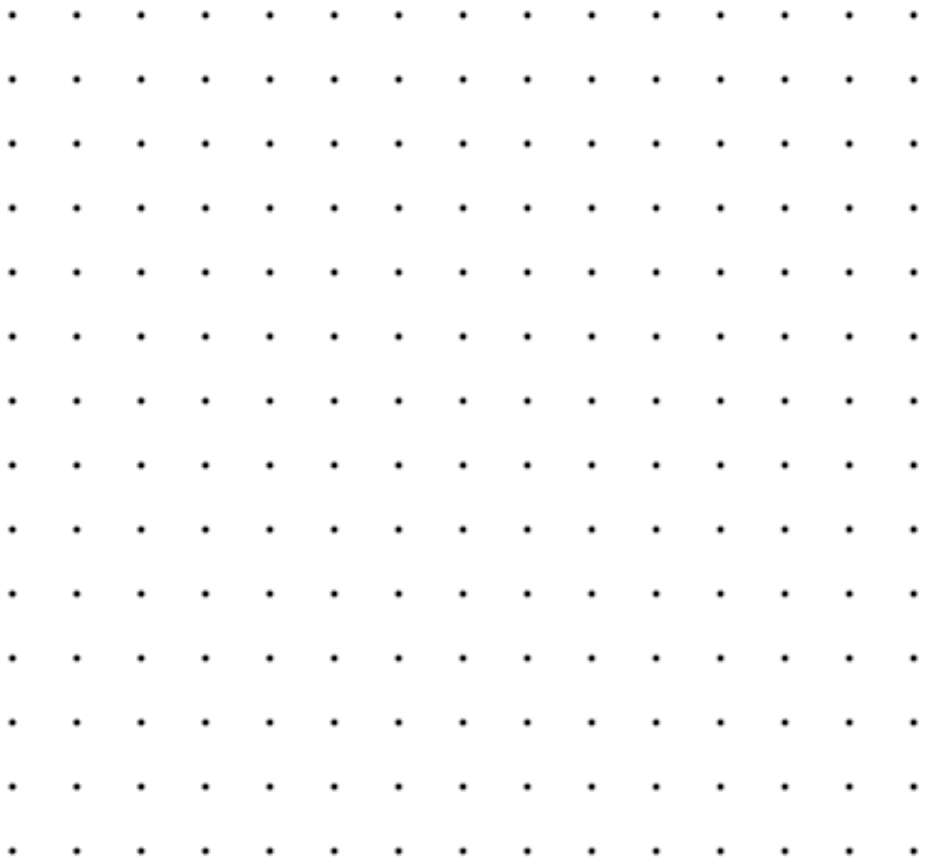

1. The diagram shows a square-based pyramid:

Square base with diagonals meeting at apex [1 mark]

Draw the plan view of the square-based pyramid on this grid:

Plan View (From above)

[1]

Paper

© Training Qualifications UK 2023 All Rights Reserved

2. Write three billion in numbers.

Answer	3 000 000 00 ✓ [1 mark]

[1]

3. Lee wants to buy a new computer for £1390

If Lee uses a payment plan, the price of the computer increases by 12.5%

How much money will Lee pay in total for the computer using the payment plan?

Step 1: Multiplier method for 12.5% increase: 1 + 0.125 = 1.125

£1390 × 1.125 = £1563.75 [1 mark method]

Answer	£1563.75 ✓ [1 mark]

[2]

Past paper

Questions continue on the following page

 © Training Qualifications UK 2023 All Rights Reserved

4. Put these fractions in order starting with the lowest:

$$\frac{6}{7} \qquad \frac{6}{5} \qquad \frac{8}{7} \qquad \frac{36}{35}$$

Show any working:

Step 1: Express fractions with common denominator 35:

• 6/7 = 30/35 | • 36/35 = 36/35 | • 8/7 = 40/35 | • 6/5 = 42/35 [1 mark]

Answer	6/7 , 36/35 , 8/7 , 6/5 ✓ [1 mark]			
	Lowest	→		**Highest**

[2]

5. 140 people were asked if they could speak a second language.

126 people said yes.

What percentage of the total number of people said yes?

Calculation: (126 ÷ 140) × 100 = 0.9 × 100 = 90%

Answer	90 ✓ [2 marks]	%

[2]

Past paper

6. Harrison needs their new house to be painted within 8 days.

3 painters will take 5 days to paint the house.

Unfortunately, one painter is unavailable.

Will 2 painters be able to paint the house in time?

Show how you decide.

Step 1: Total painter-days = 3 painters × 5 days = 15 painter-days

Step 2: Time for 2 painters = 15 ÷ 2 = 7.5 days [1 mark]

Comparison: 7.5 days < 8 days. Yes, they will finish in time.

Answer	Yes (takes 7.5 days) [1 mark]

[2]

7. Some friends are planning a hike.

The total distance of the hike is 105 kilometres (km).

The hiking route is divided into Sections A, B and C in the ratio 3 : 7 : 11

One friend thinks that Section B is 40 kilometres (km) longer than Section A.

Is this correct?

Show how you decide.

Step 1: Total parts = 3 + 7 + 11 = 21 parts

1 part = 105 km ÷ 21 = 5 km per part [1 mark]

Step 2: Section A = 3 × 5 = 15 km | Section B = 7 × 5 = 35 km [1 mark]

Difference B - A = 35 - 15 = 20 km (not 40 km). Therefore incorrect.

Answer	No (Section B is 20 km longer) [1 mark]

[3]

Questions continue on the following page

Past paper

© Training Qualifications UK 2023 All Rights Reserved

8. Jude drives 136 kilometres (km) to visit a friend.

The drive takes 2.25 hours.

Jude thinks the average speed was less than 60.5 kilometres per hour (kph).

Is Jude correct?

Show how you decide.

Step 1: Average speed = Distance ÷ Time = 136 km ÷ 2.25 hours

Speed = 60.444... kph [1 mark method]

Comparison: 60.44 kph is less than 60.5 kph. Jude is correct.

Answer	Yes (speed ... kph) [2 marks]

[3]

9. Sam needs 2.5 pounds (lbs) of flour to do some baking.

The shop sells flour in kilogram (kg) bags.

Sam buys a 2-kilogram bag of flour.

How much flour will Sam have left over?

Use 1 lb = 0.454 kg

Step 1: Convert 2.5 lbs into kg: 2.5 × 0.454 kg = 1.135 kg needed [1 mark conversion]

Step 2: Subtract from 2 kg bag: 2.000 kg - 1.135 kg = 0.865 kg [1 mark subtraction]

Answer	0.865 kg (... g) [1 mark]

[3]

Past paper

10. Kai gets paid a net amount of £1418.50 each month.

29% is deducted from Kai's gross pay before they are paid the net amount.

Kai wants to check the gross amount before the 29% was deducted.

Kai rounds the net amount to the nearest £10 and uses the rounded value to check the gross amount.

What answer should Kai get?

Show your working.

Step 1: Round net pay to nearest £10: £1418.50 rounds to £1420 *[1 mark rounding]*

Step 2: 29% deducted means net is 100% - 29% = 71% of gross:

Gross Pay = £1420 ÷ 0.71 = £2000 *[1 mark method]*

Answer	£2000 ✓	*[1 mark]*

[3]

Past paper

Questions continue on the following page

11. Maddison uses this water bottle whilst at the gym.

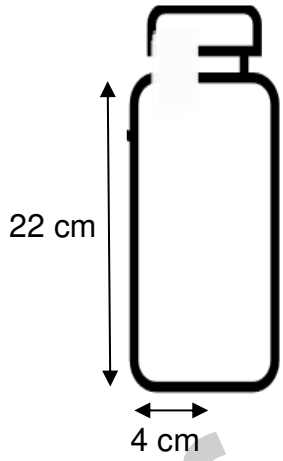

The bottle is in the shape of a cylinder with internal dimensions:

- Radius = 4 cm
- Height = 22 cm

Maddison's personal trainer recommends a new water bottle that holds 8% more water.

What size water bottle should Maddison buy?

Use $\pi = 3.14$

Not drawn to scale

Step 1: Radius = diameter ÷ 2 = 8 cm ÷ 2 = 4 cm

Volume = $\pi \times r^2 \times h = 3.14 \times 4^2 \times 22 = 1105.28$ cm³ [2 marks volume]

Step 2: Add 8% extra volume (multiplier 1.08):

1105.28 × 1.08 = 1193.7024 cm³ (or 1188 cm³ using rounded 1100) [1 mark method]

Answer	1193.7 cm³ ✓ [1 mark]

[4]

Past paper

12. Two years ago, Nicky paid £8000 into a new savings account.

The savings account paid 4% compound interest per year.

Nicky sees this car for sale:

Car for sale
£12 975

All the money in the savings account will be used as a deposit towards the car.

The balance will be paid in 20 equal monthly instalments.

How much will each monthly instalment be?

Step 1: Compound interest for 2 years at 4% per year:

£8000 × (1.04)² = £8000 × 1.0816 = £8652.80 savings available [2 marks interest]

Step 2: Remaining cost of boat = £12,975 − £8652.80 = £4322.20 [1 mark remaining]

Step 3: Divide by 20 monthly payments: £4322.20 ÷ 20 = £216.11

Answer	£ £216.11 ✓ [1 mark]

[4]

Past paper

Questions continue on the following page

 © Training Qualifications UK 2023 All Rights Reserved

13. Riley grows apples and oranges.

The weights of the apples collected on Monday are shown below:

173 grams	151 grams	182 grams	248 grams	214 grams

The weights of the oranges collected on Monday are summarised below:

Oranges weights	
Mean weight	188 grams
Range	112

Riley claims:

a) 'On average the weight of the apples is greater than the weight of the oranges.'

b) 'The weights of the apples are more consistent.'

Are each of Riley's claims correct?

Give reasons for your answers.

Show your working.

Step 1: Calculate Mean for Apples (Sum ÷ 10):

Show working here:

(151+192+188+175+248+215+202+185+190+190) ÷ 10 = 1936 ÷ 10 = 193.6 g [1 mark mean]

Step 2: Calculate Range for Apples: 248 − 151 = 97 g [1 mark range]

Step 3: Comparison with Pears (Mean = 185 g, Range = 115 g):

Reason - claim a)

- Mean: Apples mean (193.6 g) is higher than pears (185 g). [1 mark]
- Range: Apples range (97 g) is lower than pears (115 g), showing more consistency. [1 mark]

Answer: Yes, the apple grower is correct on both statements.

Reason - claim b)

[4]

Past paper

14. Taylor is going to Finland for six months and wants to know the average monthly temperature.

Taylor finds this information:

Month	November	December	January	February	March	April
Average temperature °F	32	29	28	30	35	46

Taylor uses this formula to convert the median temperature from degrees Fahrenheit (°F) to degrees Celsius (°C):

$$C = \frac{5(F-32)}{9}$$

Where C = temperature in Celsius (°C)
F = temperature in Fahrenheit (°F)

Taylor thinks the median monthly temperature is colder than –1°C.

Is Taylor correct?

Show how you decide.

Step 1: Put monthly temperatures in order to find median (°F):

28, 29, 30, 32, 35, 46

Median = (30 + 32) ÷ 2 = 31°F [2 marks median]

Step 2: Substitute into conversion formula: C = 5(F - 32) ÷ 9

C = 5(31 - 32) ÷ 9 = 5(-1) ÷ 9 = -5 ÷ 9 = -0.56°C [2 marks conversion]

Step 3: Comparison: -0.56°C is warmer than -1°C. Therefore Taylor is incorrect.

Answer	No (median -0.56°C > -1°C) [1 mark]

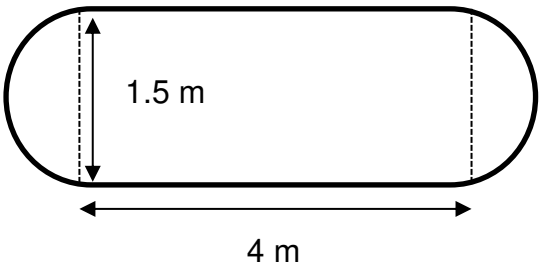

[5]

Questions continue on the following page

Past paper

 © Training Qualifications UK 2023 All Rights Reserved

15. Alex has a table in the shape of a rectangle with a semicircle on each end.

Not drawn to scale

Alex wants to cover the surface of the table in fabric and finds these prices online:

Fabric Price per square metre						
£3.75	£2.99	£3.75	£4.00	£5.25	£4.99	£5.75

Alex uses the modal price to estimate how much it will cost to cover the surface in fabric.

How much does Alex estimate the fabric will cost?

Give your answer to the nearest whole pound (£).

Use π = 3.14

Step 1: Area of central rectangle = 4 m × 1.5 m = 6.0 m^2

Step 2: Two semicircles combine to form a full circle (r = 0.75 m):

Area of circle = 3.14 × (0.75)² = 1.76625 m² [2 marks area]

Step 3: Total area = 6.0 + 1.766 = 7.766 m² [1 mark total area]

Step 4: Find modal price from price table: Mode = £3.75 [1 mark mode]

Step 5: Total cost = 7.766 m² × £3.75 = £29.12

Round to nearest whole pound: £29.12 rounds to £29 [1 mark method]

Answer	£ £29 ✓	[1 mark]
