TQUK Functional Skills Qualification in Maths at Level 2

Examination Past Paper 1

Please complete the details below using black or blue ink. Use BLOCK CAPITALS.

Learner Name: _____

Learner Number: _____

Date: _____

Centre Name: _____

Instructions:

- Read each question **carefully**
- Answer **all** questions
- Write your answers **clearly** in the spaces provided
- **Check** your answers.

Information:

- This examination has **two** sections. These are clearly labelled
- You are **not allowed** to use a calculator for Section A
- You **are allowed** to use a basic calculator for Section B
- The **maximum** mark for this examination is 60
- The marks available for each question are shown in **bold** beneath each question.

Exam paper

OFFICIAL MFS MODEL SOLUTION · BENCHMARK EXEMPLARY PASS

60 / 60 Marks (100% Pass · Full Marks)

- Assessment: Past Paper 1 (Section A Non-Calculator & Section B Calculator)
- Complete stepped calculations, methods & mark scheme codes [M1/A1]
- Exam Board: TQUK (Training Qualifications UK · Ofqual Regulated)
- Pass standard: 34 / 60 marks (Achieved: 60 / 60 marks)

Verified by Tutor Abdul (Senior Assessor) · MasterFunctionalSkills.co.uk

Section A	15		
Section B	45		
Total marks	60		

MASTER FUNCTIONAL SKILLS

ONLINE LEARNING PLATFORM & ACCREDITED COURSES

Pearson Edexcel & Open Awards Accredited Suite · Entry 3, Level 1 & Level 2

Pass Your Functional Skills Exams With Confidence

100% Pass Guarantee | Dyslexia-Friendly Learning | 1-to-1 Expert Tutor Support

Master Functional Skills provides an adaptive, dyslexia-friendly online learning platform tailored for adult learners, apprentices, and NHS healthcare staff. Everything you need to revise, practice, and pass is at your fingertips.

1. Smart Diagnostic Initial Assessment

Calculate your exact working level and pinpoint knowledge gaps instantly

- **Exact Grade Calculation:** Adaptive assessments calculate your exact level across all topics.
- **Personalised Study Pathway:** Skip what you know; focus 100% on the topics needed to pass.
- **Real-Time Exam Readiness:** Predictive tracker confirms when you are 100% ready to book.

2. Comprehensive Video Lessons & Worked Solutions

Bite-sized visual explainers covering every single Maths & English curriculum standard

- **Step-by-Step Video Lessons:** Master percentages, algebra, perimeter, ratio, and reverse fractions.
- **Multi-Ink Handwriting Models:** Visual 3-colour methods showing working, carries, and examiner tips.
- **Tutor Shortcuts & Golden Rules:** Proven non-calculator mental arithmetic hacks and BIDMAS tricks.

3. Full Mock Exams & Real-Time Performance Analytics

Practice in exam conditions and watch your scores and confidence climb

- **Authentic Exam Papers:** Timed Section A & Section B papers formatted exactly like Pearson Edexcel.
- **Instant Topic Breakdown:** View percentage scores across Number, Measure/Shape, and Data.
- **Historical Score Tracking:** Monitor past attempts to ensure continuous improvement before exam day.

Ready to Master Your Functional Skills & Pass First Time?

Join thousands of healthcare staff, apprentices, and adult learners across the UK.

Instant 24/7 access on desktop, tablet, and mobile with no software to install.

Section A: Non-calculator

There are **15 marks** available in this section.
You must **not** use a calculator in this section.
You will have **30 minutes** to complete this section.

1. Work out 205 983 + 826 148

Step 1: Align digits by place value (vertical column addition):

205 983 + 826 148 = 1 032 131

Answer	1 032 131 ✓ [1 mark]

[1]

2. Work out 2.5 × 3.462

Step 1: Multiply whole numbers: 25 × 3462 = 86 550

Step 2: Place 4 decimal places (1 + 3 = 4): 8.6550 --> 8.655

Answer	8.655 ✓ [1 mark]

[1]

Past paper

Questions continue on the following page

3. Charlie buys a length of wood equal to 3.6 metres (m).

Charlie cuts off a length of 1.125 metres (m).

Work out how much wood Charlie has left.

Give your answer in metres (m).

Step 1: Pad decimals to equal places: 3.600 m - 1.125 m

3.600 - 1.125 = 2.475 m [M1]

Answer	2.475 ✓ [A1]	**m**

[2]

4. Work out $7^2 + 6 \times 5$

Step 1: BIDMAS - Powers and Roots first: $7^2 = 49$

Step 2: Multiplication before addition: 6 × 5 = 30 [M1]

Step 3: Add evaluated terms: 49 + 30 = 79

Answer	79 ✓ [A1]

[2]

Past paper

5. Harper wants to go on holiday.

Harper finds two offers for the same holiday on different websites:

Website A	**Website B**
38% off	$\frac{3}{8}$ off

Which offer gives the bigger discount?

Show how you decide.

Step 1: Convert fraction to percentage: 3/8 = 3 ÷ 8 = 0.375 = 37.5%

Step 2: Compare discounts: Website A = 38%, Website B = 37.5% [M1]

38% > 37.5%, so Website A gives the bigger discount.

Answer	Website A (38% > 3 ✓ [A1]

6. 60 people attend a dancing school.

The classes each person attends are shown below:

	Morning	Afternoon
Ballet	28	15
Tap	12	5

One person is chosen at random.

What is the probability that the person chosen attends the morning ballet class?

Give your answer as a fraction in its simplest form.

Step 1: Identify favorable attendees: Morning Ballet = 28

Unsimplified probability: P = 28 / 60 [M1]

Step 2: Simplify fraction by dividing by 4: 28÷4 / 60÷4 = 7 / 15

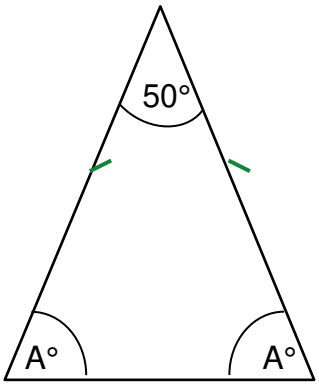

Answer	7 / 15 ✓ [A1]

[2]

Past paper

7. Work out the value of A shown in this triangle:

Not drawn to scale

Step 1: Triangle is isosceles, so both base angles equal A°

Step 2: Total angles in triangle = 180°

Sum of base angles: 180° − 50° = 130° [M1]

Step 3: Divide equally: A = 130° ÷ 2 = 65°

Answer	65 ✓ [A1]	°

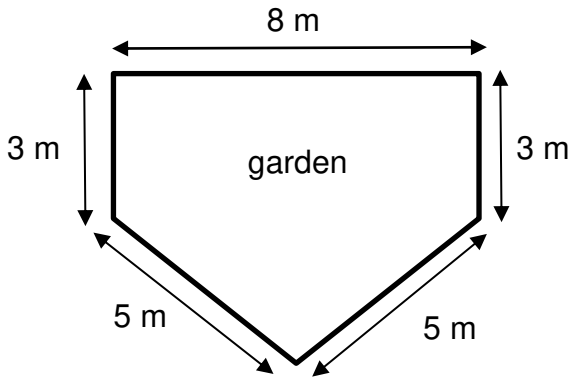

[2]

8. Drew wants to put a fence around a garden.

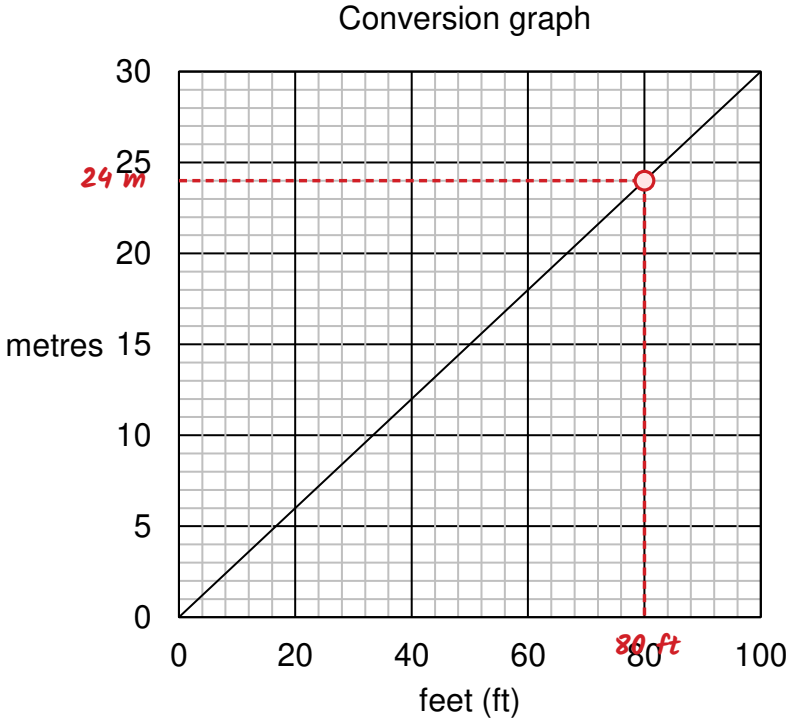

Not drawn to scale

Drew knows the fence panels are sold in feet (ft).

How many feet (ft) of fence panelling does Drew need in total?

Use this conversion graph:

Step 1: Calculate garden perimeter: 8 + 3 + 5 + 5 + 3 = 24 m [M1]

Step 2: Read conversion graph at 24 m (see dashed red projection lines):

24 m = 80 feet (ft) [M1]

Answer	80 ✓ [A1]	ft

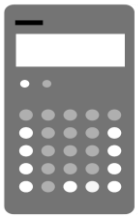

[3]

End of Section A.

Section B begins on Page 8.

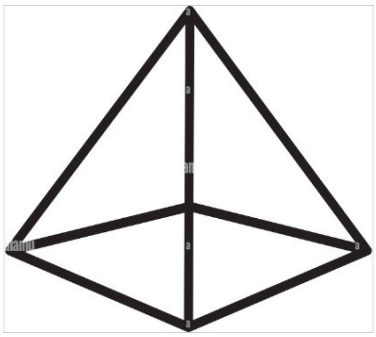

© Training Qualifications UK 2023 All Rights Reserved

Section B: Calculator

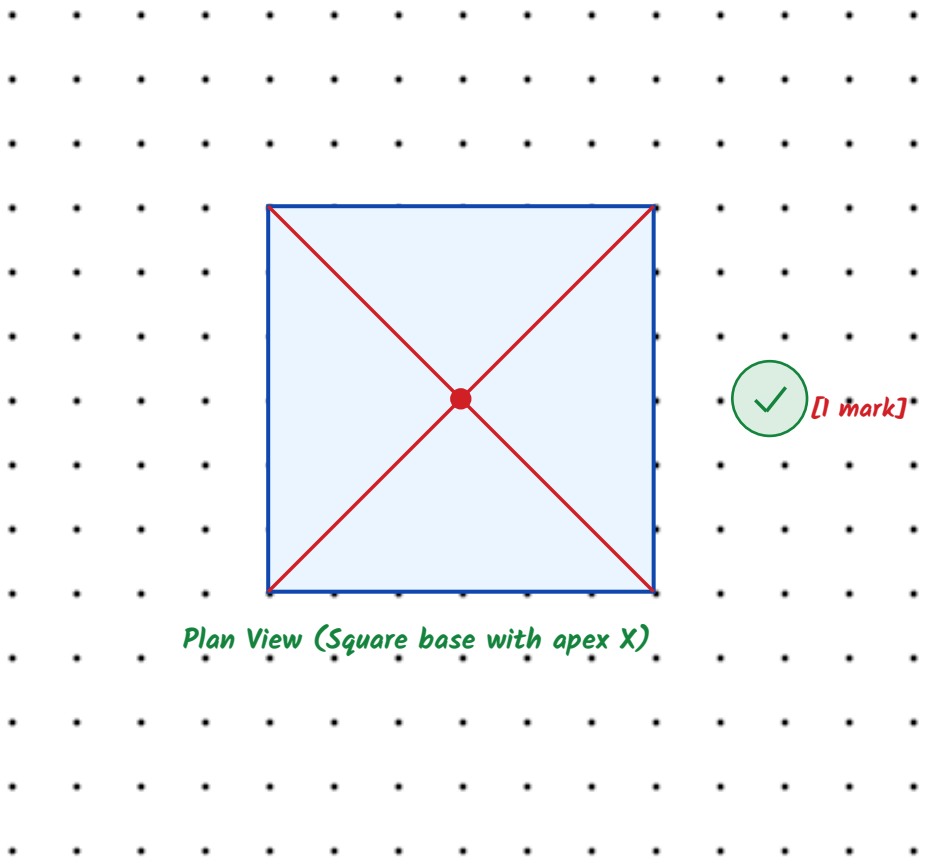

There are **45 marks** available in this section.
You **can** use a basic calculator in this section.
You will have **90 minutes** to complete this section.

1. The diagram shows a square-based pyramid:

Draw the plan view of the square-based pyramid on this grid:

[1]

Paper

2. Write three billion in numbers.

Answer	3 000 000 000 ✓ [1 mark]

[1]

3. Lee wants to buy a new computer for £1390

If Lee uses a payment plan, the price of the computer increases by 12.5%

How much money will Lee pay in total for the computer using the payment plan?

Step 1: Calculate 12.5% price increase: £1390 × 0.125 = £173.75 [M1]

Step 2: Add increase to base cost: £1390 + £173.75 = £1563.75

(Or direct multiplier: £1390 × 1.125 = £1563.75)

Answer	£ 1563.75 ✓ [A1]

[2]

Past paper

Questions continue on the following page

4. Put these fractions in order starting with the lowest:

$\frac{6}{7}$ $\frac{6}{5}$ $\frac{8}{7}$ $\frac{36}{35}$

Show any working:

Step 1: Convert to common denominator (35):

6/7 = 30/35, 36/35 = 36/35, 8/7 = 40/35, 6/5 = 42/35 [M1]

Answer	6/7, 36/35,	8/7, 6/5 ✓	[1 mark]	
	Lowest	→		**Highest**

[2]

5. 140 people were asked if they could speak a second language.

126 people said yes.

What percentage of the total number of people said yes?

Step 1: Calculate fraction: 126 ÷ 140 = 0.9

Step 2: Convert to percentage: 0.9 × 100 = 90% [M1]

Answer	90 ✓ [A1]	**%**

[2]

Past paper

6. Harrison needs their new house to be painted within 8 days.

3 painters will take 5 days to paint the house.

Unfortunately, one painter is unavailable.

Will 2 painters be able to paint the house in time?

Show how you decide.

Step 1: Total workload = 3 painters × 5 days = 15 painter-days

Step 2: Time for 2 painters = 15 ÷ 2 = 7.5 days [M1]

7.5 days < 8 days, so 2 painters can finish in time.

Answer	Yes (7.5 days < 8 da ✓ [A1]

[2]

7. Some friends are planning a hike.

The total distance of the hike is 105 kilometres (km).

The hiking route is divided into Sections A, B and C in the ratio 3 : 7 : 11

One friend thinks that Section B is 40 kilometres (km) longer than Section A.

Is this correct?

Show how you decide.

Step 1: Total parts = 3 + 7 + 11 = 21 parts

Step 2: 1 part = 105 km ÷ 21 = 5 km per part [M1]

Section A = 3 × 5 = 15 km | Section B = 7 × 5 = 35 km [M1]

Difference: 35 km - 15 km = 20 km (not 40 km).

Answer	No (diff is 20 k ✓ [A1]

[3]

Questions continue on the following page

Past paper

© Training Qualifications UK 2023 All Rights Reserved

8. Jude drives 136 kilometres (km) to visit a friend.

The drive takes 2.25 hours.

Jude thinks the average speed was less than 60.5 kilometres per hour (kph).

Is Jude correct?

Show how you decide.

Step 1: Speed formula: Average speed = Distance ÷ Time

Speed = 136 km ÷ 2.25 h = 60.444... km/h [M1]

60.44 km/h < 60.5 km/h, so Jude is correct.

Answer	Yes (60.44 < 60.5) [A1]

[3]

9. Sam needs 2.5 pounds (lbs) of flour to do some baking.

The shop sells flour in kilogram (kg) bags.

Sam buys a 2-kilogram bag of flour.

How much flour will Sam have left over?

Use 1 lb = 0.454 kg

Step 1: Convert flour needed to kg: 2.5 × 0.454 = 1.135 kg [M1]

Step 2: Flour left over = 2 kg − 1.135 kg = 0.865 kg [M1]

Answer	0.865 kg [A1]

[3]

Past paper

10. Kai gets paid a net amount of £1418.50 each month.

29% is deducted from Kai's gross pay before they are paid the net amount.

Kai wants to check the gross amount before the 29% was deducted.

Kai rounds the net amount to the nearest £10 and uses the rounded value to check the gross amount.

What answer should Kai get?

Show your working.

Step 1: Round net amount £1418.50 to nearest £10 --> £1420 [M1]

Step 2: 29% deducted means net pay = 100% - 29% = 71% (0.71)

Step 3: Gross pay = £1420 ÷ 0.71 = £2000 [M1]

Answer	£2000 ✓ [A1]

[3]

11. Maddison uses this water bottle whilst at the gym.

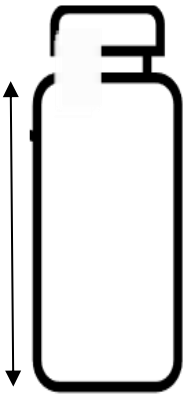

The bottle is in the shape of a cylinder with internal dimensions:

- Radius = 4 cm
- Height = 22 cm

Maddison's personal trainer recommends a new water bottle that holds 8% more water.

What size water bottle should Maddison buy?

Use $\pi = 3.14$

Not drawn to scale

Height h = 22 cm

Radius r = 4 cm

Step 1: Volume of cylinder formula: $V = \pi \times r^2 \times h$

$V = 3.14 \times 4^2 \times 22 = 3.14 \times 16 \times 22 = 1105.28\ cm^3$ [M1]

Step 2: Recommended bottle holds 8% more water:

$V_{new} = 1105.28 \times 1.08 = 1193.7024\ cm^3$ [M1]

Answer	1193.7 ✓ [A1]	cm^3

12. Two years ago, Nicky paid £8000 into a new savings account.

The savings account paid 4% compound interest per year.

Nicky sees this car for sale:

Car for sale
£12 975

All the money in the savings account will be used as a deposit towards the car.

The balance will be paid in 20 equal monthly instalments.

How much will each monthly instalment be?

Step 1: Calculate 4% compound interest over 2 years:

Year 1: £8000 × 1.04 = £8320 | Year 2: £8320 × 1.04 = £8652.80 [M1]

Step 2: Remaining balance = £12 975 − £8652.80 = £4322.20 [M1]

Step 3: 20 monthly instalments: £4322.20 ÷ 20 = £216.11

Answer	£216.11 [A1]

[4]

13. Riley grows apples and oranges.

The weights of the apples collected on Monday are shown below:

173 grams	151 grams	182 grams	248 grams	214 grams

The weights of the oranges collected on Monday are summarised below:

Oranges weights	
Mean weight	188 grams
Range	112

Riley claims:

a) 'On average the weight of the apples is greater than the weight of the oranges.'

b) 'The weights of the apples are more consistent.'

Are each of Riley's claims correct?

Give reasons for your answers.

Show your working.

Show working here:

- Mean of apples = (173 + 151 + 182 + 248 + 214) ÷ 5 = 968 ÷ 5 = 193.6 g [M1]
- Range of apples = 248 g − 151 g = 97 g [M1]

Reason - claim a)

Yes, claim a) is correct. [A1]

Mean of apples (193.6 g) is greater than oranges (188 g).

Reason - claim b)

Yes, claim b) is correct. [A1]

Range of apples (97 g) is lower than oranges (112 g), showing greater consistency.

[4]

Past paper

14. Taylor is going to Finland for six months and wants to know the average monthly temperature.

Taylor finds this information:

Month	November	December	January	February	March	April
Average temperature °F	32	29	28	30	35	46

Taylor uses this formula to convert the median temperature from degrees Fahrenheit (°F) to degrees Celsius (°C):

$$C = \frac{5(F-32)}{9}$$

Where C = temperature in Celsius (°C)
F = temperature in Fahrenheit (°F)

Taylor thinks the median monthly temperature is colder than –1°C.

Is Taylor correct?

Show how you decide.

Step 1: Put monthly temperatures in order to find median (°F):

28, 29, 30, 32, 35, 46 --> Median = (30 + 32) ÷ 2 [M1] 31°F

Step 2: Substitute median F = 31 into formula: C = 5(F - 32) ÷ 9

C = 5 x (31 - 32) ÷ 9 = 5 x (-1) ÷ 9 = -5/9 = -0.56°C [M1]

Step 3: Compare with -1°C: -0.56°C is warmer than -1°C (-0.56 > -1)

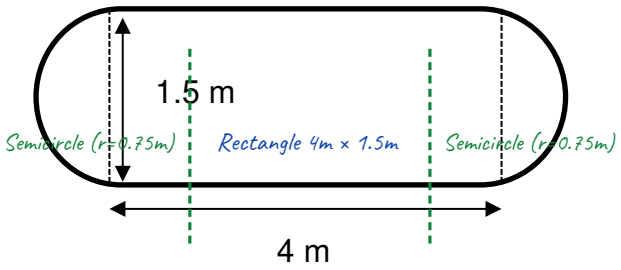

Answer	No (-0.56°C > -1°C) ✓ [A1]

[5]

Questions continue on the following page

© Training Qualifications UK 2023 All Rights Reserved

15. Alex has a table in the shape of a rectangle with a semicircle on each end.

Not drawn to scale

Alex wants to cover the surface of the table in fabric and finds these prices online:

Fabric Price per square metre						
£3.75	£2.99	£3.75	£4.00	£5.25	£4.99	£5.75

Alex uses the modal price to estimate how much it will cost to cover the surface in fabric.

How much does Alex estimate the fabric will cost?

Give your answer to the nearest whole pound (£).

Use π = 3.14

Step 1: Area of middle rectangle = 4 m × 1.5 m = 6 m² [M1]

Step 2: Two semicircles combine to form 1 circle (r = 1.5 ÷ 2 = 0.75 m):

Area of circle = pi × r² = 3.14 × 0.75² = 1.76625 m² [M1]

Step 3: Total surface area = 6 + 1.76625 = 7.76625 m² [A1]

Step 4: Identify modal fabric price from table: Mode = £3.75 per m² [B1]

Step 5: Total cost = 7.76625 m² × £3.75 = £29.123... [M1]

Step 6: Round to nearest whole pound (£): £29.12 --> £29

Answer	£29 ✓ [A1]
