MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Data Sheet for Minibus

Hiring a minibus

Some companies charge

a fixed amount per day
plus
an amount per mile.

Example

A company charges

£37 per day

plus

40p per mile.

Jack hires a minibus for 2 days and travels 358 miles.

2 × £37 = £74
358 × 40p = £143.20
Total charge = £74 + £143.20
= £217.20

Jack has to pay £217.20

Distance between places by road

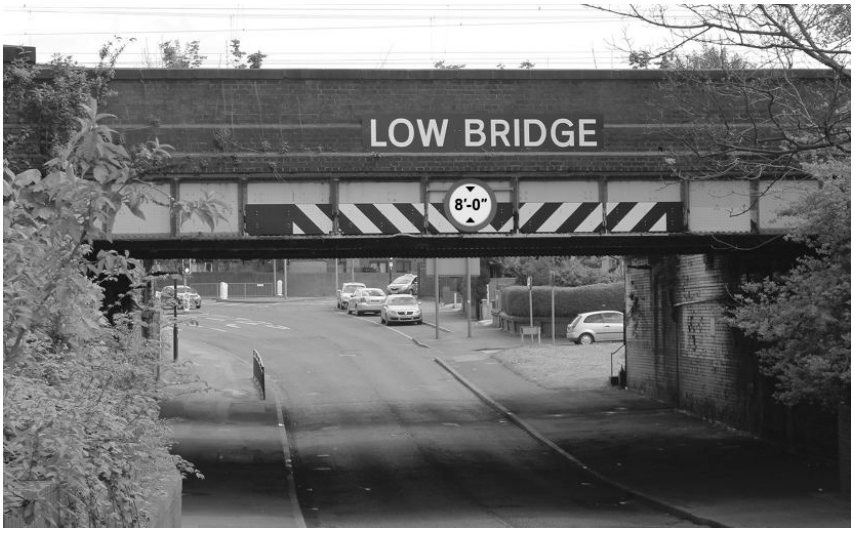

The table shows the distances, in miles, between four places.

	Bristol	**Exeter**	**Southampton**	**Truro**
Bristol		81	100	168
Exeter	81		114	87
Southampton	100	114		198
Truro	168	87	198	

Example

The distance between Exeter and Southampton is 114 miles.

Low bridges

A sign tells drivers the maximum height of a vehicle that can pass under the bridge.

8′ 0″ is 8 feet 0 inches.

Converting feet to metres

Use these steps to convert feet to metres.

Step 1 Multiply the number of feet by 300

Step 2 Divide your answer to **Step 1** by 1000

Example

Convert 4 feet into metres.

Step 1 4 × 300 = 1200

Step 2 1200 ÷ 1000 = 1.2

4 feet = 1.2 metres

Data Sheet for Wages

National Minimum Wage

By law, all workers should be paid at least the National Minimum Wage.
This table shows the hourly rates for different ages.

Age (years)	16 to 17	18 to 20	21 to 24	25 or over
Hourly rate	£4.05	£5.60	£7.05	£7.50

Piece workers

Some workers are paid for each item they make.

For example, Jenny makes shirts for a clothing company.

She is paid for each shirt she makes.

Fair rate

This is the minimum amount piece workers should be paid for each item they make.

To work out the fair rate

Step 1 Work out mean number of items made per worker in one hour

Step 2 Work out National Minimum Wage ÷ the answer to **Step 1**

Step 3 Work out the answer to **Step 2** × 6

Step 4 Work out the answer to **Step 3** ÷ 5

The answer to **Step 4** is the fair rate per item.

Example

A company employs piece workers to make hats.
All the workers are 25 years old or over.
The National Minimum Wage for these workers is £7.50

Step 1 Mean number of hats made per worker in one hour = 15

Step 2 £7.50 ÷ 15 = £0.50

Step 3 £0.50 × 6 = £3.00

Step 4 £3.00 ÷ 5 = £0.60

The fair rate is 60p per hat.

Do not write outside the box

Answer **all** questions in the spaces provided.

1 **Minibus**

There is a **data sheet** for Minibus.

Samir wants to hire some minibuses to go to a hockey match.

He needs enough minibuses to carry 90 people.

Q1(a) Worked Solution:

†1 (a) Each minibus can carry 15 people.

How many minibuses does Samir need to hire?

[2 marks]

Reverse process or alternative method, e.g.

$6 \times 15 = 90$

Mark holistically

Check

Allow $15 + 15 + 15 + 15 + 15 + 15 = 90$

Check your answer.

Show how you have done your check.

[1 mark]

$\div 24$

[A1] [M1]

1 (b) Each minibus can travel 24 miles for one gallon of petrol.
Each minibus travels 60 miles.

How many gallons of petrol will **each** minibus use?

[2 marks]

Do not write outside the box

10 friends live in Bristol.

They are going to Truro for a weekend.

They want to hire a minibus to get from Bristol to Truro and back.

1 (c) How many miles in total is it from Bristol to Truro and back?

[2 marks]

1 (d) The 10 friends look at this advert.

Minibus hire

£21 per day

plus

70p per mile

They hire the minibus for 3 days.

They travel from Bristol to Truro and back.

The friends share the cost equally between them.

How much will each friend pay?

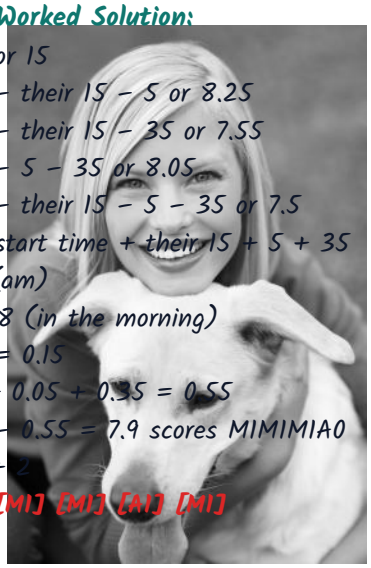

[5 marks]

Do not write outside the box

2 **Guide Dogs in training**

Guide Dogs train at a centre each day from Monday to Friday.
In the evenings and at weekends, people look after them at home.

Q2(a) Worked Solution:
× 60 or 15
8.45 – their 15 – 5 or 8.25
8.45 – their 15 – 35 or 7.55
8.45 – 5 – 35 or 8.05
8.45 – their 15 – 5 – 35 or 7.5
their start time + their 15 + 5 + 35
7.50 (am)
10 to 8 (in the morning)
× 60 = 0.15
0.15 + 0.05 + 0.35 = 0.55
8.45 – 0.55 = 7.9 scores MIMIMIA0
382 ÷ 2
[M1] [M1] [M1] [A1] [M1]

Sarah looks after Buddy.

2 (a) Sarah takes Buddy from her home to the centre.
She then travels to work.

Sarah makes these notes.

Home to centre	quarter of an hour
At centre	5 minutes
Centre to work	35 minutes

Sarah needs to arrive at work by 8.45 am

Work out the **latest** time that she can leave home.

[4 marks]

Do not write outside the box

The daily amount of food for a dog depends on the weight of the dog.

Weight of dog	Daily amount of food
26 kg	362 g
27 kg	372 g
28 kg	382 g
29 kg	392 g
30 kg	402 g
31 kg	412 g
32 kg	422 g
33 kg	432 g

Dogs get two feeds each day.

Morning feed Half the daily amount

Evening feed Half the daily amount

†2 (b) Buddy weighs 28 kg

How much food does Buddy get in his morning feed?

[2 marks]

Check your answer.
Show how you have done your check.

[1 mark]

Do not write outside the box

2 (c)

Tim looks after Ella.

Ella gets 216 grams in her morning feed.

Tim uses a cup to measure out the feed.

1 cup holds 96 grams.

Tim says,

"I need to measure out between 2 and $2\frac{1}{2}$ cups."

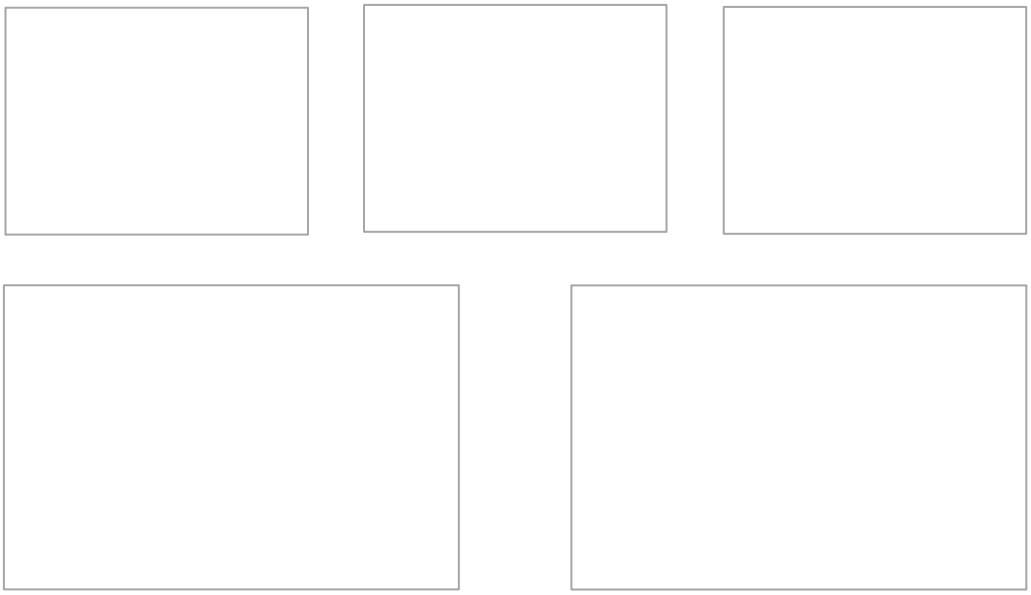

Is he correct?
You **must** show your working.

[3 marks]

Question 2 continues on the next page

Do not write outside the box

2 (d) At the centre the dogs are put into one of five cages.
There are three small cages and two large cages.

Up to 2 dogs can be put in each small cage.

Up to 3 dogs can be put in each large cage.

These dogs need to be put in the cages.

Dog	Information
Axel	With Gina
Buddy	With Ella
Cora	Not on her own
Dax	With only one other dog
Ella	With Hugo

Dog	Information
Frank	With only one other dog
Gina	Not with Cora or Iggy
Hugo	Not on his own
Iggy	Not on his own
Jake	On his own

On the next page show **one** possible way the dogs can be put in the cages.

[5 marks]

3 **Dance Show**

Susan runs a dance school.

Susan

The students at my dance school are in a show.

Q3(a) Worked Solution:
11 rectangles of correct size shown
140 + 20 + 140 + 20 25 × 140 or
or 320 3500

Each dancer in the show wears a costume with a sash.

Susan is making the sashes.

Each sash is a rectangle 140 cm long and 20 cm wide.

Here is a scale drawing of a sash.

25 × 20 or 500
25 × 160 or
4000
25 × their 320 2 × their 3500 +

Scale 1 cm represents 20 cm

3 (a) Susan has a piece of material 200 cm long and 160 cm wide.

She says,

"I can make 11 sashes from this piece of material."

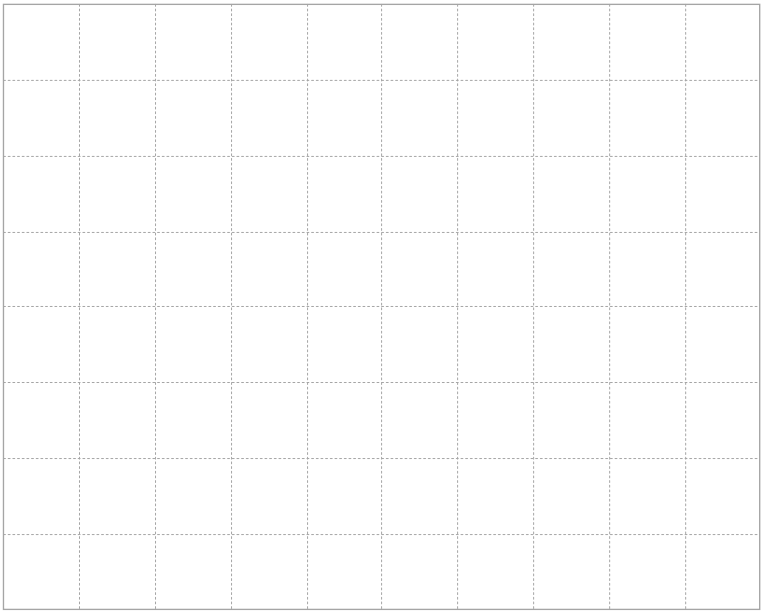

Use the scale drawings below to show how she can do this.

[3 marks]

Practise on this scale drawing.

2 × their 500
their 7000 +
their 1000
[A1] [M1] [M1]

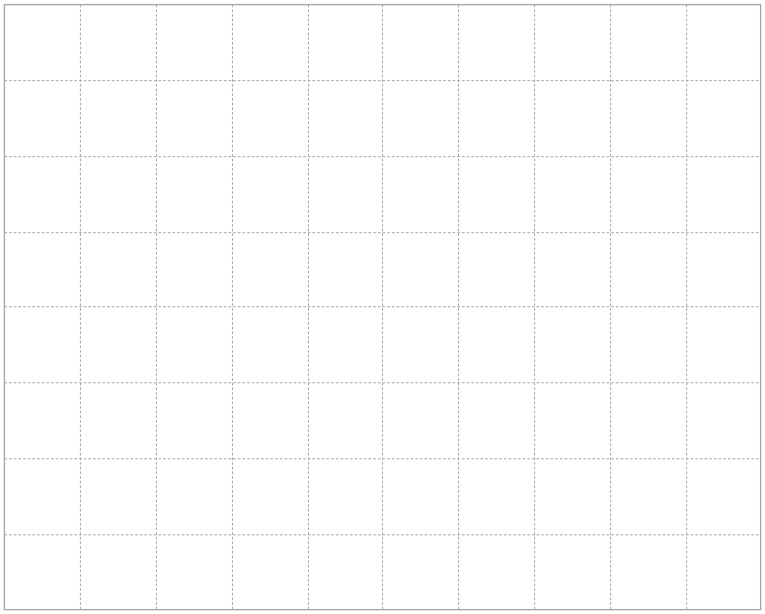

Scale 1 cm represents 20 cm

Do not write outside the box

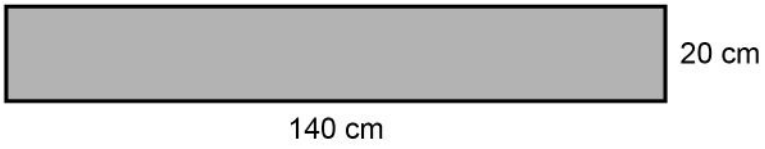

Put your answer on this scale drawing.

Scale 1 cm represents 20 cm

3 (b) Susan sews tape along the edge of each sash.

Not drawn accurately

How many centimetres of tape does she need for 25 sashes?

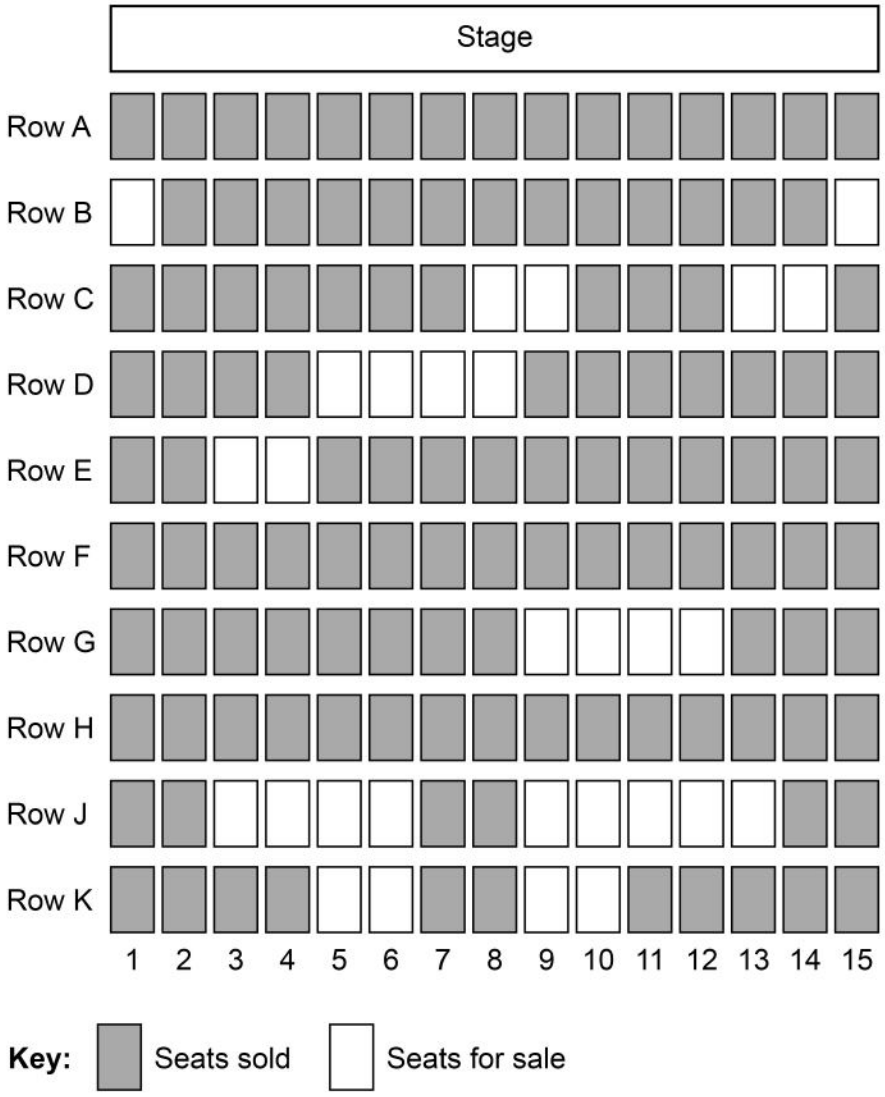

[3 marks]

Do not write outside the box

Susan has booked a hall for the show.

Here is a seating plan for the hall.

The seats already sold for Friday are shaded.

3 (c) Chris and Mary want 2 seats for Friday.

They want the seats to be

- together in the same row
- as near to the stage as possible
- as near to the end of a row as possible.

Which seats should they choose?

Circle your answer below.

[1 mark]

A1 and A2 C8 and C9 C13 and C14 K5 and K6

Do not write outside the box

3 (d) The show is on for **two** nights.

Tickets are £8.50 each.

The **total** cost of putting on the show for two nights is £960

Susan says,

"If we sell **all** the tickets for both nights we will make **more than** £1500 profit."

Is she correct?

You **must** show your working.

[6 marks]

13

Turn over for the next question

Do not write outside the box

4 **Wages**

There is a **data sheet** for Wages.

Q4 Worked Solution:
90 ÷ 15
[M1]

My company makes and sells clothing.

Bob

10 piece workers make T-shirts.

This list shows the number of T-shirts each worker made in one hour.

10 7 9 8 6 7 7 10 9 7

4 (a) Show that the mean number of T-shirts made per worker is 8

[2 marks]

Do not write outside the box

4 (b) The workers are all 18 to 20 years old.

Bob says,

"The fair rate is 75p per T-shirt."

Is he correct?

You **must** show your working.

[6 marks]

4 (c) All 10 piece workers make T-shirts for 2 days.

They work 6 hours each day.

The mean number of T-shirts they each make per hour is 8

Bob says,

"Altogether, they will make more than 1000 T-shirts."

Is he correct?

You **must** show your working.

[4 marks]

4 (d) Bob sells 2000 skirts for £4.99 each.

Here are his costs.

Payments to piece workers	£1.64 per skirt
Materials	£1900
Postage and packaging	£705
Other costs	£1080

Bob says,

"My profit is **more than** £3000"

Is he correct?

You **must** show your working.

[6 marks]
