NCFE Level 2 Functional Skills Qualification in Mathematics (603/5060/X)

Paper number:	P001372
Section A:	Non-calculator Test

Assessment window: Monday 7 September 2020 – Friday 11 September 2020
Time allowed: 30 minutes

Learner instructions

- Answer **all** questions.
- Read each question carefully.
- Write your answers in the spaces provided.
- Show your working, as marks may be awarded for working.
- State units in your answers, where appropriate.
- Check your work.

Learner information

- Section A contains **Activity 1** only.
- The maximum mark for this section is **15**.
- The marks available for **each** question are shown in brackets.

To be completed by the examiner		Mark
A	Activity 1	/ 15
B	Activity 2	/ 15
	Activity 3	/ 15
	Activity 4	/ 15
TOTAL MARK		/ 60

Resources

You will need a:

- pen, with black or blue ink
- pencil and eraser
- 30 cm ruler
- protractor.

If extra pages are used, please make sure your name and centre name are o

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and NHS healthcare staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

PAST PAPER

Activity 1: Building blocks

1 (a) Noah's hobby is building models using plastic blocks.

He is making a model of a town.

Noah has opened a new model building set.

Inside is a large bag of coloured blocks:

Colour	Number
White	75
Red	276
Yellow	45
Green	50
Blue	154

What percentage of the blocks are red?

[3 marks]

Total = 75 + 276 + 45 + 50 + 154

= 600

(276 ÷ 600) x 100

= 46 %.

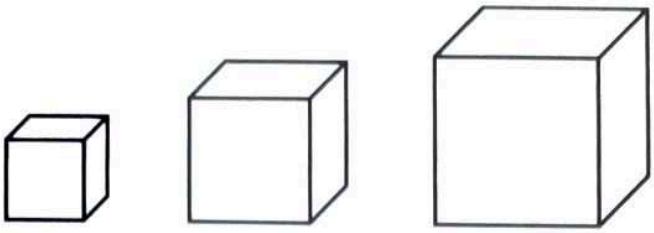

Your answer: 46 %

Please turn over

Examiner u

1 (b) Noah has two bags of blocks.

Each bag contains the same number of small, medium and large blocks.

small medium large

Noah picks one block from each bag at random.

The table below shows the possible outcomes, which are all equally likely:

		1st bag		
		Small (S)	**Medium (M)**	**Large (L)**
2nd bag	**Small (S)**	SS	MS	LS
	Medium (M)	SM	MM	LM
	Large (L)	SL	ML	LL

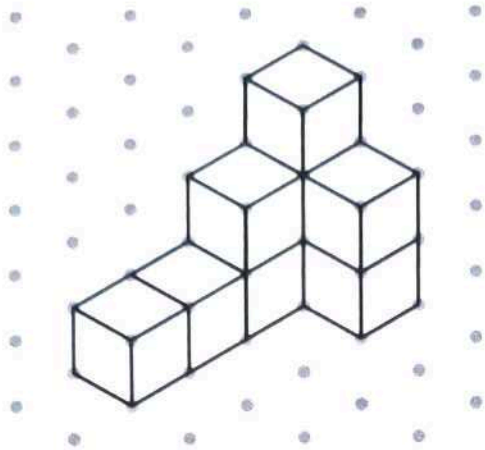

What is the probability that Noah picks two small blocks?

[1 mark]

Your answer: 1/9

1 (c) Noah has started to build a wall using cubes.

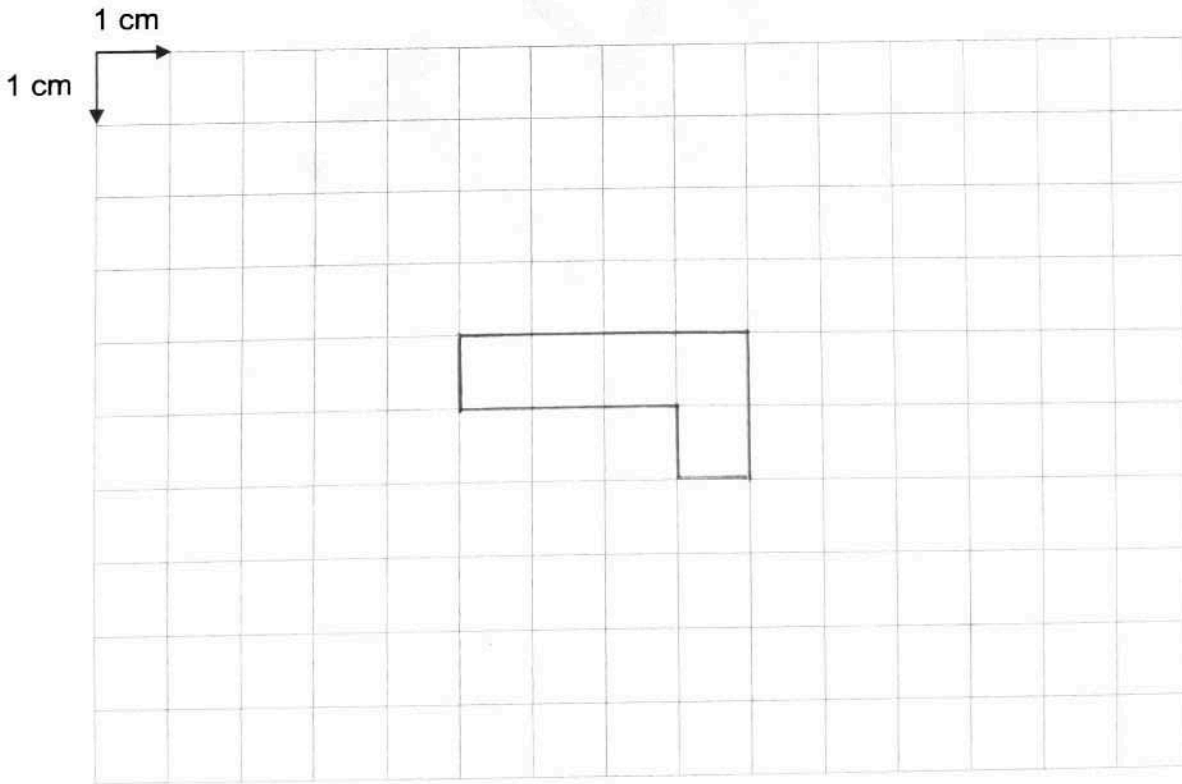

This is the first diagram in the instructions:

The length of each side of the cubes is 1 cm

On the grid below, draw the plan view of the wall once Noah has built this part.

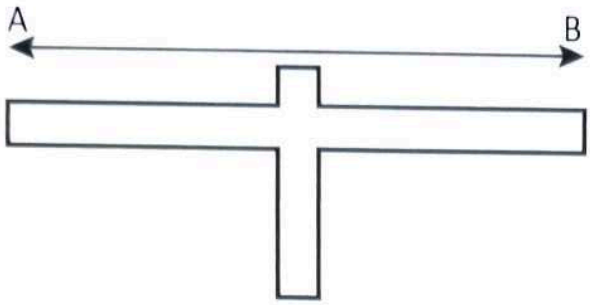

[1 mark]

Please turn over

Examiner

(c) A statue is 20 m high, and 54 m wide (from A to B).

Not drawn accurately

Noah is making a scale model of this statue.

Noah's model statue is 5 cm high.

How wide is Noah's model statue?

[2 marks]

$5 \times (54 \div 20)$

$= 13.5\text{cm}$

Your answer: 13.5 **cm**

Please turn over for the next question.

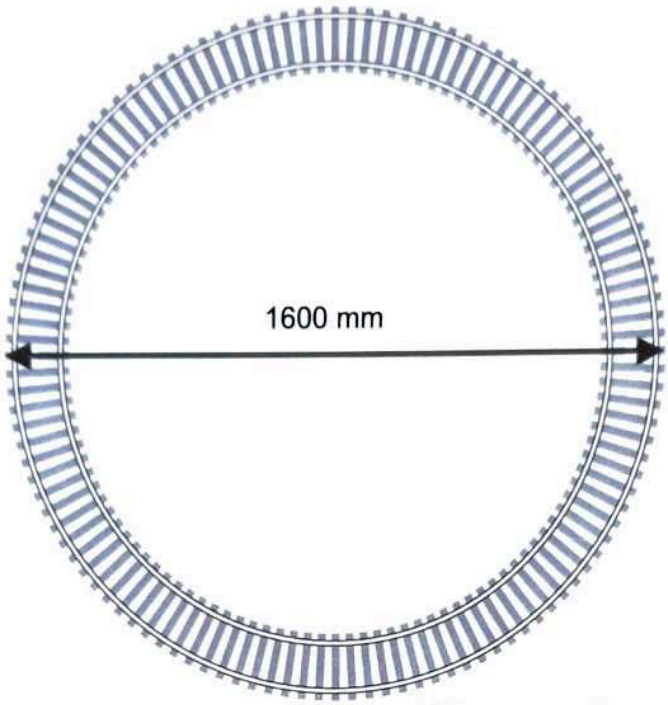

MASTERPAPERS

Examiner us

1 (e) Noah is making a circular train track.

He has some curved pieces of track.

When he puts them together, the curved pieces will make a circular track with diameter 1600 mm

Not drawn accurately

The outside length of each curved section is 157 mm

How many curved pieces does Noah need to make the whole circle?

Use $\pi = 3.14$

[3 marks]

circumference = πd
= $\pi (1600)$
= 3.14×1600
= 5024

find number of curved pieces:

$5024 \div 157 = 32$

Your answer: 32 **curved pieces**

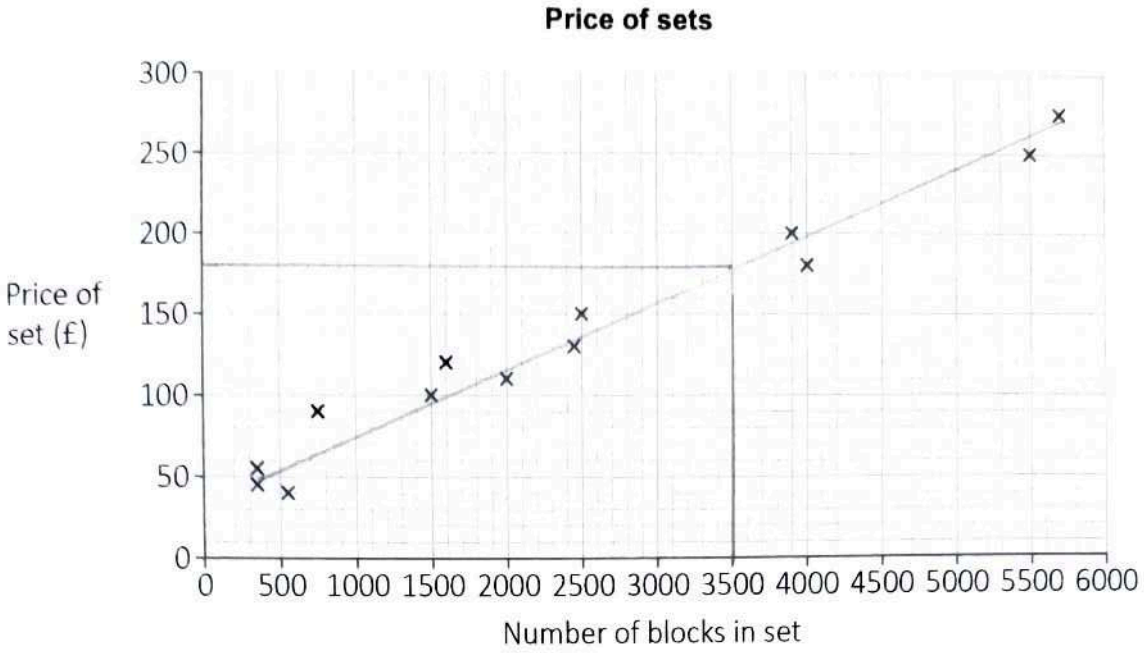

er use only

Please turn over

Examiner u

1 (f) Model building blocks are sold in sets.

The scatter diagram shows information about more sets that Noah sees for sale:

Use the scatter diagram to estimate the price of a set containing 3500 blocks.

[2 marks]

Your answer: £ 180

1 (g) Noah sells a bundle of spare blocks online.

The bundle weighs 3120 g

There are six types of block in the bundle:

Block type	Weight of each block (g)
A	2.7
B	4.5
C	7.4
D	2.9
E	3.5
F	9.0

Use the median weight to work out an estimate of the **number** of blocks in the bundle.

[3 marks]

In order:

2.7 2.9 (3.5 4.5) 7.4 9.0

$\frac{3.5 + 4.5}{2} = \frac{8}{2} = 4$

3120g ÷ 4 = 780 blocks

Your answer: 780 **blocks**

[Total marks: 15]

This is the end of Section A.
