Paper 2 Calculator Paper

Specimen paper

Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:

- a calculator
- mathematical instruments.

Instructions

- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.
- State the units of your answer where appropriate.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 60.
- You m

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and NHS healthcare staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

Section A

Answer **all** questions in the spaces provided.

1 Circle the number that is 5 **more** than –1

[1 mark]

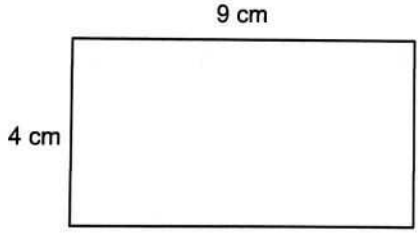

–6 –4 (4) 6

2 Write $\frac{7}{20}$ as a percentage.

[1 mark]

Answer 35 %

3 Here is a rectangle.

Not drawn accurately

Work out the perimeter.

Circle your answer.

[1 mark]

13 cm (26 cm) 36 cm 72 cm

4 Work out the value of 38^2

[1 mark]

Answer 1444

5 List these types of angle in order, with the smallest first.

reflex obtuse acute right angle

[1 mark]

Smallest acute

right

obtuse

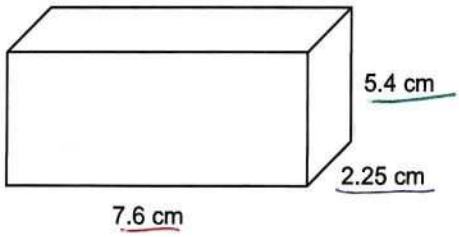

Largest reflex

Turn over for the next question

5

outside the box

6 A cuboid measures 7.6 cm by 2.25 cm by 5.4 cm

Work out the volume of the cuboid.

[2 marks]

7.6 × 5.4 × 2.25 = 92.34

Answer 92.34 cm^3

7 Here are 15 values.

13 40 22 14 19 30 36 33

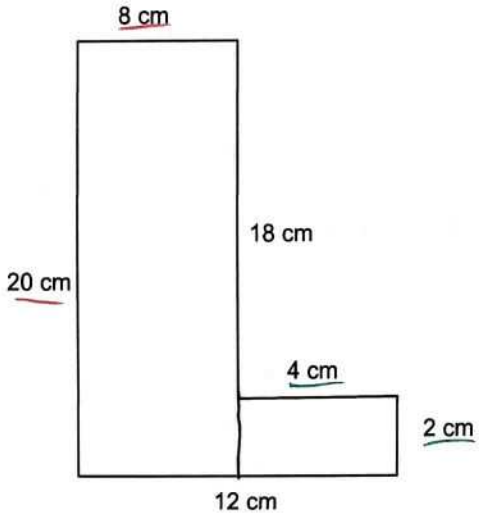

8 37 38 28 3 17 32

Complete the frequency column of the table.

[2 marks]

Value	Frequency
1 – 10	2
11 – 20	4
21 – 30	3
31 – 40	6

8 Here is an L-shape.

Not drawn accurately

Work out the area of the L-shape.
State the units of your answer.

[3 marks]

$20 \times 8 = 160$

$4 \times 2 = 8$

$160 + 8 = 168 \text{cm}^2$

Answer 168cm^2

7

box

Section B

Answer **all** questions in the spaces provided.

9 Restaurant

Rory works for a restaurant.

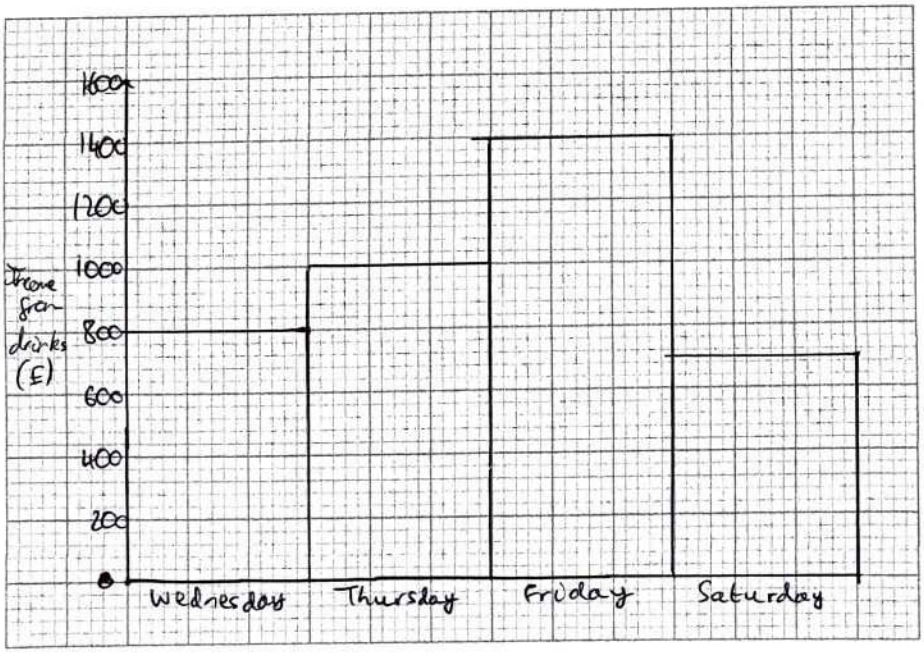

One week, the restaurant runs a special offer from Wednesday to Saturday.

The table shows the income from sales of drinks for the four days.

	Income from drinks
Wednesday	£800
Thursday	£1000
Friday	£1400
Saturday	£700

9 (a) On the grid below, draw a suitable chart showing the income from drinks. **[4 marks]**

Income from Drinks

9 (b) The table shows the income from sales of food for the four days.

	Income from food
Wednesday	£2100
Thursday	£2800
Friday	£3900
Saturday	£3500

Rory says,

"In total, the income from food was more than three times the income from drinks."

Is he correct?
You **must** show your working.

[5 marks]

£2100 + £2800 + £3900 + £3500 = £12300

£800 + £1000 + £1400 + £700 = £3900

£12300 ÷ £3900 = 3.1... > 3

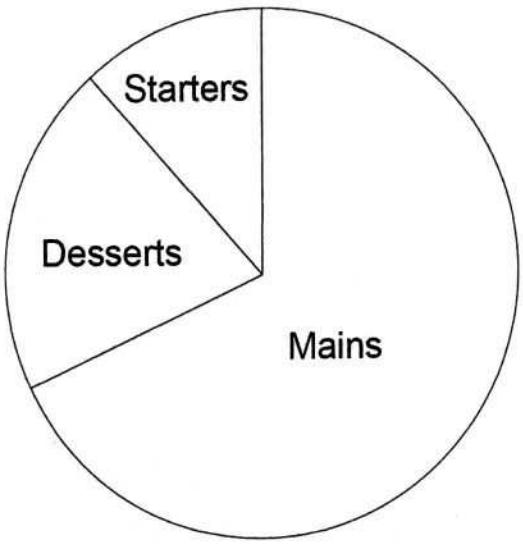

Rory is correct.

9

9 (c) The income from food comes from starters, mains and desserts.

The pie chart represents the income from food during the special offer.

Income from food

In total, Rory wants $\frac{1}{3}$ of the income from food to come from starters and desserts.

Has this happened during the special offer?
You **must** show your working.

[3 marks]

$\frac{1}{3}$ of $360° = 120°$

Angle is $116° < 120°$.

No.

outside the box

9 (d) In the next week, the total income at the restaurant is £14 800

The table shows the costs to run the restaurant that week.

	Amount (£)
Wages of chefs	210 hours at £9.35 per hour
Wages of waiters	570 hours at £7.90 per hour
Other costs	£3700

Work out the profit for the week.

[5 marks]

210 × £9.35 = £1963.50

570 × £7.90 = £4503.00

£1963.50 + £4503.00 + £3700.00

= £10166.50

£14800 − £10166.50 = £4633.50

Answer £ 4633.50

8

DOX

10 Holiday to Spain

Jo and Steve are planning a holiday to Spain during October.

10 (a) Jo and Steve look at information about two towns they might go to.
The tables show the number of hours of sunlight in October for five years.

Town A

2014	2015	2016	2017	2018
199	219	198	195	214

Town B

2014	2015	2016	2017	2018
197	207	204	196	203

Jo says,
"We want to go to the town with the higher **average** number of hours of sunlight."

Use the information in the tables to give one reason why they might choose Town A.
[3 marks]

$\frac{199+219+198+195+214}{5} = \frac{1025}{5} = 205$ Town A.

$\frac{197+207+204+196+203}{5} = \frac{1007}{5} = 201.4$ Town B

Town A has higher average.

The tables show the price of flights each Friday and Saturday during October.

outside the box

UK to Spain	
Friday	Saturday
Oct 4 £82	Oct 5 £99
Oct 11 £72	Oct 12 £79
Oct 18 £102	Oct 19 £99
Oct 25 £65	Oct 26 £65

Spain to UK	
Friday	Saturday
Oct 4 £74	Oct 5 £86
Oct 11 £76	Oct 12 £79
Oct 18 £82	Oct 19 £92
Oct 25 £99	Oct 26 £109

10 (b) Jo and Steve decide to

fly to Spain on a Friday

fly back to the UK on the next Friday.

What is the cheapest possible total cost for the two flights?
Give the date of **each** flight and the **total cost** for Jo and Steve.

[4 marks]

4th and 11th = £82 + £76 = £158

11th and 18th = £72 + £82 = £154 ← Least.

18th and 25th = £102 + £99 = £201

Should fly out on 11th Oct and back on 18th Oct for £154.

7

outside the box

10 (c) You pay £17.99 for luggage weighing up to 15 kg

You pay an extra amount for each additional kilogram of luggage.

Jo's luggage weighs 19 kg

She pays £23.99

Steve's luggage weighs 22 kg

How much does he pay?

[4 marks]

£23.99 − £17.99 = £6.00 extra.

19kg − 15kg = 4kg

£6.00 ÷ 4kg = £1.50 per kg extra.

22 − 15 = 7kg extra.

7 × £1.50 = £10.50 extra.

£17.99 + £10.50 = £28.49

Answer £ 28.49

outside the box

11 **Trip to a concert**

Ian is going to a concert.

He decides to drive to the concert and back.

11 (a) The concert starts at 7.15 pm

Ian will take $1\frac{1}{2}$ hours to drive to the concert.

He wants to arrive at least 10 minutes before the concert starts.

What is the **latest** time he should leave home?

[3 marks]

7.15 - 10 mins = 7.05

7.05 - 1 h 30 m = 5.35pm

Answer 5.35pm

Question 11 continues on the next page

7

11 (b) The tank in Ian's car can hold 11.6 gallons of petrol.
The petrol gauge shows how full the tank is.

Ian's car travels 46 miles for each gallon of petrol.
The concert is 70.3 miles from his home.

Is there enough petrol in the car to get to the concert **and back**?
You **must** show your working.

[4 marks]

Tank shows $\frac{1}{4}$

$11.6 \times \frac{1}{4} = 2.9$ gallons

$2.9 \times 46 = 133.4$ miles

$70.3 \times 2 = 140.6 > 133.4$.

No.

outside the box

11 (c) Here is the price list for food and drink at the concert.

Food		Drink	
Burger	£4.45	Coffee	£2.95
Hot dog	£3.95	Tea	£1.95
Pizza	£5.45	Cola	£2.35
Crisps	90p		

Ian has a student discount card.

He gets 15% discount on the food and drink.

Ian has £6.20

Does he have enough money to buy a hot dog, crisps and a cola?

You **must** show your working.

[4 marks]

£3.95 + £0.90 + £2.35 = £7.20.

£7.20 × 0.85 = £6.12 < £6.20

Yes.

Turn over for the next question

8

12 **Personal finance**

12 (a) You can use these steps to work out the amount of income tax you pay each **month**.

Step 1 Work out monthly salary – 987.5

Step 2 Work out answer to **Step 1** ÷ 5

Cho has a salary of £24 000 per **year**.

Helen has a salary of £1720 per **month**.

How much **more** income tax does Cho pay than Helen each **month**?

[4 marks]

£24000 ÷ 12 = £2000

£2000 £987.50 £1720 £987.50

= £1012.50 = £732.50

£1012.50 ÷ 5 = £202.50 £732.50 ÷ 5 = £146.50

£202.50 - £146.50 = £56.00

Answer £ £56.00

outside the box

12 (b) David has a net monthly income of £1623.48

From this, his expenses each month are

£500 for rent

£420 for food

£340 for other expenses

He saves two thirds of the money he has left.

How much will he save in a year?
Give your answer to the nearest pound.

[5 marks]

£1623.48 − £500.00 − £420.00 − £340.00 =

£363.48.

£363.48 × $\frac{2}{3}$ = £242.32

£242.32 × 12 = £2907.84.

Round: £2908

Answer £ 2908
