Master Functional Skills	Model Solutions (MFS)

Pearson Edexcel Functional Skills

Centre Number	Candidate Number
MFS-UK	FSM01/01

Mathematics

Level 1

13 – 17 March 2017
Time: 1 hour 30 minutes

Paper Reference
FSM01/01

You must have:
Pen, calculator, HB pencil, eraser, ruler graduated in cm and mm, protractor, compasses.

Total Marks
48 /48

My signature confirms that I will not discuss the content of the test with anyone until the end of the 5 day test window.

Signature: Master Functional Skills (MFS)

Instructions

- Use a **black** ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Sign the declaration.
- Answer **all** questions.
- Answer the questions in the spaces provided
  – there may be more space than you need.
- **Calculators may be used.**

Information

- The total mark for this paper is 48.
- The marks for each question are shown in brackets
  – use this as a guide to how much time to spend on each question.
- **You must show clearly how you get your answers because marks will be awarded for your working out.**
- **Check your working and your answers at each stage.**
- **This sign shows where marks will be awarded for showing your check.**

Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and NHS healthcare staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

START LEARNING TODAY AT

MasterFunctionalSkills.co.uk

SECTION A: Market stall

Answer all questions in this section.

Write your answers in the spaces provided.

1 Norman and Siran run a market stall.
They sell fruit and vegetables.

Siran has 7 trays of fruits.
She wants to display them on one shelf of the stall.

She has
pears, cherries, oranges, bananas, strawberries, apples and lemons.

Siran must display them so that
- lemons are next to cherries
- bananas are at one end of the display
- pears are next to oranges
- bananas are **not** next to strawberries.

(a) Write the names of the fruits in the boxes below for Siran.

(2)

You may use the boxes below to practise.

Use the boxes below to show your final answer.

Bananas	Apples	Pears	Oranges	Strawberries	Lemons	Cherries

Criteria Verification: [M1 A1]

- *Bananas are at one end of the display (left end, box 1).*
- *Lemons are next to cherries (boxes 6 and 7).*
- *Pears are next to oranges (boxes 3 and 4).*
- *Bananas are next to apples (NOT next to strawberries).*

DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA

Norman gives regular customers a 15% discount loyalty card.

Mrs Brown has a loyalty card.
She buys fruit costing £4.60

(b) Work out 15% of £4.60

(2)

Use the box below to show clearly how you get your answer.

Step 1: Calculate 15% of £4.60:

Method 1 (Percentage Multiplier):

- 15% = 15 ÷ 100 = 0.15
- **0.15 × £4.60 = £0.69 (or 69p) [M1]**

Method 2 (Build-Up Method):

- 10% of £4.60 = £4.60 ÷ 10 = £0.46
- 5% of £4.60 = £0.46 ÷ 2 = £0.23
- 15% = 10% + 5% = £0.46 + £0.23 = £0.69

Final Answer:

15% of £4.60 = £0.69 (or 69p) [A1]

(Total for Question 1 is 4 marks)

2 Norman sells the same type of potatoes in bags of different weights.

Potatoes	Potatoes
500 g	2 kg
48p	£1.65

Norman says the 500 g bags of potatoes give the best value for money.

(a) Is Norman correct?
Show why you think this.
Show a check of your working. **(5)**

Use the box below to show clearly how you get your answer.

Step 1: Convert weights to consistent units and find scale factor:

- *1 kg = 1000 g -> 2 kg = 2000 g [M1]*
- ***Scale factor = 2000 g ÷ 500 g = 4 bags of 500 g in one 2 kg bag. [M1]***

Step 2: Compare cost for 2000 g (2 kg):

- ***Cost of four 500 g bags = 4 × 48p = 192p = £1.92 [M1]***
- ***Cost of one 2 kg bag = £1.65 (165p)***
- *£1.65 < £1.92 (the 2 kg bag saves £1.92 − £1.65 = £0.27 / 27p).*
  (Alternative: 165p ÷ 4 = 41.25p per 500 g in the 2 kg bag < 48p).

Final Conclusion:

No, Norman is not correct.

The 2 kg bag gives better value (£1.65 vs £1.92 for four 500 g bags). [A1]

Write your check in the box below.

☑

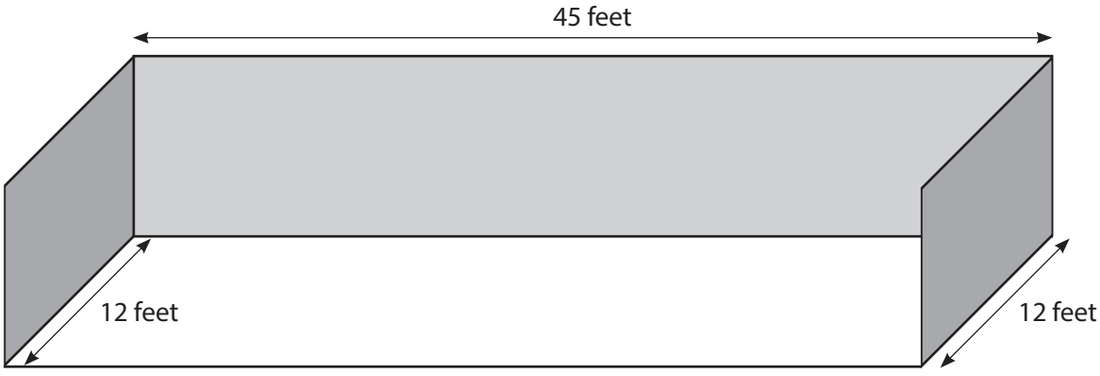

Reverse Process & Rate Check: [B1]

- *Reverse multiplication: £1.92 ÷ 4 = £0.48 (48p per 500 g bag).*
- *Price difference: 192p − 165p = 27p savings by buying the 2 kg bag.*

DO NOT WRITE IN THIS AREA

Norman is going to put mirror strips around 3 sides of his display shelf.
His display shelf has 1 side of length 45 feet and 2 sides each of length 12 feet.

Diagram **not** accurately drawn

The mirror strips are all of length 3 feet.

Norman buys 25 mirror strips.

(b) Does Norman have enough mirror strips to go around all 3 sides of the shelf? **(3)**

Use the box below to show clearly how you get your answer.

Step 1: Calculate total perimeter needed for 3 sides of the shelf:

- Side 1 = 45 feet; Sides 2 and 3 = 12 feet each
- **Total perimeter = 45 + 12 + 12 = 69 feet [M1]**

Step 2: Calculate total length of 25 mirror strips:

- Each strip is 3 feet long
- **Total length available = 25 × 3 = 75 feet [M1]**

(Or strips needed = 69 ÷ 3 = 23 strips needed).

Step 3: Compare available strips with required length:

- **75 feet > 69 feet (or 25 strips > 23 strips).**
- Norman has 75 − 69 = 6 feet extra (2 spare mirror strips).

Final Conclusion:

Yes, Norman has enough mirror strips (has 75 ft / 25 strips, needs 69 ft / 23 strips). [A1]

(Total for Question 2 is 8 marks)

3 Norman sells 200 raffle tickets.
The prize for the raffle is a basket of fruit.

Mrs Brown buys 3 of these raffle tickets.

(a) What is the likelihood of Mrs Brown winning the raffle?

(1)

Tick a box to show your answer.

impossible	unlikely	even	likely	certain
	✓ [B1]			

Norman asks each customer if they would like a home delivery service.
If they do, he needs some information.

He needs to know what time of day they would want a home delivery.
- morning
- afternoon
- evening

How far they live from the market.
- under 5 miles
- 5 – 15 miles
- over 15 miles

Norman needs a data collection sheet by each till.

(b) Design a data collection sheet for Norman.

(3)

SECTION B: Wildlife centre

Answer all questions in this section.

Write your answers in the spaces provided.

4 Dean, Jan and their 2 children are visiting the wildlife centre.
The children are 12 and 5 years old.

Dean sees these admission prices.

Admission prices	
Adult	£12.60
Child (age 4–16)	£6
Group ticket (2 adults and 2 children)	£32

Dean thinks it will be cheaper to buy a group ticket for the visit.

(a) Is Dean correct?
Show why you think this. **(4)**

Use the box below to show clearly how you get your answer.

Step 1: Calculate total cost of individual tickets for the family:

- *2 Adults: 2 × £12.60 = £25.20 [M1]*
- *2 Children (ages 12 and 5): 2 × £6.00 = £12.00 [M1]*
- *Total individual tickets = £25.20 + £12.00 = £37.20 [M1]*

Step 2: Compare with group ticket price (£32.00):

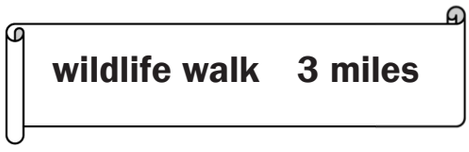

- *Group ticket (2 adults and 2 children) = £32.00*
- *£32.00 < £37.20 (buying a group ticket is cheaper).*
- *Savings = £37.20 − £32.00 = £5.20 saved.*

Final Conclusion:

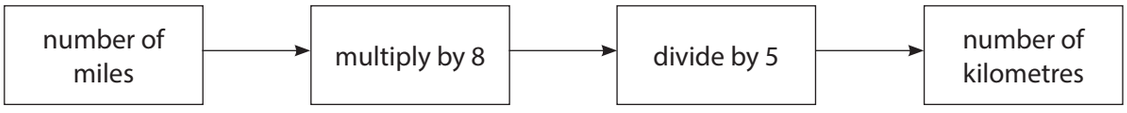

Yes, Dean is correct (group ticket is £32.00, which is £5.20 cheaper than individual tickets at £37.20). [A1]

DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA DO NOT WRITE IN THIS AREA

There is a wildlife walk at the centre.
Dean sees this notice at the start of the walk.

Dean uses this rule to change miles to kilometres.

Dean thinks the walk is 4 kilometres long.

(b) Is the walk 4 kilometres long?
Show a check of your working. **(4)**

Use the box below to show clearly how you get your answer.

Step 1: Convert 3 miles to kilometres using the given rule:

Rule: miles -> multiply by 8 -> divide by 5 -> kilometres

- *3 × 8 = 24 [M1]*
- *24 ÷ 5 = 4.8 km [M1]*

Step 2: Compare actual length with Dean's statement (4 km):

- *4.8 km ≠ 4 km (the walk is 4.8 km, which is 0.8 km longer than 4 km).*

Final Conclusion:

No, the walk is 4.8 kilometres long (not 4 km). [A1]

Write your check in the box below.

☑

Reverse Calculation Check: [B1]

- *Reverse process: 4.8 km × 5 = 24; 24 ÷ 8 = 3 miles (matches walk length).*
- *Reverse check from 4 km: 4 × 5 ÷ 8 = 20 ÷ 8 = 2.5 miles ≠ 3 miles.*

5 Jan wants to plan their visit.
She knows these activities are available.

Activity	Start time	Duration
flamingo talk	11.15	1 hour 15 mins
swan feeding	2.30	$\frac{1}{2}$ hour
lego brick animals workshop	12.00	1 hour
pond dipping	available all day	$\frac{1}{2}$ hour
den building	available all day	$\frac{1}{2}$ hour
bug hunting	available all day	$\frac{1}{2}$ hour
meet the reptiles	available all day	$\frac{1}{2}$ hour

Jan wants to
- arrive at 10.15
- go to the flamingo talk
- go to the swan feeding
- allow 30 minutes for lunch between 12.30 and 1.30
- go to 2 other activities
- be at the cafe by 4 o'clock.

She needs at least 10 minutes to travel between activities.

Write a plan for the visit for Jan.
You must show the start and finish times for each activity. **(5)**

Day Visit Activity Plan for Jan & Family:

Sequential schedule from 10:15 arrival to 16:00 cafe departure [M1 M1 M1 M1 A1]

Time (Start – End)	Activity / Event	Notes & Travel
10:15 – 10:30	Arrival & walk to activity	15 mins travel
10:30 – 11:00	Pond Dipping	30 mins (Activity 1) [M1]
11:00 – 11:15	Travel to Flamingo talk	15 mins travel
11:15 – 12:30	Flamingo Talk	1 hr 15 mins (Fixed) [M1]
12:30 – 12:40	Travel to Lunch	10 mins travel
12:40 – 13:10	Lunch	30 mins (in 12:30–1:30) [M1]
13:10 – 13:25	Travel to Bug Hunting	15 mins travel
13:25 – 13:55	Bug Hunting	30 mins (Activity 2) [M1]
13:55 – 14:30	Travel & rest to Swans	35 mins travel

Afternoon Schedule to Cafe: [A1]

- **14:30 – 15:00: Swan Feeding (starts 2:30 pm, duration 30 mins). [M1]**
- 15:00 – 15:15: Travel to Cafe (15 mins travel time).
- **15:15: Arrive at Cafe (comfortably before the 4:00 pm / 16:00 deadline). [A1]**

Constraints Verified: [M1 M1 M1 M1 A1]

1. Arrive at 10:15: Yes.
2. Flamingo talk (11:15–12:30) & Swan feeding (14:30–15:00) included: Yes.
3. 30 mins lunch between 12:30 and 1:30 (12:40–13:10): Yes.
4. Two other 30-min activities (Pond Dipping & Bug Hunting): Yes.
5. At least 10 minutes travel between all activities: Yes (10 to 35 mins allowed).
6. At cafe by 4:00 pm: Yes (arrives 15:15, 45 minutes ahead of deadline).

6 Dean, Jan and the children visit the cafe.
They see the price list for the drinks.

Tea	£1.30
Coffee	£1.50
Hot chocolate	£1.20

Dean wants to order 4 hot chocolates.

He thinks he will have change from a £5 note.

(a) Will Dean have any change from a £5 note?
Show why you think this. **(2)**

Use the box below to show clearly how you get your answer.

Step 1: Calculate total cost of 4 hot chocolates:

- Hot chocolate price = £1.20 each
- **Total cost = 4 × £1.20 = £4.80 [M1]**

Step 2: Calculate change from a £5 note:

- Amount paid = £5.00
- **Change = £5.00 − £4.80 = £0.20 (or 20p) [M1]**

Final Conclusion:

Yes, Dean will have change.

He will have £0.20 (20p) change from a £5 note. [A1]

SECTION C: Dining room

Answer all questions in this section.

Write your answers in the spaces provided.

7 Rashid is going to fit new flooring in his dining room.

He wants to cover the floor with carpet tiles.

The diagram shows a plan of the floor.

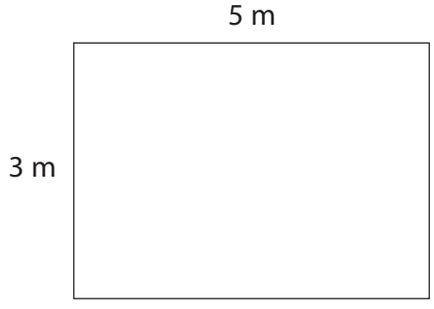

Diagram **not** accurately drawn

Rashid knows that

- there are 10 tiles in a pack
- 4 carpet tiles will cover 1 m^2 of the floor.

Rashid buys 7 packs of carpet tiles.

(a) Does Rashid have enough tiles to cover the floor?
Show why you think this. **(4)**

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

Use the box below to show clearly how you get your answer.

Step 1: Calculate the total area of the dining room floor:

- Floor dimensions: length = 5 m, width = 3 m
- **Floor area = 5 m × 3 m = 15 m² [M1]**

Step 2: Calculate the number of carpet tiles needed:

- 4 carpet tiles cover 1 m² of floor
- **Total tiles needed = 15 m² × 4 = 60 carpet tiles [M1]**

Step 3: Calculate the total number of tiles Rashid bought:

- Rashid bought 7 packs of tiles
- 10 tiles in each pack
- **Total tiles bought = 7 × 10 = 70 carpet tiles [M1]**

Step 4: Compare tiles bought with tiles needed:

- **70 tiles > 60 tiles (Rashid has more tiles than required).**
- Spare tiles = 70 − 60 = 10 spare tiles (1 full pack extra).

(Alternative check: 60 tiles ÷ 10 = 6 packs needed; 7 packs > 6 packs).

Final Conclusion:

Yes, Rashid has enough tiles.

He needs 60 tiles and has 70 tiles (10 spare tiles / 1 extra pack). [A1]

Rashid is going to paint the walls of his dining room light green.
He finds this information in a DIY shop.

To make light green paint

mix
1 litre of blue paint
with
3 litres of yellow paint

Rashid is going to use 2 litres of blue paint to make light green paint.

(b) How much yellow paint does Rashid need to use?
Show a check of your working. **(3)**

Use the box below to show clearly how you get your answer.

Step 1: Identify the ratio of blue paint to yellow paint:

- Ratio (Blue : Yellow) = 1 : 3
- For every 1 litre of blue paint, 3 litres of yellow paint are needed.

Step 2: Calculate yellow paint needed for 2 litres of blue paint:

- **Yellow paint = 2 × 3 = 6 litres [M1]**

Final Answer:

Rashid needs to use 6 litres of yellow paint [A1]

Write your check in the box below.

☑

Reverse Ratio Calculation Check: [B1]

- Reverse process: 6 litres ÷ 3 = 2 litres of blue paint (matches blue paint used).
- Ratio check: 2 litres : 6 litres = 1 : 3 (confirms correct proportion).

9 Rashid sees the dining table and the display unit he wants in 3 different stores.
Each store has a different offer for the table and the display unit.

House of Style

table and display unit

£95 deposit

and

12 monthly payments of £32

free delivery

Dining Outlet

buy today, pay $\frac{1}{3}$ normal price

table and display unit

normal price £1545

free delivery

Naveed's Dining Store

table	£199
display unit	£280
total delivery charge	£20

Rashid has a budget of £500

Which stores can Rashid afford to buy the table and the display unit from?
Show why you think this. **(5)**

DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA
DO NOT WRITE IN THIS AREA

Use the box below to show clearly how you get your answer.

Step 1: Calculate total cost at Dining Outlet (Budget: £500):

- Special offer: Pay 1/3 of normal price (£1545), free delivery.
- **Cost = 1545 ÷ 3 = £515.00 [M1]**
- **Compare with £500 budget: £515.00 > £500.00 (Over budget by £15).**
  -> Cannot afford Dining Outlet.

Step 2: Calculate total cost at House of Style:

- Deal: £95 deposit + 12 monthly payments of £32, free delivery.
- **12 monthly payments = 12 × £32 = £384.00 [M1]**
- **Total cost = £95.00 + £384.00 = £479.00 [M1]**
- **Compare with £500 budget: £479.00 < £500.00 (Under budget by £21).**
  -> CAN afford House of Style.

Step 3: Calculate total cost at Naveed's Dining Store:

- Items: Table £199 + Display Unit £280 + Delivery £20
- **Total cost = £199 + £280 + £20 = £499.00 [M1]**
- **Compare with £500 budget: £499.00 < £500.00 (Under budget by £1).**
  -> CAN afford Naveed's Dining Store.

Step 4: Summary Comparison of All 3 Stores:

- Dining Outlet: £515.00 (Too expensive, exceeds £500 by £15)
- House of Style: £479.00 (Within budget, £21 remaining)
- Naveed's Dining Store: £499.00 (Within budget, £1 remaining)

Final Conclusion & Decision: [A1]

Rashid can afford to buy from:

1. House of Style (£479.00)

2. Naveed's Dining Store (£499.00) [A1]
