MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and healthcare & vocational staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

Activity 2: Ice

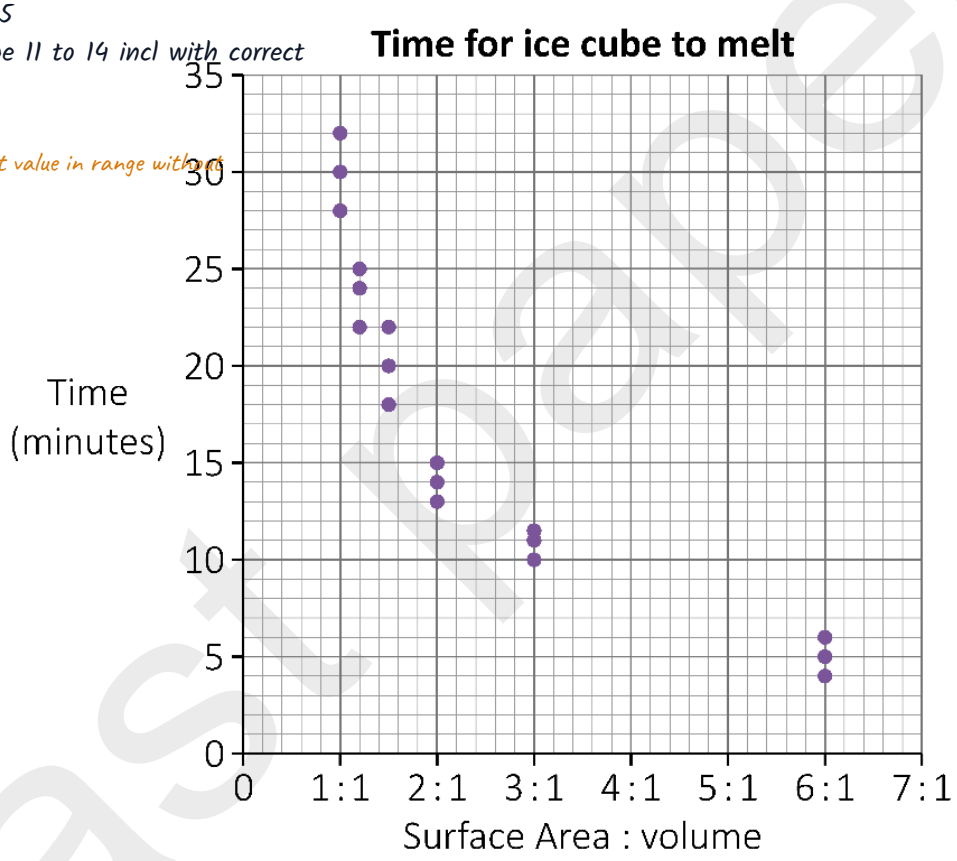

2 (a) Tom is studying science at college.
He is learning about ice.

Tom does an experiment.
He shows that the ratio of an ice cube's surface area to its volume affects the time it takes for the ice cube to melt.

Q2(a) Worked Solution:

37.5
15.625
2.4 : 1 or 12 : 5
Answer in range 11 to 14 incl with correct working
[4 marks]
Tip: Do not accept value in range without

This scatter diagram shows his results:

past paper

Examiner use only

Tom has another ice cube.
Each side is 2.5 cm long.

Estimate how long this ice cube will take to melt.

[4 marks]

Your answer: **minutes**

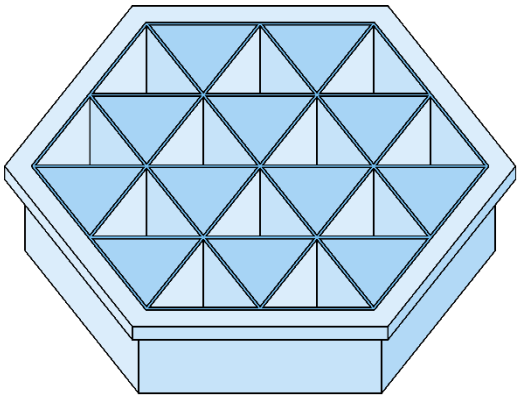

past paper

2 (b) In the science lab, Tom finds this mould for making 24 triangular prisms of ice.

Q2(b) Worked Solution:
Any triangular prism correctly drawn
[1 mark]

Mould

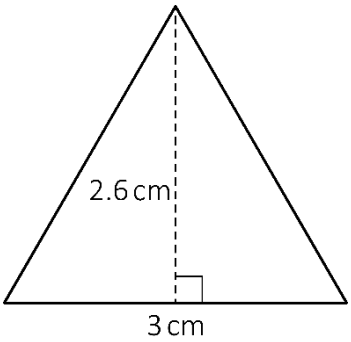

Draw a triangular prism.

[1 mark]

past paper

Examiner use only

2 (c) The triangular faces of each prism have base 3 cm and height 2.6 cm

Not drawn accurately

Q2(c) Worked Solution:
340.7 (cm3)
6
method 1
0.5 × 3 × 2.6 or 3.9
their 3.9 × 3.5 or 13.65

Tom fills the hexagonal mould with water to a depth of 3.5 cm

Tom knows that:

- to calculate the volume of each triangular prism, he can use the formula

  Volume = area of triangular face × depth of prism

- when a volume of water freezes, the ice that is formed has a volume 4% more than the volume of the water.

What will be the **total** volume of ice formed when all the water in the hexagonal mould freezes?

[5 marks]

their 13.65 × 24 or 327.6
1.04 × their 327.6 or 340.7(04)
or 327.6 + (their 327.6 × 4 ÷ 100)
(cm3)
340.7(04)
[5 marks]
Tip: Award 5 marks if correct answer given

Your answer: **cm³**

Examiner use only

2 (d) Icebergs are large lumps of ice that float in the sea.

Tom reads that the icebergs float because the density of ice is less than the density of seawater.

Q2(d) Worked Solution:

The density of ice is 0.92 g per ml and the density of the sea is 1.03 g per ml

89 (%)

Calculate 0.92 as a percentage of 1.03

Give your answer as a percentage to the nearest whole number.

0.92 ÷ 1.03 or 0.89(3...) or 89(.3...)(%) **[2 marks]**

~~[2 marks]~~

Tip: Award 2 marks if correct answer given

Your answer: **%**

2 (e) Tom reads that scientists are planning to move an iceberg across the sea to provide water to a very dry country.

The iceberg weighs 40 million tonnes.

Write 40 million using numbers.

[1 mark]

Q2(e) ~~Worked Solution:~~

40 000 000

[1 mark]

Your answer:

past paper

Examiner use only

2 (f) The iceberg will melt as it travels.

By the time it arrives, the iceberg will weigh only 25 million tonnes.

By what fraction will the original iceberg have reduced in weight by the time it arrives?

Q2(f) Worked Solution:

$\frac{3}{8}$

$\frac{15}{40}$

7

(Calculator Test)

[2 marks]

Tip: Award 2 marks if correct answer given

Give your answer in its simplest form.

Activity 3: Wages

3 (a) Faisal starts a new job.

He will work 37 hours a week for 48 weeks a year and is paid £8.25 an hour.

He must pay:

- 0% income tax on the first £12 500 he earns each year
- 20% income tax on anything over £12 500 that he earns.

His income tax payments are spread evenly over the 48 weeks.

Q3(a) Worked Solution:

Faisal's first weekly wage slip shows that he has paid £8.96 income tax.

He thinks he has paid more than he should.

method 1

Is he correct?

Show how you decide.

[4 marks]

(37 × 48 × 8.25) − 12500 or
14652 − 12500 or 2152
0.2 × their 2152 or 430.4
or 2 × (their 2152 ÷ 10)
their 430.4 ÷ 48 or 8.966(...)
(£)8.966(...) or (£)8.97 and no
[4 marks]

Your answer:

past paper

Examiner use only

3 (b) Sonya reads an article about the 5 : 3 : 2 rule.

The rule says you should spend your wages after tax in the ratio 5 : 3 : 2 on **needs : wants : savings**

- **needs** are bills like rent that must be paid
- **wants** are extra things like social life and new clothes which are not needed
- **savings** are amounts of money kept for the future.

Q3(b) Worked Solution:

3
or 0.3
10

Sonya earns £480 a week after tax.

Last week she spent £185 on going out with friends.

Was this in line with the 5 : 3 : 2 rule?

or 480 ÷ 10 or 48

Show how you decide.

144 or 0.38(...) or 0.39 and no

[2 marks]

[2 marks]

Tip: Accept comparison of 38.5(%) or 39(%)

Your answer:

3 (d) The manager of a small business claims that the mean salary in the company has gone up by over 10% in the last year.

One of the workers says that the gap between the highest and lowest earners has more than doubled.

Use this data about the company salaries to decide whether **each** of the statements is true. Show your working.

[5 marks]

Q3(d) Worked Solution:

457 260 ÷ 12 = 38105

592 578 ÷ 14 = 42327

Annual salaries (£s)							
Last year (12 employees)				**This year (14 employees)**			
15 275	42 122	15 679		15 500	33 775	17 995	34 065
20 000	25 344	25 879		21 339	20 112	24 995	23 115
85 682	15 998	53 245		157 250	40 631	45 888	
55 333	70 507	32 196		60 200	80 555	17 160	

(their 42327 – their 38105) ÷ 38105

or 11(.07...)

or 1.1 × their 38105 or 41915.50

70407 and 141750

States that both statements are correct

[5 marks]

Activity 4: Archaeology

4 (a) Archaeologists study human history by digging up and analysing items from the past.

Chen is a volunteer with a community archaeology group.
At the weekends she helps to dig at an archaeological site.

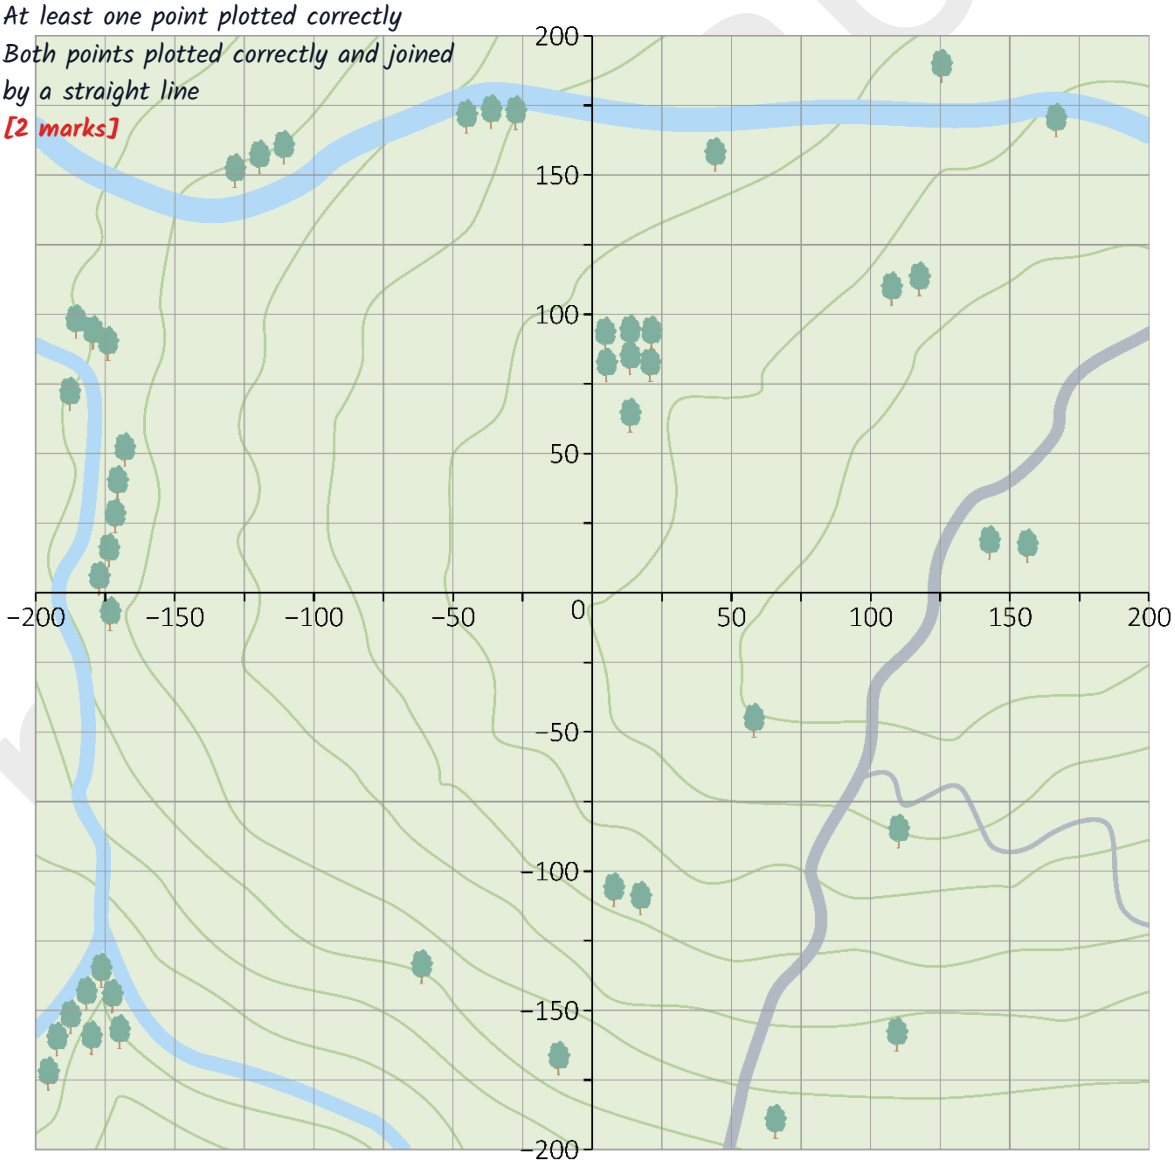

The volunteers have to record exactly where each item is found.
They do this by using a coordinate grid laid over a map of the site.

The volunteers have found the wall of a building.
It runs in a straight line from (–125, 100) to (150, –75)

Draw the position of the wall on the grid.

[2 marks]

Q4(a) Worked Solution:
At least one point plotted correctly
Both points plotted correctly and joined by a straight line
[2 marks]

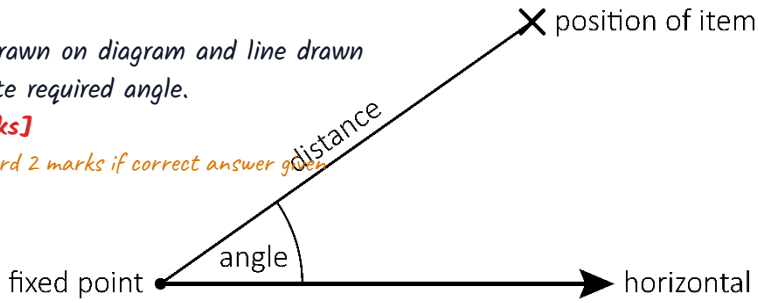

Examiner use only

4 (b) There is another way that the volunteers can record the position of an object:

- measure the object's distance from a fixed point and
- measure the angle (see example in the diagram below).

Q4(b) Worked Solution:
45 (°)
9
Point drawn on diagram and line drawn to create required angle.
[2 marks]
Tip: Award 2 marks if correct answer given

The volunteers find an object at the point (100, 100) on the coordinate grid.

i) Mark the point on the grid in **4 (a)**.

The volunteers measure the distance of the object from the fixed point (0, 0)
They then measure the angle.

ii) What size is the angle?

[2 marks]

Your answer: **degrees**

4 (d) Chen reads about some footprints that were preserved in volcanic ash.

The foot length was 18.8 cm and the stride length (the distance between the footprints) was 164.5 cm

Archaeologists use the formula: $R = \frac{\text{stride length}}{4 \times \text{foot length}}$

Chen uses a calculator to calculate R for the footprints found in the volcanic ash.

She enters 164.5 ÷ 4 × 18.8 and gets the answer 773.15

Explain what Chen has done wrong.

[1 mark]

Q4(d) Worked Solution:

Any correct explanation relating to order of operations

[1 mark]

past paper

Examiner use only

4 (e) If R is less than 2.0 the person was probably walking.
If R is greater than 2.9 the person was probably running.
If R is in between 2.0 and 2.9 it is not possible to decide.

Tick the correct statement about the person whose footprints were preserved in the volcanic ash.

Q4(e) Worked Solution:

☐ They were probably walking.

☐ They were probably running.

'It is not possible to decide' with 2.18(75)
2.18(75)

☐ It is not possible to decide.

[2 marks]

Explain your choice.

Tip: Award 2 marks if correct answer given **[2 marks]**

past paper

Examiner use only

4 (f) There are 10 volunteers in the community archaeology group.

The probability that they all attend on a Saturday is 0.35
The probability that they all attend on a Sunday is 0.12

The site is open next weekend.

Q4(f) Worked Solution:

Calculate the probability that all the volunteers will attend on both Saturday and Sunday next weekend.

Give your answer as a percentage.

[2 marks]

4.2 (%)
0.35 × 0.12 or 0.042
[2 marks]
Tip: Award 2 marks if correct answer given

Your answer: **%**

past paper

Examiner use only

4 (g) The site was open on Saturday and Sunday for 26 weekends during last year.

This table shows the number of days each volunteer attends out of the 52 days available.

The information for Chen is missing.

Q4(g) Worked Solution:

No with correct explanation [1 mark]

Volunteer	Number of days
Ada	48
Barry	25
Tim	30
Chris	24
Gwen	43
Sia	39
Rita	40
Rav	18
Jon	35
Chen	

Chen says that the mode of the 9 values is 48

Is she correct?

Explain your answer.

[1 mark]

past paper
