MasterFunctionalSkills.co.uk · NCFE Maths Level 1 Specialist

NCFE Level 1 Functional Skills Qualification in Mathematics (603/5055/6)

Paper number:	P001253
Section B:	Calculator Test

Assessment window: Monday 14 October 2019 – Friday 18 October 2019
Time allowed: 1 hour 30 minutes

Learner instructions

- Answer **all** questions.
- Read each question carefully.
- Write your answers in the spaces provided.
- Show your working, as marks may be awarded for working.
- State units in your answers, where appropriate.
- Check your work.

Learner information

- Section B contains **Activities 2, 3** and **4**.
- The maximum mark for this section is **45**.
- The marks available for **each** question are shown in brackets.

Resources

You will need a:

- pen, with black or blue ink
- pencil and eraser
- 30 cm ruler
- protractor
- calculator.

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and NHS healthcare staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Community nurse

2 (a) Asmita is a community nurse.

Each week she runs a drop-in clinic where people can have a check-up. People arrive at the clinic and wait until it is their turn to be seen.

At one clinic Asmita asks each person to estimate how many minutes they have had to wait.

The results are shown below.

2	15	18	32	37	8	25	13
31	32	3	5	6	7	4	12
12	14	11	35	28	11	8	12

Use this template to create a grouped frequency table for this data.

[4 marks]

Minutes	Frequency
0 - 9	8
10 - 19	9
20 - 29	2
30 - 39	5

Please turn over

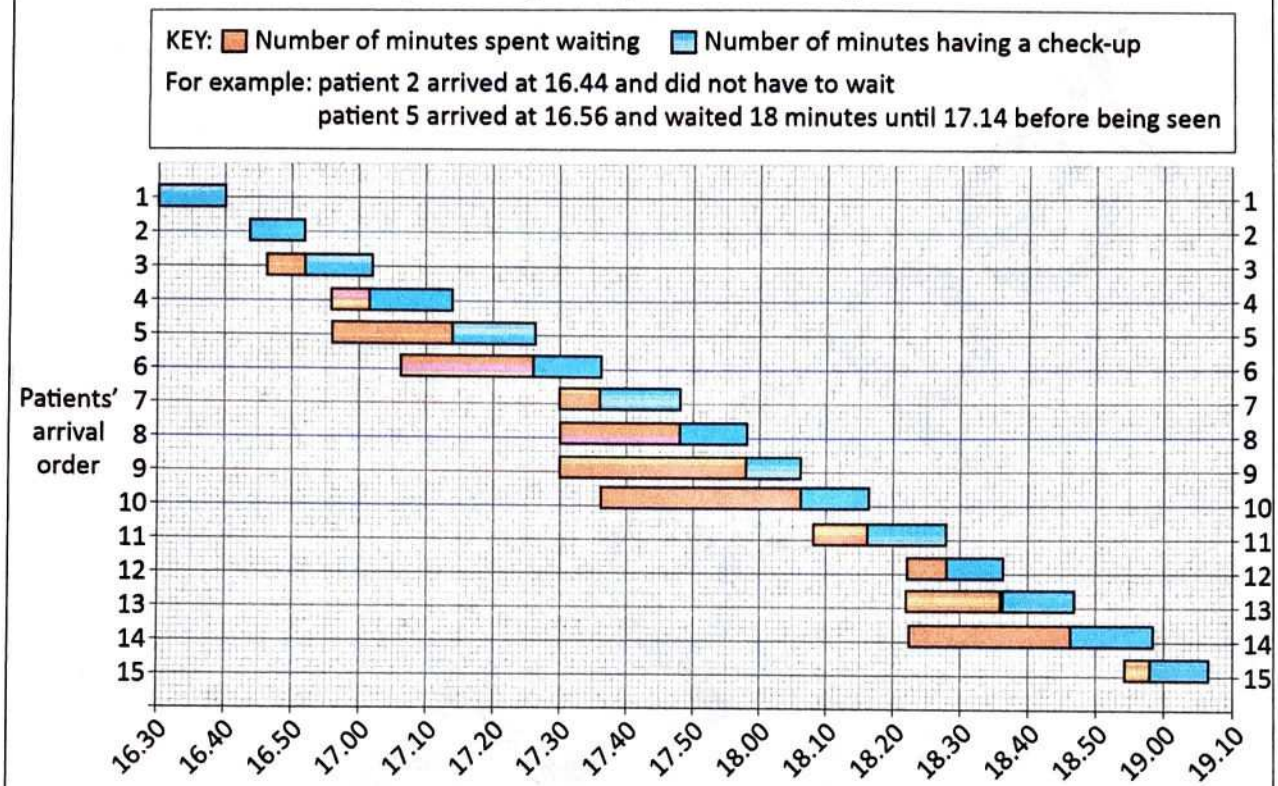

Examine

that each person arrives is recor

Asmita also writes down the times that each person's check-up begins and ends.

She uses this information to draw a graph.

Graph showing waiting times and check up times for clinic

Asmita says,

"40% of people either waited no time or waited less than 10 minutes before the start of their check-up."

Is Asmita correct?

Show your working.

[3 marks]

15 patients.

40% of 15 = 0.4 × 15 = 6.

But 8 patients waited no time or less than 10 mins.

So Asmita is wrong.

Your answer: No.

use only

Practice Paper

Please turn over

Examine

She drives from Skegness to Candlesby to visit one of her patients.

Asmita has a map with scale 1 cm : 2 km

The distance on the map between Skegness and Candlesby is 6.5 cm

Asmita can claim 28p per kilometre for fuel.

Complete the travel expense form below for Asmita's **one-way** journey from Skegness to Candlesby.

[3 marks]

Your answer:

Journey	Distance (km)	Pence per km	Total (£)
Skegness to Candlesby	13	28	

$6.5 \times 2 = 13$ km

$13 \times 28 = 364p = £3.64$

he road in Candlesby.

The car is facing north west.

When she has finished the visit, Asmita turns her car round ready to drive south east.

Through how many degrees has the car turned?

[1 mark]

Your answer: 180 °

2 (e) Asmita is concerned about how much fuel she is using.

The manufacturer says that the car has:

- a 52-litre fuel tank
- fuel consumption of 17 km per litre.

Asmita finds that she uses one full tank of fuel to drive 800 km

Is Asmita's fuel consumption as good as the manufacturer claims?

Show how you decide.

[2 marks]

$52 \times 17 = 884 > 800$

No.

Your answer: No.

Please turn over

Examine

(c) Asmita puts 40.2 litres of fuel in her car.

The fuel costs 130.1 pence per litre.

She is charged £52.70 for the fuel.

By rounding **litres of fuel** and **cost per litre** to the nearest whole numbers, show how Asmita could check that she has been charged about the right amount.

[2 marks]

$40.2 \simeq 40$

$130.1 \simeq 130$

$40 \times 130 = 5200p$

$= £52$

$\simeq £52.70$

Your answer:

[Total marks: 15]

3 (a) Tomas is an apprentice gardener.
He is asked to make a flowerbed to look like the French flag.

The flowerbed is a rectangle 225 cm long and 150 cm wide.

Tomas is going to put paving round the perimeter of the flowerbed.

Calculate the perimeter of the flowerbed in metres.

[2 marks]

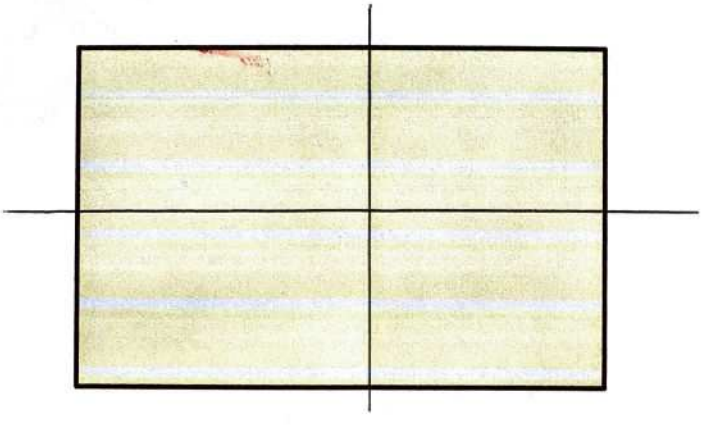

$2 \times 225 + 2 \times 150 = 750\text{cm}$

$= 7.5\text{m}$

Your answer: 7.5 m

3 (b) Draw in all the lines of symmetry on the flowerbed.

[1 mark]

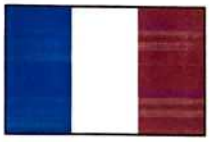

Please turn over

Examir

ıd blue flowers to make the flowerb

French flag.

- The flowerbed is a 225 cm by 150 cm rectangle.
- The 3 stripes need to be of equal width.
- Tomas needs one plant for every 12 cm^2 of flowerbed.

How many red plants will Tomas need?

[4 marks]

$225 \times 150 = 33750\ cm^2$

$33750 \div 3 = 11250\ cm^2$.

$11250 \div 12 = 937.5$.

Tomas needs 938 plants.

Your answer: 938

...ng plants for a different project.

The table shows the costs per tray for different colours.

Flower colour	Cost per tray
Blue	£42.98
Red	£31.56
White	£33.98
Yellow	£42.99
Pink	£35.75
Purple	£28.50

Calculate the mean cost per tray.

[2 marks]

6 trays

$$\frac{£42.98 + £31.56 + £33.98 + £42.99 + £35.75 + £28.50}{6}$$

$= £35.96$

Your answer: £ 35.96

Examine

each colour.

There are 310 plants in each tray.

Tomas says, "The mean cost per plant is over 10 pence."

Is Tomas correct?

Explain your answer.

[2 marks]

$310 \times 10 = 3100p$

$= £31 < £35.96$.

So Tomas is correct.

Your answer: Yes.

Question Paper

measures 30 cm by 50 cm by 4 cm

How many litres of compost would be required to fill one tray?

Use the conversion 1 cm^3 = 1 ml

[2 marks]

$30 \times 50 \times 4 = 6000 cm^3$.

$6000 cm^3 = 6000 ml$.

$6000 \div 1000 = 6$ Litres

Your answer: 6 Litres

Question Paper

Examir

compost in the ratio 1 : 4

He mixes $4\frac{1}{5}$ litres of grit with $16\frac{4}{5}$ litres of compost.

Are these numbers in the correct ratio?

Show how you decide.

[2 marks]

$4\frac{1}{5} \times 4 = 16\frac{4}{5}$

Yes.

Your answer: Yes.

[Total marks: 15]

ise only

4 (a) The world population is about 7726.5 million.

About one in nine people in the world experience extreme hunger.

Use this information to estimate how many millions of people in the world experience extreme hunger.

Give your answer to the nearest million.

[2 marks]

$7726.5 \times \frac{1}{9} = 849.9$,

850 million

Your answer: 850 **million**

Question Paper

Please turn over

Examin

aid organisations have to decide
first.

One method they use is to measure, in mm, the distance round each person's mid upper arm.

These are the mid upper arm measurements of 20 people.

170	172	158	175	156
154	162	151	172	186
158	173	190	174	169
178	175	157	188	189

What is the range of the measurements?

[1 mark]

$190 - 151 = 39$

Your answer: 39 mm

4 (c) What is the probability that one of these people chosen at random has a mid upper arm measurement of less than 160 mm?

Give your answer as a decimal.

[2 marks]

6 less than 160 mm
out of 20 total.

$\frac{6}{20} = 0.3$

Your answer: 0.3

(...) ...ations use is to calculate Body Ma... ...

To find the BMI:

Step 1: calculate height × height

Step 2: divide weight by your answer to Step 1

Height must be in metres and weight in kilograms.

Calculate the BMI for a person who has:

- weight 64 kg
- height 1.60 m

[3 marks]

Step 1: $1.60 \times 1.60 = 2.56$

Step 2: $64 \div 2.56 = 25$

Your answer: 25

use only

Question Paper

Examiner

4 (e)

20% of the people in village A are malnourished.
15% of the people in village B are malnourished.

Village A has a population of 300
Village B has a population of 440

Which village has the higher number of people who are malnourished?

Show how you decide.

[2 marks]

$300 \times 0.2 = 60$
$440 \times 0.15 = 66$

$66 > 60$
Village B

Your answer: B

4 (f) A newspaper reports that the UK wastes one million tons of food each year which could be used to feed hungry people.

Write one million in figures.

[1 mark]

Your answer: 1 000 000

n a website about food wastage.

What fraction of food wastage came from supermarkets?

Give your answer in its lowest terms.

[2 marks]

$15\% = \frac{15}{100} = \frac{3}{20}$

Your answer: $\frac{3}{20}$

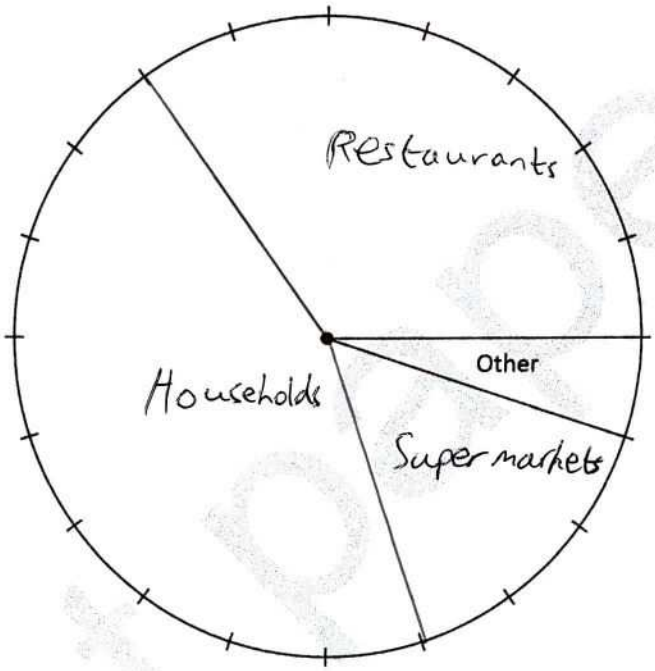

Please turn over

od wastage given in **4 (g)** to compl

below.

[2 marks]

Who's wasting the most food?

[Total marks: 15]

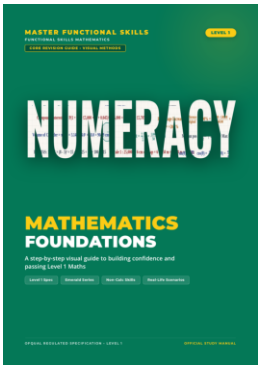

This is the end of the external assessment.
