Practice exam paper for first teaching September 2019

Time: 25 minutes | Paper Reference **PRACL1/01**

Mathematics

Level 1
Section A (Non-Calculator)

You must have:
Pen, HB pencil, eraser, ruler graduated in cm and mm, protractor, pair of compasses. Tracing paper may be used.

Total Marks
14 /14

My signature confirms that I will not discuss the content of the test with anyone.

Signature: Master Functional Skills (MFS)

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Sign the declaration.
- Answer **all** questions.
- Write your final answers in the boxes provided.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- You **must** show clearly how you get your answers in the spaces provided. Marks will be awarded for your working out.
- Check your working and your answers at each stage.
- Diagrams are **not** accurately drawn, unless otherwise indicated.
- **Calculators may not be used.**
- Take the value of π to be 3.14

Information

- The total mark for this section is 14
- The marks for each question are shown in brackets – *use this as a guide as to how much time to spend on each question.*
- This sign ☑ shows where marks will be awarded for showing your checks.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and NHS healthcare staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

START LEARNING TODAY AT

MasterFunctionalSkills.co.uk

SECTION A

Answer ALL questions. Write your answers in the spaces provided.

1 Jack is keeping a record of the number of steps he takes each day.

Monday	8 565 steps
Tuesday	14 707 steps
Wednesday	15 323 steps
Thursday	9 788 steps
Friday	12 482 steps

--> Lowest (Min)

--> Highest (Max)

(a) Work out the range of the number of steps.

(2)

Highest number of steps (Wednesday) = 15 323

Lowest number of steps (Monday) = 8 565

Range = Highest − Lowest

= 15 323 − 8 565 [M1]

= 6 758 steps [A1]

6 758 [A1] steps

☑

(b) Show a check of your answer.

(1)

Reverse Addition Check:

6 758 + 8 565 = 15 323 ✓

Matches highest daily steps exactly! [B1]

(Total for Question 1 is 3 marks)

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

2 (a) Work out $\frac{1}{4}$ of 24

(1)

To find 1/4 of an amount, divide by the denominator (4):

24 ÷ 4 = 6 (or 1/4 × 24 = 6)

6 [B1]

(b) Work out –5 + 3

(1)

Start at –5 on the number line and move 3 units right (+3):

–5 + 3 = –2

–2 [B1]

(c) Write 6.384 correct to 1 decimal place.

(1)

Look at the digit in the hundredths place (second decimal place):

6 . 3 [8] 4

Since 8 ≥ 5, round the tenths digit UP from 3 to 4 --> 6.4

6.4 [B1]

(Total for Question 2 is 3 marks)

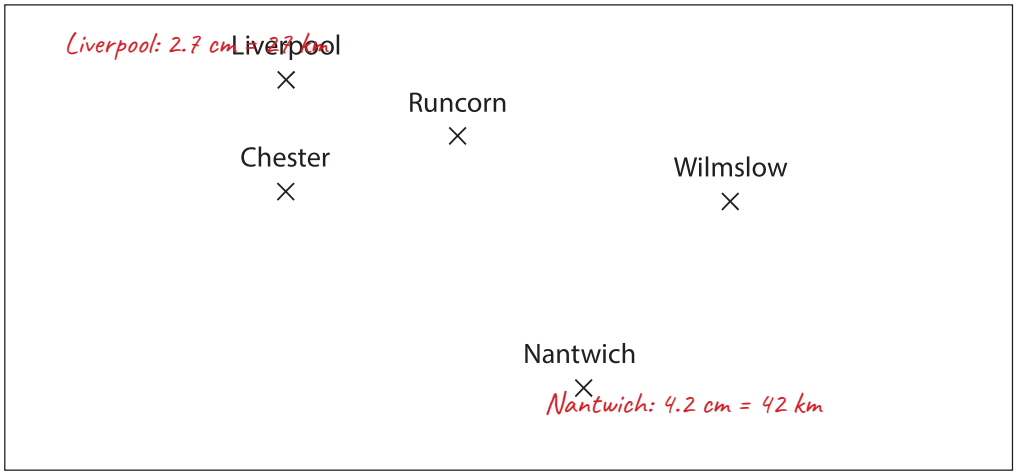

DO NOT WRITE IN THIS AREA

3 Alan works at a warehouse in Runcorn.

A furniture company needs deliveries from

- Runcorn to Liverpool
- Runcorn to Nantwich.

Alan needs to work out the total delivery charge for these deliveries.
He uses this map.

Scale 1 cm on the map is 10 km on the ground

Alan uses these delivery charges.

distance from Runcorn	charge (£)
less than 20 km	9.99
20 km – 35 km	14.99
over 35 km	24.49

Work out the total delivery charge.
Show how you get your answer.

(4)

Step 1: Runcorn to Liverpool delivery:

Map distance = 2.7 cm --> Actual distance = 2.7 × 10 = 27 km

27 km is in "20 km – 35 km" band --> Charge = £14.99 [M1]

Step 2: Runcorn to Nantwich delivery:

Map distance = 4.2 cm --> Actual distance = 4.2 × 10 = 42 km

42 km is "> 35 km" band --> Charge = £24.49 [M1]

Total Charge = £14.99 + £24.49 = £39.48 [M1]

£ 39.48 [A1]

(Total for Question 3 is 4 marks)

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

4 John works Monday to Friday.
He buys his lunch on his way to work.

Each day John buys a sandwich, a bottle of water and a bag of crisps.

Shop A	
any sandwich	£2.85
a bottle of water	60p
a bag of crisps	85p

Shop B
£3 meal deal

any sandwich
a bottle of water
a bag of crisps

John thinks he will save more than £7.50 a week if he buys his lunch each day from shop B instead of shop A.

Is John correct?
You **must** show your working. **(4)**

Shop A Costs (Monday to Friday = 5 days):
Daily lunch = £2.85 + £0.60 + £0.85 = £4.30 [M1]
Weekly cost (5 days) = 5 × £4.30 = £21.50

Shop B Costs (Monday to Friday = 5 days):
Meal deal daily price = £3.00
Weekly cost (5 days) = 5 × £3.00 = £15.00

Weekly Savings Calculation:
Weekly saving = £21.50 − £15.00 = £6.50 [M1]
(Daily saving = £4.30 − £3.00 = £1.30; 5 × £1.30 = £6.50)

Decision & Evaluation:
John claims he will save more than £7.50 a week.
Since £6.50 < £7.50 (saves £1.00 less), John is NOT correct. [A1]

No [A1]

(Total for Question 4 is 4 marks)

TOTAL FOR SECTION A = 14 MARKS

S 6 4 0 3 8 A 0 1 1 6

Pearson

SECTION B

Answer ALL questions. Write your answers in the spaces provided.

1 In June Gemma paid £68 for her electricity.
In July she will pay 5% more for her electricity.

Work out how much Gemma will pay for her electricity in July.

(3)

Method 1: Calculate 5% increase and add to original bill

5% of £68 = 68 × 5 ÷ 100 = 68 × 0.05 = £3.40 [M1]

July payment = £68 + £3.40 = £71.40 [M1]

Method 2: Using percentage multiplier

100% + 5% = 105% = 1.05

July payment = £68 × 1.05 = £71.40

Examiner Note: Always write money answers to 2 decimal places (£71.40 not £71.4)

£ 71.40 [A1]

3 Alfie sells flooring for playgrounds.
He has this diagram of a playground.

The playground is rectangular 9 m by 15 m.
The lawn is rectangular 3 m by 4 m.

Alfie will put flooring on all the space inside the playground but not on the lawn.
The flooring costs £36 per square metre.

Work out the total cost of the flooring.

(5)

Step 1: Calculate total area of the playground:

Area of playground = Length × Width = 15 × 9 = 135 m² [M1]

Step 2: Calculate area of the rectangular lawn:

Area of lawn = Length × Width = 4 × 3 = 12 m² [M1]

Step 3: Area requiring flooring (playground minus lawn):

Flooring area = 135 m² − 12 m² = 123 m² [M1]

Step 4: Calculate total cost at £36 per square metre:

Total cost = 123 m² × £36 = £4 428 [M1]

Alternative check: (£135 × 36 = £4860) − (£12 × 36 = £432) = £4428

5 Kate has this information about the total monthly sales for a shop in 2018

Kate needs to put this information in a table.
The table must show the total sales for each quarter of the year.

quarter 1 (Jan to Mar)
quarter 2 (Apr to Jun)
quarter 3 (Jul to Sep)
quarter 4 (Oct to Dec)

Draw and complete a suitable table for Kate.

(3)

Calculate total sales for each quarter (from the bar chart):

Quarter 1 (Jan to Mar) = 160 + 60 + 150 = 370 [M1]

Quarter 2 (Apr to Jun) = 30 + 50 + 50 = 130

Quarter 3 (Jul to Sep) = 70 + 80 + 80 = 230

Quarter 4 (Oct to Dec) = 100 + 90 + 110 = 300 [A1]

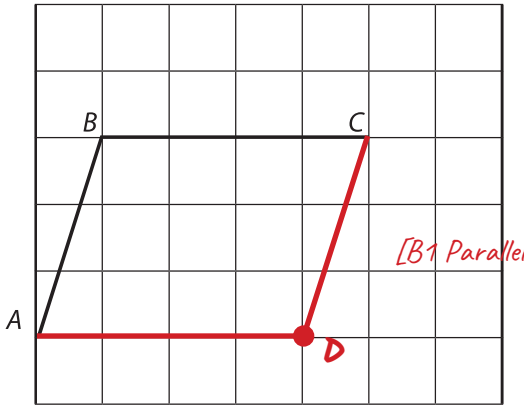

Quarter	Total Sales
Quarter 1 (Jan · Mar)	370
Quarter 2 (Apr · Jun)	130
Quarter 3 (Jul · Sep)	230
Quarter 4 (Oct · Dec)	300

[B1 Table]

(Total for Question 5 is 3 marks)

6 Karen is a cake designer.
She is designing different shaped cakes.

AB and *BC* are two sides of a parallelogram.

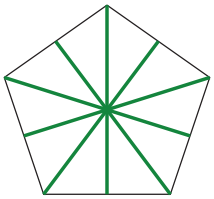

[B1 Parallelogram completed]

(a) On the grid, complete the parallelogram.

(1)

Here is a regular pentagon.

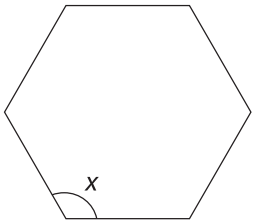

[B1 5 lines of symmetry]

(b) Draw all the lines of symmetry on this pentagon.

(1)

Here is a regular hexagon.

(c) What type of angle is angle *x*?
Tick the correct answer.

(1)

right angle	acute angle	reflex angle	✓ obtuse angle

[B1]

Regular hexagon angle is 120° (between 90° and 180° = obtuse angle)

DO NOT WRITE IN THIS AREA

7 Daniel has these test results

public services 46% maths $\frac{14}{25}$ English $\frac{13}{20}$ art and design $\frac{6}{10}$

His tutor wants to compare these results.

List the subjects in order from his best result to his worst result.
Show why you think this. **(3)**

Convert all test scores to percentages to compare:

- Public Services = 46%
- Maths = 14/25 = (14 × 4) / (25 × 4) = 56/100 = 56% [M1]
- English = 13/20 = (13 × 5) / (20 × 5) = 65/100 = 65% [M1]
- Art and Design = 6/10 = (6 × 10) / (10 × 10) = 60/100 = 60%

Compare percentages (highest to lowest):

65% (English) > 60% (Art & Design)
> 56% (Maths) > 46% (Public Services)

Order from best to worst result:

1. English (65%)
2. Art and Design (60%)
3. Maths (56%)
4. Public Services (46%)

[A1]

[A1]

English, Art and Design, Maths, Public Services

(Total for Question 7 is 3 marks)

DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA

8 (a) Write $\frac{3}{60}$ as a fraction in its simplest form.

(1)

Divide both numerator and denominator by their greatest common factor (3):

3/60 = (3 ÷ 3) / (60 ÷ 3) = 1/20

[B1] $\frac{1}{20}$

A group of dancers raised some money for a charity.

Here is some information about the money raised.

money raised (£)	number of dancers
4.99 or less	15
5 to 9.99	23
10 to 14.99	12
15 to 19.99	7
20 to 24.99	3
total	**60**

One of the dancers is chosen at random to give the money raised to the charity.

(b) What is the probability that this dancer raised less than £10?

(2)

Step 1: Find number of dancers who raised less than £10:

- "£4.99 or less" group = 15 dancers
- "£5 to £9.99" group = 23 dancers

Total raising less than £10 = 15 + 23 = 38 dancers [M1]

Step 2: Calculate probability out of total 60 dancers:

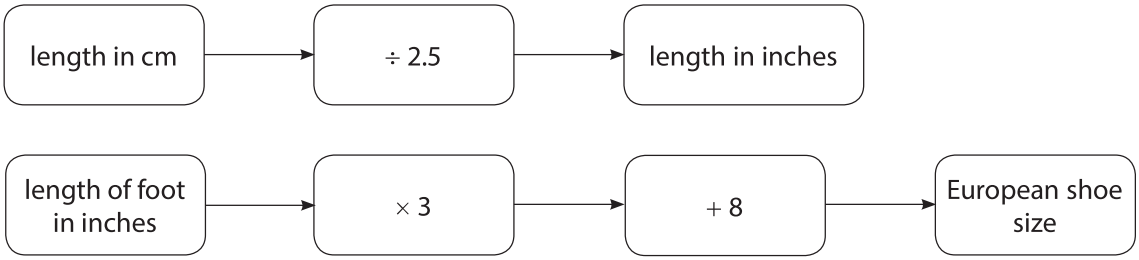

Probability = 38/60 (or 19/30) [M1]

38/60 [A1]

(Total for Question 8 is 3 marks)

9 Joanne is buying a pair of shoes in Europe.
The length of her foot is 27.5 cm.

Joanne uses these rules to work out her European shoe size.

Joanne thinks her European shoe size is 38

Is Joanne correct?
Show why you think this. **(4)**

Step 1: Convert length in cm to length in inches using Rule 1:

Length in inches = Length in cm ÷ 2.5

= 27.5 ÷ 2.5 = 11 inches [M1]

Step 2: Convert length in inches to European shoe size:

European shoe size = (Length in inches × 3) + 8

= (11 × 3) + 8 [M1]

= 33 + 8 = 41 [M1]

Conclusion & Comparison:

Joanne thinks her European shoe size is 38.

Since 41 ≠ 38 (actual size is 41), Joanne is NOT correct.

(A size of 38 corresponds to: (38 – 8) ÷ 3 = 10 inches = 25 cm)

No [A1]

(Total for Question 9 is 4 marks)

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

10 Sarah has a snack at work each day.

She has this information about the snacks she had last week.

day	Mon	Tue	Wed	Thu	Fri
snack	banana	chocolate	biscuit	cake	crisps
number of calories	105	260	49	257	234

Sarah thinks the mean number of calories in these snacks is more than 200

Is she correct?
Show why you think this. **(3)**

Step 1: Calculate total calories consumed across the 5 days:

Total calories = 105 (Mon) + 260 (Tue) + 49 (Wed)
+ 257 (Thu) + 234 (Fri) = 905 calories [M1]

Step 2: Calculate the mean number of calories (divide total by 5):

Mean = Total calories ÷ Number of days = 905 ÷ 5
= 181 calories [M1]

Conclusion & Comparison:

Sarah thinks the mean number of calories is more than 200.

Since 181 < 200, Sarah is NOT correct.

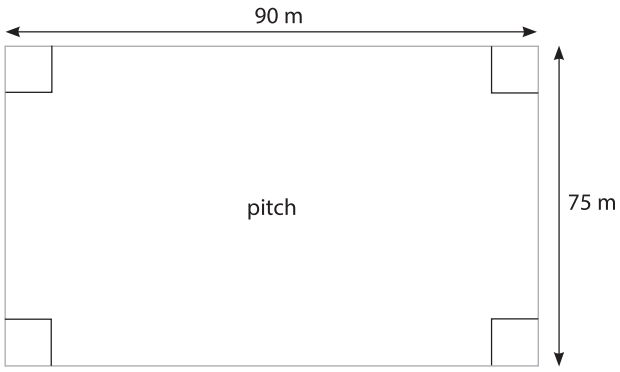

Alternative check: For mean 200, total = 200 × 5 = 1 000 cal.
Since 905 < 1 000, mean is strictly less than 200 cal.

No [A1]

(Total for Question 10 is 3 marks)

11 Ali is preparing for a race.
He runs laps around a football pitch to prepare for the race.

The length of each lap is the total distance along the four edges of the pitch.

Ali needs to run at least 10 km.

(a) What is the minimum number of complete laps Ali should run?

(4)

Step 1: Convert units so they match (km to metres):

Target = 10 km = 10 × 1 000 m = 10 000 m [M1]

Step 2: Calculate perimeter of football pitch (1 lap):

Perimeter = 90 + 75 + 90 + 75 = 330 m per lap [M1]

Step 3: Calculate number of laps required:

Number of laps = Total distance ÷ Distance per lap

= 10 000 ÷ 330 = 30.303... laps [M1]

Step 4: Interpret question ("minimum number of COMPLETE laps"):

- 30 laps = 30 × 330 m = 9 900 m (9.9 km, less than 10 km!)
- **Therefore, Ali must run 31 complete laps to exceed 10 km.**

(31 × 330 m = 10 230 m = 10.23 km ≥ 10 km)

31 [A1]

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
