Version Control	
v 1.0	New document September 2019
v 1.1	Reviewed March 2023 to update wording. No substantive changes.
v 2.0	May 2025 full review and rebrand. Amended subject content to meet DfE updates (no material changes). Scheduling and results timeframes updated.

About the Qualification

Title	Open Awards Level 1 Functional Skills Qualification in Mathematics
Qualification Accreditation Number	603/4805/7
Sector	14.1 Foundations for Learning and Life
Level	Level One (1)
Funding	Please click here for more information
Pricing Information	Please click here for more information
Review Date	31/07/2031

Purpose	Prepare for Further Learning or Training and/or Develop Knowledge and/or Skills in a Subject Area
Sub-Purpose	Develop Knowledge and/or Skills in a Subject Area

Total Qualification Time/Guided Learning	
Total Qualification Time (hours)	60
Guided Learning (hours)	55

Age Range and Restrictions	
Pre-16	✓
16 – 18	✓
18+	✓
Any other restrictions specific to the qualification(s)	None

About Functional Skills Qualifications

Functional Skills qualifications should provide reliable evidence of a learner's achievements against demanding content that is relevant to the workplace. They need to provide assessment of learners' underpinning knowledge, as well as their ability to apply this in different contexts. They also need to provide a foundation for progression into employment or further technical education and develop skills for everyday life. In some contexts, Functional Skills qualifications will also play a part in the Government's accountability systems.

A key aim for Functional Skills Mathematics specifications is to enable the learner to demonstrate a sound grasp of mathematical skills at the appropriate level and be able to apply mathematical thinking effectively to solve problems successfully in the workplace and in other real-life situations.

Purpose of Functional Skills Mathematics for Level 1 and Level 2: a qualification for work, study and life.

Achievement of the qualification demonstrates a sound grasp of mathematical skills at the appropriate level and the ability to apply mathematical thinking effectively to solve problems successfully in the workplace and in other real-life situations.

Achievement of the Qualification

To achieve this qualification, learners must successfully pass at Level 1:

- One externally set and marked assessment in Mathematics (including a calculator and non-calculator section).

A learner is awarded a 'pass' or 'fail' result for the qualification.

Any Specified Entry Requirements

There are no restrictions on learner entry to these qualifications. However, it is recommended that learners undertake a comprehensive initial diagnostic assessment to ensure that they are following an appropriate learning programme leading to a summative assessment.

Assessment Method Summary

Achievement of the Functional Skills Mathematics qualifications is through successful completion of a task-based assessment at Level 1 which are:

- Externally-set and externally marked assessment paper, including a calculator and non-calculator section.

Sample assessments are available on the Portal and can be accessed by the Assessment Administrator contact at your provider. Sample assessments cover both paper-based and on-screen modes of delivery. In addition, there are practice mathematics questions for the functionality utilised for on-screen assessments and demonstration videos of how to use this functionality. Providers must ensure that learners have utilised these question types in advance of sitting an on-screen assessment to ensure they are familiar with the assessment platform and potential question types.

The assessment tasks are based on real-life contexts. Contexts may be based on:

- Work and education
- Community, citizenship and environment
- Family, home and social issues

The amount of time allocated for the assessment is 2 hours.

The assessment is split into the following sections:

- Section A: 30 minutes (non-calculator) – worth 25% of the marks
- Section B: 1 hour and 30 minutes (calculator) – worth 75% of the marks

Both parts must be completed in one assessment session.

All assessments must be taken under controlled assessment conditions. Further guidance can be found in Open Awards' Instructions for Conducting Controlled Assessments or Open Awards' Instructions for Conducting Controlled Assessments Remotely available via the Portal.

The assessment can be carried out by either on-screen or by paper-based modes of delivery.

On-screen assessments are delivered on demand via the XAMS assessment system.

Paper-based assessments are printed by Open Awards and sent to the provider in line with the published assessment calendar.

Completed paper-based assessment papers must be returned according to the instructions provided by Open Awards within the specified timeframe.

All assessments are marked within the XAMS assessment platform by Open Awards markers, and results are released within the XAMS assessment platform.

The use of other electronic devices, including phones and smart-watches are not allowed at any time during the assessment.

When completing the non-calculator section, learners will not be allowed access to external aids in relation to calculations, including traditional calculators and smartphones, watches and other electronic devices.

When completing the calculator section, learners will be allowed to make use of a non-scientific calculator (for paper-based and on-screen assessments) or the onscreen calculator (on-screen assessment).

Reasonable adjustments and special considerations may be required for individual learners to enable them to undertake assessments fairly. Please see our Reasonable Adjustments and Special Considerations Policy available on the Portal for details on how to apply for and implement these measures.

Subject Content

Open Awards Level 1 Functional Skills Qualification in Mathematics supports learners to apply their mathematical skills, through appropriate reasoning and decision making, to solve realistic problems of increasing complexity.

Functional Skills qualifications at Level 1 will:

- indicate that students can demonstrate, through appropriate reasoning and decision-making, their ability:
    - in mathematical skills
    - to apply these to solve realistic problems of increasing complexity
- introduce students to new areas of life and work so that they are exposed to concepts and problems that, while not of immediate concern, may be of value later
- enable students to develop an appreciation of the role played by maths at work and in life generally

Scope of study

The scope of study (SoS) for Level 1 Mathematics, including the SoS references from the DfE Subject Content is included below:

Use of number and the number system: Learners at Level 1 are expected to be able to:

- count in steps of various sizes, including negative numbers
- read, write and understand positive whole numbers to one million
- order and compare:
    - whole numbers of any size
    - fractions
    - ratios
    - decimals
- recognise the effect of multiplying and dividing by powers of:
    - 10
    - 100
    - 1000
- identify, compare and extend a range of:
    - numerical
    - spatial patterns
- use, understand and calculate with:
    - fractions
    - decimals
    - percentages
- calculate simple interest.

Level 1 - Using numbers and the number system (*whole numbers, fractions, decimals and percentages)*	
SoS1. Read, write, order and compare large numbers (up to one million)	SoS2. Recognise and use positive and negative numbers
SoS3. Multiply and divide whole numbers and decimals by 10, 100, and 1000	SoS4. Use multiplication facts and make connections with division facts
SoS5. Use simple formulae expressed in words for one and two-step operations	SoS6. Calculate the squares of one-digit and two-digit numbers
SoS7. Follow the order of precedence of operators	SoS8. Read, write, order and compare common fractions and mixed numbers
SoS9. Find fractions of whole number quantities and measurements	SoS10. Read, write, order and compare decimals up to three decimal places
SoS11. Add, subtract, multiply and divide decimals up to two decimal places	SoS12. Approximate by rounding to a whole number and to one or two decimal places
SoS13. Read, write, order and compare percentages in whole numbers	SoS14. Calculate percentages of quantities, including simple percentage increases and decreases by 5% and multiples thereof
SoS15. Estimate answers to calculations using fractions and decimals	SoS16. Recognise and calculate equivalences between common fractions, percentages and decimals
SoS17. Work with simple ratio and direct proportions	

Use of common measures, shape and space:

Learners at Level 1 are expected to be able to:

- work out simple relationships between common units of measurement to define quantities
- use mathematical terms for position and direction
- apply and use calculations with common measures, including:
    - money
    - time
    - length
    - weight
    - capacity
- visualise, draw and describe 2-D and 3-D shapes
- use the properties of 2-D shapes in calculations

Level 1 - using common measures, shape and space	
SoS18. Calculate simple interest in multiples of 5% on amounts of money	SoS19. Calculate discounts in multiples of 5% on amounts of money
SoS20. Convert between units of length, weight, capacity, money and time	SoS21. Recognise and make use of simple scales on maps and drawings
SoS22. Calculate the area and perimeter of simple shapes including those that are made up of a combination of rectangles	SoS23. Calculate the volumes of cubes and cuboids
SoS24. Draw 2-D shapes and demonstrate an understanding of line symmetry and knowledge of the relative size of angles	SoS25. Interpret plans, elevations and nets of simple 3-D shapes
SoS26. Use angles when describing position and direction, and measure angles in degrees	

Handle information and data: learners at Level 1 are expected to be able to:

- select, construct and interpret a range of statistical diagrams in various contexts
- select and use methods and forms to present and describe outcomes
- extract and interpret information from:
    - tables
    - diagrams
    - charts
    - graphs
- apply simple statistics
- recognise features of charts to summarise and compare sets of data
- recognise and use the probability scale and interpret probabilities

Level 1 - Handling information and data	
SoS27. Represent discrete data in tables, diagrams and charts including pie charts, bar charts and line graphs	SoS28. Group discrete data and represent grouped data graphically
SoS29. Find the mean and range of a set of quantities	SoS30. Understand probability on a scale from 0 (impossible) to 1 (certain) and use probabilities to compare the likelihood of events
SoS31. Use equally likely outcomes to find the probabilities of simple events and express them as fractions	

Solving mathematical problems and decision making

Students at Level 1 are expected to be able to use the knowledge and skills set out in the subject content section to:

- recognise a straightforward problem
- obtain a solution or solutions to a straightforward problem

A straightforward problem is one that requires students to work through either:

- one step or process
- more than one connected step or process

Individual problems are based on the knowledge and/or skills from the mathematical content areas:

- number and the number system
- common measures, shape and space
- information and data

At Level 1, it is expected that the student will be able to address individual problems, some of which draw upon a combination of any 2 of the mathematical content areas and require students to make connections between those content areas.

Learners are expected to be able to:

- read, understand and use mathematical information and terms appropriate to Level 1
- address individual problems as described
- use knowledge and understanding to a required level of accuracy
- check the sense and reasonableness of answers
- analyse and interpret results in the context of the original problem
- present results with appropriate explanation and interpretation, demonstrating simple reasoning to support the process, and show consistency with the evidence presented

The context of individual problems at this level will require some comprehension in order for the student to be able to independently identify and carry out an appropriate mathematical approach.

Attributes, of which one or more may be present in a single task to consider it as problem solving, are listed below:

A. Tasks that have little or no scaffolding: there is little guidance given to the learner beyond a start point and a finish point. Questions do not explicitly state the mathematical process(es) required for the solution.
B. Tasks that provide for multiple representations, such as the use of a sketch or a diagram as well as calculations.
C. The information is not given in mathematical form or in mathematical language; or there is a need for the results to be interpreted or methods evaluated, for example, in a real-world context.
D. Tasks have a variety of techniques that could be used.
E. The solution requires understanding of the processes involved rather than just application of the techniques.
F. The task requires two or more mathematical processes or may require different parts of mathematics to be brought together to reach a solution.

Delivering this Qualification

Becoming a Provider

To deliver this qualification you must be a recognised Open Awards Provider. For more information, head to our website or contact the team on 0151 494 2072.

How to Deliver

To request to deliver this qualification, please login to the Portal and then click on 'Tracking' and 'Initiate a Workflow'. You will then need to select 'Apply to Deliver Functional Skills'.

For support with this process, please see the following document in the Portal 'Provider Portal Guidance – Qualification Approval' or contact the team on customerservices@openawards.org.uk or 0151 494 2072.

Registering Learners

Once you are ready to deliver this qualification, you will need to register your learners in line with the timescales below:

Short courses (15 weeks or less) within 25 working days of the course start date.
Long courses (over 15 weeks) within 60 working days of the course start date.

You will need to register your learners via the Portal.

Please ensure all learner details are provided to avoid delays to your learner registrations being processed. Learner Registrations Forms can be submitted by the Provider Admin Contact. If an end-date for the course is not provided, the Functional Skills registration will last for a period of two years.

Once your learners are registered, you will be able to schedule assessments via the XAMS assessment platform.

Identification and Learner Authenticity Identification Requirements

Providers must have systems in place to ensure that an individual completing an assessment is the person they are claiming to be.

It is a provider's responsibility to confirm the identity of a learner as part of its registration process. You may do this by requesting sufficient personal data and a unique learner number (ULN) to ensure the learner can be clearly and uniquely identified.

The use of a ULN is a mandatory requirement for publicly funded education and when submitting Individualised Learner Record (ILR) returns.

Providers are required to ensure that each learner's identification is checked and that the type of identification provided by each learner is recorded before assessments are undertaken. Open Awards' Quality Assurance team will check this record during quality assurance monitoring activities.

The following are permitted proof of a learner's Identity:

- a valid passport (any nationality);
- signed UK photo card driving licence;
- valid warrant card issued by HM Forces or the Police;
- other photographic ID card, e.g. employee ID card (must be current employer), student ID card, travel card; OR
- UK biometric residence permit.

If an assessment is taking place in a learner's place of work and a learner is unable to supply any of the above, authentication of a learner's identity by a third-party representative, for example his/her line manager or a member of his/her workplace Human Resources Team can be accepted.

Scheduling Assessments

Learners must be registered in accordance with Open Awards policy prior to scheduling learners for a Functional Skills assessment.

Once the learner has been registered, their assessments can be scheduled via the XAMS assessment platform.

Providers can set their own dates/ times for assessments.

For on-screen assessments, providers can schedule up to two (2) hours before the set assessment date/time. The assessment will be available for the learner to sit at any time on the scheduled date via the XAMS assessment platform (i.e., 12 hours before or after the scheduled time).

For paper-based assessments, providers can schedule up to 10 working days before the set assessment date/time. The paper-based assessment can be sat on any day, as long as there has been 10 working days notification of the assessment. Paper-based assessments will be sent to the provider by Open Awards a minimum of 48 hours before the scheduled assessment.

Once the papers have been sat, providers are required to return them via Tracked Delivery with signature (24 hours) to Open Awards Head Office within 24 hours. This includes any papers that have not been sat by a learner for any reason.

A calendar of results dates for paper-based assessments is published at the beginning of each academic year on our website.

Please see our XAMS User Guidance on the Portal for further information.

Once scheduled, you cannot change the date or time of the assessment. Providers can, however, withdraw the learner from the scheduled assessment and re-schedule within the timescales outlined above.

Quality Assurance and Standardisation

Delivery of this qualification must be done so in accordance with Ofqual regulatory guidelines and in line with Open Awards' quality assurance processes. Please see our website for more information.

Provider Staff Requirements

Providers are responsible for ensuring that their staff are occupationally competent and have access to appropriate training and support. They are also responsible for promptly notifying Open Awards of staff changes.

To deliver our Functional Skills qualifications, Open Awards expect that you have appropriate staff in place to fulfil the following essential roles:

- Tutor/ teacher
- Internal Quality Assurer
- Invigilator
- Assessment administrator

These roles must be covered by a minimum of 2 separate individuals to avoid potential or actual conflicts of interest. For more information, please see our Conflicts of Interest Policy available on the Portal.

In addition, it is Open Awards expectation that staff at providers meet the following minimum requirement:

- Tutors have relevant teaching experience and/or a qualification, and experience and/or a qualification in the relevant subject area, as a minimum at a level above that being taught
- For the role of the administrator, providers must ensure that the confidentiality and security of assessments is maintained at all times.

Administration includes initial receipt of confidential materials, secure storage, movement and preparation of materials for scheduled assessments, and registration, secure storage and return of materials to the awarding organisation after scheduled assessments are completed.

No tutor of a Functional Skills qualification can be involved in the invigilation or administration of the assessment materials for Level One (1) and Two (2) assessments in that subject, regardless of the level they teach. Nobody with a vested interest in the outcome of the assessment may be involved in the administration or invigilation.

For the role of Invigilator, staff will be required to complete Open Awards' online training before the first assessment, with a refresher annually.

External Assessment

Assessment of Level 1 Functional Skills in Mathematics is through an externally set and marked assessment, comprising of a calculator and non-calculator section. This assessment can be completed on-screen (on-screen and on-demand) or paper-based

Practice assessments are provided in both modes of delivery (on-screen or paper-based), and providers should ensure learners have access to these in advance of sitting their assessment to familiarise themselves with the format. For on-screen assessments, there are additional demonstration questions available via the Portal to enable learners to get used to the different question types and functionality that may appear in their assessments e.g., drawing shapes, graphs and on-screen protractors.

Providers must ensure that assessments are carried out in controlled conditions to minimise the potential for plagiarism and to ensure security of the assessment materials. In order to ensure these conditions are enforced, external assessments must be delivered in accordance with our policy, Instructions for Conducting Controlled Assessments or Instructions for Conducting Controlled Assessments Remotely, available on the Portal.

Open Awards permits remote invigilation of Functional Skills assessments. Providers must apply in advance of the first assessment via the Portal if they intend to administer assessments remotely. Open Awards also provides a remote invigilation service. Open Awards invigilated assessments can be scheduled via the XAMS assessment platform by choosing this option from the drop-down. Prices associated with utilising Open Awards' invigilators are published in our Pricing Information on the Open Awards website.

Invigilator reports must be completed for every assessment and retained in line with Open Awards' Instructions for Conducting Controlled Assessments (Remotely) and made available to Open Awards external quality assurance team on request. Invigilators are responsible for ensuring that learners do not have access to calculators for Part A of the scheduled assessment, and that, for paper-based assessments, all Part A scripts are returned before issuing Part B.

Providers must ensure that there are no conflicts of interest between the invigilator and learners by checking in advance of the assessment. The invigilator(s) must not be a Functional Skills tutor for the same subject the learner, or group of learners, is undertaking the assessment for. The only exception to this is where it is required as a reasonable adjustment for a learner with specific support needs. In this case, a request for a reasonable adjustment should be made to Open Awards in advance of the assessment.

Once completed, paper-based external assessments must be returned to Open Awards by Tracked and Signed 24 hours postage service. This includes any scripts that were not attempted due to learner absence. For full guidance on returning completed and blank scripts, please refer to the instructions provided to providers with the assessment papers.

Storing Confidential Materials

Question papers and any other confidential material must be stored securely at the provider's registered address in a safe and secure lockable cupboard/cabinet with restricted access in a secure locked room. The contents of all materials must be treated as strictly confidential and should not be shared with anyone other than those taking or administering the assessment. Copies may not be issued to anyone, including teaching staff. Open Awards must be notified immediately if any known or suspected infringement of these conditions takes place by calling 0151 494 2072 or emailing quality@openawards.org.uk. Should the provider be found responsible for compromising the security of the assessment then we will invoke our Sanctions Policy and the provider may be charged for redevelopment costs.

External Quality Assurance

Providers are allocated a Quality and Standards Advisor (QASA) who will lead the external quality assurance activities.

External quality assurance includes, but is not limited to, the following activity:

- Observations of live assessments
- Annual Functional Skills Risk Rating Review
- Quality compliance visits/activity
- Unannounced visits and spot checks
- Checks of policies and procedures
- Feedback from staff and learners

Provider monitoring will:

- ensure the Provider is taking all reasonable steps to prevent the occurrence of malpractice or maladministration
- confirm that invigilation is conducted by appropriately experienced individuals and subject to internal monitoring

Open Awards adopts a risk-based approach for monitoring all approved Providers, which identifies and justifies the number and frequency of external quality assurance monitoring visits required based on the Provider's performance. The risk-based sampling approach adopted uses a RAG rating matrix and is utilised across the delivery of Functional Skills.

Provider Monitoring

Providers delivering Functional Skills Maths at Levels One (1) and Two (2) will receive, as a minimum, an annual review of their Functional Skills Risk Rating.. This will include a check of policies, procedures and controls for ensuring the provider undertakes the delivery, invigilation and administration of assessments in line with guidance and policies provided.

Providers are required to schedule all assessments to enable Open Awards to complete observations of on-screen and online assessments, unannounced visits and spot checks.

Further guidance on training and support is available, please speak to your Open Awards' Quality and Standards Advisor.

Unannounced and Short-notice Visits

Open Awards operates a system of unannounced and short-notice visits to ensure that providers are complying with the rules set out within this specification and associated policies, around the delivery of assessments. These visits ensure ongoing confidence in the qualification as well as maintaining and improving quality and standards. Such checks will create the opportunity to comment on good practice and to identify areas for improvement.

Guidance on unannounced and short-notice visits is available via the Portal.

Training and support

Guidance and support to providers is available as part of the regular external quality assurance monitoring visit, as well as provided throughout the year via training sessions, workshops and networking events.

Open Awards offers a variety of training and support to Providers. Our online training and support is free of charge and can be accessed on the following link https://oalearn.org.uk/shop. An everlasting coupon (PLUC code) will be issued to each Provider to gain free access to these resources.

External Marking and Results

All external assessments are marked by qualified Open Awards markers.

Standardisation and marker checks are carried out regularly to ensure quality of marking. This includes second-marking and sampling by a Lead Marker in line with Open Awards sampling policy.

Following completion of the marking process, learners' results will be available to the provider through the XAMS assessment platform.

Results for on-screen assessments will be available within a maximum of 10 working days from the date the assessment was taken and within 32 working days for paper-based assessments.

For newly released assessment versions, the maximum time a provider/ learner will wait for results to be issued is 32 working days. This additional time is to allow for the awarding process where specific pass marks are set for each assessment version.

For mathematics assessments, learners will receive a feedback report on their performance against the subject content that was assessed. This is available for providers to download via the results screen in the XAMS assessment platform.

Resits

Learners are permitted to resit an external assessment where they are issued a fail result. Resit charges will apply.

Providers are responsible for preparing their learners for the assessment and should ensure that the approach to resits is appropriate. Learners should be discouraged from repeated resits and be provided with further teaching and learning to support successful achievement of the qualifications where learners have not passed the assessment.

Learners can be scheduled for a resit in the XAMS platform within the standard timeframes, provided the necessary further learning has taken place. This is to ensure that learners receive further teaching and learning and that they are fully prepared for the resit.

Please note, providers should not re-schedule an assessment until results have been received and it is confirmed that a learner has failed an assessment attempt.

If a learner has had three (3) attempts and not yet passed, please contact us on 0151 494 2072 or quality@openawards.org.uk to discuss this with the Quality Assurance team before scheduling a fourth attempt.

Enquiries and Appeals

Providers and learners have the right to appeal against the results issued. Providers must ensure that learners are made aware of this.

There are three stages of appeal depending on the nature of the decision at each stage:

- Enquiry (Stage 1)
- Appeal (Stage 2)
- Independent Appeals Review (Stage 3)

Each stage must be completed before progressing to the next stage. More information can be found in Open Awards Policy for Enquiries and Appeals found on our website.

Open Awards offers training and standardisation events that are held throughout the year. Such events will also provide an opportunity to identify and share best practice. Up to date details of training and standardisation events can be found on our website.

Reasonable Adjustments and Special Considerations

Open Awards is committed to ensuring the rights of individual learners to access qualifications, units and assessments in a way most appropriate for their individual needs and to enable them to demonstrate their achievements. At the same time, we are committed to ensuring that the integrity of our qualifications, units and assessment is maintained at all times.

Open Awards encourages Providers to adopt, at all times, inclusive assessment processes that adhere to disability and equal opportunity legislation and other regulatory criteria without compromising standards of assessment or giving any unfair advantage over other learners. We ensure that our Providers consider a variety of suitable assessment methods as good practice, taking into consideration its learners. In cases where a qualification is inaccessible because of a learner's inability to demonstrate competence in all units of the qualification, credit will be awarded for all units for which competence has been demonstrated.

Open Awards treats all records of reasonable adjustments and special consideration requests and agreements in confidence. Different types of assessment make different demands on learners and will influence whether reasonable adjustments will be needed with the kind of suitable reasonable adjustments which may be put in place.

The adjustments that are appropriate for a particular assessment will depend upon:

- the specific assessment demands for the qualification/unit
- the type of assessment
- the particular needs and circumstances of the individual learner.

In situations where the learner is given set assessment materials and must complete the task in a fixed amount of time, there may be a greater need for adjustments to standard assessment arrangements in order to give access. In such instances, Providers must obtain approval from Open Awards before the assessment is planned to take place.

Open Awards' policy for reasonable adjustments and special considerations can be found on our website here.

Malpractice, Maladministration and Incident Management

Open Awards is committed to ensuring access to fair assessment for all learners and to protecting the integrity of the award of credit and qualifications. Our policy and procedures define malpractice and maladministration, clarifies the roles and responsibilities of Providers, learners and Open Awards, and outlines the procedures that will be followed when there are issues of suspected malpractice or maladministration within a Provider.

The purpose of the policy is to ensure that:

- potential malpractice and maladministration is identified, prevented, corrected and/or mitigated
- any event that could lead to an Adverse Effect is identified, prevented, corrected and/or mitigated.

The full Policy and Procedure can be found on our website here.

Open Awards Level 1 Functional Skills Qualification in Mathematics Setting Specification

Learning aims and outcomes	Scope of Study	Task Coverage	Problem solving	Underpinning skills	Task details	Assessment structure and timings
Demonstrate mathematical skills to solve realistic problems of increasing complexity through reasoning and decision making. **Familiarise self with concepts and problems that apply to life and work.** **Understand the role played by mathematics in the world of work and in life generally.**	1. Read, write, order and compare large numbers (up to one million) 2. Recognise and use positive and negative numbers 3. Multiply and divide whole numbers and decimals by 10, 100, 1000 4. Use multiplication facts and make connections with division facts 5. Use simple formulae expressed in words for one or two-step operations 6. Calculate the squares of one-digit and two-digit numbers 7. Follow the order of precedence of operators 8. Read, write, order and compare common fractions and mixed numbers 9. Find fractions of whole number quantities or measurements 10. Read, write, order and compare decimals up to three decimal places 11. Add, subtract, multiply and divide decimals up to two decimal places 12. Approximate by rounding to a whole number or to one or two decimal places 13. Read, write, order and compare percentages in whole numbers 14. Calculate percentages of quantities, including simple percentage increases and decreases by 5% and multiples thereof 15. Estimate answers to calculations using fractions and decimals 16. Recognise and calculate equivalences between common fractions, percentages and decimals 17. Work with simple ratio and direct proportions 18. Calculate simple interest in multiples of 5% on amounts of money 19. Calculate discounts in multiples of 5% on amounts of money 20. Convert between units of length, weight, capacity, money and time, in the same system 21. Recognise and make use of simple scales on maps and drawings 22. Calculate the area and perimeter of simple shapes including those that are made up of a combination of rectangles 23. Calculate the volumes of cubes and cuboids 24. Draw 2-D shapes and demonstrate an understanding of line symmetry and knowledge of the relative size of angles 25. Interpret plans, elevations and nets of simple 3-D shapes 26. Use angles when describing position and direction, and measure angles in degrees 27. Represent discrete data in tables, diagrams and charts including pie charts, bar charts and line graphs 28. Group discrete data and represent grouped data graphically 29. Find the mean and range of a set of quantities 30. Understand probability on a scale from 0 (impossible) to 1 (certain) and use probabilities to compare the likelihood of events 31. Use equally likely outcomes to find the probabilities of simple events and express them as fractions	**Task 1** Sample of SoS	9 marks	6 marks	No calculator permitted/ online calculator disabled	Section A 30 minutes
		Task 2 Sample of SoS	12 marks	3 marks	Non-scientific calculator allowed/ enabled	Section B 1 hour and 30 minutes
		Task 3 Sample of SoS	12 marks	3 marks	Non-scientific calculator allowed/ enabled	
		Task 4 Sample of SoS	12 marks	3 marks	Non-scientific calculator allowed/ enabled
